The Field Programs area of the Faculty of Education works with partner organizations to design innovative inservice programs, which engage educators in focused, sustained reflective inquiry into classroom practice. Its Graduate Diploma programs, incorporating this philosophy and consisting of at least 30 credits of coursework over two years in a specific theme, are designed in collaboration with local school districts and are offered at off-campus sites on a cohort basis. Programs are usually offered in BC school districts.

Applications are invited for Sessional Instructors for the following Summer 2016 Special Topics courses in current Graduate Diploma programs:
