

## **Econ 426 Bibliography**

**September 2021**

This bibliography provides a list of journal articles written by economists on labor-managed firms, worker-owned firms, employee ownership, profit sharing, employee participation in management, and related topics after 2003.

Some of these articles are mainly theoretical, some are mainly empirical, and some make normative arguments about public policy. I do not necessarily agree with the conclusions reached by the authors, and I don't guarantee that all of these articles involve high quality research. Some are very competently done. Others not so much.
