

Puzzle 2:

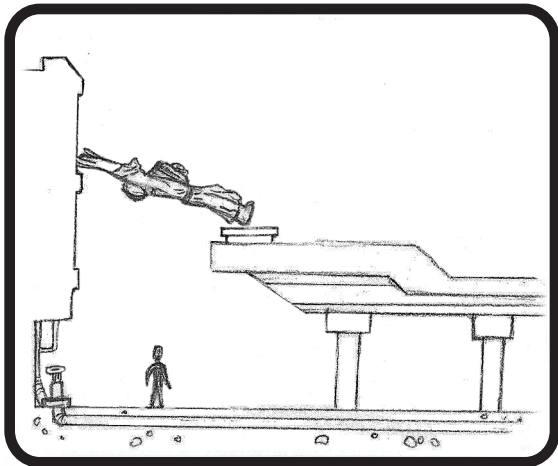

1. In the garden, below the walkways, the player may notice a valve but the way is blocked by rain.

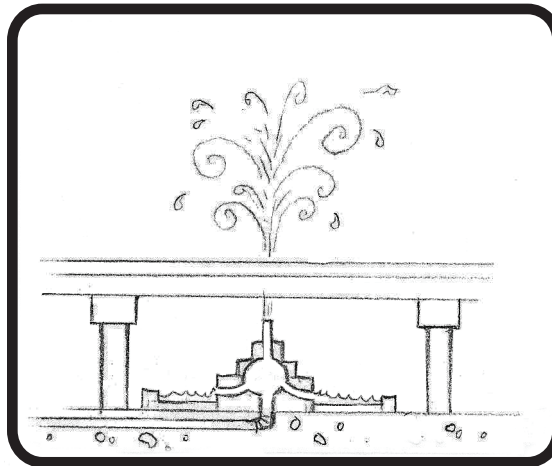

2. Once the player progresses to the walkways, they will eventually discover a statue whose base has been worn away. They can push it over to create a rain cover.

3. The statue falls and blocks the rain. The player is then free to turn the valve by going back down to the ground.

4. Once the valve is turned, the first thing that the player notices is that the rain has stopped.

5. Immediately after the rain stops, a fountain begins to flow in the center of the garden.
