### COMMENTS

It was absolutely terrible this term!!! As well as last spring, as well as this fall!!! Every semester it seems like everything is taken up before I have a chance to enroll. Last spring I was only able to take 3 towards our degree because everything was taken up or not enough other required courses were offered. This fall I was only able to take 3 towards my degree as well and was forced to take two electives that I don't need since I have fulfilled my elective requirements; however I need to complete a 30 credit year. This spring semester I ran into almost the same thing, I am only able to take 3 towards my degree and am having to take 2 electives since many classes conflicted with each other, and there was barely any offered in the upper division kin classes to begin with!

Overall in my forth year with a 3.6 CGPA I was only able to take 6 out of 10 classes that I actually needed to take for my degree; the rest just wasted my time and money.

I had an extremely difficult time enrolling for courses. I am going to major in french with a minor in history to become an elementary school teacher. I need a certain amount of courses in french, in history and also certain courses to fulfill my PFP. I found it extremely difficult to find courses that didn't conflict with each other. I took me about 2 hours to find a schedule that didn't conflict, meaning I had to take an evening course, a Distance Education course, and not take 2 courses I needed.

Natural Resource Economics is an essential offering in any University ECON Program, especially in Canada.

this is really just not fair. my enrollment dates was actually 1 month later than a friend of mine...and i ran to the SFU library to pick my classes, and what do i get? pretty much every single class i had in mind to take are all full, there are more to the list than the above classes. this is really not fair that i can't take the electives i want, like Japanese, but also the classes that are REQUIRED like BUS classes and PHIL classes. i'm writing this because i'm very dissapointed that i was unable to get what i wanted, from a total of about 7 different classes i can possibly think of taking in term 2, i got stuck with 1 class, and the times table isn't even fitting for me.

It's awful. Extremely difficult to get into most classes, especially english and philosophy.

Reserved Capacity is ridiculous, when the waiting list becomes unavailable even though it is empty.

Re: CMNS - to have more than just the one course offering each semester because of its high demand.

CRIM 131 is one of THE most important courses for both Criminology majors and minors, and is crucial as a prerequisite. Every term it is offered, the class size is way too small! Add more seats!!! PSYCH 102 conflicted with other courses required for the Criminology major (i.e. CRIM 220, POL 101W, PHIL 120W, etc.)

Don't know why some people get to choose course so much earlier, leaving students that need to take certain courses to be left out. There should be a flow for the courses taken, meaning similar courses should/need to be taken one after another so that the thoughts, ideas, processing will remain.

I am a visiting student from the XXXXXX and really wanted this class as it was pre approved to transfer back to my home university degree.

It showed that does not meet the prerequisite. I am a transfer student from XXXXXX and will graduate as Financial planning major. I did two Calculus courses when I was in XXXXXX University of Finance and Economics in XXXXXX, and I got both 90% on the result (shows on the transcript I sent). And the course BUEC 232 was transferred which used MATH 157 as a prerequisite course.

Can't get the courses that I want even though they're large sized first year required courses.

I am frustrated with the possibility of not getting into this course because it is a prerequisite for courses in my forth year. Without this course I will not be able to go to Bamfield in the summer nor take the courses I would have been able to in my forth year. I will most likely be graduating much later due to this course.
**COMMENTS**

| I am a bit disappointed with these only being offered in Surrey. I am a transfer student and these two must be taken apart from other courses. Fulltime study is difficult, as well as planing courses for next term when I will lack these two courses for my upper level standing and studies. Any suggestions? |
| Nice job, the WQB requirement is quite good at delaying my graduation. You guys must be making a fortune. |
| Its way too hard to get into courses like accounting 320. Only 15 spaces?? |
| The times for Psychology are really hard to work with for courses in other domains. |
| I'm a 4th year student, it's kind of ridiculous that I still can't get into the courses I want at this stage of my academic career! |
| Please open more classes and times. It is hard for first year students who have enrollment dates at the very end to get into what they want. In the long run, if most of the classes needed are full, this will push back the student's graduation year. |
| I was able to get in but not the evening class which i needed since i work |
| Always, I can not take accounting courses that I wanted to. SFU has good business programs but there are not enough accounting courses offered. Please offer more accounting courses. I feel I can not finish my degree forever every time I try to register. |
| If you fail a course and need to retake it, it would be nice to let us know early. NOT when all the classes are full! |
| something like 75% of upper division english courses are supposed to be reserved for declared english majors. you’d think this would help me register, and somehow of course there is only one section for this course which everyone wants to get into. same with american lit, or any of the canadian lit ones requires for the degree. I'm not going to graduate for another 3 years at this rate. it feels almost like a conspiracy to keep us here forever. |
| By the time my enrollment date arrived, many lectures were already full and it was very difficult to create a schedule that worked while still meeting requirements. |
| There should be more spaces for first year students who have a restriction on what they can take. |
| Many courses offer limited space, I can hardly enroll in the classes I need to take |
| Why does Spring semester have crappy course selection options???????????????????????????? |
| I am accepted at a Bachelor of Arts, programme of study international studies, I am trying to put myself on waitlist for the classes on Burnaby Campus (This is where I will be studying), but all the tutorials there are full, and it will be very troublesome for me to have to go to Surrey for my tutorials. |
| Please make more Education courses available to students in Vancouver (ie Harbour Centre campus) and also by Distance Education. Thank you! |
| it's kinda unfair that my enrollment date was late... |
| It would be great if I could attend this course despite my waiting list position at number 10. If I was unable to attend IS101 this year, my whole entire schedule for SFU has to be revised and may not work out at all. |
| Many courses are scheduled Tuesday and Thursday from 9:30-10:30 which makes it impossible to pick the courses that one wants because they are all the same time. |
| There are much too many to select for this survey, but being an undergraduate in BBA, I'm really disappointed in how limited my selection was. I thought by being a BBA undergraduate I would have more priority in enrollment, but it turns out I have the same enrollment date as my friends who are in the ARTS faculty. I feel like there is not difference now that I'm in business because art students have the same chance as picking all the business courses that I want to take and sure enough, they're all full! I'm sure many of the people who have taken up the seats aren't even in business... it makes no sense at all!!!! enrollment dates should be earlier for business students so we can get the priority!!!! |
| I'm sick of not getting the course I want...I'm a criminology major, and haven't taken a crim course since my first semester...I'm going into my fourth! I'm never going to graduate! |
| There are two 400 level chem courses with final exams on the same day. Is this not avoidable? |
| Why does the system not recognize classes currently being finished as pre-requisites for FOLLOW UP classes? I'm in 210, why can't I get into 310 (which I NEED!) |
| make courses available at all campuses to all students, not just select ones! |
| The required sociology classes should have more spots in them or more sessions. If they are required for the degree, it should be more accessible to students. Furthermore, a lot of the classes conflict in time, so its virtually impossible for students to take the classes they want if they are all being offered on the same day during the same hours. |
| No tutorials open at this time, but heard that more may be available in the upcoming weeks. |
### COMMENTS

I am on the waiting list, please advise when I may be enrolled in class.

**Intro to personality** is a very basic psyc class and a requirement for many grad school applications, hoping SFU has a plan to make it available.

It is difficult to get the courses I need for my International Relations specialization for my Political Science Major and for my History Minor when there are only 30 seats in each course and they fill up long before my late registration date. How can I finish my degree when I can’t even take what I need for it?

Shouldn’t priority be given to those who require the course? The course was full before I could even begin to enroll in classes (Dec 4th 7:30 am). If it is a required course for my program and its full before I can enroll what am I supposed to do?

Both class r full in TUT and/or LAB, but I am still able to get into lecture

Need to offer more spaces in classes...at least to those students who have declared!!!!!!!!!!!!!!!

More courses should be available for distance education and night courses. My selection was limited and most of the courses I wanted were full. Very disappointed!

Wait lists are needed for business courses to prevent students from getting friends to hold a place for them. This will give all students an equal opportunity to enroll in the courses they need to take.

**OPEN MORE LABS!!!! MAKE ENOUGH SPACE TO FIT THE LECTURES!**

Having only 15 spots total for a class (in this case, BUS 320) is asinine. I hope that the university notices that the waitlist enrollment (so far) is twice as big as the available seats and decides to open a few more sections.

When I went in to register for MB 309 it said that it was open, both lecture and elective. But, as I progressed further to finish enrollment, it did not allow me to proceed unless I clicked the wait list. I really need to take that course this semester!

There is one in Burnaby at Wed 6:30-8:30PM, its way too late, and I’m studying in Surrey.

I just could not get into the Thursday lab 1:30-5:20

Fewer classes in upper division cmpt offered, and that makes course selection pretty grim. If I hadn’t been offered a spot in a directed studies class I would be taking 1 class that I neither need nor am interested in simply to get enough credits to graduate.

It’s a very efficient system for how to select courses, but now I have no idea if I am going to get into BIO 102 and I seriously need that class because that the one class I really wanted to get into and I happen to love bio over any other course...you might have heard better reasons than this but I just really want to be in bio 102 and the lab

Make ECON and BUS finals on different dates!

This is the worst system I have ever used. For anything. Period.

I really needed those courses!!

I am working full time, it would be very helpful if more courses (especially courses for Criminology Major) can be offer in the evening or weekend in Vancouver Campus, and/or more available seats for CODE courses. Thanks.

I did not get any of the courses I wanted, and it was very tedious trying to find something (something that I am not interested in) that was available to fill up my schedule.

This course is only available at Surrey campus, it is a requirement for my major, as well as a prerequisite for another course that is also a requirement for my major. I am aware that some of my fellow students are taking this course at other institutions, and I hope that this issue is fixed so I will not have to do the same.

I have tried to get this class for the last two semesters and it is still unavailable. I really would like to take it but it seems it is always full, there should be another lecture or in a bigger class room, obviously enough people want to take it, to increase class size.

I enrolled in a class that offered 3 sections. All sections were taught by the same professor. I did not want to take the course with this professor. The option was not available. SFU courses need some more variety.

More sections should be offered.

By the time my registration date came around, all of the classes that I wanted to take were either full or I couldn’t get into it for some unknown reason. I have declared my major and I still couldn’t get into one of the classes I wanted. It’s just really disappointing that all these great classes are offered, yet no one can get into them if there registration date is a week after the start date. Just something to consider.

I could not get into KIN classes because only those in the major were able to. This course is a SCI B requirement, except you can’t get into it unless you’re already a science major. That’s stupid! Either don’t make it a SCI B option, or make more classes available.

</tbody>
</table>
**COMMENTS**

I do not know why I was only able to get in one course. Every class I wanted to take was full. There may not be enough classes offered in this term, enough seats in the classes, or maybe there are too many students at SFU for what it is able to offer. I now have to add another year onto my degree because I can not take any of the classes I need to graduate.

Will SFU NOW courses be opened to the general student body if they do not reach capacity?? I need the class to finish my degree in a timely manner!

A lot of courses’s timing clashes with others, both of which I wish to take. IE: my math 240 clashes with most of the business course I want to take during the day.

I know I am in business probation right now, but can’t I still be enrolled in higher level of BUS classes?

In the courses I did sign up for, the tutorials were not the ones I wanted.

**PSYC 358 is full but there is no waitlist**

I'm in the criminology faculty, yet I was not able to sign up for any of the courses because they were closed.

I was extremely disappointed in not being able to even get on the wait list for Electroacoustic Music, as I am still unsure if I am capable of continuing on in Communications, and that was one of the other options in Distance Education that was available to me. I need to take DE until I decide on my Major because I live so far away (Maple Ridge - 40 minute commute on a good day - usually one hour). Very disappointing. If you can switch me, I'd be ever grateful.

I just have to say that if you expect me to be able to complete my major, WHICH I HAVE DECLARED, then it would help if you gave me an enrollment date that allowed me to get into more than one third year English class. I am truly mystified by the ignorance of this selection process. I am in my seventh semester now and I have only been able to take ONE third year English thus far, when some of my fellow peers have full schedules of just third year English. I could not be more angry with this university and cannot believe that this is EVEN AN ISSUE.

I need to take 6 more Crim courses to meet my major requirements and I have been unable to take the ones I want because they are always full before I get to register. I need to take Crim 369 so that I can take Field Practice January 2010. I would like to know if I will be able to be guaranteed to take the courses I want before graduating as I do not want to pay for courses I am not interested in.

I did not fully understand why I was not allowed to enroll in MATH157.

The lecture times for ENSC 150 conflicts with the PHYS 126 open lab times. (Thursday ~2:30pm). (Attempted to drop/re-enroll ensc 150 to see if it would work, but now am unable to re-enroll in the course.)

Either the courses I wanted started at 8:30 am, which, to me is too early because I spend an hour commuting. I cannot function that early in the morning, so I won't learn anything and there's no point taking the course. Also, all the courses that I needed for this term were FULL or not OFFERED. My degree is a common one -- Political Science, yet there was an awful course selection!!! Because there are not any courses that I can take, instead of taking five courses this semester, I can only take two, or three!!! If this keeps up, a four year degree will take me seven years to complete. Despite a few courses offering Distance Learning, the reason why I am in university is to attend class, listen to lectures and learn from professors. That is not the same experience learning on my own. I transferred to SFU because I had heard so many good things about it, but with the awful course availability, I am thinking of transferring to somewhere else where I do not come across any of these absurd problems. It's so awful!

I think there should be a wait list option available if a section is full.

Too many of the courses are offered at the same days and times. There were way too many classes offered Wednesday afternoons between 2:30 and 6:30.

I am a post bac student with over 130 credit hours, not being able to register in my program courses when I have already been admitted into the program is ridiculous.

It would be easier for students to have several professors for a course to choose from ranging from all hours. Or even better, to have more courses available for distance education.

I think there should be more distance education courses offered.

More courses should be offered every term.

I'm in the process of trying to complete my WQB requirements. I found it very frustrating to add classes because two of the courses I need to take have space left, but these seats are reserved for people of that particular faculty and program.

It was VERY difficult looking for the classes I needed. Nothing, I tried almost everything and nothing seemed to be available.

IAT classes are FULLY reserved for IAT students, but this troubles those who wish to transfer to SIAT. We cannot enroll in IAT class when it is not full.

It's terrible when I Bio student can only get into one Bio class...

<tr>
<td>I have to wait until Dec 13th to see if there is any availability left for IAT 244 before I can try to enrol. There was no WAITLIST option when enrolling, like there was for the KIN courses. Waitlist should be offered.</td>
</tr>
<tr>
<td>Too little space, people who got later times were not offered because spots were already taken. Other people with earlier dates when we have the same credits registered 1 day earlier, making lectures full quickly.</td>
</tr>
</tbody>
</table>
It seems as though the classes that fill up very quickly have small sections. For example the HUM 102 class I was hoping to take next semester has room for 97 students and has already filled. On the other hand CHEM 122 has space for over 400 students and has 20 tutorial sections, yet the class is not even 25% full and most of the tutorial sections remain empty. This seems like a mismanagement of the university's resources.

I wish there are more music courses offered in contemporary arts. Why can't I put myself on the waitlist? The upper-division English and Women's Studies courses should have more spaces in them. That are above the 100 level have very few seats, making it difficult to get the required classes for the degree!

It seems course availability in the Linguistics department is consistently low, and those courses that are available that are above the 100 level have very few seats, making it difficult to get the required classes for the degree!

The administration should be ashamed of themselves for not solving this and many other problems.

It would be fantastic if there was more Math offered at SFU. It is very annoying if the system tells you the course is open and when you click on it, you are denied. because of the waiting list issue - then don't say the course is open! majority of courses interfere with other courses because they occur during the same time. tutorial on a separate day? more interference with transportation. when you want to go back to the page, it won't let you. Then you have to re-start your class search AGAIN.

All other sections are full. This particular section's lecture was open, but the labs were full.

I can see why SFU is currently being regarded as a second rate university. It is because course availability, as well as many other long standing problems, is awful in SFU. The administration should be a shamed of themselves for not solving this and many other problems.

I really not enough sections for courses. I tried registering for a lot of my required courses for the past 2 semesters, especially upper level psychology courses, extremely difficult. and times conflict even if available, hard to register for more than 2 courses a semester.

better course selections date. because when it gives out the enrollment date some people only have one midterm done so they get stuck on the really late selection day

Tough luck for us who have late enrollment dates. My was going to be as perfect as it can be.

please make more room in the course for the spring 2009 semester since it is only offered once a year

Shouldn't make use take BISC before taking this.

There were very few CMNS 200-level courses offered this term, let alone on the Burnaby Campus. At least two CMNS 200-level courses are required for the 3/400-level CMNS courses, therefore I must wait at least one more term in order to get the pre-reqs I need to take the upper level CMNS courses.

I am extremely concerned about the lack of space in the accounting courses- I am an accounting major and could not get into any accounting courses.

It seems course availability in the Linguistics department is consistently low, and those courses that are available that are above the 100 level have very few seats, making it difficult to get the required classes for the degree!

The upper-division English and Women's Studies courses should have more spaces in them.

Why can't I put myself on the waitlist?

I wish there are more music courses offered in contemporary arts.

None of the classes in the same subject should overlap. It is hard to take required courses in Chemistry when they conflict with other classes I want to take in Chemistry.

I need more seats in iat labs!!!!!!! students are taking longer to complete their minors/majors because space is too limited!! seriously, it's making me angry

My concern with course selection for next term is regarding the fact that I have been enrolled in all the classes that are my electives and not my requirements, due to the courses being closed. I have declared my major as Psychology, and the courses I need to take for next term are Psych 102, and also a social breadth course in Criminology 101. It is to some sense mandatory that I could be enrolled in these classes for next term. Thank you

There's not enough class for almost all the upper level accounting courses!!!

I paid my deposit as soon as I could and enrolled as soon as I can but they were all already full. This happened to me for these exact same classes last semester as well, Fall 2008.

I have only taken WL 100, and do not have the required pre-reqs for this course. However, professor XXXXX has notified the WL advisor that XXX has waived the pre-reqs for me to enroll in this class, so I should be able to enroll

upper level electives are restricted for faculty requirements but do not provide enough electives for students who need electives for graduate

Psychology 102 should be reserved for students who were enrolled in Psychology 100.

I REALLY wish FPA 147 had more room!

The course wasn't offered.

This was ridiculous. I have to travel 2 hours each way to get to SFU and the least of bad options now has me going 4 days a week with two of the courses I require for my concentration being unavailable before my registration date. Please follow up with me as I would like to talk about this.

It would be fantastic if there was more Math offered at night! I work full time during the day, and would love to take night classes at Surrey.

it is very annoying if the system tells you the course is open and when you click on it, you are denied. because of the waiting list issue - then don't say the course is open! majority of courses interfere with other courses because they occur during the same time. tutorial on a separate day? more interference with transportation. when you want to go back to the page, it won't let you. Then you have to re-start your class search AGAIN.

All other sections are full. This particular section's lecture was open, but the labs were full.
The course filled up within the first 3 days of the course registration period. I noticed that the class size was expanded, yet it was still filled up. My registration date was on the 14th of November, and by then I had become 9th on the wait list. I am on my final semester and still do not have this course that I intend on taking. Perhaps the class size should be enlarged, or an alternative section should be offered.

| The course I actually want is ENGL 105W but it won't allow me to pick that catalog number. 
Selection is extremely difficult when you have an early enrollment appointment, so having a later appointment makes getting necessary courses extremely difficult. Otherwise, not too bad! 
Hello, can you please open up the waiting list for CRIM 101 in burnaby? I think that's not fail to not open a waiting list. thank you |
| NOT ENOUGH SPACE IN COURSES!!!!! |
| Good professor and class subject relevant to career aspirations. 
It would be help a lot to have MBB231 in the summer semester for 2009. 
I think that they should not make 300 level courses have such few seats and be offered at few times. Some courses are only offered once a year and if your registration date is late you cannot take it. 
As a Psychology Major wanting to get into a Counseling Psychology graduate program, I need to take EDUC 323, but the program is full, and the waitlist is full. I also need to take EDUC 423. This course and its waitlist are also full. I was hoping to get a waiver from EDUC 323, but since EDUC 423 is also full, I have no options. Please offer more than one lecture for a course 
the wait list for chem lab was full but still spots available in the class so i couldn't pick the lab that was open |
| Large lack of any courses available after the first 10 minutes. Not enough choices for tutorials either, all courses with waitlists are full as well. 
First of all, I am paying for this out of my hard earned money, therefore I do not want to be spending money on courses that I do not need. I expect that there will be a good selection if you want my money. I find this very frustrating! |
| I think it is absolutely unfair that I have such an early registration date and then I see that the classes are overbooked? That is not possible unless people were placed in the courses by instructors. I needed to take these classes as I was going to intern in the Philippines at a magazine company. Now I have to postpone it. For these popular courses there should be two sections each semester. 
Three science courses that I wanted to take were all at the exact same time!!! 
The course I actually want is ENGL 105W but it won’t allow me to pick that catalog number. 
Selection is extremely difficult when you have an early enrollment appointment, so having a later appointment makes getting necessary courses extremely difficult. Otherwise, not too bad! 
Hello, can you please open up the waiting list for CRIM 101 in burnaby? I think that's not fail to not open a waiting list. thank you |
| Have completed similar course to pre requisite and feel I can participate successfully in 231 if allowed the chance. 
No waiting list for any of the classes! 
It is silly how the mandatory kin courses are completely full and how even though I have a GPA of 4.33 get such a late registration ! None the less the kin courses I could register into, advisors won't make the exception for taking a pre-requisite at the same time ! It's very frustrating and leaves me the option of wanting to change majors because I have to graduate by a certain time! |
| Some of the classes filled up so quickly I never had a chance to enroll, how is that fair? 
I wish there were more options. Especially being a criminology student, I know a lot of students in SFU are majoring in this faculty, therefore it should either open up more classes or let the Crim major students register first. 
One section shows that the course is on a wait list or available. But when you submit it says that cannot enroll b,se enrollment is full. The courses offered are so competitive it seems and so limited. What is offered is not my area of interests and i dont even need for my practical work when i graduate. I dont wana take a degree that is useless in everyday life yet i have to pay back the student loan. Please provide enough choice of practical studies so that we dont end up with un needed or unpractical degrees. It is not a matter of getting a degree but the substance and practicability of it for everybody ‘s needs for everyday life requirements. Thanks |
| If a course is Required, students should be able to enroll in it. This is ridiculous. 3 semesters in a row now. 
There isn’t enough spots for students to take these classes! 
Spanish Courses consistently have an awkward time. Twice a week in the middle of the day makes it EXTREMELY difficult to work around other requirements. |

How ridiculous is it, that two of the MAIN REQUIRED COURSES for a psych major, are scheduled at the exact same time? I'll tell you, it's pretty ridiculous. When I wrote to the advisor, her answer to me is "you shouldn't have left courses required to graduate until your last semester." You wonder why SFU scores so low on every aspect of student satisfaction surveys. I have two classes left, and was hoping for an April graduation. Because of such a STUPID scheduling issue, that shouldn't even exist for REQUIRED courses in the SAME faculty, I am stuck taking a single course over TWO semesters. Thanks for nothing SFU. Thanks for delaying my ability to get out into the workforce 5 months earlier. Thanks for delaying my graduation. Thanks for forcing me to pay TWO TIMES the amount of student fees, based on forcing me to be here two more semesters instead of one.

WHY THERE ARE LOTS OF SEATS ARE RESERVED ALREADY, BUT THE SYSTEM STILL SHOWS OPEN?????!!!!!!!

Why are online courses capped at 45?

Would appreciate more CMPT classes that were not MWF but instead either 2 days or a 3 hr lecture.

I am in the Business faculty and I can't even get into the one class that I require to continue my Business studies, I find it unfair that I am in the Business faculty and we don't even receive reserved seatings for the classes we need. Other faculties such as Kineisiology do it for their lower division classes why can't the Business faculty do it as well.

I am VERY disappointed with the availability of courses this upcoming semester at SFU, especially the psychology courses. I don't even have enough room in the above space to show how many courses I could not enroll in. I looked on the "psych course offered spring 09" list and found that out of 27 -300 level psychology classes, SFU is only offering 11!! And out of those 11, 2 that I need conflict (psych 300 and 381), and none of the other ones are part of my program/my interest in my program (BSc Behavioural Neuroscience). This is a problem because I cannot officially transfer into the program until I have completed Math 154 and Phys 101 and Kin 142. The problem with this is that for the Fall 09 semester SFU computer system did NOT put me into the course properly so I had to wait to take it this semester, and math and physics are only offered MWF at one time! This is unrealistic to think that everyone can make it to courses that are only offered at one time a week! There should at least be it an option that students can take an equivalent course at a different time/day. What is funny about that is all the equivalent math courses to 154 that I can take are offered at the same time on the same day as 154! I could sit here and type for hours about my anger towards this situation, but all I have to say is that I beleive it's not fair that I can't even find enough classes to fit in my schedule to enroll full time in school and I am forced to take random courses because SFU is not offering anything that works for me. Why should I continue to enroll at SFU every semester to pay a lot of hard earned money and not get any closer to finishing my 4 year degree that I am in my third year of, and still require atleast 2 more to go, since I have to reduce my course load so I can survive?

How did you arrange of our course chosen????????????? I was arranged so late to select my course so that I can not choose any course I want!!! It is totally unfair!!!! should offer waitlist

This class has only a limited amount of seats for people out side a major or something like that--as stated in the description and I was just wondering I am number two on the wait list when will I know if I will get the class or not --I need to know so I can make other changes thank you

I'm upset because I enrolled for this course early, and was told to drop all courses once I recieved a Co Op job offer. After recieving a job offer, I dropped the courses. A few days later I was told to enroll in courses because I may not get to work for the job I was offered. Now the course is full.

Very difficult for students who have the latest enrollment dates to get into any desired classes. Very frustrating for a large number of students. Maybe there could be a link to options for students to take if they cannot get into their classes.

I am currently taking the course which is the prerequisite. Does the system not know this? Or do I have to wait until this term is completed?

My reg date was really late and because I am going into 3rd year the classes are smaller. I know my GPA was low but I feel that it should have been pushed up because of the limited number of spaces in the classes I need to take.

Need more spaces or classes in the day.

I wish there are more spaces available for Upper division accounting courses. I am a business major, but still can't take any of accounting courses offered at SFU because every semester they are full.

courses fill up before most peoples enrollment dates come around, and advisors are way to busy to help students out around this time as well which is also a huge inconvenience offer more tutorials/larger tutorial classes.

<tr>
<td>Not fair for people with such late enrollment dates, dates are not fair.</td>
</tr>
<tr>
<td>Very disappointed</td>
</tr>
<tr>
<td>so many courses either have overlapping times or they are not available. really difficult to make a working schedule for the semester!</td>
</tr>
<tr>
<td>Communication should not be at all three campuses. Almost all the 200 level classes for Spring 2009 were on Tuesdays and Thursdays making scheduling very difficult. It is impossible to travel from Burnaby to Surrey or Vancouver in 10 minutes. If you're going to be at multiple campuses there needs to be time for travel, not having all the classes at close by times.</td>
</tr>
<tr>
<td>It is very frustrating when you are not an FPA major/minor student but require two FPA courses and many courses require department approval. As well, when the required intro classes are only offered once per year, it sets me and others further back, thus making our graduation take longer than necessary. Having courses offered, both intro 1 and 2 all year would be convenient for students.</td>
</tr>
<tr>
<td>It sucks I couldn't get into any of the classes I needed. They are all full and because I just transferred from college my registration date was later than I thought it would be.</td>
</tr>
<tr>
<td>There are not enough seats for a lot of classes.</td>
</tr>
<tr>
<td>will my major of choice be accepted before the start of the semester so i can enroll in this class?</td>
</tr>
<tr>
<td>Offer more 400 level business courses.</td>
</tr>
<tr>
<td>Course availability was extremely limited. I am a Criminology major and was unable to enroll in ANY of my required lower-level courses.</td>
</tr>
<tr>
<td>In general the system works, the course selections are indeed very limited in space and at times.</td>
</tr>
<tr>
<td>WHY are many courses almost ALL at the SAME popular days and times? This makes it very difficult to build a timetable. Thanks.</td>
</tr>
<tr>
<td>The course availability is great for every subject except fine and performing art. Every semesters students are continually screwed over by the disorganization and thoughtlessness of the school for the contemporary arts. The program does every last minute. As I was registering for classes this semesters courses were literally disappearing on the class search. I called the office and they said it is because professors still aren't even sure about what they are offering and the spring 2009 schedule is not done yet! I feel like other programs have this sorted out by the time students need to register. I have taken classes in more than just SCA and have never EVER had a problem with registering. I do not recommend anyone to this program. I wanted to take introdution to movement as part of the random required courses I am to take but the class disappeared.</td>
</tr>
<tr>
<td>It is not fair that people who need to take the courses in order to get into a program are not allowed because it is full.</td>
</tr>
<tr>
<td>It's pretty ridiculous that a distance class can have limited seats. I realize you have to mark the assignments, but seriously, for a class that's offered as infrequently as Gero-300 is, 50 seats (12 of which are reserved for Gero diploma/minor students, and I bet there are like 4 of those in the whole school) is not even close to being a large enough class. Additionally, what's the deal with a 5 person wait list? How is that helpful? There should be at least as many spots on the waitlist as there are reserved seats for Gero students. Very disappointed.</td>
</tr>
<tr>
<td>Please make more sections or larger classes. Surrey or downtown is fine too. The entire graduation is delayed by a whole semeter where i have to take one of these accounting courses. it reduces the interest-free status period of 6 month after semester end by 4 MONTHS, because one course in a semester is not full-time.</td>
</tr>
<tr>
<td>General discrepancies between available tutorial spaces and lecture spaces (not enough tutorial spaces to place everyone in the lecture into one). Not enough courses offered and not enough spaces in courses offered to get the courses I need to graduate in a timely manor.</td>
</tr>
<tr>
<td>need more spaces !!!!! and should cancel the reserve space thing!!!</td>
</tr>
<tr>
<td>I found that enrolling in courses on December 5th was way too late. All of the courses were filled, I could not enter any course that I not only wanted, but I also needed, such as PSYC 102. I need that to get my Major in Psychology. I hope that the courses I need will open up so I can enter them before the penalty comes for dropping courses.</td>
</tr>
<tr>
<td>There are only Jap 100, 101, 200 and 201... no further courses after that. These are all beginners courses and I already am eligible for Jap 201 from previous courses taken in highschool. I am hoping to become a english and japanese teacher in the future...with this limited level of advancement it will hinder me. Thinking of switching universities if I cannot learn Japanese fully here.</td>
</tr>
<tr>
<td>Courses should have more space or time available for students who have late registration dates.</td>
</tr>
<tr>
<td>COMMENTS</td>
</tr>
<tr>
<td>-----------------------------------</td>
</tr>
<tr>
<td>Every semester I am unable to register for at least two courses, I need to get earlier enrollment dates if I'm ever going to graduate!!!!!!!</td>
</tr>
<tr>
<td>too many course conflicts this upcoming semester</td>
</tr>
<tr>
<td>SFU applied science would do well to offer upper division classes at different times of the day, not just all clumped together during the afternoon. It is true that some students might end up with a course in the morning and one in the evening, but that is preferable to not being able to take courses required for graduation.</td>
</tr>
<tr>
<td>BUS 320 should definitely have more sections. Having roughly 40% of all business students majoring in accounting, and only 15 available spots in one semester for BUS 320 is quite ridiculous.</td>
</tr>
<tr>
<td>More section of Edu 100 need to be opened up. Don't understand why in the Fall semester so many sections were offered and now there's only three!! VERY frustrating since I was looking SO forward to this course.</td>
</tr>
<tr>
<td>I was wondering why I had a fairly late enrollment time?</td>
</tr>
<tr>
<td>I didn't get it because I had the WORST registration date, and now I only have two classes, and I don't understand why I'm not on the waiting list for this class anymore!!</td>
</tr>
<tr>
<td>Very few 300 level biology courses are available for spring 2009, which will prolong my graduation. Not even &quot;option&quot; courses to meet my degree requirements were available. This will make me graduate a semester later now.</td>
</tr>
<tr>
<td>It sucks.</td>
</tr>
<tr>
<td>There is a scheduling conflict between TECH114</td>
</tr>
<tr>
<td>I am a joint major student and every semester I have issues registering because the faculty fails to omit the courses that I am not required to take (but which are required for non-joint business majors). The course I wanted to take needed a prerequisite which was supposed to have been omitted for me, and that's why I couldn't take the course. It's a good idea to omit all of the courses a joint student needs to take so that the student wouldn't have to contact the advisor every semester, providing stress on both ends.</td>
</tr>
<tr>
<td>You are unable to enroll in this class at this time. Available seats are reserved and you do not meet the reserve capacity requirements. This is what it said, for the reason why I could not register. I have not declared my minor, and haven't yet decided whether I want to do English or psychology, so I really wanted to take this course, for my BA. Is there still an opportunity of taking it?</td>
</tr>
<tr>
<td>It's really frustrating having a late registration date. Being a business student, I couldn't even get into any business classes for the Spring semester</td>
</tr>
<tr>
<td>more tutorial/lecture times</td>
</tr>
<tr>
<td>Why is there only one section for 420? It got filled up in one day =(</td>
</tr>
<tr>
<td>I picked my courses quite late, I can't really complain that most of them are full.</td>
</tr>
<tr>
<td>Very late registration appointment left very little courses available. This is unacceptable as I am unable to get in to majority of the courses I tried.</td>
</tr>
<tr>
<td>I think there should be more courses available for certain things that are required to graduate. For the WQB courses especially. FPA and KIN are recommended for getting into the PDP and I think these should also have more classes and options for students.</td>
</tr>
<tr>
<td>why are there so many 3 hour lectures?</td>
</tr>
<tr>
<td>Some of the courses have not been offered for awhile. In order for completion of the diploma I need the above mentioned courses and do not want to have to take extras that either do not suit my purpose or need other pre-reqs as I already have two degrees and just want to complete the Post Bacc asap. I would like to get the course selection completed without having to take any extra credits. I would also really like to see another cohort on Diverse Learners offered in the Maple Ridge area.</td>
</tr>
<tr>
<td>filled up fast.......enrollment date was very late compared to otherss..</td>
</tr>
<tr>
<td>very disappointed with course availability this semester. did not get 3/4 of the courses i wanted.</td>
</tr>
<tr>
<td>to allow me not to be wait listed anymore, i've been needing to take this class for the past 3 semesters and would like to get it done before i move on to my upper division courses..</td>
</tr>
<tr>
<td>I need this course as a requirement for crim major.</td>
</tr>
<tr>
<td>I inquired about changing the time by one hour of one class and was told it was not possible even though there were other people in my geog 317 class who expressed the same concern.</td>
</tr>
<tr>
<td>I hate taking afternoon courses, and refuse to take evening courses (anything that ends after 6pm), and this semester was extremely frustrating as all except two courses I am in is in the afternoon. Also, I really wanted to take Sports Psychology while here, but I dont think it is offered anymore at all!</td>
</tr>
</tbody>
</table>
I am in the extremely hard time finding courses that fit with the two classes I had to take, had to end up taking distance learning. It is extremely frustrating to have a terrible schedule two semesters in a row. Due to such a late enrollment date my schedule now is a disaster. I hope from next semester on enrollment dates are not so late because it is really frustrating to have a terrible schedule two semesters in a row.

More HR courses need to be offered. OFFER COURSES IN THE EVENINGS AND MAKE LECTURES AND TUTORIALS ON THE SAME NIGHT!!!! I don’t want to come all the way to Burnaby just for a tutorial!

It is quite absurd that BISC 102 only has 280 available seats when there were over 400 students in BISC 101. Isn’t it in the school’s best interest to supply more classes for students? BISC 101 students should have priority in taking that course. Horrible, thousands of students try to apply for courses and have no chances of getting in.

I wanted to take one of my courses downtown but was unable to. English 206 downtown is reserved for SFU NOW students...

Bus 320 is a required course so offer more sections! I have tried to enroll in Bus 320 for two straight semesters without success and am starting to feel like SFU is holding me back from advancing my education all with this one class.

By the time I got to register for the Spring 2009 semester, all classes that I planned to take were full and I had a very hard time finding courses that fit with the two classes I had to take, had to end up taking distance education.

I am in explorations elective stream and I wanted to sign up for the 9:30-10:20 lecture and the tutorial 10:30-12:20 with sean markey, but when I confirmed it showed an x and said I cannot.

It is extremely frustrating that I got such a late registration date because I didn’t get a single course that I wanted to take, they were all full! This semester is going to be very difficult because I have no interest in any of the courses I am taking but I had to take something...

Looking ahead, there’s no indication that CMNS 220 will be offered any time soon... I really hope this isn’t the case.

I believe I was told that I could enroll in these classes and now at the last second, I am told that I need prerequisites?? I am not interested in taking the other Exploration courses (110 or 130) that are required to take these courses!! Please just let me in!!

why is there a section available that has everything set to TBA? it is hard to fit that into a schedule when the location, time and even instructor are not determined.

I need that course to major in visual arts, if I can’t get in it will take me a year longer to get my degree.

Very few options available in upper division History and Political Science. French is much better at ensuring that required and elective courses are available. I find this unfortunate, given that I have declared a History Major, and a PolSci Minor, but have not declared anything for French.

should open more classes so students have more choices

there is no point in saying there are 131 available seats in the class when you only bother making enough tutorials in the first place and so there are only 12 available seats left. the tutorial system is a waste of time since everyone learns at their own pace, and therefore should never be made mandatory. so when one cannot get into a lower level mandatory class for their degree because they only create 2/3's the amount of tutorials that the class needs, it makes the school look like a complete joke.

I am in the faculty of business, and am now in my third year. During registration in the last two years, I have had extreme difficulty getting into a number of required Business courses. I am fed up with this. I want to major in accounting, however have yet to be able to register in the course, as ALL sections, and their waitlists, are full before I even get the chance to register. I sincerely hope that something is done to remedy this problem, as myself, and many others are extremely frustrated.

<tr>
<td>Since this class is so in demand it should probably have more than one section offered.</td>
</tr>
<tr>
<td>Those planning/doing a major/minor program even in first year should have SOME priority, over those in other academic faculties taking same classes for their electives, or other requirements OUTSIDE of their programs!!!</td>
</tr>
<tr>
<td>The kin classes never have enough room and are always booked up by people who 'may' take the class.</td>
</tr>
<tr>
<td>I think that it is unfair that for kinesiology students a huge portion of the seats in the classes are reserved, but that is not the case for history courses.</td>
</tr>
<tr>
<td>Many classes held by B. Cartwright are often filled to maximum capacity. If possible, it would be best to expand his class capacity to allow more student to enroll in his classes.</td>
</tr>
<tr>
<td>I think it's ridiculous that communications 221, 223, 253, 323 are all offered at 10:30-12:30 on Tuesdays. How can a student fulfill their lower division requirements when it's impossible for them to take two lower division courses at the same time? I usually take 4 courses per semester, but because of this inconvenience, I'm left with no other options. I'm close to finishing my major, and yet, I still cannot get into the courses I need.</td>
</tr>
<tr>
<td>Computer system should be little bit faster. On Friday I spent at least 5 hours to enroll in classes it was not letting me to go through. However, it is very helpful we can do everything from home. Thank you.</td>
</tr>
<tr>
<td>Unfortunately, the email regarding my course enrolment date was sent to me a week AFTER said date occurred, making me a week late in my ability to register for classes.</td>
</tr>
<tr>
<td>There should be more than one section offered because there are so many communications students wanting to take this course. 40-odd spots is not enough.</td>
</tr>
<tr>
<td>I would like to have taken Sec 5803 - the distance education option.</td>
</tr>
<tr>
<td>It would be nice to have more tutorial offerings for courses to lessen the chance of conflicts with other classes, or make non-mandatory course tutorials such that they can't conflict with potentially necessary classes.</td>
</tr>
<tr>
<td>It would be ideal for students to know the name of the professor for teaching a course instead of the word seasonal.</td>
</tr>
<tr>
<td>I really wanted to take the physics course, but I took MATH 157 and that is not the co-requisite and/or the pre-requisite they ask for this course. I wish they'd give me a chance to take the course and if they feel that I can't handle it, then they can drop me from the course.</td>
</tr>
<tr>
<td>I was unable to register in the above courses for fall08 and now I am unable to register for spring09 as well. Perhaps more class sections could be introduced to reduce the waiting list.</td>
</tr>
<tr>
<td>Day classes not available anymore. This is the second semester in a row that this course has not been offered. Like many, I work during the summer and so if it is offered at that time I will be unable to take it.</td>
</tr>
<tr>
<td>I think there should be more seats available for English classes.</td>
</tr>
<tr>
<td>How the heck do you manage to have a required course offered 2 semesters a year with waiting list in the <em>several hundreds</em>.</td>
</tr>
<tr>
<td>There are three courses that I was looking at taking for psychology. Unfortunately, I am only able to take one since all three are at the same time.</td>
</tr>
<tr>
<td>They need to make classes bigger for those courses...they are smaller then others</td>
</tr>
<tr>
<td>ya, there should be more of those English courses i selected above, because they're required to transfer to business.</td>
</tr>
<tr>
<td>Please consider adding more evening sections. Working full-time, it is disheartening to see so few night classes available. That being said, I'm glad an evening section for CMPT 150 was offered this term. Thank you!</td>
</tr>
<tr>
<td>Most of the CMNS courses conflict with eachother because most are offered at the same time as one-another there seems to be a lack of course offerings in the psych department for this spring semester because there aren't even a total of two classes that I can take for this spring in this department</td>
</tr>
<tr>
<td>I think it would be nice if there existed some sort of prerequisite for this course (i.e. &quot;have completed 30 credit hours&quot; or &quot;have completed a 100 level CRIM course&quot;). I have tried to enroll in this course twice now and it has been full before my enrollment date even came, probably due to the fact that there seems to be no restriction on who can register for it.</td>
</tr>
<tr>

</tbody>
</table>
It doesn’t make any sense to have any time conflicts at all within an accredited program; this shouldn't be a problem. Scheduling issues shouldn’t happen when specific courses are required, and I've heard other people have had similar problems.

Bus 342 was canceled.

As a biophysics major, I find that the physics and mbb courses often have time conflicts (i.e. both at 9:30 mwf), making it nearly impossible to plan my schedule in order to graduate in a reasonable amount of time.

The course availability at my registration date and time left me no space in any of the lectures for any of the courses I had originally intended to take.

The business courses always seem to be full

SFU needs to get a registration system like UBC where you can select courses in advance and arrange your time table and alternative courses/timetables prior to registration date/time!!!!!

Stats 285 requires Math 232 as a pre or co req but the only time it was offered this semester was at exactly the same time as Stat 285.

I confirmed my interest in this course with the instructor and received approval via email and instructions to complete approval to waive pre-requisite 2nd 200 level course with Sheila Falconer. I completed this process but by my registration date (today) the class was full. I would still like to be enrolled in this class for Spring 2009 if at all possible. Thank you.

There should be priority for those who require these courses.

I’m a student that major in Psychology and I’m now on Burnaby campus. I have to take Psyc 100 but it is full for the one in Burnaby campus and the one in Surrey campus is conflicted with my class schedule. Please add me in the Burnaby section of Psyc 100. Thanks a lot.

More Crim courses on Mondays would be nice :) 

Course availability is extremely limited and unfair to students with later registration dates
### COMMENTS

It is unfair that students have different enrollment dates. The date differences can be as long as one month. Some students can enroll as early as November 10, while others can only enroll after final exams. As a result, many courses in the available time slots are being taken, leaving undesirable times, such as those of evening, night time, and surrey campus, for "inferior" students to choose. Students with early enrollments are not superior than the rest, as many of them are often below average in terms of intelligence and campus involvement. This is a banal enrollment system, and I would like to see some future changes. Thank you.

Perhaps sacrifice tutorials that come 1, 2, 3 hours after the lecture for more tutorials that follow the lecture. Very few people wish to take tutorials 1, 2,3, hours after the lecture as it usually doesn't work with their schedule or is simply cumbersome.

The entrepreneurship course requirements are not offered frequently enough to fit into any reasonable time line. Where is new venture finance and new venture marketing? Instead New venture planning is offered which sounds applicable, yet the course prerequisites make that only available in the final stages of the program. Also, I highly doubt that the prerequisites are necessary for such a class, aside from being 400 level. I am not satisfied with the availability of the courses I need to finish my program. I am currently less than 2 semesters away from graduating and can only enroll in a single class for the upcoming term. Very frustrating.

Um..make the class size a bit bigger? 18+3 wait lists are...not that flexible, especially if the day before you find you everything except for surrey and harbour centre is taken up, and you cant make it to those...lpi here i come ...

I could not get into the tutorial that I wanted.

I was only able to register for one of the courses (and section) I wanted. My first and second choice for BUS 251 was full and because of this I was unable to register for my first or third choice for BUS 237 (see above) or second choice for for BUS237 because it was full. I was also not able to register for my first choice ECON 105. I had difficulty finding an elective to register in-finally registered in one class that I had not considered before. - Ended up registering in only 4 classes.

This is about the third semester in a row that I have been royally screwed by my enrollment appointment. Each semester I get an appointment such that all the classes I need to take are already full -- This is XXXXX, I should be able to get these classes since I am required to take them to finish my degree! More spaces need to be offered

please open up another section. The next time this course will be available is on Spring 2010. Not good.

there were several classes that had the green circle indicating they were open, when I went to enroll, I was told they were full. your system is broken.

Many tutorials for Chem 122 and Phy 121 conflict with their corequisite labs.

For Kin 303 there were 3 spots left in the class and an available lab but i could not register in it and i am an approved major!!!

More classes should be offered at Harbor Centre so that students who need to work full time jobs will have the option of taking classes early morning on weekdays, weekends or at night.

Thanks SFU for screwing me over once again!!! If the professors won't overload me into these courses, my CGA training is going to be a heck of a lot longer and harder!!!!!!

It's very hard to get into the classes I would like to be in/ are required for my degree. The limited availability of classes cuts down on choices of classes I can take. Because of this, I have to take classes which I don't really want to be in.

To make these courses available during the summer would be very appreciated since they fill up so quickly during the fall and spring semester.

My enrollment dates have always been late!!! My gpa is not low, and credit wise I am 2nd year, I have been forced to give up seats to people not even in the faculty of business. What the heck is going here? I'm always forced to take night classes or choose other electives because my date is so late. This is so UNFAIR!

I transferred here from a university in the states. I love it here and I love SFU, but it's impossible to get the classes that I want. I will be a 3rd year student next fall, but on my profile it says I am a freshman right now. I think that is why I register so much later than others at my level. Is there any way to change this status so that next semester I can get a better pick? Thanks

I would like to enroll in these courses.

With SA 302 being one of the few SA classes that meets a W requirement, seeing it fill up before I can register for it every semester is frustrating. That said, I think it is mostly because a lot of students want to take a course with Bogardus.

The course was "closed" so I could not put myself on the waitlist. I would like to take it tho - wondering if I should attend the first lecture anyway just in case enough people drop that I could get in
**COMMENTS**

Very frustrating to be in second year looking for courses when enrollment date is so late. Classes were all full or conflicted with schedule.

The lecture is open but all the labs are full and closed. How come?

