

Scatter Plot graph – Matt Martell

This will be a scatter plot that is designed for pair wise comparisons (Person X, Person Y). The data points will be color coded to display the top 25% as Green, Middle 50% as yellow and the bottom 25% as red. It will use the idea of zones of agreement in the graph to show where both Person X and Person Y agree. The idea is to clearly see where two people agree.
