Welcome to Simon Fraser University (SFU), and congratulations in joining the SFU research community! SFU is one of the fastest growing and most innovative universities in the country and among Canada’s top research-intensive universities. We are consistently ranked among the top 15 in Canada by major global and national ranking systems (learn more about SFU’s Research Performance). SFU researchers are committed to disseminating knowledge and harnessing new ideas and innovations for the benefit of society.

The Office of the Vice-President, Research and International (VPRI) serves to encourage, facilitate, administer and promote research at SFU—nationally and internationally. We advocate and support university research, while guiding policy development at academic and government levels. SFU’s VPRI portfolio has several departments, services and initiatives that will help you launch a successful and fulfilling research program at the university. Just some of the services we can support you with are: submitting grants and contracts; undertaking research involving human participants; competing for prestigious grants, prizes and awards; intellectual property protection and technology licensing; accelerating science and technology-based ventures; providing animal care resources; library and knowledge mobilization resources; sustainability initiatives; and mobilizing global reach of teaching, research and community engagement. Please learn more about how we can support you and how to get in touch with the various VPRI departments by visiting sfu.ca/research/departments. We also have a contact directory on our website that will be useful for you to find specific VPRI staff members.

Research at SFU spans eight faculties covering a broad range of fundamental, interdisciplinary and applied research topics, as outlined in our Strategic Research Plan (SRP). Our faculty members collaborate with researchers across Canada and in more than 125 countries around the world—we are the second ranked Canadian University for International Outlook. As Canada’s Engaged University, we guide and support SFU researchers as they translate their discoveries into real-world impact.

If we can be of any further assistance, please contact the Office of the Vice-President, Research and International. I wish you the very best for a successful start to your research career at Simon Fraser University.

Sincerely,

Dugan O’Neil, PhD
Vice-President, Research and International
Professor, Faculty of Science
Simon Fraser University
