Notes:

- a) Qualifying Student -- A student working either to improve cumulative grade point averages in order to meet the minimum University requirement, or to make up deficiencies in their backgrounds to satisfy the Graduate Program Committee in their area of interest. A student may be recommended for admission as a Qualifying Student when it is expected that the admission requirements for a Masters or a Doctoral program can be met though the satisfactory completion of no more than 30 semester hours of specified courses.
- b) Special Student -- At the graduate level, a special student is a person who has at least a Bachelors degree, or the equivalent, who wishes to take specified courses but is not seeking a degree from SFU.
- c) Exchange Student -- Bona fide graduate students at other universities who wish to take courses at SFU, not leading to a degree at this University.
- d) Totals may not add due to rounding. A student pursuing a credential in more than one program is split between the programs.