I need Educ 327 (Self, Psychology and Education) for my minor in Counselling and Human Development, however I’ve been unable to enroll in this class for over TWO YEARS! I’m in my fourth year with a relatively early enrollment date, and I STILL haven’t been able to enroll in this required class. PLEASE consider offering this course more than once in at least ONE semester out of the school year? There’s clearly a need for it.

There should be a wait list available.

It doesn’t make sense to schedule courses that would obviously interest people in other departments at the same time as core required courses. Visual Arts students might want to take classes in other departments that also study art. This semester a Humanities class which has the topic of "Art Worlds" does seem quite well related to Visual Art, but it’s at the same time as a core studio class. Not too brilliant. Not to mention the myriad of film courses I’d love to take but can’t because one has to be in the program in order to take any, yet, I’m expected to have a studio class outside of major, but look at all the red tape. I thought this was supposed to be an interdisciplinary Contemporary Arts department.

Every semester I have trouble getting the courses that I want! When I first plan which courses I had planned to take, however, when I enroll for the courses, one of the lectures would be cancelled. Very unhappy!

Probably the most upsetting was the classes where there were restrictions on where the student focused his or her discipline. IAT was probably the most strict in this matter as NO students out of techone can take it. For an introductory level this is kind of silly. How do I know if I want to major/minor in photography if I can’t take a beginner course in it?

I was not even able to get even 1 class that I wanted which is relevant to my major both this semester as well as last semester and am stuck taking electives again.

There is class availability for these classes, but when it got down to the end it said the spaces were reserved for others. Great.

There is a lack of 3rd year level psychology courses offered this spring semester. I hope that a few more classes will open up soon during registration.

The prerequisite for this course (Chem 110) was only offered in Burnaby during the Math 251 that is required for my program.

I have 55 credits and need 60 to register in most upper division courses I want. I do not feel I would be better prepared for upper division classes after another class and a half. I have successfully completed the prerequisites, more lower division courses arts courses will not help with upper division economics.

There was enough space for me in the lecture, but no space left in the studio labs!! :(  

Enrollment time and date did not seem fair. Moreover there should be more than one class available per term to avoid conflicts and to satisfy requirements.

On the the day I was granted election of courses, almost everything was already closed and full. Therefore, I have added two english course which are WQB requirement. If possible, please advise of availability for either. Additionally, evening classes would be prefereable. Thanks!

I do not have any B-Sci thusfar, and am not good with math or science. The 2 courses listed above are ones that would work for me and I really need to take them!

I think that all students who are graduating should be able to get all the courses they need to graduate on time.

by the time my application was approved, there were no courses left for my major at either the burnaby or vancouver campus. very dissapointing

This course is ALWAYS full!

It also conflicted with other classes

Upper level psychology courses that i need and have requirements for are all offered at the same time.

Ridiculously hard to get even 4 courses that worked together, that are not a waste of my time.

Even with a fairly good registration date, I could not get these classes since they all filled up in 2 days. Please add more sections or allow for more students in every class.

It was strange because right when I was allowed to start picking courses every single course I wanted was already filled up? How is that fair?

The course allow for more students than the tutorial sections could hold. all tutorial sections were full even before the class was full!

very, VERY interested in the class and was planning to take it with a couple of friends. never got the chance to select because of registration date. been trying to take this class for two semesters.

<td>I wasn’t able to pick anything but at last I got some courses that I doubt that I need them</td>
</tr>
<tr>
<td>How come there are so few upper division psychology courses offered in Spring?? I’m not going to list them all, but many of the psychology courses I wanted to take are not being offered this Spring term...very frustrating!</td>
</tr>
<tr>
<td>I need this course so I can graduate on time!</td>
</tr>
<tr>
<td>Its a online course why can’t they open more spaces up?</td>
</tr>
<tr>
<td>The availability was terrible. Almost all the courses and my back ups that I was going to take were completely filled by my enrollment date.</td>
</tr>
<tr>
<td>i should be able to get in but im not sure why its not letting me, i really need a w credit before my second year ends at sfu if there is anything that could be done t would be highly appericiated. thank you</td>
</tr>
<tr>
<td>Being a first year I'd like to think SFU would have a very open availability for first year students because we are unaware of what we are going to do in the future. More than the above courses I wished to take but were either closed or the wait list was over 100 students. I'd like to get into the famous KIN 143 and KIN 140 courses but those courses fill up like crazy and don't give students not on scholarships a chance to get into them. This semester I'm only taking courses to fill credits. This semester just seems as a filler semester.</td>
</tr>
<tr>
<td>It is ridiculous that I have to pay thousands of dollars for course I do not want or need. How are students suppose to complete there majors or minors if they cannot get into the required courses?</td>
</tr>
<tr>
<td>It is extremely difficult to find courses and absolutely ridiculous that ALL sections can be filled up. For a first year student this process is stressful as is, and enrollment for this term has made it much more difficult.</td>
</tr>
<tr>
<td>Every course i seem to want to take overlaps with each other, or it is full. Provide more variety in times, at the same campuses, or provide more classes of popular classes at the same campuses.</td>
</tr>
<tr>
<td>I understand that there isn't much that can be done in these situations, but I'm extremely disappointed that I've been unable to enroll in /mandatory/ courses for my program.</td>
</tr>
<tr>
<td>Tried many different courses to enroll but was not succesful because of seats availability. I am confused because it showed that the clss was open but when I tried to enrol it said it did not have enough seats.</td>
</tr>
<tr>
<td>There should be more class (Lecture) session availability for each courses.</td>
</tr>
<tr>
<td>because I am taking math 308 at surrey campus it is on m w and f 10:30 to 11:20. cann't bus 251 how will get to surrey campus in ten minutes since bus 251 is on w 8:30 to 10:20</td>
</tr>
<tr>
<td>Why can I not register when it is open?</td>
</tr>
<tr>
<td>I think the courses are arranged badly since i am in science major, i have to take at least 2 science courses. And i want to take some as my electives and the time always overlap with other courses which make me have no other choices. Also, most of the courses are full. All the 100 level english courses are full. I think that is unreasonable because we need english as a W course and it is ALL FULL.</td>
</tr>
<tr>
<td>All course sections for CRIM131 were full 2 weeks before my registration date.</td>
</tr>
<tr>
<td>Yes. I am registered in legal studies minor but I am totally blocked out Crim 332 and 338, one of which is required for the degree. Moreover, I am blocked out of CRIM 330, although there are plenty of seats left. In fact I am blocked out of all third year criminology course. How in this world am I to complete the requirements for the legal studies minor that I have declared? Another problem is a lack of upper level Writing courses. I wanted to take POL 426W next semester or CRIM 300W but I am not allowed in. Why are you not offering enough Writing course to give the students a chance to complete their degrees?</td>
</tr>
<tr>
<td>NEED MORE SPACES!</td>
</tr>
<tr>
<td>I couldn’t select courses that are required for my actual degree because they were full which was highly annoying.</td>
</tr>
<tr>
<td>Seeing as I’ve already taken the first four weeks of physics 100, and it is only the bio tutorial that conflicts with the physics lecture ONE DAY A WEEK, I was planning on alternating between lecture/tutorial for the duration of the semester. The lab/tutorial component I would to take is sub-labeled D116 and runs Friday 930-1230 with the tutorial being Wednesday 1230-130. If there is any way an exception can be made in my favor, I would be incredibly greatful.</td>
</tr>

**COMMENTS**

There are not enough classes/spaces offered in Kinesiology (every term)! I’ve been at SFU for 5 years now have a GPA over 3.0, and I’m just barely over half way through my Kinesiology degree- not because I chose to take a smaller class load, but because classes are always full by the time my registration date rolls around. With a limit of only 6 credit hours on wait list the most I can hope for is 2 classes each semester and that's only if I’m lucky and the 15 people ahead of me decided to drop! Again this spring's availability was ridiculous and by the time it came to my turn to register not one Kinesiology class that I needed was still open. I keep being told that the more credits I acquired the higher on the registration list I will go- but how can I get credits if I can't get into the courses I need and how many years does SFU expect me to sit around and wait for these classes. It shouldn't take 8 years to complete a 4 year degree. MORE CLASSES NEED TO BE OFFERED AND MORE SEATS NEED TO BE AVAILABLE OR STOP ACCEPTING SO MANY STUDENTS IF DON'T HAVE ROOM FOR THE STUDENTS ALREADY IN THE PROGRAM!

I had an earlier registry date and was still unable to get the courses I wanted. As a fourth year student who has declared my major this is unacceptable to me.

can you open more spaces for Japanese (for the 2009 Spring Sem)???

Do you think it’s possible that in the future that they open up more space to allow up to 100 students? This course is popular and only those who get to pick their courses first will ever be able to learn Japanese.

I was able to get all the classes I wanted besides two. One was cancelled and another I was dropped from the waitlist when it was purged. I fail to understand the reasoning in why there are no waitlists for upper division CRIM classes, but waitlists for other departments and faculties. Where is the fairness in this? It is absolutely ridiculous that I'm expected to just check go.sfu 10 times a day hoping someone has dropped a class. Someone else with lower credit count, and a lower GPA get to have priority in classes only because they were lucky enough to see an empty seat while I was at work. I think it poorly reflects on this school, when a student in their last year needs to wait until the first week of classes for someone to drop a class. This causes me a large amount of anxiety, and puts me behind in my schedule having to jump into a class after the semester starts.

There should be some spots reserved for business majors already in the program who still need to finish their lower division requirements.

How does the enrollment dates work? Is it based on the GPA?

What is going on? I am registered to write my FAL (English language proficiency index) test December 6. Literature was my best mark at University of XXXXXXXXX. These are entry level courses. Why has by registration been refused?

The econ class capacity is too small (only 20 people). Should either increase class size or offer more classes.

The course availability is completely flawed in this school. Classes that i need for graduation should be made available.

Very hard to choose from such a small amount of courses. Please make more class sections available!

Yes, this is absolutely ridiculous. This is the second semester in which I was unable to take the required business courses. I am in the Faculty of Business Administration, yet I need to jump through hoops and spend two semesters taking only electives because the courses that are required for my degree are filled up and no longer offered. The enrollment system is border lining stupidity. The students with a later enrollment date are being forced to choose between taking courses that have nothing to do with their degrees, or skipping the semester in hopes of better luck next time. With the tuition being what it is, you'd think there would be ways of offsetting this issue. Bottom line, the enrollment system is a joke.

Waiting list should be made available.

As this is a distance ed course, I hope that there will be ample room for me to enroll. This course is required in order to take several other courses, so not having it presents a problem for progression. Thanks. Hopefully, I can get into this section.

This class has a very small enrollment capacity and I don't understand why.

It would be helpful if history classes were available in the Summer 2009 class search

I think class sizes for smaller classes such as IAT 100 should be a bit larger because so many people want to take it and it fills up so fast.

surrey offering was full

There is not enough selection of economics courses
I am a third, going into fourth year Bachelor of Arts student, trying to finish up her degree. This is very difficult when very few of the B-Sci classes, the ones that are not geared towards students wishing to have a degree in the science field, are offered during a semester. And many of the courses that are specifically required for my major conflicted with those few non-science student science courses that were offered. I would like to finish my degree as soon as possible, while still maintaining four or more classes, and not wasting too many of my classes taking electives. This is difficult when there are not many courses that I can take that fulfill the B-Sci requirements that are not designed for students wishing to go on in those fields. I would be happy to see more of those courses that Bachelor of Arts students could take that fulfill the B-Sci requirements, especially as we are required to take two of them. Thank you.

no comments....just please save some spaces for the art faculty’s student first (linguistic department to be specific) so we can complete our requirement courses in time instead of delaying...

I should be able to enroll in this course since I am in the Gero Post Bac Diploma program but it won’t let me

I do not find it fair that my enrollment date was about a month after another 1st-year students on my floor. I am paying for all of my tuition, and this does not make me want to stay. The HUM 101 course at the Harbour Centre was stated to be “reserved” for other students. If this is the case, then why was it offered to me in the first place? The SA 150 course I was told to take as a way to take a Q course next year, SA 240, since the IS 240 is full. I do not now meet the prerequisites for the classes I need to take next year. I am extremely unhappy about the way that this has played out, why am I shelling out close to 8,000$ every year if I am not even paying to receive the education that I want and deserve? Simon Fraser University has been an extreme letdown to me this year. I sincerely hope this does not continue in the future or I may go elsewhere.

my first semester marks were extremely high, yet my course selection date was below my friends’ which their marks were terrible. I find this extremely flawed.

Though there were open spaces in STAT 203, the system would not let me enroll. Since it requires no prerequisites, I don’t know why it refused me.

You should allow more than 30 people per english class. They all fill up so quickly. Also the criminology department stopped allowing people to declare, and the only course offered without having to declare is now full.

Am I not able to take the prerequisite in the same semester as the course it is the prerequisite for? I am really interested in Kinesiology but it is hard when there are no classes available for me to enroll in. ie. Kin 143, I am really interested in taking this course.

some of the courses, such as EASC 201, don’t have any waitlist spaces. This is sort of annoying since I would like to be on that waitlist if anyone drops out.

Lecture is not full yet tutorials are full. =[

It frustrates me that this course, which isn’t offered often and for which you need a certain french level conflicts with another higher level french class. They should check with each other. This would’ve been my last chance to take it and I cannot because there is no communication between departments.

Well I am a comm major but because I am entering my second semester at SFU I was given a course selection date of Dec 1st. What is ironic and absolutely retarded on your part is that all CMNS courses become unreserved after the last day of November....thanks so much for that. Furthermore, 3 CMNS required courses for graduation all occur at exactly the same time. Is there anyone at the helm of this ship? What else...well I was unable to take any courses I wanted this semester and got into only 3. If it wasn’t such a hassle I would switch schools.

CRIM 315 WAS AN OPEN COURSE, BUT HAD NO TUTORIALS LEFT OPEN!!! HOW AM I SUPPOSED TO ENROLL IN IT?!

I am working towards applying to do my MEd in counselling. I did my BEd at Uvic, which is where the problem lies with getting into these courses. I was told that in order to do my MEd I needed Educ 423 and Educ 323 as prerequisites for the program. What I was NOT told was that the prerequisites had prerequisites! I assumed (incorrectly) that my BEd would suffice in allowing me to enroll in these courses. When I tried to enroll online I was not permitted to enroll in the courses. It took me two days to track down the appropriate person to talk to about this problem (Jacqui in the education advising dept). She then informed me that I needed to fax her my transcripts in order for her to see if I had the proper prereq’s to get into these courses. I informed her that SFU already had my transcripts. She then took another day to check my transcripts, and to inform me that I, in fact, did NOT have the correct prereq’s, but that I could ask permission from the professors. By the time I sorted all that out, and got a hold of the professors to request enrollment, one of the courses was already full. Had I been given this information ahead of time, I would have been able to remedy this quickly and would have been able to take the courses. As it stands, because I do not have the correct prereq’s for the MEd program, this is going to bump me back an entire year in doing my masters. I’m not impressed.
Unfair! Courses in a particular curriculum should be available to those who are required to take it.

Yes, please make more sections.

When originally registering in 363, there were two options marked as "LEC" which was confusing and when I tried to enroll it said the course was reserved and I did not meet the criteria when really, I should have just been selecting the other "LEC". If I had known the error was mine and not a registration restriction, I would have got the place I wanted in 363. The error message needs to be more clear.

educ 326 - 8618 which is a distance education class is full. I am on the waitlist and currently in fourth place. It has been on fourth place for approximately two weeks now and noone has dropped the class. I really need to take this class as an elective.

I am upset to say the least about the course availability. I was able to get into two of the classes I needed and the other two I wasn't able to get in though there are seats available because those seats are being reserved. Not to mention it is hard enough to find times that work and don't conflict with other courses and to be in one campus a day as opposed to switching, but when you find one that has seats and finally fits your told you cant enroll, its ridiculous. And also I couldnt find a single english class that didn't conflict or that was available. again once I finally found a class that worked and had seats I couldn't take it because it was reserved.

Sent in the prerequisite waiver form for CMPT 225 but website would not take request? Frustrating. What can I take besides BUS 364 to replace it?

The final exams of several upper level Kin courses are all on the same day or very close (ex: Kin 407, 306, 481). This makes it hard to take these courses together in the same semester.

Why are all the math classes I need only offered in the middle of the day? I can't keep my job and take classes at those times.

I phoned in the day of my course registration and since I was not enrolled at Surrey Campus I was not able to get registered the date I was told there for I phoned in to Student Help and the person I talked to told me to try it on Monday morning first thing so she suggested for me to stay up late Sunday night to ensure my spot which I did. Although her information was wrong and I was constantly checking through out Monday day to see if I could register and I still wasn't allowed. I checked right before I went to bed and woke up Tuesday morning signed on to see if I could register and I noticed that the courses I wanted and I was told I wouldn't have a problem getting were full and there was no wait list. Therefore I was given false information by an SFU Help line member that cost me enrollment for this semester in required courses for my degree.

These two courses are required for my lower division requirements for the Industrial Math Major program which I am planning on taking. I find it unfair that my enrollment has disallowed from taking Required courses.

I'm wondering why FPA 147 is full even though it's a distance ed course.

Awful student information system makes course selection very painful!!!

I'm a first year business student and I'm not sure how the time slots for picking classes work, but my lower division requirements such as organizational business, all of the English classes etc were full by the time I had picked my classes...I now only have 3 classes rather than the 5 classes I was aiming for. I don't want to rant, I just feel a little ripped off, but I know I'm not the only this has happened to.

Courses should all be first come first serve. Wait list can discourage other people from selecting the class.

courses offered are so few that I have nothing I like to choose, just find some courses I am not interested in to fill the schedule.

More courses should be offered through Distance Education. It allows the student to keep working while going to school and significantly reduces their debt load upon graduation.

Courses that I am required to take are reserved for other students.

Hi there, I work full time during the day, so that I could pay for school and other expenses. I have taken most evening / distance education classes in order to finish my degree. But I need a few more. There are no more classes that I can take in order to finish my degree while working full time, and the ones that are in the evening / distance education were full by the time I had my enrollment date. I am working towards a Joint Major in Criminology and Psychology, and I would like to finish my degree. I know there are people in the same situation as mine. Please try and have more classes available for evening / distance education so that I can finish my degree in a timely manner. I would have liked to be able to just go to school and maybe have a part time job, but unfortunately I need to work full time in order to survive. At the same time I also need to finish my degree. Please try to do something about this in the near future. It would be greatly appreciated by many. Thank you.

I have found classes that I really wanted to take. Those classes were Crim 131, However, I did not get a chance to take them. I did not get to pick any Criminology courses.
COMMENTS

Require more support for indigenous peoples and languages.

This is the last course I need to be able to declare my major.

This is the second semester in a row that I have not been able to register for these two courses due to having a late registration date. These are the last two lower divisional courses I need to move on and it is frustrating that I am not able to get into them even though I try to register as soon as it is my registration time.

I would like to register in this course. I have Math 150 and Physics 12. Please advise.

I could have been able to get in my classes if I had an earlier enrollment date. Offer more classes

Not enough space for all students who need to get in...Registration dates seem to be allocated with no rhyme or reason...

will there be additional openings.

The University offers so few English courses in Rhetoric and Composition. Scheduling both 375 and 371 at the same time is absurd.

Third time Could not get into this class, This is ridiculous

I need this class so that I can eventually get into the Education program. Every time I tried to register for it, it told me that I needed department consent or something like that.

My ideal tutorial session is full. The others are okay. But, they have conflict with my other classes

I wish there were simply more available space in the courses--this is not a new problem of mine with Simon Fraser University, and it has seriously affected my decision to enroll in this school next term.

Should have at least two sections for ECON 102.

To many conflicts with Explorations, very frustrating.

I wanted to sign up for intro to prose genres (104) distance ed. so it wouldn't conflict with my schedule.. since I had a late registration date, the class is closed and there is no waiting list!

I don't understand how all THREE lecture sections of ECON 105 conflict with other courses....This is very sad:(

Really horrible. Please offer more courses.

I don't understand why business is not able to reserve seats for BUSINESS students like the kinesiology faculty is able to do. I worked extremely hard to get accepted directly into the business program and I know for a fact that there are students from other faculties that did not get accepted into the business program taking up space in business courses.

Conflicts with another Essential Business course, BUEC 232!

Students minoring in a subject should have slots reserved for them as well. I find there are SO many reservations and restrictions for Kinesiology courses.

i was really looking forward to taking IAT 244 photography class as i do not want to overload myself with hard science courses all in one semester and wanted to take this out of strong interest...also i did the quantitative exam yet it wont let me enroll in MATH 154 but only CHEM 121..

The two required courses that are available for this term is full therefore I cannot enroll. (IAT 333 and IAT 337)

not enough seats in Kinesiology classes

CAN'T graduate in summer anymore and might have to go to another school.

Enrolling in Kin courses has been some of the worst moments in my academic history!! In the last 3 semesters I have only been able to take 3 courses towards my degree each semester since all the classes get taken up due to small classroom sizes and not enough other courses available. This year I was trying to obtain 30 credits as it is a requirement for medical school. But since all the courses get taken up before I have a chance to access them I have only been able to take 6 courses in the entire year out of 10 possible! This seems ridiculous to me as I am a fourth year student with a 3.6 CGPA so I should have a pretty good enrollement date. Now I have had to take four courses that were unnecessary as my electives have already been fulfilled, so now instead of being able to complete my degree in four years as I intended to do, it has been extended to five years; thus causing me to waste more money than was necessary. Needless to say, I am very disappointed.

I attempted to sign up within minutes of my enrollment time and had ZERO chance of enrolling into my desired courses (which are for majoring and minoring in a course). It wasn't pleasant at all and you should make enrollment times/chances a bit more fair. I'm wondering if I should just enroll for Fall 2009 right now to ensure that I get into the courses I need in order to major/minor.
Many courses (such as CMNS 333, 336, 433, 435, 444) are taught only every second or third year. This makes it difficult to plan which prerequisites to take, since you don't even know if the higher level courses are going to be taught before your planned graduation year. On a separate note, all of the unavailable courses are in the "Political Economy & Policy" specialization within Communications, which essentially requires students to choose a different specialization!

I've been trying to take this class online as a retake but have been unable to for the past two semesters due to the class being full at the time of my registration.

There are too few spaces for accounting courses.

Hello, yes, I was wondering if someone can help me get into this course, Sociology 358, Distance Education course. I need this course to get my teaching certificate. I would appreciate assistance and wait for a response.

Thank you.

There is not any course during the evening. There are many students who work and are not available during the day. Everybody deserve to study, having only courses during the morning and early afternoon eliminate the possibility for us. I could only register in one course per semester. Moreover, the less credits the last I can register, even though my GPA is 4.

If wanting to take both Kin 326 and Kin 304 there is only one lab for 326 that does not conflict with Kin 304 lectures.

Classes are EXTREMELY limiting to those people that are unable to register until the near or very end; some classes are closed before being able to register.

With only 20 credits left, I can't believe that I'm still suffering from enrollment issues. Something needs to be done.

Population geography should have a wait list!!!!!!!

This is ridiculous, I am a international student who paying twice tuition as other students; however, I am not able to get all the course I have to take. For example, Fal x99! My enrollment date was like last day of all students!!! This is unreasonable to me. Please consider to open more FAL x99 classes for 2009 Spring Tern.

THIS IS SO STRESSFUL! I WANT TO STUDY TOWARDS BECOMING A PSYCHOLOGIST. HOW IS GEOGRAPHY GOING TO HELP ME PURSUE THAT DREAM?? This was horrible.

If possible, could the system be improved so that it is updated in real time? Or fix the bugs that won't let a student get into a class that is claimed to be closed but is listed as open when the student goes back to try and make changes.

For the class I wanted to get into, FPA 171. The was room still left in the lecture, however both of the tutorials were completely full and therefore closed. I don't really understand how that works.

SFU needs to open up more sessions for upper level courses. I am here trying to fill my requirements and graduate as soon as I am able to, but I am restricted and now delayed by SFU's course selection. What can I say, I am disappointed.

The courses that are required to meet PDP requirements for social studies are not offered often enough in order to make meeting these requirements simple.

I have just finished the course CMPT354 this semester with professor Ester. I wish I could learn further the topic in CMPT 454 with him again in next semester.

Hello, SFU, I need those courses, if possible, is the colleague able to open up more classes for them??

I also wanted a different tutorial for BUS237 but they're all closed, there should be waiting lists because Tuesday mornings don't work due to family commitments. This enrollment process is incredibly frustrating, my date wasn't even one of the last and 50% of the courses I wanted were closed with no waiting lists, including requirements such as English and business. The program is also inefficient because it's slow and takes a lot of time where other people are taking up the limited spots in each course. Have more waitlists!

There shouldn't be just 1 class of 25 students for our concentration courses.

It was horrible this semester. I did not get any political science courses, and this is my major.

It's so hard to get into a course that I want, such as the econ 210, I was supposed to take it this semester, due to it was full so I decided to take it next semester. However, it is full again, can you guys just make it flexible a bit that must be really work for student I guess.

The final exam conflicts with EDUC 222

Why are many of the courses closed when my enrollment just began? Was I supposed to register for them earlier?

Do political science and geography departments ever talk to each other to discuss schedule conflicts? I could really use both GEG 449 and POL 354 for my urban studies certificate, but I am now required to take one of these classes in the Spring of 2010 because of a two-hour class overlap!!!!!

</table>
I am very upset about my late registration date. I would like to know other students, the same age as me, with the same marks get to register weeks before I do. There were some classes that I didn't even bother planning on registering for because they were full days or even weeks before my registration date. On the date of my registration, some classes which were listed open (not even waiting list) were completely full by the time I had completed my exam. I had an exam on the day I was supposed to enroll, which was December 5 at 12:30 PM. Not only were most of the classes already full, but the ones I had any hope of getting into were more or less unavailable by the time I had completed my exam.

There is such high demand for this course I do not understand why SFU could not offer two sections. The class is already overloaded and there are still 30 odd people on the waitlist.

I am trying to graduate and I find it hard to register when the courses I am currently taking a pre-requisites for courses I wish to enroll in next semester. I now have to wait till after exams and hope that the courses I need are still available once my final marks are put into the system. There should be a better way for students to register. I’ll be really upset if I don’t get into those courses.

Last spring I tired to enroll in Hum 102. It was still open but I could not enroll because I apparently did not meet the requirements to get a reserved spot. Now I am a declared Humanities major, and this course is a requirement for my major and I can not get into it. Please help!

They were all reserved 100% until mid december for declared IAT students and would only be opened up for non IAT students after the fact. I understand this is done in order to allow them the maximum opportunity for them to enroll onto their program classes, but I feel that this also limits the ability of other students to try out new courses that may be of great interest to them (ie: me!)

I would like to take this for my CLA and to satisfy my BA upper division credit requirement but it is always filled very quickly.

I think business people should have priority over business courses.

The class size of bus320 is 15, which is too small. It will be better if business courses have no waitlist. So, when students drop courses, students who needed the course so much but have a late registration date may have a chance to get the spot.

Due to my enrollment appointment date, all class sections are filled and I am not able to enroll in any of them since there are only one or two lecture sections per course and the demands for those seats always exceed their capacity.

Yes, I also wanted to enroll in engl 486 and canadian lit (400 level) but the all three of these classes closed before my registration time.

The enrollment date was too late that all the course I need to take are all taken up.

I did not get ANY courses I was looking for because they were either all full or not being offered. Why is SFU such a crappy school?

It is very frustrating that I am in my last year of studies here at SFU and I am not able to register in all the courses that fit my schedule. The accounting department should have more professors teaching the session or the class size should be enlarged.

Within a department, especially when it concerns upper division classes, it would be nice if the department tried to make sure that classes did NOT all happen at the same time. There are plenty of available time slots in which upper division classes are not available that these classes could have been offered. Also, as a student who is almost done her degree, it sucks that I once again cannot take the classes that I want and have to scramble at selection time to find alternatives. Having a degree full of classes that I dont want is not helpful to me.

This term my enrollment date was too late, therefore all the courses I wished to enroll in are full. I am very unsatisfied.

IS 240 is a required course for my program and I was not able to register for it as there is no tutorial available. The lecture, however, still has about 35 seats left. Will there be more labs added to this course? Thank you.

The lack of space in these classes may delay my graduation!!!

All the courses are available in Fall semester and we have huge volume of students in Fall semester due to this reason...I’m between 3rd and 4th year SIAT student and I can’t take any courses in the summer if I’m going to be honest what I would like to say is “what a waste of time for me” and now all the courses that I need to take for my graduation is in between Fall and Spring and in my situation it’s like 8 in Fall course and 2 is in Spring. So, i need to wait my graduation for 2 years when i have only 2 semester away from graduation actually...So, please make some courses available in the Sprig as much as in Fall or fill Summer semester with some more courses at least in SIAT side please. Thank you.

I tried for 4 semester to get the course and I am down to only 2 semester left I wish to get the course to fulfill my wqp
**COMMENTS**

I feel like I am getting a later enrollment date due to living in residence and have decided to move off campus to see if that changes. I know people with lower GPAs and the same amount of credits that I do that live at home who get WAY better enrollment dates, I pay more to this school and feel it is highly inappropriate if that is taken into account.

Please add more capacity to CMNS 324 (11938) in terms of lecture/tutorials. There is obvious demand. I would greatly appreciate the ability to successfully enroll in this course; I am currently on the wait list.

I had a very hard time getting into any communications classes, especially since I am majoring in that area very frustrating.

Late registration date made finding any courses that were desired impossible to find. Ended up taking classes with no personal interest. Section I wanted was not full but would not let me in as spots are saved for Surrey students apparently; only other section offered conflicted with my BISC 101 lecture.

I have selected two classes for both the Burnaby and the Surrey campus and the system automatically dropped the Burnaby class while it was my higher priority. I have dropped the Surrey class in order to get into the Burnaby class but I cannot since it’s full and I have lost my position in waiting list.

Almost all courses are full by the time of my enrollment date.

I plan on majoring in psychology, and I have taken the first intro to Psychology course, however due to my late course selection date, I was unable to enroll into the next psychology course. I'm afraid if I don't get this course it will place me behind in my studies and require me to take summer studies, which will be difficult to take considering I will be working full time, to be able to pay for school. It would be enormously appreciated if there was any way in which I could enroll in this psychology course. PSYC 102

How stupid is it that you would offer a course that is REQUIRED to graduate, but you would only open it up to SFU NOW students!!!! Absolutely ridiculous!

I didn't get all the courses that I wanted because I enrolled late, due to the fact that I didn't realize that you must pay $100.00 fee at the beginning of every semester. Consequently, I had to make due with what was left.

There should be more seats available!!!!

I think more than 24 seats should be offered for this course. I found BISC 303 very interesting and want to learn more in the field of microbiology. I am upset that it is quite possible that due to lack of seats, I may not be able to take a course that truly interests me.

I am able to register in the lecture but there is no more room left in any tutorials.

More space in distance ed. would be great.

I'm a transfer student but I still only get to choose the class after majority of students get to pick the most wanted ones. I thought the select priority is base on the numbers of credits you have.

There are certain classes that I need to take to fulfill my requirements that enable me to enter the PDP program as per academic advisors. I am unable to take any of the courses I need and am VERY frustrated with the registration process!

My registration date was way too late.

I was given an email by sfu that I needed to complete a quantitative requirement but when I tried to enroll into a quantitative course, it said that I had not met the pre-requisites. I don't understand because it is a first year course and I am a first year student.

Hi I need this this course as a science breadth, and it seems very appealing for my lifestyle, one section is open that conflicts with my mandatory courses, so I need the section that I've chosen. If anything can be worked out that would be great, please let me know. Thanks

IS 101 is needed for my intended minor in International Studies. I couldn't get into that nor Economics 102 which are both first year requirements for IS, therefore I have to take them next year which messes up my schedule since my major in Communications requires six 200 level courses to be taken next year plus the 200 level IS courses I need to take as well.

My course registration date was too late and there were no choices left so I had to settle for classes that I did not really want to take or was not required to take for my major program.

I could not take PHYS 100 because it requires MATH 100. However, I finished my MATH 157 AND MATH 158 courses and I also finished my MATH 100 and highschool level physics in my high school in China. Please help me add this course as soon as possible. Thank you very much. I really need this course in order to take PHYS100+ LEVEL to meet WQB Requirement.

It is total garbage, more classes should be created if they fill up so quickly.. Honestly I could not even get into 3/4 the things that I wanted to
COMMENTS

This is my second semester I have enrolled in at the University. For my first semester I had a good registration date. This semester I have a very late registration date. I believe this is due to the fact that I am a transfer student and the University does not have a GPA for me yet. This needs to be addressed. I am doing well in all of my classes, and deserve the same opportunity to register as my equals. There should be no difference between my first semester and my second semester.

There are absolutely no upper division courses offered in the morning, or later in the evening... spacing them out will eliminate these annoying time conflicts

Although I stated I did not meet the pre-req’s, I did... and I’m unsure as to why I was unable to get into those classes

Date and time of enrollment seem unreasonable and make it difficult to select courses as desired.

Second attempt at registering for BUS320, but was already filled up beforehand.

In order to afford school, I must work. In order to work, I must have 2 days a week free (ie: Tues & Thurs, Wed & Fri, etc.). Ensuring that the required classes can be scheduled to 2 or 3 days a week would be greatly appreciated. I wouldn’t mind 2 hour lectures twice a week instead of 1 hour three times a week.

Could not register as there were seats reserved...I work and have class in Surrey I cannot make it to Burnaby campus everyday...

I applied to SFU because of the Japanese courses you offered. I am full-time employed, so day class will not be an option for me. The only night class available section was closed. The only available class is the distance education. It would be nice if you could open up an option for night classes. At least continue education student or student like me can can be given a chance to enroll to classes that we would want. For now, if I couldn't get into this class for Japanese Beginner, I will have to wait till the summer term 2009 to try again.

There is never enough sections for business courses compare to other courses.

I think that FPA161 should give priority for those who have taken FPA 160.

both classes' TUT/LAB is full, but i am able to select LEC.

400-level Math classes should be offered MORE OFTEN than ONCE EVERY TWO YEARS.

<tr>
<td>I need these courses to graduate. How am I supposed to graduate when I can't even be admitted into these courses? I don't have a boat load of money to spend on school, this is ridiculous.</td>
</tr>
<tr>
<td>The upper level business courses, especially finance, are too limited in their selection. Also, the limited amount of business 478 classes offered considering it is required by everyone is a bit ridiculous.</td>
</tr>
<tr>
<td>Please offer more seats for ECON 305 and offer STAT 285 more often.</td>
</tr>
<tr>
<td>I'm very disappointed in what is left there; are little to no courses I can take.</td>
</tr>
<tr>
<td>Classes should have restricted seating. More space is needed for health science students.</td>
</tr>
<tr>
<td>I took FAN X99 already. I think this is a total joke. You really need to assign people to courses based on their major. I've been waiting a full year to get into some of the classes I need and I still can't. It really makes me want to change school so maybe I won't be here for another seven years. GET IT TOGETHER, then people will stop making fun of our school in comparison to UBC.</td>
</tr>
<tr>
<td>Very frustrating to find that my courses have been switched on me without my consent. Especially seeing as how I am scholarship and therefore should have priority, but instead am bumped out of my math class and into a different one.</td>
</tr>
<tr>
<td>I really wish the SFU would have multiple times of availability for each course each semester, like UBC. This would allow more students to take the courses they need to graduate and not make them take courses that they don't particularly wish to take but will help them get a better enrollment time by getting them more credits.</td>
</tr>
<tr>
<td>I am taking prerequisite courses for PDP. Kinesiology is one of the options for me to take under education and fine art courses. I have chosen kinesiology because I am -as a former caregiver, future teacher, writer and a good cook- very much interested in health and food issues. I am writing children's picture books teaching them healthy food and how to take care about their body. I was very happy when I saw these courses, because I need strong knowledge in these areas. I am very disappointed now. I wasn't accepted into this courses because I am not studying kinesiology. It is just not fair to keep all these courses only for kinesiology students. I should be able to study them at least through distance education. It was very important to me to take these courses. I feel like my life is partly destroyed.</td>
</tr>
<tr>
<td>Couldn't understand why there was available seats in the lecture hall but not ANY available tutorial times.....</td>
</tr>
<tr>
<td>There are not enough Human Geography courses available in upper levels!</td>

<td>COMMENTS</td>
</tr>
<tr>
<td>------------------</td>
</tr>
<tr>
<td>I loathe signing up for courses at this university. The options I’m given for classes are ridiculous. One lecture time option with one tutorial time option? How is anyone supposed to make a schedule?</td>
</tr>
<tr>
<td>I have just completed JAPN 100. This course was full before I was even offered a chance to enrol. Having only spent one term learning Japanese I will now have to wait for 8 months before I can continue my studies in Japanese. It is probable that my knowledge of Japanese will be almost completely lost after this wait. So, so disappointing. The course is available but spaces are reserved.</td>
</tr>
<tr>
<td>I’m only trying to take these classes as a visiting student so that I can finish my degree @ Kwantlen sooner, and get back to SFU for my MA. In giving me such a late registration time, SFU is shooting themselves in the foot! The longer it takes me to finish my degree at Kwantlen, the longer it takes me to get back to SFU and enroll as an actual student for my MA.</td>
</tr>
<tr>
<td>CMNS 375 should have 2 sections per semester if it is filling up, along with its wait list as fast as it is.</td>
</tr>
<tr>
<td>I think there shall be more spaces in each classes, especially GEOG 111 since it is required for the major. Also, since so many people has interest in studying JAPN, there shall be more classes for JAPN.</td>
</tr>
<tr>
<td>available seats out of those reserved way too few for some courses</td>
</tr>
<tr>
<td>I’m in my first year at SFU and since I was a kid I knew what I want to become. I have a study plan that I cannot follow due to the limited access I have to the courses required for the program I want. I want to declare my major in CRIM and PSYC at the end of my second year at SFU but I'll not be able to register into the Level 200 CRIM courses unless I have CRIM104 and CRIM135! There are available seats in Surrey campus but when I tried to register for either of these courses, I got an error message saying that I cannot due to the fact that the seats are &quot;reserved&quot;!</td>
</tr>
<tr>
<td>For upper division seminars, there should be MORE than only one section of classes. Most seminars are 30 or less people. How can you expect students to graduate, let alone take classes in a single semester when they can't even get any? What are we supposed to do - take other classes and postpone graduation? Take a semester off? And how can students in their own concentrations not be able to get into their required classes?</td>
</tr>
<tr>
<td>The Course also had a waiting list!</td>
</tr>
<tr>
<td>I am very frustrated about not being able to take this course. As an sfu graduate and a teacher who took pdp at sfu, I am frustrated that I can't get in to this course, largely because I am not in a specific program. I already have a post bac and am only interested in taking a few courses so I can teach Learning Assistance. According to the people with whom I have spoken, it could be years before I get into a course. Not acceptable!!</td>
</tr>
<tr>
<td>If this course was offered after 2:30 on a Tuesday, or anytime on a Thursday it would be awesome. I really want to take this course because for one I am very interested in fitness and two because our family is very good friends with the Professor, Tony Leyland. My session starts really late. Nov 23, most courses are already full. It is the same for last semester, I can only register very late..it is the same for last semester, I can only register very late..I think SFU should rotate the enrollment dates better, if I get it early this semester, I will enroll later next semester. This seems to be fairer. Every year it feels like I can never get what i want. IT is my 3rd year. It doesn't make sense to schedule required classes for Visual Arts majors at the same time. As a major that has a large number of credit requirements, scheduling should be more flexible to accommodate different student needs.</td>
</tr>
<tr>
<td>I do only have just one question; what determines my enrollment date and time?</td>
</tr>
<tr>
<td>I am unhappy with the system we use to select our courses. The courses I wanted to take this semester were all full before I even got a chance to register for anything. I just thought that the courses were closed too quickly. I went to enroll last week, but something was wrong with the system. So I came back to enroll this week, and all the courses required for my degree are closed. This happened to me last semester too. Frustrated! How am I able to complete my degree online if I never have the required classes open to me?</td>
</tr>
<tr>
<td>Never Have classes I need, I am a transfer student and I still cannot enroll in classes because I dont make the pre-req Does not make sense!!!! Its Ridiculous. Why Did I apply TO SFU??? I dont know!</td>

<tr>
<td>I am a 2nd year criminology major student, and I only need 3 more classes to finish my lower divisional requirements for the Crim program; however, crim 131is not available at all and thus I will have to wait until the fall semester IF i get into that class to finish off my lower division. this sets me back a whole year before i can move forward with my major.</td>
</tr>
</tbody>
</table>
People in programs such as post bach diplomas should get priority registration on required courses. I needed this course and it kind of screws me up not being able to get into it. the class isn't full but tutorials are... too bad.

How the bloody hell do you choose course selection times?!?!

Currently on the wait list. I need FPA147 for a Cont. Arts 'Studio' requirement. This is 2nd semester I've tried to get in. The Lecture was full but a wait list was available. I reg. for Wed. Lab which was full so I dropped it and registered for Thurs Lab which was open. But even though I was on the Lecture wait list it wouldn't let me finish registration. So I ahve to drop an open class now and may not get back in. The second course, Screenwriting, is only offered at 1 time so it conflicts.

These two courses are very hard to get into at the surrey campus. Horrible system. I cant get into 2/3 of my remaining lower division BUSINESS REQUIRED courses. Business 237 and Business 207. 207 was ALL FULL even before my registration date, and i am on the FIRST day amongst non-scholarship people. for 237, every single 237's final exam period collided with my 232's exam time. Once again, cannot get into any 237 class.

If there are about 60 people in the waiting list, will you open another lecture? Better in the evening.

Only had one lecture to choose from and it didnt fit my schedule. The times to choose courses are unfair.... there must be a more fair way so that other people's required courses are not taken.

new venture financing and new ventures marketing are almost never offered!

The only 3 courses I really needed to take this semester are the only courses are closed. I am really upset and I may think about not coming to school at all next semester.

the course timings and seats available are very limited.

I think that the fact that students with scholarship get first pick at courses. Almost all of the classes I wanted to take next term were full, and I am now taking Spring classes that I am not interested in.

There is no enough seat for most 200 level business class and economic class, most people can not get the class they want! BUEC 232 class changed the professor after the course selection and did not send any notes to students chose this course!!!!

I feel like there was NO courses available for me. Unfair

You make the requirements to get into the Business Faculty so high, but you still allow anybody to take business courses. Why don't you reserve space for Business students in any of the courses? Considering I belong to the Business Faculty, don't you think I should get a shot at taking some business courses. Instead I have to take an endless amount of pointless elective courses. I do not understand how it is fair that I cannot get into any Kinesiologie courses because the faculty reserves a certain amount of seats for their own students and I cannot get into any Business courses because the faculty does not reserve seats. After all I pay the same amount as those that belong in the Kinesiologie faculty, but I am stuck paying for courses that do not interest me nor that I need and they are getting the courses they need and want. This is a lose-lose situation for SFU Business students and I am tired of paying money for courses that do not interest me simply because I cannot get into any courses that do.

I can't enroll in Calculus 152 because it's full now. I don't understand why it's full although I picked the course on my enrollment date. Since I can't take Calculus 152, neither can I take physics 121 because physics 121 has a prerequisite that I have to take Calculus 152 in the same semester when I take physics 121.

I mean, all of the Laboratory sections are full, but I am on the waiting list and apparently this section is required for PHYS 100...

it would be nice if there were some evening, or consolidated sections of basic General 1st & 2nd Second Year Sciences. Like a way to get Bio 101 or Chem 120 or Math 154 on a single or two days a week between lecture/tut/and lab in order to enable part-time students who must work to pay for schooling an opportunity to have a couple days during the week off. For the past 2 terms, I've taken 2 courses a term, (all 100 level Bio, Chem or Math) and have managed to have a 5 day school week starting around 830-1030 am and typically going well into mid afternoon almost every day.

I wanted to take Kinesiologie courses as an elective.. couldn't :(
**COMMENTS**

It would be great if more health science courses were offered at the Vancouver campus as those of us living on the north shore have a really long trek to get to the Burnaby campus. Thank you just simply don’t understand why students have to rush all the time to register required courses.

I got to choose my class so late that almost everything was gone.

Frustrated at the lateness of my enrollment appointment of November 17 @ 10:30. I absolutely need to complete EDUC250 and EDUC423 before I can be admitted to grad school in Sept. 2010 (I am applying this month). If required classes get full so quickly, why not offer 2-3 additional classes to accommodate students?

I wanted to take HUM 102 as a distance education course, however, the exam time was in conflict with another course I needed to take.

Course availability was terrible this semester. I had a choice of only five courses, three of which had the same lecture times and two of which had the same exam day. And, many more courses were not available, such as BISC 404, BISC 414, BISC 316, REM 356. I am worried it will take longer to complete my degree with such low course availability.

I will now have to take longer to complete my degree and am not looking forward to another year of school when I could be done so much sooner.

I am very unimpressed about the way that SFU has their enrollment dates. This is the second semester that I have not been able to get into the courses I wanted to take. I am trying to finish a degree but I am having a very difficult time trying to take courses that I want to take or need to take to get my degree. I would like to know how enrollment dates are chosen, because I seem to be getting the short end of the stick.

You should open up more spaces in Criminology since it is a popular course.

As an intended political science major and international studies minor, I should be give priority when registering for courses that are required for my degree.

I got into FPA120 but I chose the wrong time, but when I wanna change the time, this course is closed. seriously offer more courses. At this rate I’ll grad when I’m freaking 30! I am very disappointed in this university and strongly regret coming here.

The selection of upper division Political Science courses offered is terrible. I feel unable to get a degree in this field as my options are so limited.

More seats should be made available or perhaps another second lecture.

I have tried to get into Bus 316 for three semesters in a row without any success. Is there anyway you can make more spaces for this semester or next? I have also noticed that there is always people on the waitlist who can't get in for the last three semesters as well. Thank you.

I need FPA 147 as I am in the BFA Music Stream in SCA 

You NEED MORE of these courses, everything is full, and this is an issue with the required courses. Also exam dates conflict a lot.

There really aren’t enough offerings of each course, its very frustrating and inconvenient to have to postpone first year classes into second year when I shouldn’t have to.

I hear both those courses are in high demand. Is it possible to make another class?

It’s is very frustrating when we’re given a very late registration date and can’t get into any of the courses we want or need because they are all too full. Now I am forced to take courses I have absolutely no interest in because everything else is full! =( 

Criminology 131 and 135 are the hardest courses to get into, because of limited seating, and time.

I would like to know why the class sizes for important courses that certain TechOne students, going into SIAT, for example, would need to take, (IAT 100 or IAT 102) are not adequate for students enrolling the minute the enrollment date and time allows. The lectures should be made bigger, and more sections for labs should be made available since this is one of the essential courses specifically for students going into SIAT. It was also hard to find a class still AVAILABLE when I tried to enroll in most of my other classes. Since my enrollment was so late, I would not have minded even if it was an inconvenient time, but still has seat that were available in ANY section.. but even the wait list was completely full for every single section I tried to take.

I don’t get why I cannot enroll in those courses when there are seats available. I find it odd that a 100 level course would be harder to get into than a 200 level course.

I don’t understand how people with less credits and lower GPA's than me are able to get a better time to pick classes.

