ENGAGING STUDENTS.
ENGAGING RESEARCH.
ENGAGING COMMUNITIES.
SURREY CAMPUS
SIMON FRASER UNIVERSITY'S
SFU
Welcome

Simon Fraser University’s Surrey campus is a 342,000-square-foot architectural masterpiece, located at Central City in Surrey. The building, designed by acclaimed architect Bing Thom, has won numerous national and international awards.

Located in one of Canada’s largest and fastest growing cities, SFU Surrey is adjacent to the Surrey Central SkyTrain station and transit bus loop, putting SFU students just minutes away from the resources available at SFU’s Burnaby and Vancouver campuses, and conveniently connecting them to the Metro Vancouver and Fraser Valley communities.

Our stunning Surrey campus epitomizes SFU’s commitment to being the leading ‘engaged university.’ Innovative education programs, cutting-edge research, dynamic community connections, and a supportive student environment combine to create a vibrant culture for discovery, learning and dialogue.

Andrew Petter
SFU’s 9th President and Vice-Chancellor

British Columbia's Next Great Metropolitan Core

Surrey’s City Centre is undergoing a complete revitalization. The result will be the emergence of BC’s next metro centre which will include Surrey city hall, the Fraser Health Authority, and Canada’s largest RCMP headquarters. City Centre will also include a flagship library, a community plaza, a premium hotel and residence, and new commercial and residential developments together with award-winning Central City, a large-scale urban park, recreational facilities and outstanding skytrain and transit access. SFU is one of the anchors to this innovation and rejuvenation, connecting communities and minds in bold and fearless pursuits.

Mayor Dianne Watts
City of Surrey
Virtual experience spells pain relief
Studies underway in Professor Diane Gromals’ pain studies lab are testing whether those in chronic pain may get more relief from being fully immersed in a virtual experience – such as a walk through the park or flying over changing landscapes – than taking pain medication. Her Virtual Reality lab is the only lab of its kind.

SFM for green auto technology
Erik Kyung and a team from SFU’s Mechatronic Systems Engineering program is working with Ballard Power Systems and Future Vehicle Technologies (FVT) Inc. to develop new technologies for hybrid electric vehicles and fuel cells with nearly $5 million in federal funding. Collaborative clean energy initiatives are also underway in India and with the City of Surrey.

Diagnosing brain trauma
Considered one of the world’s leading neuroscientists, Professor Ryan DyArcy is at work developing new health research collaborations at SFU Surrey. DyArcy, who also helps to lead Fraser Health’s health sciences and innovation, will advance medical technologies research alongside medical practitioners at Surrey Memorial Hospital.

Fusion Kitchen fuels connection
SFU’s Bridge School of Business undergrad Chantelle Buffle and SFU Communication student Sonam Swarup cooked up an idea to help immigrant women land jobs while showcasing their cultural cuisines. Fusion Kitchen helps develop the skill sets, work experience and self-confidence of recent female immigrants through teaching ethnic cooking classes. The project was selected as one of three university winners in a new province-wide community engagement competition, BC Idea.

Friends of Simon boosts local literacy
Initiated by SFU’s Faculty of Education, Friends of Simon trained more than 80 SFU undergraduates as tutors to provide literacy support for over 250 youths at 14 schools and community agencies in Burnaby, Coquitlam and Surrey. The program has recently expanded into high schools through support from Rogers Youth Fund.

BC-India partnership increases student mobility
Over 50 students have participated in work terms in India over the past 2 years as part of the BC-India Mobility Initiative, a project funded by the Federal Government, members of the SFU India Advisory Council, and SFU. SFU is the first western Canadian academic institution accepted into a prestigious international global partners program developed by Bangalore-based tech-giant Infosys – where two School of Interactive Arts and Technology graduate students will travel to carry out digital media research.

Planned Initiatives:
• Tutoring services for immigrant and refugee children
• Interactive games camps, summer camps, and Science Alive programs for youth
• Literature readings and outreach
• Financial literacy workshops and consulting services
• Post-secondary education transition programs
• Career assessment and management services for adults
• Community-focused volunteerism

Build a Better Community
Community engagement has been an essential activity at SFU Surrey since the campus was established in 2002. During our first ten years we have been an integral part of a transforming Surrey and the South Fraser community together with The City of Surrey, the provincial and federal governments, the Surrey School District, the Surrey business improvement association, the community-at-large, and SFU staff, faculty and students.

We invite you to build a better community with us at www.sfu.ca/surrey/engage.
Programs at a Glance

EXPERIENTIAL LEARNING & SUPPORT

For over 40 years SFU Continuing Studies has provided learning opportunities and services to thousands of British Columbians and students from across North America and the world. We work with industry experts within and beyond the University to establish learning partnerships locally, provincially, nationally, and internationally.

Join us — and open yourself to the possibilities.

CO-OP FOR EVERY PROGRAM

No matter what program you enroll in, co-operative education can provide you with the opportunity to combine paid, practical work experience in a field that is directly related to your area of study. You can gain valuable work experience with small, medium and large organizations in BC, Canada, and around the world before graduating. You will be able to alternate work and study terms which will allow you to combine the knowledge you acquire in the classroom with invaluable work experience.

Often, grad are later hired by employers or contacts they met as a result of their co-op experiences, making co-op one of the most important investments you can make in your future. Check out “SFU co-op” on YouTube to see the opportunities you could experience: www.youtube.com/showil

A DIFFERENT TYPE OF LIBRARY

The Fraser Valley Real Estate Board Academic Library at SFU Surrey provides access to a unique facility combining library, student learning commons, gaming and equipment services. We have a screening room and gaming library; PC, Mac, and laptop computers; and group and silent-study rooms. Our collections include more than 25,000 books, journals, DVDs and games; digital camcorders, projectors and other equipment; access via delivery to the 2.5 million titles at the other SFU libraries; and web access to over 4 million online books, journals, databases and images.

FOR MORE INFORMATION: www.lib.sfu.ca/surrey

STUDENT LEARNING COMMONS

The You’lve Work Student Learning Commons is an academic learning centre providing friendly and knowledgeable assistance with a wide range of academic topics and skills.

Learn how to write a successful term paper, read and take notes for university, manage your busy schedule, study more effectively for your exams, and get one-on-one help with writing, math, or course software.

FOR MORE INFORMATION: http://learningcommons.sfu.ca

EXCHANGES

Study internationally and earn credit towards your SFU degree. The SFU Exchange Program allows you to study at one of SFU’s partner institutions for one or two terms while paying SFU tuition. With over 140 partner institutions in more than 45 countries there are opportunities for everyone.
