

Publications for Barbara Frisken, Professor of Physics

Publications

- D. Lee, I.A. Gutowski, A.E. Bailey, L. Rubatat, J. deBruyn and B.J. Frisken, Investigating the microstructure of a yield-stress fluid by light scattering, *Phys. Rev. E* **83**, 031401 (2011).
- M. Sikor, A. Keyvanloo, J.F. Sabin, M.F. Schneider, J.L. Thewalt, A.E. Bailey, and B.J. Frisken, "The Interaction of a Charged Polymer with Zwitterionic Lipid Vesicles", *Langmuir* **26**, 4095-4102 (2010).
- M.W.E. Tsang, Z. Zhang, A.C.C. Yang, K. Shi, T. Peckham, R. Narimani, B. Frisken, S. Holdcroft, "Nanostructure, Morphology and Properties of Fluorous Copolymers Bearing Ionic Grafts", *Macromolecules* **42**, 9467-9480 (2009).
- M. Adachi, T. Navessin, Z. Xie, B. Frisken, and S. Holdcroft, "Correlation of In Situ and Ex Situ Measurements of Water Permeation Through Nafion NRE211 Proton Exchange Membranes", *J. Electrochem. Soc.* **156**, B782-B790 (2009).
- Y.-W. Hsueh, M.-T. Chen, P.J. Patty, C. Code, J. Cheng, B.J. Frisken, M. Zuckermann, and J. Thewalt, "Ergosterol in POPC membranes: physical properties and comparison with structurally similar sterols", *Biophys. J.* **92**, 1606-1615 (2007).
- J. Gao, Y. Yang, D. Lee, S. Holdcroft and B.J. Frisken, "Self-assembly of latex particles into proton-conducting membranes", *Macromolecules* **39**, 8060-8066 (2006).
- L. Rubatat, Z. Shi, O. Diat, S. Holdcroft and B.J. Frisken, "Structural study of proton-conducting fluoruous block copolymer membranes", *Macromolecules* **39**, 720-730 (2006).
- F.K. Oopong, L. Rubatat, B.J. Frisken, A.E. Bailey, J.R. deBruyn, "Microrheology and structure of a yield-stress polymer gel", *Phys. Rev. E* **73**, 041405 (2006).
- P.J. Patty and B.J. Frisken, "Direct determination of the number-weighted mean radius and polydispersity from dynamic light scattering data", *Appl. Opt.* **45**, 2209-2216 (2006).
- B.J. Frisken, "Revealing the microstructure of polymeric materials using SANS", *Physics in Canada*, 284-288 (2006).
- J. Gao, D. Lee, Y. Yang, S. Holdcroft and B.J. Frisken, "Self-assembly of surface-charged latex nanoparticles: a new route to the creation of continuous channels for ion conduction", *Macromolecules* **38**, 5854-5856 (2005).
- S.G. Taneva, P.J. Patty, B.J. Frisken and R.B. Cornell, "CTP:Phosphocholine Cytidylyltransferase binds anionic phospholipid vesicles in a cross-bridging mode", *Biochem.* **44**, 9382-9393 (2005).
- J. Gao and B.J. Frisken, "Influence of secondary components on the synthesis of self-crosslinked N-isopropylacrylamide microgels", *Langmuir* **21**, 245-251 (2005).
- J. Gao and B.J. Frisken, "The influence of reaction conditions on the synthesis of self-crosslinked N-isopropylacrylamide microgels", *Langmuir* **19**, pp. 5217-5222 (2003).
- P. Patty and B.J. Frisken, "The pressure-dependence of the size of extruded vesicles", *Biophys. J.* **85**, pp. 996-1004 (2003).
- J. Gao and B.J. Frisken, "Cross-linker-free N-isopropylacrylamide gel nanospheres", *Langmuir* **19**, pp. 5212-5216 (2003).
- S. Pautot, B.J. Frisken and D.A. Weitz, "Engineering asymmetric vesicles", *PNAS* **100**, pp. 10718-10721 (2003).
- S. Pautot, B.J. Frisken, and D.A. Weitz, "Production of unilamellar vesicles using an inverted emulsion", *Langmuir* **19**, pp. 2870-2879 (2003).
- S. Pautot, B.J. Frisken, J.-X. Cheng, X.S. Xie and D.A. Weitz, "Spontaneous formation of lipid structures at oil/water/lipid interfaces", *Langmuir* **19**, 10281-10287 (2003).
- B.R. Dasgupta, S.-Y. Tee, J.C. Crocker, B.J. Frisken and D.A. Weitz, "Microrheology of polyethylene oxide using diffusing wave spectroscopy and single scattering", *Phys. Rev. E* **65**, 051505 pp. 1-10 (2002).

Publications for Barbara Frisken, Professor of Physics

- B.J. Frisken, "Revisiting the method of cumulants for analysis of dynamic light scattering data", *Appl. Opt.* **40**, pp. 4087-4091 (2001).
- B.J. Frisken, C. Asman, and P. Patty, "Studies of vesicle extrusion", *Langmuir* **16**, pp. 928-933 (2000).
- D.G. Hunter and B.J. Frisken, Effect of extrusion pressure and lipid concentration on the size and polydispersity of lipid vesicles, *Biophys. J.* **74**, pp. 2996-3002 (1998).
- A.E. Bailey, B.J. Frisken, and D.S. Cannell, Domain growth in the presence of quenched disorder, *Phys. Rev. E* **56**, pp. 3112-3118 (1997).
- B.J. Frisken, D.S. Cannell, M.Y. Lin, and S.K. Sinha, Neutron scattering studies of binary mixtures in silica gels, *Phys. Rev. E* **51**, pp. 5866-5879 (1995).
- A.A. Sonin, A. Yethiraj, J. Bechhoefer, and B.J. Frisken, Temperature-induced orientational transitions in freely suspended nematic films, *Phys. Rev. E* **52**, pp. 6260-6266 (1995).
