Company Analysis Summer 2022

SNAP INC. (SNAP)

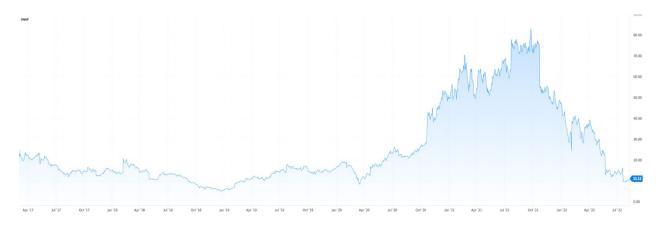

Stock Overview

Snap Inc. is traded on the New York Stock Exchange with the ticker symbol, SNAP. As of August 12th, 2022, the closing price was \$11.62 USD. The company has a P/E ratio of 0 due to their negative net income annually since their IPO.

Their stock price represents an 84.4% drop since their closing price of \$74.62 one year ago and a 52.5% drop since their IPO closing price of \$24.48 in 2017. The stock price saw a tremendous rise from 2020 through 2021 due to revenue growth attributed to user growth amid the coronavirus pandemic, with an all-time high of \$83.34 in September 2021. However, Snap Inc.'s stock price significantly dropped off in Q4 2021 and subsequent quarters due to missing revenue and earnings estimates as well as Apple's implementation of their ATT policy on their iOS platform that limits the collection of user data, affecting Snap Inc.'s advertising revenue model.

Compared to its competitors in the social media space, Snap Inc.'s stock performance has been similar to that of the more recent Pinterest Inc. which went public in April 2019, however both are overshadowed in price and stock performance by industry incumbent Meta Platforms Inc. (formerly Facebook Inc.). When comparing Snap Inc. to the social media index and the S&P 500, their stock performance has been lackluster with the exception of a brief period in Q3 2021 into the beginning of Q4 2021 where it saw stock gains higher than both these benchmarks.

Snap Inc. has multiple classes of common stock. Only their Class A common stock is publicly traded and has no voting rights. Class B and Class C common stock are not traded in the public and are entitled to 1 vote and 10 votes per share respectively. The higher voting power Class C shares are held by the original co-founders and now Chief Executive Officer, Evan Spiegel and Chief Technology Officer, Bobby Murphy where Mr. Spiegel alone has voting control with 53.1% of the voting power.

Company Profile

Snap Inc. is a camera and social media company founded on September 16, 2011 by Stanford University students Evan Spiegel, Bobby Murphy, and Reggie Brown. They are headquartered in Santa Monica, California and currently have daily active users of over 300 million. Their motto is "the fastest way to share a moment".

Snap Inc.'s main product, Snapchat, started out as Picaboo, a picture message app found only on iOS, in 2011. With little attention received in the first few months of its release, the app was rebranded as Snapchat as in "snapping a photo" and "chatting with friends" after a cease-and-desist letter was sent by a photo-book company with the same name. By the spring of 2012, Snapchat went from having 1,000 daily active users to 100,000; that metric would increase to 1,000,000 later that year after releasing the app on the Android platform in October 2012.

New functionality was being added to Snapchat each year. In addition to disappearing pics, the ability to send disappearing videos was added in 2012. By the end of 2013, users were able to broadcast their short videos and images (Snaps) to all their friends via Stories and the company introduced the ability to replay Snaps as well as the use of Smart Filters, basic overlays to shared media that displayed the time, temperature, or speed. Further features such as the ability to send texts to friends, watch and/or contribute to a curated user-generated stream of Snaps of a public event known as Live Stories, and geofilters with new location-specific overlays were implemented in 2014 to a community of 50,000,000 daily active users. Later functionality introduced included the more advanced augmented reality filters known as Lenses, on-demand geofilters that let users create their own event specific filters, letting users save their personal favorite Snaps and Stories known as Memories, use of personalized cartoon avatars (Bitmojis), and a redesigned and upgraded chat interface. Snapchat saw another large jump in users from 100,000,000 daily active users in 2015 to 150,000,000 in 2016. Around this time, Snapchat's user base growth slowed down with the introduction of Stories on their competitor's platform, Instagram. It wouldn't be until Q2 2019 that Snapchat surpasses 200,000,000 daily active users and shatters 300,000,000 by O3 2021. Along with the popular Snapchat app, Snap Inc. also has hardware offerings: Spectacles, a pair of sunglasses with integrated cameras to take and upload Snaps to the users' smartphone and Pixy, a Snap taking selfie drone.

One of Snapchat's challenges is the ongoing changes to privacy laws and mobile operating systems. As seen with the ATT policy from Apple, Snap Inc.'s ability to attract and retain advertisers can be significantly reduced if mobile OSs can cut their pipeline of user data to apps, leading to the inability to serve effective targeted ads. Another challenge lies in their competition. Their main competitor, Instagram, incorporates many of Snap's unique features, including a "Stories" feature that largely mimics Snap's Stories feature and has a higher user retention time of 11.2 hours/month compared to Snapchat's 3 hours/month.

