

### TRANSCRIPTION EXERCISE

Transcribe the following sentences as you would pronounce them. Observe all possible articulations as indicated in the *Guide to Transcription Practices* handout. These sentences are to be understood as representing *connected speech*. Thus you are not working with citation forms (words spoken in isolation). Pay attention to word boundaries, and represent boundary coarticulation phenomena in your transcription. Mark primary stress.

Soon the whole clinic was in darkness and the six men stepped into the foggy chill of the October night and went their separate ways.
