- AAC Osteoarthritis Models of Care Workshop
- AAC Inflammatory Arthritis Models of Care Workshop for Early Career Rheumatologists

The burden of arthritis is on the rise and will continue to strain and potentially cripple the health system's ability to provide timely care to patients.

We can do better together! Join Canada's leading arthritis experts working to address these challenges as we:

- Learn why it is important to invest in arthritis models of care (MoC); a look into an economic evaluation of the cost consequences of implementing MoCs
- Share "how to" implement evidenced based best practices, shared care models and practical clinical tools to optimize the delivery of osteoarthritis and inflammatory arthritis care!

The Arthritis Alliance of Canada (AAC), formed in 2002, is committed to fostering improvements in arthritis prevention and care across Canada. Our current membership includes professional organizations and associations, patient/consumer groups, academic groups, government agencies and industry partners. Please visit www.arthritisalliance.ca for more details.
