SETTING UP
GRID
in *Illustrator*

1 Create a ▢ and make it the same size as the your artboard.

2 Select the rectangle you just made, and go to **Object> Path > Split Into Grid.**

3 Have Fun Designing.

SETTING UP GRID
in *Photoshop*

1 To turn on Grids, go to **View> Show > Grid.**

2 **Edit> Preferences> Guides,Grids& Slices & Count.**
to adjust Grid Size and Properties in the window.

3 Snapping can be really helpful for you to align objects in photoshop. To turn it on, go to:
View > Snap To > Grid.

SETTING UP
GRID
in *InDesign*

1 Grids can be reused over and over again. Hence we want to create our grids in the master page. Double Click on **A-Master** on your **Pages Panel**.

2 Go to **Layout> Create Guides** to create your own grid. To remove the gutter, set it to 0.

3 Click on any page to exit the master page mode, and have fun designing.
