

The Canadian Genomics Enterprise would like to invite you to attend the following webinar:

Technology Platforms to Support Your Omics Research

Genome Canada's technology platforms provide researchers within Canada and internationally with access to leading-edge technologies used in genomics, metabolomics, proteomics, and other related areas of research.

They also assist researchers in the development of research proposals by providing advice on appropriate technologies, study design, data analysis and bioinformatics that improve the quality of the research. The following platforms will be presenting during the webinar:

- Centre for Advanced Proteomics Analyses
- Canadian Data Integration Centre
- McGill University and G enome Qu ebec Innovation Centre
- Canadian Centre for Computational Genomics
- The Centre for Applied Genomics
- Network Biology Collaborative Centre
- Toronto Centre for Phenogenomics
- The Metabolomics Innovation Centre
- Sequencing Platform at the BC Cancer Agency Genome Sciences Centre
- The Proteomics Centre

The purpose of the webinar will be to provide researchers in the omics community, and in particular applicants developing projects for funding through Genome Canada, exposure to the unique and specific service offerings provide by the platforms. Representatives from each platform will speak to their platform's service provision model, mechanism for engagement, and general contact information.

WHEN: Tuesday, June 20th from 12:00 PM (EDT) / 9:00 AM (PDT) – 2:00 PM (EDT) / 11:00 AM (PDT)

As registration spots will be limited, please register for the webinar in advance through the following link:

<https://attendee.gotowebinar.com/register/519552612535396865>

If possible, we kindly request that colleagues and teams in close proximity share a single registration to ensure everyone has the opportunity to attend.
