AV services available to faculty include AV equipment for your classroom, lecture recording services for your classes, and video conferencing.

Maillists are primarily used by faculty for instructional, administrative or research-related purposes. The Courselist option automatically includes all SFU email addresses for students registered in a specified course and is updated automatically every evening so no manual updates are required.

Canvas is the primary online learning platform at SFU, available from any desktop or mobile device. SFU Canvas is an open source version running in the SFU Data Centre.

The goSFU Student Information System manages student records, enrollment information, class and exam schedules, and final grades. For instructors, the goSFU Faculty Centre provides class rosters, and is where one submits final grades.

An open-source learning management system used for a number of Chemistry, Math and Statistics courses.

Computing ID
Your SFU Computing ID is assigned automatically and provides you with access to most online services at SFU. Use your computing ID to log in SFU Mail for email and calendaring, the goSFU Student Information System, your payroll information, e-learning systems such as Canvas, campus labs, online Library services, and a variety of other services.

Email

SFU Mail
SFU Mail is the University’s integrated email and calendaring system.

Maillists
Maillists are primarily used by faculty for instructional, administrative or research-related purposes. The Courselist option automatically includes all SFU email addresses for students registered in a specified course and is updated automatically every evening so no manual updates are required.

Wireless

SFUNET-SECURE
The preferred wireless network at SFU.

eduroam
Access wireless at cooperating universities in Canada, Asia, Europe, and the United States without needing a guest account.

SFUNET
Offers basic connectivity and is not secure.

Storage

SFU Vault
A cloud storage service for faculty, staff and students with an individual space quota of 50 GB. Files can be accessed from both desktop or mobile device.

Teaching & Learning

Canvas
Canvas is the primary online learning platform at SFU, available from any desktop or mobile device. SFU Canvas is an open source version running in the SFU Data Centre.

LON-CAPA
An open-source learning management system used for a number of Chemistry, Math and Statistics courses.

goSFU