Courses that are mandatory for any program should be taught in some form other than distance education, at least once per year. Distance Education courses are much more difficult and it is unfair to force anyone to take them.

Just wondering why my enrollment date was so late this semester. This isn't based on merit, year, or major?
I really want to get into class!

HSCI courses have very very inconvenient times for HSCI major students to complete required courses. For example, in Fall 2009 two manditory HSCI first year classes were 5 hours apart from eachother.

The French faculty picks very odd times to schedule their courses. I would like to complete an extended minor, but by making classes Tues/Fri (as opposed to Tues/Thurs or Mon/Wed), or that they're only offered at 8:30 am, it becomes difficult to fit them in around other classes and work commitments.

Some more sections of this popular class would be nice! Atleast one more would be good, not just one section.

Clearly not enough spaces. Or 10 Minute commute from Surrey to Burnaby / 30 Minute for exam. Why aren't they scheduled at different times when they're clearly BUS requirements.

Should have more choices of tutorial class schedules; should not have most of the tutorial classes on the same day.

I would prefer to have courses scheduled in a block of two days instead of spread out over three. also stop scheduling things so early in the morning.

I had to take all of the courses at inconvenient time because they were full.

Why are lectures open, but all labs/tutorials (required) are closed?

It's really frustrating that such an essential course (when declaring a major or minor) is offered so little. If I am not able to find some way into this course for spring 2010, Sfu is effectively setting back my minor a year as this course is not being offered in the summer.

It says it was reserved

It would be nice if a few more courses were offered at the Surrey campus.

The lecture is still open, but the tutorials are not sufficient. the total seats of the lecture is 75. the total seats of the tutorial is 60. Regards

I don't understand why the 200 level communication courses, esp, the required ones, conflict with each other?!

I think there should be more seats !!! That way people that have to work at night can get the desired times in the mornings.

All the crim classes in burnaby were full

Can you please provide more spaces in the summer 2010 semester for Bus 316? I have been trying to get into this course for three semesters now with no luck of getting in. It is always overfilled for the last three semesters. Thank you.

If possible, could you please have more openings for bus 316 and bus 478 for summer semester? Thank you.

This course is something I am extremely interested in regarding its studies on the issues of literature and culture. In addition it helps me towards fulfilling the WQB system. There is currently no space available for me in the Burnaby Campus, only the Vancouver Campus.

I was unable to register for CMPT-376W, which is compulsory. Because of my marks, I used to be the first group of students to be able to register. However, I am now having my 2nd co-op work term, and maybe because of this reason, I was given a very late date to register. I understand that CMPT-376W is compulsory, but only offered in the Spring term. And the number of students allowed is only 55, which in my opinion will render many students unable to register. I may take more co-op work terms and I am worried that I will never be able to take this course to complete my undergraduate studies. Please respond and let me know what to do.

It is ridiculous how so many people want to take this course and so few seats are available. I just hope they will increase class size or create more sections so more people can enroll.

I think that you should decide whether or not a course is able to be offered BEFORE the enrollment period starts so that this problem does not happen. I am now not able to graduate at the end of the spring semester unless the crim advisor can squeeze me into another Monday class.
I feel that particularly with regards to lower division courses that are required within a degree program that more lecture times should be made available. As was the case with my current semester, many of the courses that I am required to take have lectures starting at 830am. One of the benefits of being in university is the ability to develop a schedule that works for you. Last semester was my first term at SFU after transferring from another post secondary institute. I was very disappointed when my class schedule was almost exclusively starting at 830 am because the lower division core courses I required as pre-requisites were not offered at any other times. In the future it would be beneficial for students to have a selection of lecture times, more importantly so for mature students who may have a less flexible schedule due to external commitments. On a more general note, it is fact that not everyone enjoys taking courses at 830am, and personally speaking I can say that it has adversely affected my current semester, and that I find unacceptable as a scholarship entrant.

**COMMENTS**

- every semester that I have tried to enroll in this course it has been full!
- Not enough seats available for upper division courses!
- Math 158 needs to be offered more in the future!!!! Why doesn't SFU offer math 158 in summer 2010 or even fall 2010?!
- I only received 2 days to enroll, before open enrollment. I now have no options to enter IAT 102 to continue in SIAT.
- My comments are to provide more lectures since for time flexibility and should maintain 5 - 6 open classes (e.g. tutorial, lab) after all other time slots have closed for that particular course.
- The time conflicts I had between my desired courses were worse this semester than they have been in all my years of post secondary education. I am tremendously disappointed by the scheduling and selection of courses for the spring, and am beginning to regret that I did not go to another institution with more course selection, UBC, for example.
- I am EXTREMELY unhappy about course selection, especially this semester. I am in my 5th year at Simon Fraser University, and this semester there are only 3 course being offered that directly benefit my degree. I registered as soon as my enrollment appointment was open, and I was ONLY able to register for one single class that I need. I would like to take IAT 431, as well as IAT 320 instead of taking multiple electives for only one class that I actually need. I think it is absolutely ridiculous that in my 5th year I still can't get the classes I need towards my degree. I already contacted the SIAT advisors and was told they can't do anything because of fire caps. I completely disagree with this and feel something needs to be done, otherwise why would I even enroll? Please do something about this ASAP as this is unacceptable.

- How do I know when the reserved seats are taken up and non-majors can enroll to be in the course?
- All the courses that I need to take in order to go forward with my degree are full.
- I would have preferred selecting courses from Surrey Campus, but seats are reserved. I'm not sure how swapping all of my Burnaby classes for these will be when open registration starts. Perhaps I should add until I reach the maximum course load, then delete.
- It's frustrating that this class if offered sparingly and with little room available when it is necessary if I want to declare my criminology minor.
- Improve the schedule.
- Fix the schedule, this is really stressful.
- Required 400 level English courses must have either a wait list or more available seats.
- I was hoping more courses would be offered through distance education to allow me to continue working while also completed the program.
- Currently, the upper division history courses's pre-requisites only consist of 45 credits with 9 lower division history courses. I would like to suggest to have the upper division be reserved for history majors until open enrollment.
- from talking to other students, this course is high demand but has very limited seats, despite it being a major requirement and prerequisite for courses I would have taken had this course been available.
- LING360 used to be offered via distance education; it would be very good if it were offered by distance education again.
- I don't like that i am so late to register, and I didn't get any courses i wanted.
- it is the Human Trafficking course.
- The Tech 114 course that is required to be taken by each Tech One student is full, and I cannot sign up. This is a serious flaw, as the only other time it is offered conflicts directly with other required courses I must take.
- I would really like to get into the two classes. I will check back to see if the computer problems are fixed, but is it possible to have it noted that there were spaces available when I tried to register?
- Has not been offered in any of the last three semesters and is a requirement to apply for a joint major in criminology and sociology.
- This is my 3rd semester trying to enroll in this course

| 1. Unfair how students who get to register first are also allowed to switch, add, drop classes the entire time up to the last day of enrollment. Students who have later enrollment have NO choices left, not only electives but also core courses. Students should have only 2 weeks after their enrollment time to switch around and not the entire month. | 2. If registration dates are based on athletes, number of courses, GPA, and faculty; they must have made some mistake with my registration date. Even a few hours make a difference. | 3. Tutorial times are very limited. More convenient times are offered only once or twice out of perhaps 12 tutorial sections. |
Many courses weren't offered in the department of geography. I looked ahead to the summer semester to see if I could take them then but there are barely any 300 or 400 level classes available and none of them are any I would need/want to take. It would be much easier if the courses were offered more often.

I would like to see more bus courses offered at harbour center

I am finding extremely hard to fit a history course to fulfill a B-Hum requirement as it always either conflicts with my other required courses, is not available that semester, or the class is full. It would be nice to have some WQB course requirements available especially to fit the schedules of different faculties each semester.

there must be a problem.. .because it doesn't work.

Geog 253 is not being offered anymore?

I will likely be transferring schools at the end of the spring 2010 semester, in order for my Chemistry 122 course to be recognized by the school I transfer to, I need to also complete Chemistry 126.

I want to take a class on the history of India.

Need classes with long 1 day lectures available on MWF, as almost none are.

Business Students should be able to get into all business courses. These are required courses and we are not able to get into them. Please increase class sizes or offer more classes. Or make sure that seats are reserved for all business students. Thank you.

I really wanted to take these courses, but unfortunately, since I have such a late enrollment time, I was not able to get into them before other students have their pick.

Since this course is NOT ONLY offered once yearly but is also required for the WQB requirement, I think that there should be more spaces. The only other upper level W course in CMPT is at Surrey, which is also yearly.

I am in my second year as a kinesiology student and am still finding it very difficult to get into any of the required kinesiology courses. If there are this many people interested in taking these courses then there should probably be more space in these classes.

CMNS 372 is a requirement to most of the CMNS publishing courses. It is convenient because it is a distance class that needs no pre-requisites except credit amount. It might be a good idea to allow more than 65 students to enroll in this course per semester.

I would prefer that Criminology courses be first reserved for Crim Majors, because of the popularity and minimal availability, it's difficult to get into the classes.

most of the political science courses were online. I didn't want to take my courses, that i pay a couple hundred bucks on, online. Thanks

I would really like to be able to take this course in the Fall 2010 term. Also, I was wondering as to why my registration date was as late as it was (November 27), when I had received a scholarship from my dad's company.

The course was full so I got on the wait list. Then another section opened up and filled up over the course of a day. I am still wait listed for the original section even though 18 people who would have been wait listed after me are now in the course. Stupid SFU...

This is the SECOND semester I haven't been able to get into more than 50% of the class I need or want. I think it's odd that this is the second semester when my enrollment seems later than a lot of people and it would be nice if someone explained why or atleast helped me get into the classes I need.

Not being offered in 2010? winter/summer/fall?

I suppose I'll have to talk to an advisor, but want to take this course while I'm on coop.

I am a communications student, who was put on the waitlist for this course. I thought that the seats were supposed to be reserved for cmns students. A little frustrated because I can't take classes during the day, and NOW classes are the only ones that I am able to handle. Perhaps for night classes should be offered for cmns classes

The limited space in sections are ridiculous. If this keeps up nobody will be able to graduate in a reasonable time. I am furious with the lack of courses offered this spring and think that it is very unfair. I am a student majoring in Linguistics and I was only able to register in one Linguistics course.

It if a course is open, but you do not meet the requirements for the reserved seating, make it so the student can actually SEE that before they waste their time trying to enroll in it, and thus lose out on other potential classes

It would be really nice if there were more lectures available at different times not just one set amount at one campus. I don't want to have to drive somewhere in the middle of the day to get a lecture at another campus because that one fits my schedule better.
# COMMENTS

English classes fill up too fast. I am an intended English major but am UNABLE to complete my lower division requirements because BOTH SEMESTERS this year the English classes have filled up before my registration date/time. SFU does not want me to succeed :(

Sometimes the issue is that the desired professor's not available or that the instructor is not good enough.

Can you please open another section for BUS 420, like you did with BUS 426, I need to graduate in April 2010. 420 was full before my registration date. Thank you.

All the HR classes are full. There should be more classes set up to accommodate student needs. Not being able to take my courses will ultimately delay my grad schedule.

why is an online course on a wait list???? ridiculous!

It is ridiculous how this required course is being combined with another required course, political science 201. Shouldn't the university know by now that these classes need to have more space so students can declare their major by third year? Why is it combined anyway? If both these courses are required, then there should be enough space for students to enroll and not have to worry about not only the other students trying to enroll for this class, but other students, from a different faculty trying to join this class as well.

Please open up more spots for Neurobiology.

I have been accepted as a Criminology student, but I was unable to enroll in any Criminology courses this term because all the 100 level courses were already full when my enrollment date arrived (I wanted to enroll in Crim 104 and Crim 131). I am not sure why my enrollment date was so late. Perhaps consideration should be given to providing criminology students the opportunity to enroll in criminology courses first before students in other programs.

Once again the courses I wanted was full or on reserve. If Kin 140 is so popular and so many people are majoring then please add more seats. It is unfair if people want to minor but can't because the seats are "reserved" for majors.

tutorials were all taken up. not left with many choices

Registration times are based on unfair criteria. What determines other students going ahead of me? All times should be equal for all students

I wish there would be more seats for upper level courses.

Please kindly make any necessary correction of this not user-frendly system operation and thanks !

I got such a horrible registration time this semester, and I'm angry that this is probably going to put off my graduation for another year.

only having one class section with only 35 seat doesn't make senes to me. it's my final semester and this is one course i really wanted to take.

This is my concentration, finance and HR... I had to take another BUS 400' level course for my finance concentration just so I COULD take a class.. 25 maximum students for BUS 482? That is ridiculous, there needs to be more sections available for HR.

Course availability was much better this semester than last semester in Fall 09 except HSCI classes which tended to be scheduled at odd times and days of the week causing conflicts. Should take a look at separating Chem 111 from 110 and should be able to register without Math 100 as it's an intro course.

For compulsory courses to major or minor, it would be smart to make larger lecture theaters available with more TA's.

It is my last semester. I need those courses to graduate on time.

on wednesday I have PHIL 100W - D100 11:30AM - 12:20PM on Burnaby and another class BUS 272 - D202 Tutorial 12:30PM - 1:20PM Surrey Campus 5060 . so i have no time to commute.I want to change this tutorial to other time??

I think the times for registration for Spring 2010 was too spread out, compared to Fall 2009, so the course filled up too quickly

this course was full.

I'm sure by now you are aware what classes are popular, why not place them in larger lecture halls so more students can enroll. Also, it is difficult to understand why some distance classes have a very limited number of seats. Distance classes should allow for a larger number of students considering a lecture hall is only necessary for exams

The 400 level class are very small (20) and just fill up so fast. POL 441 and POL 447 are the two classes that I most looked forward to taking at SFU, but they both filled up before I could enroll. It seems like having 25 seats in a class would allow more people to take upper level courses without sacrificing the feeling of a small class...

Class sizes need to be larger in order to accommodate the large number of students who are trying to register for these courses. It is difficult to complete a four year program in four years, when the classes are not being provided consistently and when there is no available space. It shouldn't be this inconvenient and difficult to register for courses.

**COMMENTS**

**THERE NEEDS TO BE MORE HR COURSES AVAILABLE! EVERY SEMESTER THERE IS THE SAME PROBLEM. HR CLASSES ARE FULL AND THE WAITLISTS ARE UP TO 20 OR MORE PEOPLE FOR A CLASS THAT ONLY SEATS 25. THIS HAS TO CHANGE. EITHER MAKE BIGGER CLASSES OR OFFER MORE CLASSES. THERE IS OBVIOUSLY A HIGH DEMAND FOR THESE HR COURSES.**

None of these classes offer over 25 slots and registration did not allow me to get any slots in any of these courses.

Doesn't make a lot of sense to have almost all of the 200-level econ classes scheduled at the same time....

This is a requirement course for concentration of Entrepreneurship, however, it is only offered once per year. There are only 25 spaces in a class and people need this course in order to graduate. I don't think anyone want to wait for a long time to graduate when you can graduate on time if there is more space for this class.

various required psych courses should not be offered during the same time slot, so that students are able to take these courses in the same semester.

I cannot choose a still open course in Japanese for they are reserving seats, and also I cannot choose French for beginners since they said that I'm not fulfilling the requirement. I just dont get it. I dont think there are requirements for French for beginners and obviously I dont have any background in French. What's wrong with the system?

I dont know if its possible but could I get an earlier registration date for the next fall semester? Please? I made adjustments and everything is going to work out but it was a pain trying to reorganize everything. the classes that I thought I was going to take were either not there the next day or the times that worked for me were taken.

I had a late enrollment date, Nov. 26th

This is the second semester that I have been unable to get into this course. This course is required in order for me to move forward with my major requirements. I have contacted the professor to try and get into the class even though it is at capacity. However, I am not guaranteed a position in the course, and it has become very frustrating!

Should offer more sections of correspondence courses for people who have to work.

I had really wanted to continue taking Japanese, but it is not offered past the 201 level. The courses available for most language courses do not go past this level, and it really disappoints me that I cannot pursue a minor in a language with my degree because I feel that it could open so many more opportunities for me internationally. I hope in the future SFU may offer 300 and 400 level courses in language courses such as Japanese. Thank you for your consideration.

There should be more spaces available in the distance courses. This is my first time attending University and I was only able to get into one course by distance and am on the wait list for two others. In order to keep my student loan I am required to be in at least three courses. I did look at every course that still had openings and some of them would not allow me to registar even though there are seats still available.

Not enough lectures.

I don't like that the majority of anthropology classes are either late at night or offered at the downtown Vancouver campus.

Would like more upper credit ECON courses with lower pre-requisites.

It was full on the day of my course selection appointment

This is a class I needed for graduation that semester and it is all filled up with no other sections.

The english requirement was the entire reason I am enrolled at Simon Fraser. Please advise as to other options to meet my requirements. Thanks

Very frustrating how so many were overlapping times on mon/wed/fri only, Communications courses at Surrey doesn't make sense since it's all moving to harbour centre-- very inconvenient. Overall frustrating process!
I want to minor in Legal Studies and major in Crim, however, this requires I take 6 credits of law-type courses OUTSIDE Crim. You NEVER offer buec 391, any of the poli-sci law courses, and I've yet to complete phil 120 so I can't even take the philosophy legal studies courses. It's really hard to minor in legal studies when you never offer any of the courses. In addition, I'm 3rd year transfer, and apparently my GPA doesn't transfer so I get one of the last enrollment appointments and have to pick from all the XXXXX courses nobody else really wants. I find this extremely unfair because my gpa was 3.42 and I'm a 3rd year, which means, ideally, I should be getting among the first pick. This happened to me my first semester here, and AGAIN for this upcoming semester, because none of the grades for this semester are in yet (as the courses are still in session); twice in a row have I been screwed over in getting the courses I want. I'm not from the lower mainland and it's expensive as hell to just take accouple courses here and there and not worry about when I graduate--however I have to go home in the summers to work and save up money for the next semester. So when I get screwed over in course selection, that's 5 courses I'm taking that I have no interest in. This has happened two semesters in a row, therefore, HALF of my time here at SFU has been taking the XXXXXXX courses available, when I'm in third year, and should finally be able to take some interesting courses!

I think many students (people who are in waiting list are about 80-90%) are looking forward to take this course as distance education. I'm also wanting to take it as distance ed. This class was allowed for only students who are in KIN department first, so even though my registration date was early I couldn't get it! I hope sfu will offer one more distance education course for this semester.

I was unable to take more than one of the 400 level History courses I wanted because six of the offered courses were scheduled for the same day at the same time. Does anyone review department scheduling and take the overall picture into consideration?

I need to get into this course because it is my second first year requirement for my English Major. I am able to take the course at either the Burnaby and the Surrey campus.

Spring 2010 will be my last semester and I currently have over 120 credits. How is it that I am on the third day of registration? How many credits does one need to register the first day? How can I have so many credits, a decent average, and still not be able to get the courses I want? I was thankfully able to get into the evening section of the class I want, so I will be able to graduate on time, but I've waited a long time to be able to get into that course! I think it's especially bad when SFU has to send out emails suggesting that we take courses into this course because it is m

There were almost no spaces in any 400 level english classes. This is unacceptable.

I am a communications major in my fourth year so I don't understand why I am being wait listed for a course that is a requirement for my studies!

I need to get into this course because it is my second first year requirement for my English Major. I am able to take the course at either the Burnaby and the Surrey campus.

Spring 2010 will be my last semester and I currently have over 120 credits. How is it that I am on the third day of registration? How many credits does one need to register the first day? How can I have so many credits, a decent average, and still not be able to get the courses I want? I was thankfully able to get into the evening section of the class I want, so I will be able to graduate on time, but I've waited a long time to be able to get into that course! I think it's especially bad when SFU has to send out emails suggesting that we take courses that we can't get into at SFU at another university.

I don't like how you can't pick an alternative course just in case the one you are waitlisted for doesn't go through. I have to have 12 credits/units per term and two of the courses I need I am on the waitlist and I can't pick back up courses for that time slot that works for my schedule (work and parent).

I am a current graduate from the University of XXXXXX and have just received my Bachelor of Science. Upon deciding I would like to continue my education with Teaching, I've discovered Irequire a first year History course. I work full time at a private XXXXXXX as a manager in Tsawassen and with a very unstructured schedule due to events and functions, it is very difficult for me to commit to a class time weekly. I am confident in my University studying skills and would be able to attend a morning class on Tuesday with the tutorial following or as an alternative, my correspondence. Any information that one may have for me would be greatly appreciated.

This frustrated me. Not a single seat was available by the time I registered, and I'm actually registered as a Business Administration Student/Major. The one seat open was reserved for a specific type of Surrey Business student. Either open up more seats or open up another section. How are we supposed to complete a degree without getting the classes we need.

It have never been available for the past 3 semesters

I also couldn't register in English 484 but for some reason it would not let me enter it in. More fourth year courses are needed for English Major students. I'm a third year with a declared major and am always baffled when I hear of first/second/third years w/o declared majors getting much sooner enrollment dates than me.

Waitlisted for Lec, Tut, and Lab

Error: You are unable to enroll in this class at this time. Available seats are reserved and you do not meet the reserve capacity requirements. What does this mean? I have to try another time??

**COMMENTS**

I think it is unfair that spaces for Criminology courses offered at the Surrey Campus are reserved for the students that usually take courses in Surrey. This and last semester, there were spaces available for courses in Surrey but since the spaces were reserved, I was not able to take those required courses, as they filled up before I was eligible to enroll. I also feel some space for Criminology courses should be reserved for those who are trying to major in Criminology, as spaces usually fill up fast, and intended Crim majors are not able to take those courses.

Need to have more than one lecture available for popular courses.

It is really stressful to get into upper division courses. There needs to be like a supply and demand system for running courses at SFU. Simply for many classes, there is more demand than supply.

Not a huge fan of the limited availability of CRIM courses that are offered as non-major required and also the lack of courses that can be taken when a major is not declared.

It would have been a lot better if more BISC courses were offered more regularly.

It's preventing me from graduating in the spring 2010 semester.

I feel like there are ALWAYS so few upper division Bisc courses offered. I am unable to take what I want, and just have to take what is offered.

There has been an increase in the number of health science students - we NEED more classes! Also can we try to make them not conflict with other required courses (Stats 201 for example) that everybody has to take. If you look at the number for 2nd and 3rd level courses that conflict with Stats 201 it's amazing. Add to that the other required course Gen Chem 101 and you have almost no options and the ones you do have are full before you even get a chance to register. I was unable to get into any HSci classes - it is my major and I have above 4.00GPA. This has to improve or you are going to start losing students and credit hours. This is not a student-friendly system. I know you can't please everybody, but only being able to take 10 credits because even my academic adviser can't find me anything useful to take it not good enough.

Courses filled up too fast. Need more sections!

Business courses are seriously easy to be full. Not only Business students, but also students from other faculties can enroll any 200 level's business courses. In my opinion, reserved seats for only business students will help solve this problems. Health science courses have reserved seats for only health science students. And it is also necessary for business courses to do so. Business students' right to enroll in any business courses without having any troubles should be guaranteed. Also, business courses usually have few sections or the class capacity is too small which make the enrollment problems more serious. I do hope course unavailability problem will be solved as soon as possible.

Enrolled as Economics Major. I am currently taking Econ-103, and I got 84% for my Grade-12 maths. Really don't understand why I do not match the prerequisites. Somebody help me...

Poor scheduling, lack of available classes/times

**ENSC 283 Lab Class 10432 at 2:30 Fridays conflicts with Ensc 226 Lab Class 10432 at 230 Fridays.**

The course selection date was tooooooooooooooooo late for me! How did the school arrange the time?? I do not understand. Always the new comers got the early date to select the course.

