Are you curious about ‘Scientist-Entrepreneur’ as a possible career? Wondering what it takes to start a successful company and commercialize scientific research? Entrepreneurship 101: Science Startups is an informal conversation with a panel of experienced founders who will discuss how their interest in science led them to become entrepreneurs.

Panelists include:

**Oliver Buck**  Founder, *ITM Isotope Technologies Munich GmbH*

**Christopher J. Campbell**  Entrepreneur

**Austin Lee**  (SFU PhD Candidate, est.2016)  CTO, *Shield Diagnostics*

**David Vocadlo**  (PhD)  Chief Science Officer, *Alectos Therapeutics*

**Byron Thom**  VP Systems and General Counsel, *Optigo Networks*

Presented by SFU Venture Connection and SFU Faculty of Science

March 20th
