

Puzzle 3:

1. Upon first entering from the lower garden the player cannot proceed past a trench in the center of the room. They may also notice a wine cellar on the ceiling and a barrel in the trench.

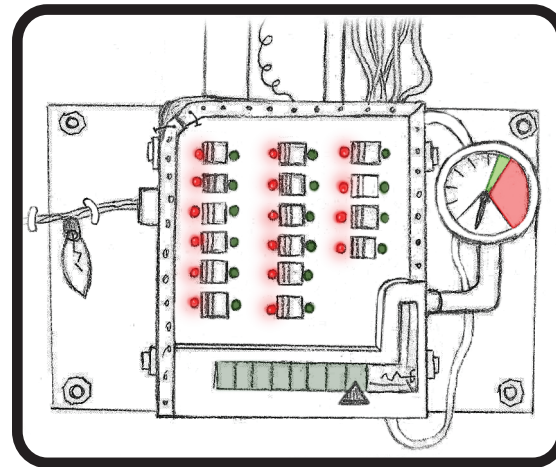

2. Once the player gets to the walkways and turns off the rain, they may access the cellar from the walkway entrance (where it is right-side-up). Through exploring it they discover a corkscrew in a drawer.

3. The corkscrew can be used to drain the wine barrels in the room, filling the cellar floor with wine.

4. If the player enters from below after draining the barrels in the cellar the trench is now filled with wine and they may use the floating barrel to get across.

Puzzle 4:

1. The corkscrew can be used to drain the wine barrels in the room, filling the cellar floor with wine.
