Position

DATA ANALYST

The Centre for Applied Research in Mental Health and Addiction (CARMHA) is currently recruiting for a Data Analyst who has extensive experience with quantitative research, academic and scientific writing, and is interested in psychiatric epidemiology and health system planning for mental health and substance use. The Data Analyst will work with one of CARMHA’s dedicated research teams in the execution of specific research tasks related to two or more of the centre’s key projects.

Who we are

CARMHA is an internationally recognized research centre conducting innovative and interdisciplinary scientific research related to mental health and substance use, primarily in the areas of clinical practice and interventions, health systems, and population health and epidemiology. CARMHA is based within the Faculty of Health Sciences at Simon Fraser University.

CARMHA’s primary mission is to conduct research, generate evidence, and translate knowledge into policy and practice that is innovative, relevant and effective in preventing and reducing the burden of disease related to mental health and substance use.

Applicants are encouraged to visit our website for more information relating to our research, people and projects at www.sfu.ca/carmha.

Who you are

- You have completed a university graduate degree in health sciences, epidemiology, biostatistics, or a related field.
- You have 2-3 years of related research experience, including quantitative data analysis
- You have applied knowledge of the various components of the research cycle and proficiency in different qualitative and quantitative research methods
- You have strong analytical and problem-solving skills
- You are proficient with quantitative analysis
- You have advanced knowledge of statistical programming packages such as R or SAS
- Experience working with administrative data an asset
- Applied knowledge of mental health and addictions research and policy issues considered and asset
