

## Questions for Roy

1. You have studied the nature of technology. Has your study enabled you to offer a definition and an account of technology? If so, please explain it. If not, please explain why not.
2. Heidegger's various analyses of craft and technology always combine considerations on function with considerations on practice and meaning. Other accounts emphasize one or another of these three dimensions of technology. Comment on this and present your own views.
3. Discuss various views on technological determinism and present your conclusions.
4. Because technology is so central to modern societies, all philosophies of technology have political implications. This is true even for those approaches that deny their own relevance to politics. Discuss the connection between technology and politics.
