Weekly Exercise 3 - Feedback

Marking criteria:
- Submission
- How closely does the output of your spelling bot match the sample output when the user enters a sample input?

Feedback:
- Most of you did awesomely!
- Your program must output exactly what is seen in the sample input/output when the user enters the specific sample input.
- Don’t forget that your spelling bot must solve the problem, i.e., be able to spell any words (including the sample input words).
Weekly Exercise 3 - Possible Solution

- There are a variety of ways (algorithms) to solve this problem
- Here is a possible solution:
