Interaction with the DJ Spooky app

journey framework: creating & uploading a mix

I access the main page of the app

I set a playlist

I record a mix

I make an error.

I save and upload the mix

I make an error.

I receive feedback from others

User View
What am I looking at?

What are the menu options?

Do I know which one to choose?

Designer View
Will the user understand what the app is about?

Are the menu options clear in their wordings?

Is there a guide for first-time users?

User View
How do I return to main menu?

How do I select songs?

Where can I get more songs?

Designer View
