Unit of measure: Dollar (\$)
Notes: Shelter includes expenditures on principal accommodation (either owned or rented) and on other accommodation such as vacation homes or accommodation while travelling.

Prior to 1997 in the Family Expenditure Survey, mortgage interest payments were reported in the "Shelter" category under both "Owned living quarters" and "Owned vacation homes". (Mortgage principal payments were reported under "Net change in assets and liabilities" since they were considered to pertain to a change in the value of household assets.)

For the Survey of Household Spending (starting with the 1997 reference year), interest payments are not available separately from principal. "Regular mortgage payments" on "Owned living quarters" (including both principal and interest) are included under "Shelter". However, the entire mortgage payment for owned vacation homes is included under "Money flows--assets, loans and other debts". Caution should therefore be used when comparing these data to data from previous years. Categories affected include: Total expenditure, Total current consumption, Principal accommodation, Owned living quarters, Regular mortgage payments, Other accommodation, Owned vacation home, and Money flows (assets, loans, and other debts).

Notes: Includes expenses on other property (not principal accommodation or vacation home), legal services, financial services, dues to unions and professional associations, contributions and dues for social clubs, forfeits of deposits, fines, money lost, and purchase of tools and equipment for work.

Prior to 1997, in the Family Expenditure Survey, interest on personal loans and interest paid on mortgages and loans for other property were reported under "Miscellaneous". (Principal payments for mortgages and loans were reported under "Money flows--assets, loans and other debts" since they were considered to pertain to a change in the value of household assets or debts.)

For the Survey of Household Spending (starting with the 1997 reference year), interest payments are not available separately from principal. Payments for personal loans and mortgages and loans pertaining to other property (including both principal and interest) are reported under "Money flows".

Also starting in 1997, expenditures for "Games of chance", formerly included under "Miscellaneous" became a separate sub-category. Caution should therefore be used when comparing these data to data from previous years. The categories "Total current consumption" and "Total expenditure" are also affected since "Miscellaneous" is a component of these categories.

ADEQUACY

<i>Field:</i>	254						
<i>Long name:</i>	Housing adequacy indicator						
<i>Description:</i>	This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC) to identify "any household living in a unit in need of major repairs, and/or lacking hot/cold running water, inside toilet, or a bath/shower". This variable classifies households according to whether their dwelling has at least one bathroom and is in reasonable repair.						
<i>Specifications:</i>	Adequate: SHS_B:006 (need for repairs) = 20 (minor) or 21 (none) AND SHS_B:009 (no. of bathrooms) = 1 or more Not adequate: SHS_B:006 (need for repairs) = 19 (major) OR SHS_B:009 (number of bathrooms) = 0

AFFORDAB*Field:* 255*Long name:* Housing affordability indicator*Description:* This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC).

This variable uses a shelter cost-to-income ratio (STIR) to see if households spend more than an accepted amount on shelter: expenditures of 30 per cent or more are considered above the norm.

Specifications:

Rent = SHS_I:002

Regular mortgage = (SHS_G:002 * SHS_G:003) + (SHS_G:004 * SHS_G:005) + (SHS_G:006 * SHS_G:007) - (SHS_E:003 * (100 - PctExpAgainstBusiness_E:009 / 100 if SHS_G:015 = '1') - (SHS_G:014 if SHS_G:016 = '1'))

Condo charges = SHS_E:006

Property taxes = SHS_E:003

Water, fuel and electricity = SHS_J:001 + SHS_J:002 + SHS_J:003 + SHS_J:004

Household income before taxes = SHS_U:004 + SHS_U:005 + SHS_U:006 + SHS_U:007 + SHS_U:008 + SHS_U:009 + SHS_U:010 + SHS_U:013 + SHS_U:014 + SHS_U:015

On this file, the housing affordability indicator is calculated as follows:

Affordable: Rent + Regular mortgage payments + Condominium charges + Property taxes + Water, fuel and electricity / Household income before taxes = less than 30%

Not affordable: Rent + Regular mortgage payments + Condominium charges + Property taxes + Water, fuel and electricity / Household income before taxes = 30% or more

Not applicable: Households where household income before taxes = 0 or less, and households with shelter cost-to-income ratio (STIR) = 1 or more.

SUITABLE*Field:* 256*Long name:* Housing suitability indicator*Description:* This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC) according to the National Occupancy Standard (NOS).*Specifications:* The National Occupancy Standard (NOS), used to measure housing suitability, determines the number of bedrooms a household should have for households of different size and composition. According to the National Occupancy Standard, there must be one bedroom for each:
- cohabiting adult couple;
- unattached household member 18 years of age and over;
- same-sex pair of children under age 18;
- additional boy and/or girl in the family, unless there are two opposite sex siblings under 5 years of age, in which case they are expected to share a bedroom.
A household of one individual can occupy a bachelor unit (i.e., no bedroom).

For example, a household composed of a couple and two children (boy aged 4, and girl aged 2) is expected to require 2 bedrooms. When the boy turns 5 years old, the requirement would increase to 3 bedrooms.

RQNMEDP*Field:* 257*Long name:* Required number of bedrooms*Description:* This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC). According to the National Occupancy Standard there must be one bedroom for each:
- cohabiting adult couple;

MONRENT

Field: 258
Long name: Monthly serviced rental payments
Description: Monthly serviced rental payments for principal residences.
Specifications: (SHS_I:002 + SHS_J:001 + SHS_J:002 + SHS_J:003 + SHS_J:004) / 12

(Rent + Water + Electricity + Fuel) divided by 12

Calculated for households where:

1. Dwelling tenure during reference year (TENURYR) = 6 or 7 (rented) and
2. Months household occupied a rented dwelling (SHS_I:001) = 12 and
3. Reduced rent reason = 3 (no reduced rent) and
4. Dwelling repairs needed = 2 or 3 (minor or no repairs needed)

Unit of measure:

Households not meeting above criteria have this field set to 000000000.00.
 Dollar (\$)

Notes:

Criteria 1 and 2 do not always yield the same records because of the presence of part-year members who may have had a different housing tenure than the reference person. So using the two together allows us to eliminate or reduce the number of records with complicated tenure histories. A complicated tenure history is usually due to the presence of a part-year member with a different previous tenure from the reference year.
