SFU FACULTY OF ARTS AND SOCIAL SCIENCES

2020/21 FASS GUIDE TO FIRST YEAR COURSE SELECTION

START

www.sfu.ca/fass/firstyear
WELCOME to SFU and the Faculty of Arts and Social Sciences (FASS), SFU’s largest and most diverse faculty.

In FASS, you have the freedom to explore a rich menu of options and opportunities. Look forward to encountering inspirational professors who will open doors to ideas, insights and ways for you to make meaning in your world.

In your first year at SFU for 2020/21, we recommend you take some time to develop a well-grounded plan for your Fall 2020 courses before registration begins July 6.

For the Fall 2020 term, most teaching and learning is remote. A decision for the Spring 2021 term will be made in late summer.

This Guide is designed specifically to help you find an intellectual home at the university and connect with faculty, other students, advisors and mentors. It offers a friendly, supportive and exciting introduction to FASS.

Q: How do I begin?
A: Your first step is to complete University Prep, Step 2. After you have completed University Prep, your next step is to look at this FASS Guide. Download our worksheet (page 7). Look at the Guide to Foundations in the Majors (page 8) and Guide to Course Clusters (page 11) and create a list of 4–6 likely course prospects for Fall. Think ahead for Spring and Summer, but there will be opportunities to change your plan, depending on your first term experiences.

At SFU, enrollment opens about two months before the beginning of the next term — in July for Fall and in November for Spring. It’s always a good idea to plan ahead, but also leave yourself some flexibility to change your mind, or in case popular courses fill up.
Q: If I have already done SFU’s University Prep, what do I really need from this Guide?
A: Skip directly to the Guide to Foundations in the Majors and Guide to Course Clusters to help with your course selection, and start filling in the FASS Course Planning Worksheet to prepare for July 6.

Getting Started with this FASS Guide
- Start your thinking about your first year with the Guide to Foundations in the Majors (page 8, which outlines the introductory course requirements of each major in FASS).
- Next, take a look at our Guide to Course Clusters (page 11), a curated list of courses grouped by themes.
- Once you have looked at the options, use our suggested FASS Course Planning Worksheet (page 7) to map out some of the options that sound exciting. Feeling a little unsure? We have advisors in the wings waiting to hear from you (page 6).

The FASS Course Planning Worksheet, together with the information in University Prep, will help you construct your course cart in MySchedule — www.sfu.ca/students/enrollment/myschedule.html

What is your Academic Goal? (And it’s okay to change your mind later)
When you applied to SFU and to FASS, you were asked what subject you were interested in as a major. In fact, not all students choose one major. Some choose a major and a minor, a double major, or two minors and/or a certificate. As well, many students change their minds because of inspirational teachers or big ideas that they encountered in classes that they may have originally thought were their electives — and that is perfectly normal. Allow yourself to explore, learn and discover.

Consult University Prep for information on the types of credentials that are available. We also provide a useful list: www.sfu.ca/fass/students/current-students/undergraduate-students/plan-your-program/programs-available.html

Or watch this welcome video: www.youtube.com/watch?v=qjCkD_WtuF8

In your first year, it is important to sample broadly and build a well-balanced course portfolio. Watch for the breadth course designation to tell you that a course offered by a department is designed to open up questions which are common to a wide range of disciplines or academic subject areas. In most cases you do not have to worry about any prerequisites, with the exception of Criminology students, who should look for the recommended course prerequisites in the Course Calendar.

CHECKLIST: I HAVE AN INTENDED MAJOR

☐ Get to know your intended department

Study your intended department’s website and advice to students if you have not already done so. Department faculty members will explain why they think studying their subject area is important in the universe of ideas, and what they are researching. You will usually also find testimonials from grads, and ideas about related job possibilities.

Take a look at the faculty member biographies. They tell you how these scholars began like you did, and ended up as experts in their field. What do they research? What do they study? This investigative work helps you begin to identify what courses may interest you.

☐ Take the required/recommended foundational course(s)

This guide sets out for each department and discipline (or area of study) clear expectations of the order and number of courses you require.

See the FASS Guide to Foundations in the Majors for the required courses in your first year. These requirements provide you with a foundational survey of the field, and are purposefully ordered. Most departments suggest between one and two courses each term from their discipline. In some cases, they even suggest sequences. For example, Criminology strongly recommends that students take PSYC 100/102 and SA 150 in their first year, and that they have the PSYC courses before taking CRIM 103, and the SA 150 course prior to taking CRIM 104. Check their website to be sure. Some departments have major maps, sample course plans or helpful course checklists.

