

Molecular Biology and Biochemistry Spring 2019 Seminar Series

January 18

Hosted by:
Dr. Esther
Verheyen

Lucas Sullivan

Fred Hutchinson Cancer Research Center
Metabolic Constraints of Cell Proliferation

March 8

External Review

January 25

Hosted by:
Dr. Steve Jones

William Gibson

Department of Medical Genetics, the
University of British Columbia
*Doctor...Who? The Curse of the Clinical
Geneticist*

March 15

Hosted by:
Dr. Peter Unrau

Wade Winkler

Department of Cell Biology and
Molecular Genetics, University of
Maryland
*Discovery of antitermination mechanisms
in bacteria*

February 1

Hosted by:
Dr. Jamie Scott

Michael Gallo

Innovate Targeting Solutions Inc.
*V(D)J Recombination Mediated In Vitro
Protein Engineering*

March 22

Hosted by:
Jonathan Choy

Yajaira Suarez

Comparative Medicine, Yale University
*Macrophage miR-21, Yin Yang in Cancer
and Atherosclerosis*

February 8

Hosted by:
Dr. Lisa Craig

Ankur Dalia

Department of Biology, Indiana
Univeristy
*Molecular dissection of natural
transformation and exploiting it as a
genetic tool to study Vibrio species.*

March 29

Hosted by:
TBA

TBA

February 15

Interview week

April 5

Hosted by:
Dr. Dipankar Sen

Sachdev Sidhu

The Donnelly Centre, University of
Toronto
*From Systems Biology to Systems
Biologics*

February 22

Interview week

April 12

Hosted by:
Dr. Dipankar Sen

Charlie Boone

The Donnelly Centre, University of
Toronto
*Global Mapping of Genetics Networks in
Yeast and Human Cells*

March 1

Hosted by:
Dr. Edgar Young

Show-Ling Shyng

Oregon Health & Science University
*Getting up close and personal with KATP
channels: the making and breaking of a
glucose sensing machinery revealed by
cryoEM*

Seminars will be held on Fridays at 10:30AM in SSB7172.

For further information: 778-782-7024, mbbchair@sfu.ca
sfu.ca/mbb

MBB is a certified Green Leaf Office. Refreshments will be provided, but please bring your own mugs.
