Mac- Install PaperCut

Before starting, please note that setup must be completed on campus.

On the top menu, select the “Go” heading and select “Connect to Server.”
In the dialog box, type: `smb://sfuprint.mps.sfu.ca/PCClient/mac` Click “Connect.”

You will have to authenticate against Active Directory. Enter your SFU username and password. You must check off “Remember this password in my keychain.”
Find the “PCClient” and open it. It will ask you to move it into the “Applications” folder. Select “Yes.” If you are not asked to move it to the Applications folder, please drag and drop the PCClient to the Applications folder.

Go to System Preferences → Users & Groups.
Click the section “Login Items.” Click the “+” sign at the bottom and add “PCClient.” This will make your PCClient open every time you log in.
Go to “Applications” and select “PCClient” to open the PaperCut software.
