Nido means nest or home in many languages. Nido de Montessori believes in creating space for children to feel at home in our nest of learning. Nido means belonging to a loving, engaged, diverse community of lifelong learners. Our approach to Early Childhood Education is inspired by Montessori and Inquiry Based Learning. We deeply believe that learning should be fun, engaging and meaningful. We are currently hiring passionate, professional, loving teachers for our 3-5 year old classroom.

What Sets Us Apart?
We celebrate the diversity of our team and see the cornucopia of backgrounds, education and experiences as a strength. Integral to our beliefs is the commitment to ongoing learning and development. The culture at Nido reflects a Growth Mindset, and we encourage and support our team in their ongoing personal and professional development. This includes in-house professional development, as well as funding to attend conferences and workshops.

Nido’s 3 to 5 Year Old Program
Our robust environment is bursting with opportunities for children to develop their independence, confidence and critical thinking skills. Children engage with our hands-on curriculum as researchers, with opportunities for them to feel empowered throughout their learning. Our focus is on the process of learning; wonder, curiosity and the generation of ideas and hypotheses lead children to investigate, evaluate and co-construct their understanding of the world as they simultaneously develop their collaboration and problem solving skills.

What do we offer?
