

Workshop

Developing Disaster Management Systems

Hosted

ISCRAM  2012 by:

Sahana Workshop

@ISCRAM2012
April 21, 2012
8:00 - 5:00

A free workshop is offered to ISCRAM members the day before the conference begins. This is an opportunity for students, faculty, and practitioners from the ISCRAM community to be active contributors to humanitarian efforts. This workshop will also demonstrate to faculty how integrating software development into real world disaster management systems provides the ultimate platform upon which to further teach students to develop code, integrating and building upon real world applications building a global workforce. Limit of 30 participants. Attendees should bring a laptop computer with them. No prior experience with Sahana software, knowledge or technical skills are required. Reading book prior is a plus: <http://eden.sahanafoundation.org/wiki/Book>
