COURSE PREREQUISITES
BISC 101 and 102

COURSE DESCRIPTIONS
The biology, taxonomy, and evolution of vertebrates are reviewed. Organ systems and functions of principal adaptations are studied through comparative anatomy. Characteristics of fish, amphibians, reptiles, birds and mammals are examined to understand how vertebrates cope in different environments. Representative species are dissected and the anatomy and function of organ systems are examined in laboratory sessions.

Lectures begin September 4, 2013
Laboratory sessions begin in week of September 9, 2013.
