iv. Bake sale just ended… You missed out!!

3. Maddy & Allison's outreach program
    a. Da da da DAH!
    b. Girl Code 101:

    This program is a new initiative that aims to increase the number of females in the computing sciences and engineering fields by providing events that familiarize, motivate, and develop interest in coding for young girls. By introducing girls to technology related fields, Girl Code 101 provides them with an insight into the world of applied sciences with the hope that they will consider pursuing these fields. The second part is to motivate girls to take initiative and research on their own to gain additional knowledge that will help them find their program of interest. Lastly, Girl Code 101 aims to see girls with some curiosity or potential to develop further interest in the subject and pursue it as their future career.

4. Hackathon
    a. Post-event email:
        1. Event feedback survey
            a. And write this
        2. Congrats to winners