Products

Snapchat

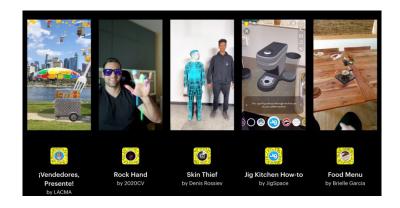

Snap Inc.'s flagship product is Snapchat, a camera app to take and share Snaps as well as interact with users. The app was overhauled in 2020 and contains 5 distinct tabs:

- **Snap Map**: live and highly personalized map to locate friends, local businesses, and Snaps of others
- **Communication**: users communicate with friends via messages (Snaps or text), voice or video calling, and games
- Camera: users create Snaps; it includes enhanced features such as AR capabilities, millions of filters (Lenses), music integration, and voice and scanning technology
- **Stories**: features content from friends, community, and content partners; it offers Brand Profiles (landing page for businesses to connect with users)
- **Spotlight**: users share content to the entire Snapchat community; most entertaining Snaps are featured and becomes personalized to the user

A key aspect of the Snapchat experience compared to other platforms is the extensive use of Lenses. With 2,500,000 Lenses and 250,000 Lens creators, Snap Inc. has built an environment to support new development of Lenses which is made up of:

- Lens Studio: application used by Lens creators to build the Lenses' augmented reality experience
- Camera Kit: software development kit that enables developers to leverage Snap's AR platform and technology in their mobile applications
- Creator Marketplace: set of features that connect both AR and Spotlight creators with advertisers

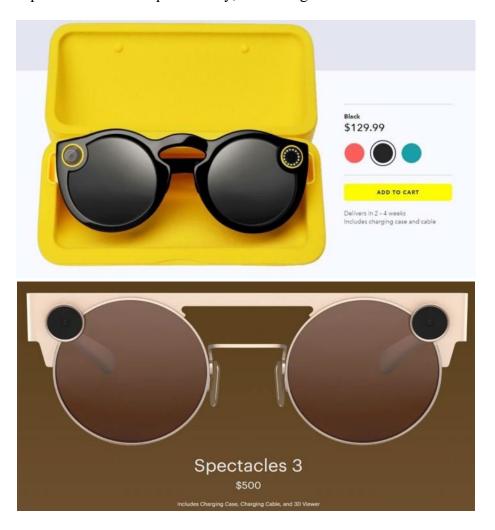

Not only does Snapchat create an experience for its users, it also adds value to its partners consisting of:

- Creators: designers, artists and storytellers who build Lenses that go viral can be more sought out by advertisers in the creator marketplace
- **Publishers**: the Discover page allows for brand exposure to a new, young audience base
- **Developers**: there are many ways to integrate with Snapchat, such as through the powerful Snap Kit

Spectacles

Snap Inc.'s first hardware product was the Spectacles, a pair of smart glasses with built in cameras to create and share Snaps. The first generation was launched in 2016 and came as a result of Snap Inc.'s \$15 million acquisition of Vergence Labs, a small Los Angeles startup that developed smart glasses with video recording capabilities.

The first generation houses a single HD camera on the frame and a dual microphone array with a cost \$129.99 USD. The current third generation houses dual HD cameras with the ability to capture 3D Snaps and a four-microphone array; its starting cost is \$380 USD.

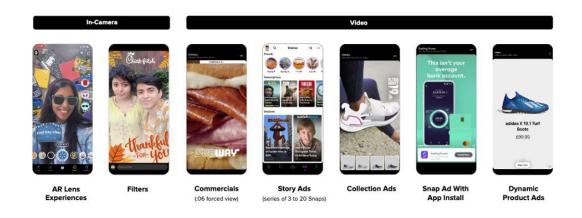

Pixy

Snap Inc.'s second hardware product was the Pixy, a pocketable selfie drone with built in cameras to create and share Snaps. Released in April 2022 at a base cost of \$230 USD, the Pixy has a front camera for capturing photos and videos and a bottom camera for stabilization and navigation. The user controls the drone via a dial on its topside that has one of four pre-set flight paths (hover, orbit, reveal, and follow) and tracks the user's head and body while in flight. Pixy can record 2.7k video up to 60 seconds long and sends to a smartphone via Bluetooth.

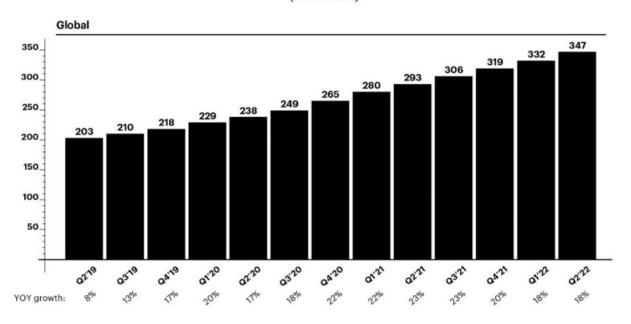

Monetization

Snap Inc.'s revenues predominantly come from advertising on Snapchat. Advertisers can choose between two types of advertisements: AR ads and Snap ads. AR ads integrate brand and product awareness into customized Lenses that users can interact with and share with others, creating high user engagement. Snap ads are more traditional forms of advertising and include commercials on the app, ads on Stories, and Collection or Dynamic product ads.

