Casual Web Developer/Programmer

Job Description

Overview

The Terry Fox Humanitarian Award Program was established in 1982 in honour of Terry Fox, Canada’s most recognized hero. Since its inception, the Program’s mission has been to provide scholarships to encourage young Canadians to seek the high ideals that Terry Fox exemplified, through the pursuit of higher education.

We are looking for a new Web Developer/Programmer to maintain and develop our in-house scholarship administration system. This position will work closely with the Executive Director to plan and execute new projects and streamline the application, student, & alumni management process. The position will work remotely and/or on-site at our office located at Simon Fraser University.

Our ideal candidate has at least 2 years of experience with front and backend web development in languages & technologies such as PHP, MySQL, HTML, CSS, Javascript and/or Python either in professional, academic or project based capacity. As someone with a strong interest in software development, the candidate may also hold experience using Git, Linux server management as well as general IT knowledge. Individuals with a true desire to learn and have an impact on one of Canada’s most prestigious scholarship awards would succeed in this position. As this job is being offered on a part-time casual basis (approximately 10-20 hrs per month), we encourage full time students to apply.

Responsibilities

- Understand company’s vision, goals and strategy. Actively contribute to the achievement of the goals and execution of the company’s strategy.
- Provide general technical support and insight as required.
- Research new features, analyze requirements, estimate implementation; program software; code reviews; document solutions.
- Communicate technical ideas to non-technical staff.
- Consistently write clean, readable code with repeatable high-quality results.
- Willingness to explore new technologies and perform other miscellaneous technical tasks.

Skills & Qualifications

- 2 years of experience with front & backend web development.
- Strong knowledge of PHP frameworks such as Laravel.
- Good eye for design with experience working on front end user interfaces.
- Familiar and comfortable using Linux based systems.
- Knowledge of version control systems such as Git and continuous integrations such as Jenkins.
- Experience in working in and adhering to short, agile, iterative development cycles.
- Results-oriented with the ability to consistently meet deadlines.
• Ability to take ownership of assigned projects and to work with little supervision.
• A true team player with great communication and interpersonal skills.
• Experience with general Information Technology or networking is an asset.
• Excellent written and spoken English.

We welcome qualified applications via email to help@terryfoxawards.ca, please send your resume and cover letter, Attn: Web Developer / Programmer in the subject line. We look forward to hearing from you by November 30th.

While we sincerely thank all applicants in advance for your interest, only successful applicants will be contacted.
