Volunteer Tutor, Post-Secondary Preparation

Location: Mission Secondary School

Description: I am looking for 2 or 3 tutors who can tutor Grade 11 and 12 students in a variety of subjects. If you have any students who are doing a major or minor in Math, pre-calculus, chemistry, physics, biology would be fantastic. I do need English, psychology, law disciplines as well--people with a general knowledge of rigorous high school curriculum.

The tutorials will be every Tuesday, starting on Feb. 12, 2019. The time will vary, as we are on a rotating block system at MSS.

The tutorials are set up as a small group of 4 – 6 students per tutor. The students hand in a few questions that they are finding difficult in their subject area. They student presents the question to the group and writes it on the whiteboard, and the group helps the student solve the question. The tutor’s role is to guide the group towards finding the answers, and keep the students on task. The tutor may want to present a different way to solve the question, or encourage the students to be creative in problem solving. The classes are 77 minutes long.

The tutor’s responsibilities are:
- collecting the questions from the class
- organizing the questions in to subject groups
- facilitating the tutorial
- marking the questions (out of 22) according to the marking rubric
- developing relationships with the students

The role of a tutor in Mission Secondary’s Post-Secondary Preparation program is a valuable experience for any prospective teacher who needs volunteer hours, is interested in high school teaching, and who wants a reference letter on their file.

Deadline to Apply: February 28, 2019

How to Apply: Please contact Carol Fissel at carol.fissel@mpsd.ca
