Instructions for Authors

Submit manuscript and cover letter (MSWord files or PDF) as e-mail attachments to editorialpost@gmail.com

NPBM Editorial Office: Nutrition Research Lab., Simon Fraser University, Kin-9625 Sciences, 8888 University Drive, Burnaby, BC, V5A 1S6, Canada, Tel: +1-778-782-4251 (see note at bottom of page regarding editorial office correspondence)

An anonymous review (double-blind) process is typically used; do not include author names in manuscript. The title page with author names and affiliations, and any acknowledgements, should be included with cover letter.

Authors should attach only two files to their e-mail submission: (1) the manuscript and all figures/tables, without title page or other author identification, (2) the cover letter, with a title page attached. The cover letter itself should also be pasted into the body of the e-mail message along with the abstract. Typically, the manuscript is not modified before being submitted to peer-reviewers.

Manuscript categories:
(1) Rapid communications, reports of extraordinary importance (priority in terms of peer-review process)
(2) Full-length articles, typically 4-9 pages in final, publication format (excluding references)
(3) Brief reports, typically 2-3 pages (excluding references) in final, publication format; these reports can include complete studies, preliminary reports of major interest, hypotheses, case reports, presentation of novel phytochemicals or ethnobotanical data, novel research methods or mathematical/computer models.
(4) Research Review articles, typically 3-6 pages in final, publication format (excluding references).

Notes, Annotated Images, Book reviews, Commentary, and Pedagogical articles are also considered.

Cover letter: Include (a) manuscript category, (b) full manuscript title, (c) short, running title, (d) names of all authors, (e) brief statement on the importance of the manuscript to the field including reference, if applicable, to previous work by the author(s), (f) optional, list of up to 3 potential referees, include e-mails and institution names (referees to be excluded may also be mentioned), and (g) the following statements regarding the submitted work:

(i) the work, or any part of it, is not submitted, under review, or accepted for publication elsewhere, (ii) no copyright material will be part of the publication, (iii) the author(s) agree(s) to pay the publication charges if the manuscript is accepted, and (iv) if accepted for publication, all authors agree to transfer copyright to the publisher.

Any discrepancies related to these points must be explained in the cover letter. Written permission from the copyright owner(s) must be provided for copyright material (cf. iii above) upon submission of the work to Nutr. Phytochem. Biol. Med.

Manuscript: Include all figures and figure legends in one MSWord manuscript file, not separate files. The manuscript should be double-spaced, 11pt ‘Times New Roman’ font (figure/table legends & references: 10pt), and have margins of 2.8 cm or 1.1 inch. Indent all paragraphs except those immediately after a heading. All manuscript pages should have a header containing the short, running title and page numbers (no author names). FIRST PAGE Should contain the title of the manuscript at the top (no author names) followed by a summary of less than 200 words, a list of up to six key words, and the total manuscript word count and number of pages. The summary should include the major findings of the research; avoid stating ‘will be discussed’ in the summary. INTRODUCTION Typically contains background information that places the current study in context and provides an indication of the need for, or importance of, the study. (Some of the following sections may not be applicable to all report types.) METHODS Provides a detailed description of procedures and materials that were used in the study, and any applicable statistics. RESULTS Provides a detailed description of results; Brief Reports and Rapid Communications may have a combined ‘RESULTS and DISCUSSION’ section. DISCUSSION Provides a discussion of all results and their relevance to the field of study and, typically, also relates them to the introductory information. AUTHOR DECLARATIONS All actual or potential conflicts of interest must be mentioned; if there is none, state “Author(s) declare(s) no conflicts of interest.” Include also statement that “Author(s) assume(s) full responsibility for all writing, revisions, and content of the paper”. REFERENCES Authors must ensure accuracy of all references. Two reference formats (A or B below) are acceptable. Authors must select one of two (note that ‘et al.’ is used if there are more than six authors):
Instructions for Authors

(A) References numbered sequentially in square brackets, e.g., “…as previously described [1,9]” and listed in the REFERENCES section as follows (single-spaced, 10pt Times New Roman font, separated by one space):

(B) References by author name(s), e.g., “…as previously described (Valdez et al. 2001; Smith and Jones 1999)” and listed in the REFERENCES section alphabetically as follows (single-spaced, 10pt Times New Roman font, separated by one space):

TABLES and FIGURES These should have a maximum length of 18 cm and a maximum width of 16 cm; preferred figure size: 6 X 7 cm (l x w). All Figures and Tables should be mentioned in the main text sections and not only in the legends. A title and description should be present at the top of each table, single-spaced, in bold 10 pt Times New Roman font. Figures should be of high graphic quality. Figure legends should be written single-spaced in a textbox below each figure using bold 10 pt Times New Roman font. Avoid figures with multiple parts (e.g. 1A, 1B, 1C); use separate figure numbers instead.

Fees: There is no fee for submitting a manuscript. To maintain its independent operation, Nutr. Phytochem. Biol. Med. relies on modest charges for accepted manuscripts. Any authors who are unable to pay these fees can apply for a fee exemption or reduction. Current charges are 40 CAD (or equivalent in USD/£/€/¥) per page for reports/articles up to 6 publication-format pages including references (a publication page is roughly equivalent to 2.5 double-spaced manuscript pages or about 600-700 words without figures or tables); any additional pages, and all Rapid communications pages, are charged twice the above amounts per page. Authors should keep manuscripts as succinct as possible.

Additional notes: Typically, within 5 days of manuscript submission, the corresponding author should receive a manuscript number from the editorial office. The office strives to respond to all submissions; but in some cases (e.g. large volume of submissions, or manuscripts not prepared according to instructions) there may be no response or a delayed response. To allow authors to submit the manuscript elsewhere as soon as possible, authors are free to submit it elsewhere after 5 days without response from Nutr. Phytochem. Biol. Med. The editorial office does not return any materials that have been submitted by the author(s). Editorial decisions to reject a manuscript before peer-review are final and cannot be contested. It is advisable to check with editorial office before submitting manuscripts that are not part of categories 1-4 above. Reference examples above are only for the purpose of illustrating format. Typically, articles are published online (PDF) upon final acceptance. Authors may post their paper on a personal website if a statement such as the following example is included: “This is an author version of an article published in Nutrients and Phytochemicals in Biology and Medicine 2009, 9:27–33. Copyright © NPBM Publishing. Nutr. Phytochem. Biol. Med. online: http://www.sfu.ca/archiv/npbm” The publisher reserves the right to publish any one part or all parts of an article online and in print, or remove any one part or all parts of an article from its webpage at any time.
