ISSUES IN WOMEN'S HEALTH AND HEALTH CARE

In this course we will focus on the health care concerns of women and the medical institutes that provide health care services. Topics include anatomy and physiology, birth control, venereal disease, breast cancer, sexuality, abortion, rape, menopause, Canadian educational institutes and Canadian hospitals and drug companies.

Assignments: An in-class exam will count for 30% of the final grade, tutorial participation for 30% of the final grade and an individual project for 40% of the final grade.

Required Reading:
Women and the Crisis in Sex Hormones, Barbara Seaman, 1977

The following books will be required if they are available in paperback. If they are not, copies will be on reserve in the library and selections from the books will be required:

The Hidden Malpractice, Gena Corea, 1978
Menopause: A Positive Approach, Rosetta Reitz, 1977

Lecture: Tuesday 6:30 - 8:20
Tutorial 01 4:30 - 5:20
Tutorial 02 8:30 - 9:20
