The Grammar–Pragmatics Interface

Essays in honor of Jeanette K. Gundel

Edited by Nancy Hedberg and Ron Zacharski

Simon Fraser University / University of Mary Washington

This collection of papers celebrates the work of Jeanette K. Gundel, who has contributed to the field of the grammar-pragmatics interface through her publications on the syntactic realization of topic and comment and the cognitive status of referring expressions, as well as by inspiring colleagues to make contributions to the overall field of pragmatics. This volume collects together papers from colleagues and former students on pragmatics and syntax, pragmatics and reference, and pragmatics and social variables. The volume includes papers devoted to explicating the grammar-pragmatics interface, with the focus of the papers ranging from Gricean and post-Gricean pragmatics, construction grammar, and genre theory to formal semantics, as well as papers devoted to expanding on Gundel's own original approach to factors such as the cognitive status decisions underlying speakers' choice of referring expression and the topic and focus decisions underlying speakers' choice of syntactic construction.