I found a lot of courses I wanted to take, but by the 25th, two days before my registration date, absolutely nothing was left. I had to reorganize my schedule and again, another problem! How can I make a schedule when there is nothing related to arts for me to choose from? I can't even take Arch 131 and it does not say it's reserved for certain students on the description. Please list these important details next time in every course.

**THIS IS XXXXX XXXXXX. There is no way i am getting anything good of this semester, NO COURSES AVAILABLE AND THE ONES THAT ARE - ARE IN SURREY!** ridiculous, we need more lectures.

More sessions on popular courses which are under WQB requirement would be greatly appreciated.

After sacrificing one course, because of work and other obligations I will still be missing one lecture every week. No alternative was available to me for the spring semester.

Required courses should always be offered, especially when the majority of upper division courses require it.

There are too little courses available.

400 level English classes fill up quickly because they have a very limited class size (i.e. 16 students). There should be more of them offered regularly so that those who need to take two of them in order to complete their BA do not have to wait forever to take one.
It is quite terrible, and frustrating. It results in less courses per semester as well as a consequently longer degree. A waste of money.

I am trying to fulfill my degree requirements by distance education. The classes fill up so quickly, especially when I received my enrollment invitation late, that I am really scrambling to find classes that fill the criteria I need. I am praying that BISC 101 is available for the summer term. Right now it says it is waitlisted already before enrollment appointments are even being given out. I’m pretty frustrated with the system right now.

All of those courses required for hr concentration, and yet it has been full every semester. I was unable to get any of those courses last semester and this semester. Because of that, my graduation is delayed once again. All of those courses required for hr concentration, and yet it has been full every semester. I was unable to get any of those courses last semester and this semester. Because of that, my graduation is delayed once again.

The only available section for this course was at a conflict with one of my other courses...which only offered ONE course. It is ridiculous that today is the first day that i can enroll and all the courses are already full.

I was waiting for this course two terms....but still no space for me

There's enough room in the lecture, but not enough tutorial space. Please put some more tutorials for right after lecture or right before lecture.

SFUnow courses should have a WAIT LIST of people that are not in the program, it is too inconvenient to delete a course and re-enroll in another (CMPT 120) at a later date.

As a fourth year political science student hoping to graduate SOON, I was extremely disappointed in the course availability for Spring 2010. I cannot get into ANYTHING, despite being a scholarship student and having a good number of credits under my belt.

Should have more seats available in each section. There are 3 sections open but the capacity in each class is small.

CMPT 376W (Tech.Writing and Group Dynamic) was full. Survey form did not detect catalog number 376W for unknown reason. As a result, I have had to put in a different catalog number to complete survey form.

please help me get this course! i would appreciate any help i can get! thank you!

I have been trying since my second semester unsuccessfully to enroll in an English course and finding them full before my enrollment date arrives. something is wrong with this.

Business course availability its ridiculous. I am admitted into the faculty and I can NEVER get the courses I want. Even the surrey campus and the burnaby evening campus options were full. How am I supposed to complete my degree if I can't even get the required courses? The business classes don't even have waiting lists.

Quite a few upper division Arch courses conflicted in lecture times!

With FAN being a requirement and a prerequisite for many courses, there should be more options available. I've been trying to get into the class for several semesters, but there are not enough morning classes offered, and very few distance education courses offered. Evening or late running courses conflict with my work schedule, and make it impossible to sign up for this course. I would have completed it by now had it been offered through distance education or had more morning offerings available.

PLEASE HAVE MORE 355!!!

The course should not be restricted to students of one campus.I prefer to take half my courses at Surrey and half at Burnaby to get a larger variety of courses than those available at just Surrey. However, due to the fact I am a Burnaby student, I have to wait until the end of the registration period to be moved from the wait list to the actual class if and only if there are available seats for Math 157 at Surrey. Also, the Math 157 at Burnaby does not fit my schedule, the time conflicts with another course I will be taking, another reason contributing to my anger at being restricted from this course due to my location as a student.

It's unfortunate that I am unable to be placed on the wait list at this time.

I should be able to take this course from what I read as the requisites. Is there some other way I should approach enrolling in the class?

I dropped it now the system wont allow me too take it again.

Once again for my fifth term in a row I get the leftovers of available courses. I am not getting many choices at all.

Add more times please...

It is awful to get into classes in the 4th year. There is not enough selection, there is not enough room for people. 4th year is where students are supposed to be able to refine and narrow in the field they want within their program. When they cannot do this, it is ridiculous. I am paying money to be here, my own money. I want to take the courses I want to take. I have taken their pre-requisites for a reason!

Mechatronics Design 1 Was in the catalog 2 days before my enrollment but now it is not in catalog , is this course no longer offered for this term or is it completely full?
**COMMENTS**

I don’t really have a problem about course availability, all the courses I wanted were present -- not that I was able to get in all of them. It is more on the times of the courses, transiting between campus is a time factor that has to be added into the schedule and I noticed with some courses I wanted, I could fit in but I would not arrive on time.

<td>Hello, I hold a degree however, I am a non-degree student trying to enroll in my classes so that I can meet the necessary english requierments in order to apply for the PDP Education program at SFU in September 2010. I am living in Ottawa, with a 3 hour time difference and would appreciate a response as quickly as possible as to how I can enrol in these selected classes: ENGL 105W, ENGL 101W, ENGL 210W. Thank you for your time, xxxx.</td>
</tr>
</tbody>
</table>

The HSCI216 lecture was open but the tutorials were all closed. I don’t understand.

| There should definitely be more courses offered for the LING upper division. All the requirement courses filled up very quickly and even though there were added space to the classes at a later date there are students who still did not get in to the desired courses as they got filled within an hour of opened space. |
well there is no way that i can take japanease for the next couple year. i was planing to do exchange after i able to finished all the japanease course. however, every semester, the japanease course is full before i get to enroll.

There was no indication that section(s) were full until I got to step 3 of the registration process.

Not enough criminology courses offered at Burnaby Campus Very dissapointing and everyone agrees, crim courses are in high demand but difficult to get into due to availability, something needs to be changed

This German 103 course is available twice but conflicts with courses I must take. These courses are 4 hour seminars. In one case, German 103 starts at the fourth hour of a seminar and many professors do not go the full 4 hours. The SFU website will not allow me to enroll in this German 103 section because of the conflict even though the conflict may only be technical.

Every semester, this class (BUS 420) is ALWAYS VERY LIMITED. SFU can see from the waitlist that more than 1 section is needed and yet SFU never fails to disappoint students every semester. I have been trying to get into this class for 4 semesters now hoping that I could transfer it to CGA. My case is very familiar that I know a lot of accounting students who will just take this course in Langara or Kwantlen after graduation.

continue to wish that more classes/capacity are posted right from the start instead of having to wait and see if a required program course comes available with more seats in days/weeks after registration. Scheduling around other classes/work/commitments would be very beneficial.

It's very frustrating trying to enroll the courses I wanted to take. Some courses aren't available, others are either have conflict with my other class time. I literally sat there for an hour trying to figure out which courses I should take.. even though I did have courses planned, at the end I am able to get into two courses I wanted. I also believe that IAT is a popular program. :S I think it would be better to offer one more class.

Open another Friday Tutorial for MBB 201

Why were almost all the courses booked? Almost all the ones I needed were completely full

I am really disappointed about how there are no available seats left in all the BUEC 232 sections. The same happened to me LAST semester. It's not fair that students with a lower GPA have an earlier enrollment time, and thus get to enroll before students who take their schooling more seriously. NOT FAIR.

I find this very frustrating that I am accepted into the PB Diploma in Special Education but can not gain access to the courses that are required because they are full??

A system that gives third year transfer students such terrible enrollment dates is ridiculous

It was quite troublesome registering so late

Hi I am doing my degree through distance education and really need to get into this class. If they're is any way that it is possible that would be great. It doesn't have a waitlist option so I'm not sure what to do, thank you.

I'm not sure if I HAVE to fill this out but I did it anyway. It wasn't TOO big of a deal for me not being able to get these courses.

tired of never choosing my classes, i transfer here, pay twice as much, and get the leftovers... too many restricted classes outside of major. Business have to wait until 5 days after classes start! stupid

I'm very disappointed that there is no waitlist for ECON331 since this is the only 5-unit course that I can take to fulfill my non-Bus/Buec requirement for my graduation. I wish I could take this class so that I can fish my degree next semester.

Because I am a mature/adult student who returns to school while also working, it would be very helpful if SFU can implement an improved system, where, we (mature students) are given a higher priority in terms of enrollment date eligibility.

With IAT333 2 Lab sections offered Thursdays (1230-2:20, 2:30-4:20) students cannot take both 337 and 431 which are required for the Design stream of SIAT program since they all have either lecture or labs on thursdays during those times.

I don't particularly agree with the way the wait-list/ closed course works. For example, I wanted to enroll in SA105, a class that was wait-listed completely, but there was still 1 spot open in the lecture. The tutorial that I wanted was still open, but I was unable to get into the lecture because the wait-list was filled despite the fact that there was still a space in the class, and the lecture had been closed. This was exactly the same thing that happened with FPA 147, the wait-list filled, but they increased capacity for the course, and since none of the people on the wait-list are in the lecture yet, I was unable, yet again, to get into the course even though the course is still open! Though I can now spend this semester taking some other courses for WQB and such, I'm still really disappointed that had the lecture not been closed, or the wait-list issue been taken care of, I would have been granted the spots in the lectures that I needed.
I was very happy to finally find one of my required courses available at Surrey, close to home. It would be easier for me to take more education courses if they were offered through distance education or at the Surrey Campus in the early evening.

Can you please put in an extra section for this semester or next semester for Bus 316 because we have been trying to get into this class for 3 semesters now with no luck. Thank you.

The courses I want filled up too quickly…I only got 1 out of 5 courses that I wanted and I was forced to enroll in another lecture/tutorial/section for those 4 courses.

More labs and tutorials should be offered, and increase class sizes, too many kinesiology students are delaying their graduation because of wait lists and not getting into REQUIRED classes.

I do not understand why I am not able to register for this class.

SFU needs to open more sections for courses. Many spots are taken up very quickly resulting in students not being able to graduate on time, or get into classes they have wanted to get into since their very first semester. (Ex. KIN 143, ENGL 101, etc.)

I only got 1 of the 4 courses I intended to take.. all sections in Crim courses on the Burnaby campus were full before my enrollment date. I would take classes in Surrey, but the spots are reserved. Enrollment was so frustrating because of the lack of available courses that were actually open or not full.

I am on waiting list right now, please let me take these course in spring semester 2010, because I really need to complete it. Thank you

Should offer more courses by CODE to lessen conflicts.
I can understand if MATH 152 is generally supposed to be an elective course but this is a required course for my degree and also a prerequisite to a number of computing science courses. I cannot enroll for the Surrey campus course as it conflicts with the rest of my courses at the Burnaby campus. It was just my luck that when the waitlist was increased I did not have internet access for that day and it filled up before I could put myself on the waitlist. I hope that in the future, considerations will be made to accommodate for the demand for courses like these as they are prerequisites for a large number of other courses we need to take in order to complete our degree on time. I also hope that another section can be opened up for this course at the Burnaby campus so that it is not a race to get enrolled.

I have never taken french in school but I have a certificate of complition level A 2.1 at Alliance Francaise and would like to register for FREN 122.

By the time I got to enroll, since I do not have a scholarship, there was basically NOTHING left in any subjects. The very few spaces that were available were put on hold for those under that major.

ENSC 182 needs more class sections. This required course for Mechatronics transfer should NOT be unavailable to any TechOne student, as all TechOne students are advertised to be GUARANTEED to get the courses they need for first year.

I wanted to take Engl 105 at harbour center but that class is full with no waiting list. That class size is too small.

There are not enough spaces in popular courses. These classes have many people on the waitlist, so the sections should have more seats.

I'm waitlisted in all my classes except one, so I don't know what I should do, I can't enroll in any other classes but I'm worried I won't get in!

This course is a requirement yet it conflicts with another required course for Environmental science students in third year. Geog 316.

Too few seats for a core course that both B.A. and B.Sc. students of the Health Science Faculty are required to take. Why not move the course into a larger lecture hall, increase the number of human resources in this course?

for some reason, the math dep changed the schedule of the course. It was initially offered in the morning, but now it is offered in the evening.

I was really hoping to get into this course for the mechatronics program, although I am not in the program, I am trying to switch into the program and will need this course.

This is a required course for the education stream but is not offered as a evening option. The Distance ed. offering filled up quickly as well. Perhaps it would be helpful to have a second course offering through distance ed?

Need more tutorial times!!!!

I have not officially declared my major because I have two more lower division courses to take, however I have no other electives left and no other lower division courses left to take.

again I'm unable to do anything with the courses towards the major I'll hopefully choose some time in the future. I feel like again I'll be wasting my time. I need a degree earlier, not when I'm 35. thank you

Please open more spaces for students who are in IAT major, I believe that they also have same problems with me. The seats are so limited. Hopefully, the seats can be increased.

I am planning to take ENGL199 distance education; however, there is already no more spot once it's my course enrollment period.

Hopefully more seats will be available. Since this course is distance ed, seating shouldn't be a problem.

you need more night classes. Especially at the Surrey Campus. It is alot safer and nicer for people traveling from Surrey/Langley/Aldergrove to get to especially at night.

It makes no sense to have 400-level English courses capped at 18 students when 24 will provide a very similar level of personal attention. I only have one semester left to take the 2 400-level courses I need to graduate. If this does not happen I will have to extend my degree. The lack of waitlists, moreover, makes it even more difficult to get the courses I need. Something needs to change.

This course is offered once a year and when it is offered it gets full in the first 2 days and I need it for my graduation. Although it was only offered in surrey I decided to take it, however it is full now

all the classes i need to take are at conflicting times or at conflicting times. I can only get into 3 classes total!
There is never enough available courses for those like me who would LIKE to major in English but are unable to even get a single class in the subject area. It is very frustrating.

I have already declared my major in french and I only have 8 courses left for that degree. I can only continue with the 400 level courses if I take 2 of the 300 level ones that are required. However both of those courses are full and I am on the waitlist. Chances of me getting into the course don’t look that good. All my WQB courses that I would like to take in spring 2010 are all full or not offered or reserved. For spring 2010, out of the 10 courses that I have as options, I can only get into one course, as all the other 9 courses are unavialable. I would like to waitlist for 3 courses so I atleast have some hope of getting into more than one course for next semester, but it appears that the limit is 2 per unit. Now I only have 1 course guaranteed, and there may be hope for 2 french classes that I have waitlisted for. This sucks!

This course has been of interest to me for a few semesters now; however, it never fails to fill up very quickly (distance ed. included). An additional section I’m sure would be very much appreciated!

I am registered in Crim 135 but at the surrey campus because that is the only one possible. I need this course as a prereq but now I will have to drop my other classes on Tues/ thurs so that I can take the crim class at surrey

The lecture for IAT 265 had 48 available seats, which would be about 2 extra sections for the course. I’m wondering how you would be able to fill those seats if there are no available lab sections left.

I’ve been trying to get enrolled in KIN 205 for the past 2 semesters. This is my third attempt.

Change this system!! it is incredibly inconvenient

Should have some priority for people in the department even in first and second year

The classes I need aren't available to me this term, and I am taking Co-op this summer, meaning I have to take them next fall which puts me a full semester behind. I wouldn't mind going to different campuses, but it's not available anywhere. I am a member of the business faculty and am doing above average in my classes I feel that I should get priority to take these classes because they are required over someone from a different faculty. Either way it should still be available without me writing a formal request.

most sections for Econ 103 and 105 are offered at 3 hour lecture schedules....they get very hectic. Atleast some sections should be available that have a variation. 3 hour lectures don't work with everyone.

Why was my enrollment date so late?

The course availability for all first year and second year CRIM courses was terrible. A great majority of the courses that WERE available were offered at the same time, making it impossible to get the courses that were needed. Without being able to get into a lot of these courses, I was unable to get the prerequisites for other courses, which essentially puts my degree on hold. Every person I spoke to was having major problems getting into the required classes. If I have the same problem with enrollment in the fall semester then I will not be able to complete my degree in the 4 years as I had planned. Since I was not able to enroll in some of the classes that were prerequisites for other courses I am being forced to take a couple classes in the summer; however not all the CRIM courses are being offered during the summer semester. Hopefully the gross errors made in the scheduling and availability of these courses will be amended for next semester so I can continue taking courses that are relevant to my degree.

Very few courses offered this semster, which made it extremely difficult to choose which courses I would like or need to take. Combined with a late registration date, I’m not too pleased with what was left to be selected.

I find it odd that there are open spots in tutorials and yet the lecture is full/waitlisted. It is totally unfair that I received one of the last enrollment times. It is very stressful trying to figure out classes when there is nothing available for my required field.

There should be a greater spread of the courses offered in different semesters, meaning more opportunity to take a [particular desired course. Again, the time conflicts should be considered when a student in a particular stream of communications cannot take classes because they are only offered at the same times.

I have looking for bus 320 for 2 semesters, but it is just so popular

I would really like the tutorial times for: Kin110 - Wednesday 8:30-9:30; HSCI130 - Wednesday 12:30-1:20. I was able to enroll in the lectures, but the tutorial times were all closed. I would appreciate your help!

Thanks,xxxxx

It's a new faculty should have more sections available as seats filled up before my registration time.
I'm not a declared crim major because I'm one elective away from being one. This class has seats open but are reserved for declared crim students. Is it possible for a teacher perhaps to open a seat for me?

I put down not at desired campus for CHIN and CMPT, but it's really more that I'm left with 10 minutes to get from Burnaby campus to Harbour Centre or Surrey campus, which is not feasible by any stretch of the imagination. I have no problem going from one campus to the other, but only if it's physically possible to make it from one class to the next.

There's spaces in the lecture but somehow there's no space for tutorial, preventing student from getting into the course! Many of the courses are out of spaces!

Some courses shouldn't be only offered in the fall semester

Three semesters in a row!

There was one seat available, but the open tutorial time conflicted with another class. Now that spot has been taken and the class is full.

This will be my first semester at Simon Fraser University and even though I am paying almost three times the amount per class as compared with Douglas College the availability of classes in each section lacks significantly as compared with Douglas College. It makes me rethink whether transferring was a good idea.

This is very unfair since I'm in my second to last semester and I desperately need these courses to graduate

there should be more availability for first year courses that are essential as prereqs, such as psyc 102 and crim 135, I found it very difficult to be able to take other courses because there was only one option for these two courses, when it was necessary that I take them.

I want to get into the faculty of my choice, but since it's difficult to get into the lower division classes required, it blocks me. I wish there was either more classes available or somehow let the student who did not get what they need to graduate with the right degree a substitution.

This will be my 4th semester at SFU and I still can not get into GEOG111 and I'm a geog major

30 people per class is too small, it gives no opportunity for those with later registration dates to enroll.
GENERAL COMMENTS

Data as of January 12, 2011, end of week 1 of classes

COMMENTS

ALL THESE CLASSES WERE FULL AND I'M DONE ALL MY LOWER DIVISION REQUIREMENTS. I CAN'T GET INTO ANY OF THE UPPER DIVISION CLASSES I NEED TO FINISH MY DEGREE

It is very frustrating that I am a communication major yet I cannot get into my communication courses unless I waitlist for them. This makes it very difficult to complete my major requirements when I cannot get into the courses that I need.

There were only 60 seats available for this course, and there's no wait list. The class was filled almost immediately. Since it's only offered in the Spring terms, I'll have to wait until 2012 to TRY again.

Most of courses I wanna select for next term are all full.

ENGL 199 offering at Burnaby Campus is full. Cannot take via Distance Education, due to motivation issues.

If you're going to make certain classes required for a degree program, offer more sections of it! The only i may have to spend longer than needed to complete my degree isn't because i'm taking less classes than i should, but because i can't get into the classes i need to graduate! I'd rather take a semester off than waste my money taking unnecessary electives.

Wait lists for Criminology would be greatly appreciated

I get put on the last day of sign ups. This leads to all the courses being closed. I wasn't even able to be put on the wait list. Therefore, I had to take electives that has nothing to do with the courses I want to take.

I was very upset about my enrollment appointment as it was very late in comparison to many other students. After the enrollment appointment, I was left with only two classes that I was securely placed in and in the other two, I was put on the bottom of each wait list. I was very disappointed with this class enrollment policy, as I have been told that the enrollment date has been scheduled based on GPA. However, I find this unfair because students have a variety of different course loads and for those who have large ones, including myself, it is difficult to keep up a competitive GPA with others students. Also, not being able to take the courses I want postpones me from completing my degree in an effective time and I find this very disheartening.

This is the second term in a row where I could not receive the classes that I had wanted to. I'm very disappointed.

Tutorials need to be in the afternoons!!

I am planning on graduating in the fall 2011 semester but since there are no classes available ever I will probably graduate in 2013!

Most CRIM courses offered at the Surrey campus have reserved seating, and by the time the courses open up to everyone the classes are full. The only available classes where those I had already taken or did not yet have the prerequisites to take the course. The CRIM courses on Surrey campus should be open to everyone. For me for example, the Surrey campus is much closer than the burnaby campus which makes it easier to take early classes if that is all that is available. Wit

I tried to get into 315, 316, and 478 with a friend at Surrey. All the class sections were full when I tried to register, for 315 and 316. 478 was full at surrey, which is more convenient for me, there was one open section at Burnaby but it was inconvenient.

Terrible. Getting courses at SFU is like pulling teeth. There is no room left in any courses and they are all offered at the same times!!!!!!!!!! It is very frustrating.

Because statistics courses are offered so infrequently, I have to choose the conflicting statistics course over this course.

: (

By the time my appointment started. 3 out of my planned 5 courses were not available and ones that remain available conflict with my remaining choices.

What makes other students choose classes before me. Is the order based on grades?

I need at least one to apply for a minor in SIAT.

There is great shortage in economics classes. And, there is no waiting list for those classes, for example econ 355.
I was required to take this course for my program, however, there was only one lecture and it was filled very quickly. I feel this was distinctly unfair because I am now unable to take any IAT courses until the course is offered again. Considering how important this course is for my program, I feel that there should have been given more consideration for SIAT students and more availability.

I saw that these courses were available a month ago and planned my schedule, now they are not available?

I feel so frustration when I see most of my required course are close. It is my last two semester at SFU. However, I still have problem to have required course. Could school open more space for Econ course? If I can not have class at this enrollment date, it means that there are many econ students will have big problem about what should they take for next semester because most of courses are close.

The waiting list for the EDUC courses is small and I find it hard to get course I’m interested in when they are closed and can't be placed on an extended waiting list or something like that. I only need a few more EDUC courses and I for a Minor in Curriculum… and when I can't enroll in courses for the times that I can go to them it is difficult. Especially when most people drop out of the class after the first week.

Many courses I am required to take were closed before my enrollment time.

For Hsci 319 W: This is a required course for all Hsci Majors, I just can’t believe it was not offered (it's equivalent was also not offered).
For MBB/ HSci 426 and BISC 303, these are also required for Infectious disease streams concentrations in Health Sciences, I wish it was offered.
I think not having these courses forces students to come and take classes in summer session instead of doing practicums/co-ops.

ENSC 150, MACM 101, and CMPT 126 are courses which i had hoped to use toward an application to transfer into the computing science program. Without these designated courses for admission i will not be able to apply.

You should make it so that you /warn/ students when their classes conflict, but still allow them to enroll since they know they’d be able to change tutorials once they get to the class anyways.

I wish that my registration would be at an earlier time because every semester I have a hard time getting the courses that i want and need.

There needs to be way more 400 level classes offered. I am almost a 5th year student and need these to graduate and they are all full. It does not make any sense for a university of this size to offer 5 courses.

