about

Coming from a diverse background, with interests from film and games, to history and art, I bridge ideas and create touchpoints in all of the projects that I partake in.

My goal is to create projects that bring meaningful excitement to my audience

technical skills

Web Design
HTML, CSS, SCSS, Bootstrap, Javascript

Front-end Development
JS, AngularJS, Typescript, PHP, Grunt, Git, MySQL

Visual Design
Adobe Design Suite, ProtoPie, Sketch, Axure RP

Others
Jira, Photography and Filming, Office Suite, G Suite, Editing and FX, Android Studio, 3D modeling

education

Simon Fraser University

Interactive Arts and Technology (SIAT), Bachelor of Science

2015 - Present
Expected graduation - Fall 2020

experiences & projects

Safe Software Inc.

Web Designer   **Summer 2018 - Winter 2019**

Designed and integrated web interfaces for an enterprise level web application that simplified the transition of spatial data. Enhanced and maintained application style rules. Developed enhancement features to improve usability

- Created wireframes and mockups for new features and improving existing interface, then implementing them through HTML, SCSS, and AngularJS

- Worked with an agile team to discuss and implement planned features and working to meet product requirements

Novii Web Product

Web Design & Narrative Design   **Spring 2018**

Developed a website that showcased Novii exercise hardware and mobile application. This project focused on developing a website that took into account accessibility, usability, and inclusivity in its design.

- Created style-guides, wireframes and mockups for different device sizes
- Developed a coherent web design that fits the aesthetic of the product while keeping the load times of the website as low as possible

The final result of the project was able to adapt for varying screen sizes as small as the oldest generations of smart-phones, compatibility for older browser types and some implementation of ARIA attributes for accessibility.

Lookbook Project

UX / UI Design & Usability Testing   **Spring 2018**

Created a high-fidelity mobile prototype for customers who want to make the experience of booking makeup and haircut appointments easier and pleasant.

- Conducted user research and interviews to investigate the needs of users for our application
- Developed and iterated wireframes and mockups of potential screens that created a seamless user experience
- Designed and created microinteractions from user testing that made interaction within our application more delightful experience

The project undertook many re-designs through user feedback and refined design skills and understanding of the different needs of individuals.
