Strand Hall construction update

WHAT TO EXPECT - SEPTEMBER 13-27

Entrances/Exits
- The North and West doors on level 2000 will be closed until the end of October and can only be accessed in the event of an emergency
- Access to the AQ is available on level 1000

Washrooms
- Level 1000 is open
- Level 2000 and 3000 washrooms are currently closed

Noise
- Work happening on the exterior of the building may be louder than usual over the next two weeks

Odor
- You may experience odors from the resurfacing work happening outside

Is the building safe during construction?
Yes, strict measures, mandated by WorkSafe BC, are being taken during the removal of asbestos in the building to ensure the health and safety of workers, staff and students. Daily air collection samples are taken to confirm the work is being done in a safe and effective manner.

ABOUT THE STRAND HALL PROJECT
Originally constructed in 1971, Strand Hall is an ageing building receiving much-needed upgrades.

Project Timelines
- November 2019 - Work will be completed on the outside of the building
- Summer 2020 - Work happening inside will be completed
What upgrades and improvements are being made?

- Offices, workstations and meeting rooms are being renovated and include new ergonomic workstations
- All washrooms will be upgraded and new showers will be added
- New heating and airflow systems will bring greater comfort and prevent inconsistent heating and cooling
- Improvements to building power and technology will increase efficiency
- Seismic upgrades, security improvements, and a sprinkler system will enhance safety