I am desperate to be in CRIM 101 as it is my intended MAJOR! But it was completely full by the time my registration came around and was full in Surrey by the time the restriction was let off.

I understand that first year students going in to their second semester don't get the best times to pick their courses, but having one of the latest possible enrolment dates ensured that I wasn't able to take any REQUIRED courses for obtaining a degree in sociology. Although I was able to get in to 4 courses that would take care of breadth requirements, it’s rather frustrating that I want to pursue sociology and wasn't able to take the Intro to Sociology course at all in my first year. I will have to take all 6 lower division courses within the next couple of semesters, so hopefully I will be able to get in to those courses for Fall 2011, Spring 2012...

When I tried enrolling into the Surrey campuses, they were all restricted.

When trying to add courses, the section was listed as available and listed the number of available seats. When trying to add it, the course was deemed unavailable. Having to wait until the registration date when all these seats are full required me to choose courses that were not helping add credits towards my major.

As an Economics Major student, I am unable to choose any 300 level econ courses this semester, as all of them are full. However, I need 39 upper lever courses and most of them need to be in economics.

I need this course but it says I don't have a prereqs, I'm not sure what the issue is.

There are too many courses that are clashing with my chem 281 courses and the times/ The times are inconvenient due to late evening courses and planning to work.

They should open up more upper level classes(Econ) instead of lower level (Econ103 and Econ105). Also they have too less 200 level econ. class to choose.

This happens every semester, where there is only 1 section offered per HR class. It makes it very difficult to graduate on time at this rate. OFFER MORE SECTIONS PLEASE.

I realise the courses not available to me was due to my failure in sending my final transcripts from my previous school.

Not enough spaces in these courses
CMPT and ENSC 150 are the same class, I would like to take CMPT 150 because it is located in Surrey and fits into my schedule but it says I don't meet the prereqs. I'm going to take the Q test soon in order to be able to get into Math 100 which is a class i desperately need! FAN X99 is my backup class if I cannot get into Math 100 but the system would not let me even click to try to enrol in the class.

Simon Fraser University NEEDS to design a proper enrollment schedule and structure, so that regular paying students do not get stuck taking extra semesters to graduate because scholarship students and athletes have priority. Either create larger classes so your whole faculty can have the same options or design a better enrollment method that doesn't leave third years unable to get the courses they need to graduate. This is a terrible system and forces students to question whether they even want to stay at SFU if they cannot get the courses they need to graduate in time. Step up your game SFU, this is an embarrassment.

This course was full and the wait list was full before my registration date. This is the only class that would fit with my co op term in health science, chemistry, and biology and therefore the only useful class that I could take. Because of the extremely small class size and only one section being offered I am not taking an extra course this semester like I'd hoped.

Barely any courses offered in the spring 2011 semester and most courses that are offered are either closed or clashing with other courses, courses that are required under the same major.

I need to take "CHEM 236W - 3 Inorganic Chemistry Laboratory" with the Lecture "CHEM 230-3 Inorganic Chemistry" (so that the material sticks in my brain). Even though I am enrolled in the Lecture (230) I am NOT able to enroll in the Lab (I am on Wait List). :( If I don't get in the Lab by the end of the week I will have to drop the Lecture also :(.

I hope HSCI department open more space and offer more classes, or offer online distance classes.

all the courses are offered at the exact same time. it is impossible to get the classes I need. furthermore, exams often are scheduled on the same day. despite my registration being so late, it wasn't my main issue. my issue is with scheduling of the classes.

For the KIN 201 and 207 one or two more tutorial class would be great, MBB 201 have tutorial classes but the needs a larger lecture hall.

I'm enrolled in the NOW program. Because I work full time, I'm only able to attend class in the evenings. Many of the courses that I need to take for my major are not offered in the evening. This is a problem, and I hope that in the future, SFU considers offering a wider selection of programs for NOW students. Currently, I'm enrolling in courses that would be my second or third choice - but I have no choice. I have a limited selection to choose from.

Thanks,  

XXX

Psyc programs are streamed (ie 22x is the prereq for 32x courses, and typically students take only one or two streams), so this semester's choice to schedule all the streamed courses at the same time on the same day (Tuesday, for the most part, 1430-1720) is a pretty bad idea...

Classes are not planned out keeping mind students availabilities. Most classes, even within the same section (ie. Psyc) clash with either other

Really disappointed in the course availability this semester.

I think the school should give ECON students the chance to choose economic courses first. Same applies to other faculties.

One of my minors is biology and this term for upper level courses that I am interested in there are 10 courses but only 4 available this term. This wouldn't be terrible if 3 out of those 4 courses all start at the same time (9:30am). Problem with scheduling...

I haven't been able to take BUEC 333 and ECON 302 since the last two semesters and still can't take them for Spring 2011. I have to take those two courses in order to take 400 level courses. The unavailability of the courses keep postponing my graduation time.

It currently states that I am a humanities major, but I want to get my degree in Anthropology. Advisers told me I had to finish lower level division requirements to officially change my major, however I could not take any 2nd year classes in Anthro or Sociology because my registration date was way to late to get into anything I wanted. Anthropology and Sociology required classes to graduate need more available classes for the students.

My enrollment date was so late that I was unable to get any upper division Kin courses. There were spaces left in the classes but were reserved for neurobiology. Likely I will not even be able to take a spring semester because I am unable to get into any classes that I need.

I am really disappointed with it and my enrollment time. That is all I can say. Totally lost my excitement for school because I didn't get the courses I'd like because of availability and late enrollment date.
COMMENTS

It is very frustrating to me that I have a high GPA, yet I have such a late enrollment date and therefore cannot get into most of my first choice courses. Some, fairly enough, are simply not available at the Burnaby campus, or conflict with other class times. However, being the second term of my second year I had hoped for better luck in an enrollment date which would not force me to take courses of little interest.

I live at SFU, however I am taking a distance education class next semester because the class time conflicted with my other classes.

In the Areas of Concentration for Computer Graphics, not a single upper division 400 level course is offered next semester, and I’m planing for that to be one of my focuses.

As a health science major, I am required to take seven 300-level health science classes, however, at the time of my appointment only one 300-level class was available to me! SFU needs to add more sections and increase the number of seats in these classes!! I am not impressed.

Regarding to IAT202 I talked to my teacher and she gave me a permission but I still waiting for John Dill to review my request.

It would be great if all third year business core classes have different exam dates. It is horrible how we have all these 300 level cores that we must complete, but half of them coincide with another's exam date.

PLZ put me in...I really need this course to meet the requirment

When there are a lot of people on wait lists, I think they should open up new classes. For the upper third year courses, it is difficult for students to get into desired courses when the class sizes are only 30 each. I think it is fair to have smaller class sizes, but they should offer more classes. Otherwise, just have a larger class size of around 50 or 80 in which you would not need to run more classes or hire more professors.

I’m very upset that there isn’t a waitlist. I’ve heard of students holding spots for their friends in courses with no waitlists and if this is true, it is very unfair. I really hopes spaces open up for this course otherwise I would have to spend an extra semester at SFU trying to get these courses.

Need more afternoon classes

the two tutorials conflited

It is a shame there is not enough space for registration!!!

Why didnt i get into EDUC 100?

There are 3 CHEM 126 Sections closed and the other is wait listed. I would appreciate it if another section would open up.

Thanks.

There is a SERIOUS lack of class times even though there is a huge demand for it...

Hoping my required courses will be open to me next semester.

Should open up a few more criminology courses in the Burnaby campus.

English- Class was completely full before my enrollment date (Lecture, Tutorial, Wait List all full)
Kinesiology- Half of seats were saved for Kin majors, was #130 on wait list, only 20 from wait list got in class because of restrictions.

By the time it was my turn to register, nearly all of the classes that I wanted were full. If the class wasn't full there was very limited space in the lecture, and the majority of the tutorials were full, giving me extremely limited flexibility. I live at the Burnaby campus, therefore it is extremely difficult for me to get out to the Surrey campus when I have classes in Burnaby on the same day.

The first three courses were absolutely needed for the degree that I want and I am very upset that I could not get any of them.

Should really fix the survey. I accidently over tabbed to a new row and now it requires me to add another course before i can submit.

Make more TUTORIALS!!!!!

Allow a wait list for Buec 232?

Can anyone tell me what should I do in order to get a early enrollment date otherwise I must stay in SFU forever!!! Thanks

The lack of space in available upper level courses was surprising. If the same occurs in Fall 2011, I likely will be unable to complete my degree program.

I had accidentally dropped from the course. I was hoping to enroll back into the course.

<tr>
<td>I don’t know how SFU arrange the course enrollment date. For me, it is totally unfair. Since the first semester I came into SFU (After the so-called first sem of EBP program), I had always been one of the last students to enroll in courses. I was totally not able to choose most courses I want to take. That lower my GPA and therefore make me can’t even select the program I prefer to study. The only way I can select the courses I wish to take is to stay in front of the screen 24/7. If I had a chance to make a choice again, I would choose to go to UT instead of SFU.</td>
</tr>
<tr>
<td>It is just really frustrating that we get an early registration date but cannot get the classes we want because they are reserved. Also SFU Surrey is still a part of SFU as a whole. Other students are able to take classes at different campuses, even though I live in Surrey I am still not able to take a class there until the very end of registration, That does not make sense to me.</td>
</tr>
<tr>
<td>I'm not the only systems one student to have this problem. Seeing as how course registration is competitive, please rectify this problem so that the system accepts such students and gets them into the classes specifically reserved for them. Thank you.</td>
</tr>
<tr>
<td>I was not able to get into a single class I initially wanted to take because once my registration date rolled around, all the classes were full.</td>
</tr>
<tr>
<td>As all students in the business faculty are required to take BUS 254, BUS 207 and other lower division business classes, more sections need to be offered, or sections with larger class sizes to accommodate the vast numbers of students attempting to fill their requirements.</td>
</tr>
<tr>
<td>Required courses for IAT students should not be available to students in other programs until open enrollment. Because of this problem, there are students who will not be able to complete higher level courses because students who do not necessarily need them to graduate or go further in their program have taken the spots that should have been 100% reserved for IAT students. On top of it all, it is a lower level course, so the demand for it is high. There should be more than one lecture for such a popular course.</td>
</tr>
<tr>
<td>please add more spots fall 2011</td>
</tr>
<tr>
<td>I really can’t take my required course this semester! Now I only can took two elective courses now.</td>
</tr>
<tr>
<td>I was not able to get any of the courses required to finish my diploma this semester. I was really dissapointed. What is the point of offering the diploma if sfu will not provide the classes needed to complete the diploma. There was nothing offted for the evening class except the only course I am taking.</td>
</tr>
<tr>
<td>-have more tutorial times</td>
</tr>
<tr>
<td>I plan out my course schedule a couple of days ahead of my enrollment date, making sure to carefully check whether a class is close to full or that nothing conflicts. So far, every time I’ve done this the courses fill up in the next couple of days and none of the alternatives I’ve chosen work anymore because they’re full too. It is really irritating that whenever I am ready to enroll so many courses I want to take are already full.</td>
</tr>
<tr>
<td>It is much too slim. They need to make more classes per course in order to accomodate everyone. It is especially apalling that I am a communications student who was not even able to enter ANY of the required communications classes (even if I have fulfilled the prerequisites)! Therefore, people in the communications faculty should have FIRST PRIORITY over anyone else in obtaining a spot in those courses (this should be applied to all other faculties as well).</td>
</tr>
<tr>
<td>I think it would be beneficial for students to be told exactly how the process of deciding who gets to pick courses first works. If this information is already available on the internet, students should be told where it is.</td>
</tr>
<tr>
<td>I attempted to register in the Distance Education section. I may have misunderstood “distance education”. I had assumed there were no set times. I will look into this.</td>
</tr>
<tr>
<td>I feel that many education class are offered but have conflicting times. They all tend to be offered in the evening and overlap in times. This makes it extremely difficult to complete necessary credit hours.</td>
</tr>
<tr>
<td>Afternoon classes not available for most subjects. If they are, they are inconveniently timed at the same time (eq. 2:30-3:30) More sections needed.</td>
</tr>
<tr>
<td>I don’t get why 206 is only offered in Spring and only one small lecture as all SIAT students aiming for a BA degree seems to need it. I need it but by the time of my enrollment date, it’s already full!</td>
</tr>
<tr>
<td>I'm a third year econ student but there is no space left for most of core courses and required courses when I enroll. This will have affect on my schedule to graduate. I will be really thankful if I can enroll in these courses! I really need them now.</td>
</tr>
<tr>
<td>I don't like how late my enrollement date was, being a first year, it was hard for me to get any of the courses that are required for my degee. I'm waitlisted for everything.</td>

</tbody>
</table>
Second degree students should have given some credits for lower division, which have been completed in the previous school. Due to pre-requisite, I was only able to take one course in the first term, then given very late enrollment date, which caused many of the desired courses closed by the time of enrollment. It happened again this time. All classes I was hoping to get was already full by the time my enrollment opened. The system is taking away my chances. This needs attention!

isn’t the lab for tues afternoon still opened? why is there no room for me?

I am taking Calc 150 and I’ve written the French entrance exam and was placed in French 212. How do add these 2 classes to my Spring 2011??

I need these 2 classes because these 2 are the requirements for my WQB

Health science courses fill up way too quickly. Maybe bigger class sizes are required?

Linguistic courses past the 220 level needs a lot more seats!

It is very frustrating as this is the 2nd term in a row in which I could not get into the courses I need. I take on a full course load each semester with 5 courses, and because of this I seem to be punished and never can get into any of the courses I need.

For macroeconomics I feel as though SFU should reserve a few seats for some first year business students since it is a prequisite for us to get our degree. Many of the people who are taking this course, especially first year students, are NOT business students. They are taking it because the WANT to become a business major - however they are not in the business students yet.

I’m choked. I would have liked to finish my major and urban studies certificate this term, leaving only one term of left to get my remaining B-Sci credits. Since nothing was available, I need to tack on another semester and hope that the very specific courses I need are offered this time again next year with space sufficient for me to enroll. How long will I need to wait to finish my degree if this happens again?

this system sucks for not letting anyone picking his/her desirable classes

I hope all the required courses could offer more sections, or students’ university schedules would be meesy and everything might be delayed.

there are not enough spaces for many courses!
the price we pay to go to school should be reflected in the available courses at the school
there is not enough space left for courses that are lower level pre-requisites

No space in the distance education sections

It’s hard to find classes that work toward my major, especially since the SFU hockey team practises everyday and we get such a low priority for choosing classes.
The classes I need and that will fit aren’t allowing me in due to reserved seating, so the classes that will fit the timetable often have nothing to do with the intended major.

Please! I really really want to and have to take this course!
although my waiting list position is at 75, please let me in!

it’s not fair, when i can enroll my class, there is not available section, even wait list is closed. i desiered study economic, by the way this is my required course, and i am the student who really want to get the economic major in the future.

As a member of the SFU NOW program, options for courses are limited to evenings and weekends. ENGL 212 is crucial as it serves as both a second year English and a Q credit.

I only need one more course to graduate. I was enrolled in three courses but Crim 440 was cancelled which will ruin my ability to graduate this semester as I can only do distance ed and all other courses are full.

Many of the required communication courses are full in lectures so that I could not get any place in this term.

More distance ed options might alleviate scheduling conflicts.

My issue with Phys 121 for the 2011 spring term was not the lecture time, but the times/availability for the tutorial classes. My desired time for the phys 121 tutorial would be 12:30 to 1:20, due to previous commitments.

IT IS SO FULL......!!! PLEASE OPEN MORE CLASSES..........!

they offer 150 seats in Fall semester, but only offer 90 in the Spring. Would that be possible to offer more seats in the coming semester?

I am doing major in Business. My concentration is Finance, but i cannot find space in Finance classes. I don’t have any other course to pick from. This has become the norm for SFU

For the love of God please don’t treat your first years like this again.
I find it ridiculous that I can be in my 4th year of study but be unable to get into ECON 302, a course I require for graduation and a course I require to be able to register for the 400 level economics courses that I want to take. This is the second semester (the first being this semester, fall 2010) that it has filled up before my registration date.

I'm a first year and I was given the last day to enroll in my classes. I can't believe I can't get any courses.

As a full time worker and part time student, I am limited to choosing courses that can be taken in a single day of the week. The course I should take, CMNS 130, is unavailable in this format.

I am on the wait list for CMNS 210, the only course available to me with only CMNS 110 as a prerequisite.

Meanwhile, as a mature student, coming in with a Journalism Diploma and a lot of relevant experience, I am hoping I might be allowed to override the requirement for both CMNS 110 and CMNS 130. Please check with Fiona Jeffries, my professor from CMNS 110, to determine if that would be appropriate.

I find it ridiculous how there are 3 courses that I need for my degree that are completely unavailable for me. I waited for a class for THREE terms and still didn’t get it. Please enlarge class capacity.

There needs to be more available sections

Economic department should open more 300 level class, like econ 301, just 60 students, unbelievable.

By the time I had my enrollment appointment the cmns 428 course with Roman was already closed - no space left even on waitlist... Why aren't there more sections offered?

definitely need more classes in ther 1630-2100 time slot. I cannot take any classes that run from 800-1600 and the selection of those outside of that range is disappointing... actually, it makes me second guess moving from UBC where there is way more selection. SFU Now is a joke as far as selection is concerned. The only way I can get my degree is if I quit my job and come back to school full time for at least one full term so that I can catch up on classes only offered during the day.

Course availability at SFU is really lacking, especially in Economics whereas departments like Business have 3 sections PER UPPER DIVISION CLASS! And schools like UBC have way more class sections as well. No wonder students can't graduate on time.

I am not sure why I am not ever able to register for this course.

It would be great to have courses available in the evening (starting after 6 for those of us who work and have to travel to get to SFU). Thank you.

There doesn't seem to be a lot of selection for women studies students.

I think there needs to be more distance education courses - particularly for lower division courses as well as some of the 300 upper division CMNS, WS and PUB courses.

My registration was very late so all the business courses were completely full and I could not even waitlist.

CHEM 126 is co-requisite for chem 122. and chem 122 is essential for all first year science students, but all sections are on wait list now except the one which is reserved for surrey students, so it's very difficult to get in. apparently seats are not enough for all who taking chem 122, could you please add another section or make other changes for this course ?

Why is the course open when I have been waitlisted?

The two courses have to be selected with MATH 151 together, but I have taken MATH 151 before.

Exploring the solar system was the only class I found that related to space. Maybe you could offer a class on astronomy- unless there already is one that I cannot find.

Why is CRIM 104 always only 60 spaces available EVERY SINGLE TIME at Burnaby! There should be much more open space for this class because it always fills up instantly and 60 for a 1st year class is a disgrace. It is also a prerequisite for my other courses and there is no excuse for only 60 spaces. Thank you.

Would like something to inform students when reserved restrictions are lifted. (Preferably email).

Please make more lecture and tutorial times for this course as it is required

please have more space for upper level classes!!

The enrolling appointments for the first year students in their second semester seem to be chosen by someone, who doesn't really understand, how important it is to get the mandatory courses as early as possible (for example, as pre-req's). Because i was not able to get the courses i need, i can't enroll in most courses now.
COMMENTS

I wasn't given my appointment to pick classes until November 25 at 1:30pm. Given that I am a distance education student and it is a well known fact that classes fill quickly, I feel I should of been given the opportunity to pick classes sooner - much sooner. It has never been a debate on what I want to take. I've been after a course program such as this, for a very long time, close to 20 years but it was unheard of then...

For the economic 200 level courses, I hope more section of lectures will be added and I wish there is at least waiting list for ECON major students, since there is limited seats for large amount of need from students.

the courses are filling up too fast.
little wait list room.

On waitlist, but filled up in seconds!

I am in the PLP program and have very specific courses which I need in order to earn a second degree while in PLP. I am now stressed out.

The health science courses offered this semester were very LITTLE and inconvenient. The sections were all VERY small, and thus all classes were filled by Nov 17th, and the courses that were offered in the 200 level were the SAME ones already offered in fall, so if you took it in fall and wanted to take more 200 level courses in spring, they were all repeats.

For the Math 155 course, having multiple sections would greatly help as this course is a requirement for many students and the space fills up quickly.

Pls Pls Pls Increase the no. of sections or no. of seats.

In case of both these classes, either the lecture is opened and the lb is closed or the lab is opened but the lecture is closed. It's really confusing and frustrating how one can be available and the other isn't. Are we expected to just take half of a class?!

The courses are available and inconvenient times, all the first year second semester math classes are very early in the morning while the first year second term chem class is available in the afternoon which means every student in science that needs a math and chem course will have around four hour time slot in between.

LING 362 should either increase class size or open more classes or be available in more than one semester.

I tried to enroll in courses on my due enrollment date; however, was denied access. On December 7th, I finally was able to enroll for classes; however, all the courses that I require for a Post Baccalaureate of Special Education are closed. I am frustrated to say the least and don't think that I will be EVER complete this programme. I am currently wait listed in EDUC 464; however, I am last on the list so that the likelihood of getting into the course is slim. I had this problem last semester as well. Are there any other courses in Education or another discipline that I could take which would count towards the 22 credits that I require to complete the P.B. of Sp Ed? As I am a Distance Ed. student I do not come into Vancouver, thus have not spoken to an adviser.

More required class lectures. and to not have tutorials times that finish at 10:20.

I NEVER get the courses I want because my course registration is always super late.

The number of seats offered by IAT 100 are not enough, since the demand of the course is pretty high

I would appreciate if there were more courses on Tuesday's or Thursdays. Very many of the courses I am looking at are offered at the same times on Monday, Wednesday, Friday.

ALTHOUGH THERE ARE ONLY A FEW SEATS LEFT, I CANNOT REGISTER IN THIS SMALL SEMINAR LIKE COURSE (A WORLD WITHOUT POVERTY, IS 329) BECAUSE IT IS 80% RESERVED FOR THE INTERNATIONAL STUDIES MAJOR. I AM DECLARING in International Studies, but I cannot declare until the end of the semester, since Jan has told me not to send in the application until the end of December, when my grades come out. Many of the higher division courses are only offered at Harbor center, which is not at everyone's convenience to have the tutorials scheduled on different days. Many of the HSCI courses are offered at a time way too early for those who have to commute.

There should be more classes available for courses that are higher in demand, especially those that are required courses.

I am finding the economics courses are filling up extremely fast. By the time I am able to register, all sections are full. I need ECON 301 to begin my upper division courses, therefore this is causing a setback.

It's distance ed!
Allow more spots!

there is a known number of ensco students. almost every single one of them takes the same courses. how did you manage to plan it so that not all of them can get the courses that are required for them to graduate?
The classes are at night time and only two of the required six are offered this semester. Some of them should not be scheduled so late, after 6:00 PM, and there should be more courses offered.

I have such a late enrollment date, almost every single required lower division course for my major kinesiology is full. Not only that time conflict also plays a major factor. I am now only enrolled in one of my three desired courses. One desired course is on wait-list, another course that I don't want to do during 2011 spring semester is also on the wait-list because every single other course either has time conflict or they are full. And lastly lots of ppl are taking MATH-155. Both Surrey and Burnaby campus are full. It is really a headache, and I think there should be more classes open for popular courses like MATH-155.

still on waiting,

I am a communications major unable to enroll into communication courses. Yeah. Lecture is on Tuesdays 830-1030, then only lab options are 1230-230 and 230-430, 1230 option is full because common for students to take 304 at the same time, and the 304 lecture is during this time slot. PLEASE ADD EXTRA LAB COMPONENT AT TIME THAT DOESN'T CONFLICT WITH CORE KINESIOLOGY REQUIREMENTS. maybe 1030-1230?????

There is not enough space in classes! I had to take all night courses (which is conflicting with work) and just barely got into them!

more space for math 232 please !!

