

Assignment 1

Yiting Long 301183087

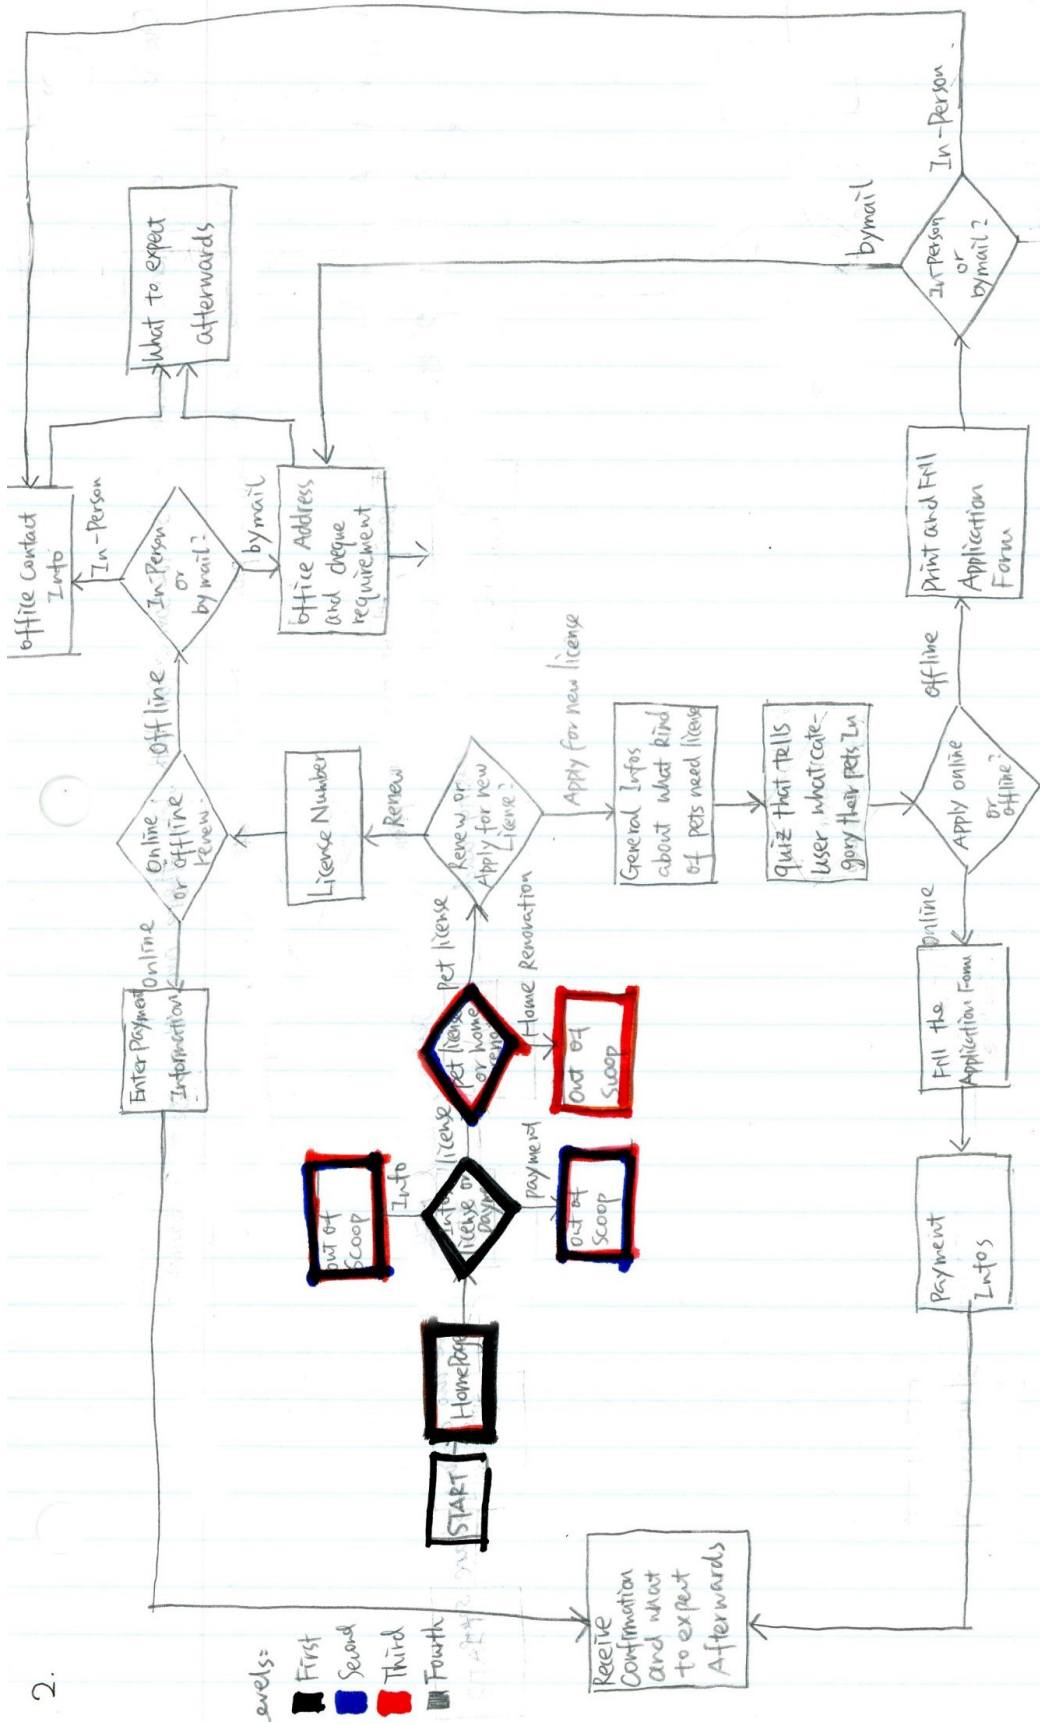

Part 1: IA based on project brief

1

Part 2: IA based on functional and content criteria:

2.

3. Discuss about the overlaps and difference, and how this influences the designer's decision.

The overlaps would be the overall structure. These two IAs have basically the same structure, they both have four levels (from top to bottom), and they have the same categories, which are info, license and payment. The difference is that, in general the second IA has much more detail about a certain topic, which is the pet licensing. The first IA, however, includes almost every category that the website has, but it has less detail.