☐ Decide which electives interest you

Now add at least two courses from a different discipline. You may choose to:
☐ Take an introductory survey course from another discipline
☐ Choose a complementary course from the FASS Guide to Course Clusters.

☐ Find out more about a course

If you find too many courses sound interesting — and we hope you do — you need to figure out how to find a tie breaker. Sometimes a short calendar description is not enough to decide about a course. So do a little investigation about the content. First, try consulting the department website for further information about the course content and or instructor assigned. Or try googling the course number and title on the SFU website to turn up old course outlines. Ask your advisor for input or a friend about their experience.

☐ Decide your course load

FASS considers a “normal” load to be three or four courses in the first term. Depending on your circumstances, you may want to consider fewer or more courses. We recommend you speak with your Advisor (see page 6) to figure out the right number for you.

In the right column on this page, write down your top four picks, and plan to have at least one or two in reserve in case courses fill up.

Now review your picks in a day or two and see if you still like them. Try to ensure you pick at least one W intensive course if you can as soon as you can. This course will introduce you to the craft of academic writing, which you will continue to hone throughout your time at SFU. You may also think about taking a course in another Faculty.
CHECKLIST: I AM UNDECIDED AND EXPLORING MAJORS

☐ Start with the FASS Guide to Course Clusters

Not sure what field you want to major in? No problem. We have specially curated courses by grouping them in shared themes. There are two ways to ensure you have sufficient diversity in introductions to fields of inquiry in the humanities and social sciences.

☐ Can you find a course cluster of interest? Choose one that you think will build on a course you particularly enjoyed in high school.

☐ In the right column on this page put down at least one of the recommended courses for Fall term from the FASS Guide to Course Clusters. Take note of the departmental acronym for the course — this will tell you its disciplinary home.

☐ Add a foundational course from another discipline

Now add at least two courses from a different discipline. You have a few choices:

☐ Take a foundational survey course from another discipline with a different acronym as set out in the FASS Guide to Foundations in the Majors to the discipline; or

☐ Choose a second course from the same FASS theme clusters which is complementary; or

☐ Choose a second course from a different FASS theme cluster.

☐ Find out more about a course

If you find too many courses sound interesting — and we hope you do — you need to figure out how to find a tie breaker. Sometimes a short calendar description is not enough to decide about a course. So do a little investigation about the content. First, try consulting the department website for further information about the course content and instructor assigned. Or try googling the course number and title on the SFU website to turn up old course outlines. Ask your advisor for input or a friend about their experience.

☐ Find out more about the departments you’ve chosen

We always recommend you study the department offering a course on the website and its advice to students if you have not already done so. Department faculty members will explain why they think studying their subject area is important in the universe of ideas, what their degree learning goals are, and usually you will find some testimonial from grads, and idea about related job possibilities. While you are at it, why not take a look at the faculty member biographies themselves? This tells you how these scholars began like you did, and ended up as experts in their field. What do they research? What do they study? This investigative work helps you begin to identify what courses may interest you and a potential department major.

☐ Decide your course load

FASS considers a “normal” load to be three or four courses in the first term. Depending on your circumstances, you may want to consider fewer or more courses. We recommend you speak with your Advisor (see page 6) to figure out the right number for you.

In the right column on this page, highlight your top four picks, but plan to have at least one or two in reserve in case courses fill up.

Review your picks in a day or two and see if you still like them. Try to ensure you pick at least one W intensive course as soon as you can. This course will introduce you to the craft of academic writing, which you will continue to hone throughout your time at SFU.

NEED HELP? WANT AN ADVISOR TO REVIEW IT?

You have access to a great team of advisors who are ready to coach you or to provide some help. Many are graduates of the Arts and Social Sciences themselves.

☐ Check your email for a message from your Academic Advisor and contact them. Or connect with them here: www.sfu.ca/students/academicadvising/contact.html
☐ If you are using your first year to explore your many options try here: www.sfu.ca/fass/advising

Q: What do I do if my advisor recommends an approach not covered in this Guide?
A: Under COVID-19, departments may have to pivot their courses due to instructor availability. Advisors may be more up to date on actual courses available. Or consult your department course availability on their website. Advisors can also look at your record, and recommend a personalized course selection, or ways to maximize success, ensuring you are ready for “heavier” required courses, or realistically judging your capacity for workload. Your advisor's personalized advice will always be more accurate than this guide. When the Fall term starts, we recommend that you reach out to talk to your instructors, or to the Undergraduate Chair of a Department you are interested in, to ask for their advice about courses they may recommend after the ones you have taken. We are all here to help.

