* See Notes to Tables 1-3. Making appropriate adjustment for semiannual payments, the time value $N_0' T$ is defined in (3). The sum of the partial convexities is $N_0' C_T N_0$. The quadratic form, $N^*' C_T N^*$, is the sum of squares for the relevant N^* from Tables 1-3 multiplied term-by-term with the appropriate partial convexities. Max CON and Min CON are the maximum and minimum individual partial convexities.
