

FREE PUBLIC PRESENTATION

**Managing for Uncertainty:
Pathogens and Diseases in Pacific Salmon**

December 1, 2011 - 7:00 pm – 9:00 pm

Room 1900, SFU Harbour Centre, 515 West Hastings, Vancouver

Moderated by: Dr. John Pierce, Dean of Environment, Simon Fraser University

Invitation:

A scientists' think tank will convene at Simon Fraser University on November 30th and December 1st to discuss disease and pathogens in Pacific salmon. The Centre for Coastal Science and Management at SFU invites you to join a panel of these scientists who will present their findings. They will address the following questions:

- What pathogens and diseases are impacting wild Pacific salmon populations?
- What do we know, what do we not know, and what do we need to know right now?
- What should we consider in terms of interacting stressors, cumulative impacts and diseases?
- How do we manage for uncertainty and the protection of wild salmon?

Reservations:

Reservations are recommended as seating is limited. To reserve a seat, please visit www.sfu.ca/reserve