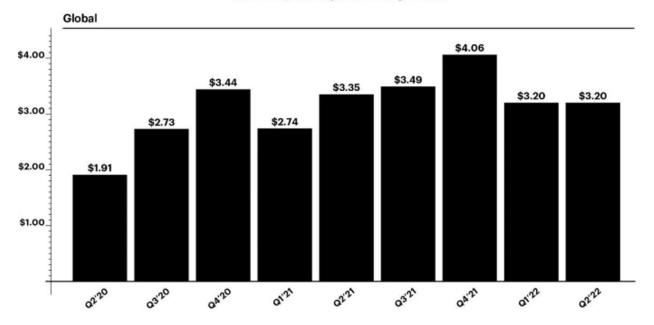

As of the company's 2021-year end, advertising accounts for 99% of Snap Inc.'s revenues. With 319 million daily active users in Q4 2021, Snapchat was generating a global average of \$4.06/user, with North America being the highest earning region per user at \$9.58/user.

Quarterly Average Revenue per User

Management Overview

Evan Spiegel - Chief Executive Officer (2011 - present)

- He co-founded Snap Inc. with Bobby Murphy and Reggie Brown while they were students at Stanford University and left in 2012 to focus on building Snapchat; he went back in 2018 to complete his degree.
- Education: Bachelor of Science, Product Design from Stanford University

Bobby Murphy - Chief Technology Officer (2011 - present)

- As one of the original co-founders, he has led the engineering and research teams at Snapchat and worked on the production of Spectacles in 2018.
- Education: Bachelor of Science, Mathematical and Computational Science from Stanford University

Derek Andersen - Chief Financial Officer (2019 - present)

- Before becoming the CFO, he served as VP of Finance since July 2018. Prior to Snap Inc., he was the VP of Finance in Amazon, supporting Amazon's digital video business from 2015 to 2018. Other previous experiences include roles at Fox Interactive Media as Senior Vice President of Finance and Business Operations for IGN, and as Vice President of Finance.
- Education:
 - o BBA from Acadia University
 - o MBA from the Haas School of Business at the University of California, Berkeley

Kenny Mitchell - Chief Marketing Officer (2019 - present)

- Prior to Snap Inc., he served as Vice President of Marketing at McDonald's Corporation from February 2018 to June 2019. Other previous experiences include Head of Consumer Engagement at Gatorade from March 2015 to February 2018 and as Managing Director, Brand and Consumer Marketing at NASCAR from December 2013 to April 2015.
- Education:
 - o BA in Sociology and Economics from Dartmouth College
 - o MBA from the Tuck School of Business at Dartmouth College

Jeremi Gorman - Chief Business Officer (2018 - present)

- Prior to Snap Inc., she was employed at Amazon.com, Inc., serving as Head of Global Field Advertising Sales from June 2018 to November 2018, as Head of Field Advertising Sales, U.S. from April 2015 to June 2018, and as Head of Entertainment Advertising Sales from 2012 to April 2015. Other previous experiences include Director of Sales at Yahoo and Variety Magazine.
- Education: BA from the University of California, Los Angeles.

Financial Analysis

Snap Inc.'s Q2 2022 saw a large increase in convertible senior notes (an increase of 65.95% from Q4 2021) as the firm took on new long-term debt due in 2028. This new debt has a total principal amount of \$1.50 billion with semi-annual interest beginning on September 1, 2022 at a rate of 0.125% per year. Their choice to leverage up in the face of negative net income is a cause for concern.

Snap Inc.'s 2021 YE saw a substantial 69.12% increase in Goodwill due to two major acquisitions: Wave Optics, a supplier of AR displays for its upcoming Spectacles refresh, and Fit Analytics, a fitting tech start-up for apparel and footwear. In both acquisitions, Goodwill accounted for the majority of the cost (\$370 million out of \$510 million to acquire Wave Optics and \$88 million out of \$124 million to acquire Fit Analytics). Snap Inc.'s overspending on these two firms when considering their negative operating cash flows is a cause for concern.

While Snap Inc.'s revenue line has seen outstanding growth at an average rate of 54.91% year to year since 2019, it continues to generate a net loss with its significant operating costs growing at an average rate of 30.75%. These higher operating costs can be attributed to Snap Inc.'s growing stock-based compensation expense that is factored into each operating expense line item. The same general conclusion can be drawn about their Q2 2022 performance as well.

Recommendation

SELL: Snap Inc. does not have a proven record of generating significant positive operating cash flows. Their choice to leverage up with the lack of earnings to support the debt is concerning. They are facing fierce competition from social media apps such as Instagram and TikTok that have been siphoning away their young user base that creates value to advertisers, further threatening their advertising revenue model.