Next Steps
Now that you have a plan for Fall, you are ready for goSFU. You will be receiving instructions soon. See advice for new students here: www.sfu.ca/students/newundergrads/after-you-accept/fall/enrollment.html

☐ The enrollment process is described here: www.sfu.ca/students/enrollment/enroll.html
☐ SFU’s MyPlanner videos are here: www.sfu.ca/students/advising-resources/help-videos/myplanner.html
☐ To supplement this FASS Guide, you want to learn how to search the whole calendar correctly, looking for other courses on your worksheet. See: www.sfu.ca/students/advising-resources/help-videos/search-browse.html

Plan Ahead
By now you’ll have the hang of it. Use your worksheet to help plan ahead for Spring or even Summer term 2021, using a similar approach to map out 30 units. Registration for Spring is usually conducted in November.

Ideally, at the end of your first year, you will have a thorough grounding in the arts, humanities and social sciences.

By the end of your first year, you can start to think about declaring your major or minor. See www.sfu.ca/fass/students/current-students/undergraduate-students/advising-and-resources/declare-your-program.html

Declaring as soon as possible is a good way to protect your standing in the program (fixing the clock on the requirements in the calendar) and becoming eligible for reserves in future courses.

Good luck for 20/21! Feel free to check in with an Advisor part way through the year to update your plan.

FASS GUIDE TO FOUNDATIONS IN THE MAJORS

This guide lists the recommended first year courses for a major in each academic discipline. Courses offered may vary, so check against the calendar each term for each department. Remember, FASS recommends 3–4 courses in your first university term. We are committed to encouraging you to discover and explore in your first year. You can combine a major with another major, a minor or extended minor or even a certificate in another subject. See www.sfu.ca/fass/students/current-students/

Note: While most of these courses are large (100 up) FASS prides itself on a tutorial system where no more than 22 students meet weekly. Tutorials are led by a trained online TA facilitator who is a graduate student in the field.

Anthropology
Recommended first year courses for a major. Note: SA 101 and 150 required.

Fall Term — Both of:
☐ SA 101-4 (B-Soc) Introduction to Anthropology

Economics
Recommended first year courses for a major. Note: It is recommended that students intending to do an Economics major also take MATH 157 in their first term.

Fall Term — One of:
☐ ECON 103 (Q/B-Soc) Principles of Microeconomics
☐ ECON 105 (Q/B-Soc) Principles of Macroeconomics

Spring Term — The other of
☐ ECON 103 (Q/B-Soc) Principles of Microeconomics
☐ ECON 105 (Q/B-Soc) Principles of Macroeconomics

ABBREVIATIONS (WQB)
All undergraduate students entering SFU must complete at least:
☐ 6 units in courses designated Writing (W)
☐ 6 units in courses designated Quantitative (Q)
☐ 18 units in designated Breadth courses distributed among the Humanities (B-Hum), Social Sciences (B-Soc) and Sciences (B-Sci)

W: Writing-intensive course (6 units required)
To graduate with a Bachelor’s degree, you must successfully complete at least two Writing-Intensive (W) courses with a grade of C- or better, one of which must be upper division, within your major, taken at SFU. It is strongly recommended that you take your first W course as early as possible, preferably in the first 30 units.

Q: Quantitative course (6 units required)
FASS introduces Q courses at the 200-level.

B: Breadth course (18 units required)
Where a course can fulfill multiple Breadth requirements, you may choose only one option. It is recommended you get some of your B requirements out of the way in the first 30 units.

FASS GUIDE TO COURSE CLUSTERS

This guide presents your possible elective courses by theme and term (Fall **FA**, Spring **SP**, Summer **SU**). **Note:** Check the course calendar each semester as availability may be subject to change. Where possible, courses are also marked with enrollment limits: Small (‖=up to 50), medium (|=50–100) or large (■=100+) class sizes.

You may choose one or more of your electives from these lists in planning your 20/21 academic year. Remember, nothing replaces either your own quest for exploration (it is okay to choose what you are interested in studying) or your seasoned advisor’s recommendation.