I am a paying student and I feel that I should be able to get into the classes I want to take! I am a hard working student and I find it incredibly frustrating that I cannot take the classes I want to because they have all been filled by students with earlier enrollment dates!

I am on a wait list. I did have 10 people ahead of me for crim 101 and now it is down to 2 people ahead of me. Much more promising but I hate leaving things to the last minute, as it stands if those 2 people drop out, I will need to swap a class. I am also on a wait list for crim 103, that has only gone from 10 people ahead of me, to 7 people still ahead of me. I would really like to take at least one crim course this term as this is my reason for wanting to be a Simon Fraser University student in the first place. If there is anyway to make this a possibility, other than the obvious, I would greatly appreciate it. Thank you very much for any consideration.

Sincerely,

XXXXXXX XXXXXXXXX (student number XXXXXXXXX)

Courses too popular. Late enrollers cannot get in.

Slim selection being a four year BPK student taking upper division courses. I didn't have much room to expand and test different areas as I was very limited in my course selection and was forced to settle for the few courses offered that I could choose as electives. Either make the BPK electives more broad or offer the courses in the upper division Kin electives list as less than half were offered.

Why does one of the Japanese 101 sections only have seats for 15 students whereas the other section has room for 25?

I'm a CMNS student, but I can't get in any 200 level courses. The two courses I have chosen are on the waiting list.

I found it impossible to get into any of the Crim and many other courses at the Burnaby campus, as they were all full or tutorial times clashed with other lectures. It was very hard to make my time table this semester. Luckily I am able to commute to Surrey. I'm hoping next semester I will be able to attend classes at the Burnaby campus.

I have taken 12th grade math and writing and passed with a B, but I was told Simon Fraser has no record of ANY of my previous grades and my class selection is limited due to this. I would not have been admittted to this university if Simon Fraser did not have a record of my grades.

The problem here is that the course selection date is so far back. By the time I was able to choose courses, the ones I needed were gone.

I know there is one seat available but I haven't taken IS 101 yet.

But professor Logan told me to take this course since I did good on his course last semester.

There are very few upper division courses offered in Archaeology it is crazy that they would be scheduled at the same time eg Paleoanth and Arch of China (special topic) . Since ST courses are not offered often it makes no sense to schedule at the same time as a course that is a pre-req to other courses!

Also - it would be helpful to have some sort of guideline to know how often/which semester courses in Archaeology Department are offered instead of having to guess whether a course will be available in the fall.

Thanks : ) !

I have been trying to get into LING 323 and 321 for the past semester and I still can't get in. This is unfair because I am an approved linguistics major and I can't even take the required courses for my own major.
**COMMENTS**

just a complete frustration ...
the system shows:  STATUS - OPEN (green circle) from step 1 to step 3 ...finish enrolling - Error: You are unable to enroll in this class at this time. Available seats are reserved and you do not meet the reserve capacity requirements
why do you need to get to the final stage with all "GREEN CIRCLEs" on the way and get a result of the ERROR message?
spent 3 days trying to enroll - no luck
I am trying to get a minor in kin, but I can't get into the pre-reqs for admission to the minor

I am really hoping to get into Math 155 because it is one of the requirements for me to fulfill before I graduate.

Every Criminology class that was offered at the Burnaby campus (where I will be in residence) was filled before my enrollment date came. This means I have to take classes everyday at the Surrey campus instead.

CMNS courses this semester were awful
i need to take those courses but i could not even take it because my resister date is too late.
to complete my major i need to take it but no way to chance to take it if my resister date is too late.

It is not fair for the students who are near the end of the enrollment where they do not have any open classes for their necessary WQB requirements and their major or minor requirements.
A different system should be thought of.

The enrollment process has left me at an extreme disadvantage when enrolling for classes. Being a 2nd Bachelor's student, I need upper level courses, yet my priority for enrolling is positioned after every other upper level student and therefore, after most of the upper level courses are full. Either the school needs to increase its class size so all interested students have a chance to enroll or more courses should be made available.

No seats available anywhere.
I found it very frustrating this time to register for courses. Something needs to be done for the unfortunate people that get a registration time LATE in the cycle. Maybe introduce a new wave of classes available half-way through the course registration cycle so that classes are staggered? I came from Kwantlen, and while it was a smaller school, they had less classes as well, but for some reason, it was never as frustrating as this time at SFU.
Also... please explain what "not meeting the reserve requirements" means?

Why do all graphic design/ media classes have to conflict with the required Filmmaking course on monday. I would have figured that it would be common or logical to want to participate in both. If you, as a university, stress interdisciplinary studies, why is it becoming almost impossible for me (as a film student) to do so? So far, the only interdisciplinary classes I can participate in are dance, (I'm a XXXX, it's not for me and I don't expect that to be common), music (in which the so-called "introductory class" is very difficult to near impossible for someone who has no musical theory training or background, which was admitted to me by my tutorial leader), or theatre (I am not interested in acting whatsoever). Please take a look at your course timings and flexibility (or serious lacking thereof).
-A Very Frustrated Film Student

have more spaces in distance ed courses
NO SPACE IN BURNABY CAMPUS Sections. I'd be willing to sit in the isles if necessary and there are always a number of people who don't show up to lecture anyways. A number of people sit in the isles even when all the seats are not full.

We have so many business and economic students. I do not understand why we don't offer more of this class

Very limited availability no wait list available. Needed this class to graduate this term.
Courses were full during first week on enrollment! Quite Ridiculous.

There are not enough classes of each course offered.

why do all of your courses from science and math conflict with each other, and when they don't the tutorials or labs conflict. as a working student playing hockey I only have mornings and days available but you continue to schedule and overlap the classes so that I have to take random crap courses I don't need. I wait each semester to take one math or science course, at this rate I'm never graduating and I can assure you it will definitely not be at this school as you guys slowly take all of my money due to your ridiculous course availability.
the lectures have space, however all tutorials are full. When we register for the class we are placed on the waiting list.
COMMENTS

English 212 Metrics and Prosody is a new course offered in Spring 2011 and I do not like how waitlisting is not offered for the English Department. As well, I wish that the class capacity would not be capped off at 23 students. I think it would be ideal to have some way for the administration to know what the desire for a course (such as English 212) would be since there is no way of knowing how many people wanted to get into the course but were unable to because of the limited seats and lack of waitlist opportunity.

I do not understand why a mandatory course and only FAL offers so little seats, at most only 20 seats. But a course such as FAN, also a compulsory course can seat at least 40 people. Also, the lecture halls can carry a capacity of 100 or so students, so why not make use of it? It is also unfair to undergrad 1st year students, when they absolutely know they will register for a particular course, which in this case for me is FAL, and I am unable to take it due to my course selection date. So why should I not be allowed to take that course, when SFU placed my registration date so far behind of everyone’s else?

Had I known how difficult it was to obtain courses at SFU, I likely would not have transferred to this university. Second-year students receive the lowest priority registration, the majority of the courses I need as an education student are only offered during the summer (and often only as night or distance courses), distance classes have a 30-45 student cap (with an even smaller waitlist) and fill up within the first day or two of registration, and worst of all, students are only allowed on two waitlists at a time (so for people like me who can barely get any courses in the first place, it’s IMPOSSIBLE to get a full course load). I do not wish to be obnoxious, but frankly, the system is ridiculous. Why am I paying good money to go to a university where I can’t even enroll in classes? I’m a student who can’t even be a student... it’s asinine.

It is really difficult, and frustrating, to try to enroll in these courses because only 10% is available for people without the IAT major, however, in order for me to apply for the IAT major, I need one IAT course. Also, once the seats are lifted, there was still very little chance of me getting into the course. Therefore, if i can not even enroll in these courses, I will never be able to even apply for this major, which does not seem fair.

For the next term I would like to enroll in Crim 104 at Burnaby Campus. The lecture has space for 180 but only offers spaces for 80 in tutorials. This thing doesn’t work; it thinks ling 221 has something to do with descriptive tech. I couldn’t get into ling 221, 222, Phil 100, or Germ 103 either because of conflicting time or every section was full because I was given this bloody late enrollment time; in some of those it was both those reasons.

This school’s course selection process is biased and ineffective. I am in the communications faculty wishing to take a course that is not only a requirement as an undergrad in this faculty, but also meets a WQB requirement. I am displeased that a student has to pay so much to attend school here only to have to settle for courses that are not ideal. It does not seem logical and it is no mystery to me as to why so many students drop out after their second year due to this reason alone. I sincerely hope somebody actually reads this message and it isn’t just stored in some empirical database. There are complaints out there, they need to be heard, and they need to be responded to adequately.

Several classes I planned to take were full, I am unable to take a full course load because of this. I am a third year student in sfu, My major is economy. I should take 4 classes in next years, But I only enrolled one class, others are all full. School should pay reponsability to this, school should open more economic classes in next semester.

Please increase the availability of the course.

finance courses are always full days before my registration. not enough section times

I believe that I have met the pre-requisites, but I still can not register the course.

Both LING-221 and LING-222 are required courses for a Linguistics major yet there are only 40 spaces in each class. Since I was given such a late registration date I was unable to get into my required courses. I think the limited amount of space in required courses is ridiculous. If you are going to make a course a requirement than it should be available to more than 40 students

make more classes available, so everybody can get into the classes the need.

For the physics 120, It says that i cant pick this course because I need to have physics 12 first, but the thing is that I cpmpleted Principal of Physice 12 in high school and i got 91% for the final mark. For the Math 232, I am not able to pick that course because they haven’t get my Ap calculus BC Level 5 result yet; therefore, it shows that i did not meet the pre-requisite of this course.
**COMMENTS**

Yes, I was withdrawn from the fall term because of the wrong mark of my provincial exam. I had a stressful time, which gave my family and others a hard time too. At first, many people were shocked by my provincial mark and when I asked for a re-mark, the mark came different and only saying "sorry" for the wrong mark. There was no second course registration since the classes were already started.

I had to pay 250 again to apply for the spring term. I thought for continuing from the fall term and appointing new in the spring term would have same course appointment time, yet, I was withdrawn before and I get to select two days later, which is today (and many courses are full).

I am a little bit mad... I want to say that I am eligible to take all the courses that I want... However, I can't since you guys would not know my story and I have no regret to take courses that are lefted out to take them.

All I want to say is, for the next people who is appointing later than the continuing students, you guys should give spaces for them.

Thank you for reading my comments

need more classes... couldn't get into any required ones like econ 105, eng199, and etc...

I wanted to do my honours in Geography but one of the required courses (a choice of either 300/301) was only offered in this current term, fall 2010 and is not offered again until next fall 2011; when I will be graduated. I cannot fulfill the requirements of the honours program now; it is unfortunate that a mandatory course is only offered once a year.

My registration date was very late for the past couple semesters. I have not been able to enroll in any of my core, required crimology courses (that is needed for me to apply to crimology major and faculty).

Looking to take courses to fulfill the Geography checklist for Environmental Specialty, as well as the Certificate in Urban Studies. The courses above were chosen based on these checklists...what are the odds of me enrolling in GEOG-100 at this point if I'm #4 on the list? Is there any chance I can still also get enrolled in SA150 for this upcoming spring if any spots free up?

According to the system I have already taken FAN X99 although I haven't. I need to take Math 100 but cannot due to my math grade therefore I am going to take the Q test. FAN X99 will be my backup in the case that I do not pass the Q test. I'm not sure why it won't let me in.

The school should add more seats. We were asked to explore whereas we don't get a chance to choose what we want.

Very disappointing that SFU only has 112 spaces available for a required crim131 class. Last term it conflicted with my Tuesday Crim classes. Also this term Tuesdays have too many conflicting courses for all classes. Vanc. campus also has reserved codes for SFU NOW students. At the time of registration I thought all campuses were available to all students. I am concerned that without CRIM131 I will not be able to enroll in other crim classes to complete my major.

My enrollment date for spring 2011 semester was horrible. If I remember correctly, the first day to enroll is 8 November, and mine was 23 November. I would like some explanation, this is unacceptable.

Please make more classes available at Surrey...

most of the courses that i wanted were closed a month ago when i first went to sign up for them e.g. managerial accounting.

More classes in the afternoon would be just dandy.

I believe that I SHOULD be able to take HIST 307 as while I do not meet the prerequisites I have worked with the instructor here in Greece, having done field and lab work, and have already learned much of Greek history and archaeology. It is possible the instructor may vouch for me.

It's really unfortunate that after 3 terms I am still unable to get into any Kin classes. It is very important that I get into Kin 142 and Kin 140, but Kin 140 won't even let me try to enroll because of reserved seats. The tutorial I was planning on enrolling for has a waitlist of only 5.

I needed 281 to get in to life sciences year 2 but Chem 122 Surrey was full and I need 122 to take 281 but the Burnaby 122 conflicted with the Surrey 281 and so I could not take it this upcoming semester

most of the hsci courses are always full. I think the hsci department should consider the problems and offer more spaces for those required courses. I know the hsci department has accepted so many students last semester and i dont think we as a student should pay for their mistakes. If this situation continues to happen, how can people graduate on time and I dont want to waste my time because there is no space left in any courses and I cant take anything.

Classes in Surrey are not available to enough of the students. I don't want to declare a minor in something before I try it, but I can't get into the classes.
This semester my courses were based on which classes were open, not which classes I needed/wanted, which isn't right or fair in my opinion.

MATH 251 at 5:30PM - 6:20PM is too late and risky especially considering it takes 1 hour 30 mins in Transit for me.
Course offerings which start at 8:30 AM is too early for me especially considering it takes 1 hour 30 mins in Transit for me.
Course offerings if restricted to 9:30 AM - 5:20 PM would be perfect.
This is ridiculous, I had the classes that I wanted picked out for weeks and when I try to register, I BARELY get into ONE class.

There are never enough sections of this course offered. Please, please, please add another section for this course. You will have more than enough people to fill it. It acts as a bottleneck for graduation.

It would be better if there were more afternoon tutorials available for classes that have a higher volume. eg. ECON

Not able to enroll in classes because of reservation of spots
I didn't get any of the courses I wanted except for ECON 103

It is always very difficult to get the classes I want because they are either unavailable or already at full capacity.

I cannot get into any of the Communications courses because they are either full, or I am unable to be added to the waitlist. This is VERY frustrating as this is my major and I should have priority. Same thing happened to me last semester and I am TIRED of taking courses that I do not need just to have a full course load.

too little seats for a required upper level Kin course

Need to somehow improve the availability of courses. I was pretty much forced to take 233 this semester because of the lack of availability in 265 and 267 labs.
I've been very frustrated the last two semesters. I have to keep putting off getting courses done because the registration system won't allow me to even register and then clear up issues. If you let us register for courses so we could hold that spot and then figure out the issue it wouldn't be as big of a deal. Now I can't register for three classes that I need and now I'm hoping it will get out sorted out in time before the classes fill up but I'm not holding my breath.

I really need these two courses. Not having them puts me back a year and would appreciate it if something could be done. Thanks

There is only 3 tutorials for HSCI 319 class!

Unable to start program as 1st year courses are all full.

There should be more classes in SFU.

We engineering students are said to have priority in our course selection, so why is it we must wait till the end of the month for our enrollment, and then jump through hoops to even get in to our core, mandatory courses?

I am a mature student coming in with a Journalism Diploma (Dean's List), and I am hoping you can waive the requirement for both CMNS 110 & 130. I have CMNS 110, and a lot of relevant experience.

As a part-time student who can only take one weekday away from work, my choices are limited. I am further limited by my work share situation with another part-time student; the only days I can choose from this semester are Monday, Wednesday and Friday (last semester it was Tuesdays and Thursdays, and this will alternate each semester).
The most logical course for me to take next is CMNS 130, but it is not offered in a single day format on my available days, nor as distance education for this semester.

I am waitlisted for CMNS 210, the only course that doesn't require both CMNS 110 and 130. If that comes through, I won't push for any special consideration on 230, but I am in position 40 on a 40 person waitlist for the lecture, so it's not looking good.

Thanks and Regards,

I've been trying to get into this course for 4 semesters now. Ridiculous
courses should be allowed to be enrolled in during ur enrollment date without have to wait for certain classes to open otherwise what's the point in having a specific enrollment date

The course availability in the Health Science Faculty is terrible. There are never any spots available, and the waitlists are always full. There are never enough sections offered, or the class sizes are too small. It is incredibly difficult for me to get into any classes and it is taking even longer for me to obtain my degree because of this. I honestly regret my decision to major in health science and I am also starting to regret coming to SFU because the enrollment system is horrible. I never get a good enrollment date despite my good GPA and no one even responds to my emails or offers to help me.

</tr>
</tbody>
</table>
i am not sure if I am erroring for these classes because I need to declare a major first. Also, not sure if i am unable to take ehl 199 because i have taken other english courses in the past. I would love to take this class because I need a refresher with writing as I have been unenrolled for 4 years.

I’d really like to be able to take those course these courses are simper compared with the others and I wish I can enroll in

The course is offered through distance ed.....when I emailed the Prof to find out if I could get in (I am first on the wait list) I was told to keep checking distance ed.....??? Where is this place to check?

please open up more space for the chem lecture and more space for the tutorial on tuesday from 12:30 to 1:20 also more space for phy 131 and a lot of people couldnt get into that course

I need hscl 160 as my faculty requirement, so please open another lecture as soon as possible. I am begging you !~

I have enrolled in the Post graduate diploma program in early childhood education that is offered as a distance education certificate. These courses are all required electives. I am concerned about being able to complete this degree on time (there is a 5 year completion limit) if I am unable to register in required courses.

N/A

My Capilano Transcript was not recieved. I have my Human Kinetics Diploma .

Please open another physics lab for tuesday 8:30 to 12:30.

9 hours after my registration enrollment time, I am not even eligible to sign up for the wait-list due to a maximum spot capacity. Perhaps this course requirement could be offered for more eligible communication students. Thank you.

i can't enroll any my major required courses this semester...so sad

There is only one kin140 offered and it is completely full as well as the tutorial class. I am on the waitlist number 66 and 9th for the tutorial class.

Eng 199W is opened in surrey, I go to SFU burnaby but why can't I take a class in surrey?? There's so much room left

seriously - the course selection period is RIDICULOUS. There needs to be a better way to gauge which students are eligible to take the courses they need in order to graduate; other students who get into the courses can afford to take it at a later date, or don't even need it as much as others. Deserving students always, ALWAYS get SCREWED over due to no availability in classes or late registration dates, and they keep getting late registration dates because they don't have enough credits. THEY ALMOST ALWAYS DON'T HAVE ENOUGH CREDITS BECAUSE OF THE LATE REGISTRATION DATES THEY ALWAYS GET, SO WHEN THEY FINALLY GET TO SIGN INTO A CLASS, ITS FULL AND CLOSED! something needs to be done. hire more profs, make more classes.

I think it should be available to ENSC students at Burnaby as well. It is an extra commute to go all the way to Surrey, especially when I have a class that would start 10 minutes after it ended. Is there ANY way there could be one at Burnaby campus for Spring? Thank you

hope school can offer more seats in the popular couses which on burnaby mountain campus.

I have been trying to get into this class for the last few semesters, but it is always full.

I struggled to find courses open with such a late registration date.

seemed like more courses available this semester, but three of them are at the same time. Not very convenient.

Not showing up in the course selection system

This course's availability conflicts with PHY131 lab.

My registration time was terrible. I hold a undergrad degree from another university and I was accepted to PDP. PDP tells you that if you don't have 1 education course entering you will need one for BC Teacher's Federation requirements to teach. How is a student supposed to get this course with a terrible registration time? Hardly setting up/assisting a student for a career opportunity! I could see a bad registration time if I was a new post-secondary student, however this is not the case.

I am on pacific leadership scholarship and as the budgets tighten they are less likely to allow us to take classes during work hours. I will be unable to finish my degree without leaving work unpaid for the semester or unless the university begins to offer classes in the evenings and weekends like the colleges do.

Thanks

<tr>
<td>I’m in communication major, however the required cmns260 course is full when my enrollment date starts. I was in wait list position 9, but I accidently mis-clicked and I had to enroll it again and this dragged me to the position 44 (44 is almost impossible to get in, in general). I feel so upset. I think the biggest problem is that the number of students attempting to take CMNS courses is increasing, it’s so hard to get into the course of my major. Hope the department can solve my problem because choosing this 260 course is a must and it’s very important and influential for the enrolling in summer term because CMNS260 is a prequist course for many upper division CMNS class. Thank you so much for reading this. Your help is very important for me and I really appreciate that. Thank you very much!</td>
</tr>
<tr>
<td>courses in surrey should have spaces left for burnaby students as well</td>
</tr>
<tr>
<td>It is very difficult to organize lectures/labs/tutorials for science courses without having to deal with seats being held at the undergraduate level.</td>
</tr>
<tr>
<td>I would like to be added into that class with the 11:30 tutorial on Tuesday. I registered on the date I was assigned but there was no tutorial to match the class, therefore I cannot even register for the class. I NEED that class, otherwise I will be behind. SFU does not offer it in the summer.</td>
</tr>
<tr>
<td>I am overall severely dissatisfied with the registration present at this higher level educational institution. The system marginalizes second year students and leaves them with the left over scraps that no one else wants. I don’t know what the school plans on accomplishing by doing this, but it certainly discourages me from wanting to spend my good, hard earned (seriously, I work to go to school) money. I would hope that there will be revisions to this system that sees students who genuinely want to participate in school being given the proper opportunities.</td>
</tr>
<tr>
<td>Thanks for the better registration date this semester! :)</td>
</tr>
<tr>
<td>The courses are always full in every semester and it is very hard for student to get to graduate on time.</td>
</tr>
<tr>
<td>This course was unable to be added to my schedule; the SIS stated that I did not have the necessary pre-reqs; however, I had already spoken to and had this course approved by an advisor within the French department. Also, I have taken a placement test that allowed me to enrol directly in 222, however I was blocked for enrolment in 217.</td>
</tr>
<tr>
<td>many courses which are widely popular among us have too little available seats such as CMPT165 IAT100 and so on.</td>
</tr>
<tr>
<td>The IS program has very few classes offered every semester, which is unfortuanate. I am thinking of changing my major, partially for this reason.</td>
</tr>
<tr>
<td>I really need to take this course in this semester since I don't think I'll have enough time in following semesters.</td>
</tr>
<tr>
<td>Over 100 spaces left and all for Kin-Majors? That’s unbelievable.</td>
</tr>
<tr>
<td>THERE NEEDS TO BE MORE SECTIONS AVAILABLE PER CLASS. THERE ARE TOO MANY ECON 103/105 AVAILABLE YET NOT ENOUGH THIRD YEAR ECON’S. 180 STUDENTS PER CLASS IS NOT ENOUGH TO ACCOMODATE SUCH A GREAT DEMAND FOR THESE CLASSES. WHAT IS THE PROBLEM? TEACHER SHORTAGE?</td>
</tr>
<tr>
<td>It closed even before I could enroll, and also, it wouldn't let me enroll because it was reserved</td>
</tr>
<tr>
<td>On the class schedule of spring term, There is D100 lecture of MACM101 but when I search the class online, It was not valid and another time is conflicted.</td>
</tr>
<tr>
<td>The Distance Ed. course is already full and my position on the wait-list is not likely to make it into the course before the semster starts.</td>
</tr>
<tr>
<td>The open lecture conflicts with my Math course (154).</td>
</tr>
<tr>
<td>Interested in going into communications, and was told to try out Communications 110 which is an introductory course. The course at the moment is only open to students with in the Communications Program. Would really like to see if I’d be interested in the Communications Program, hopefully there is room for me to attend this class.</td>
</tr>
<tr>
<td>I’m an MBB major and require these course for my degree. Both of these classes have space in the lecture but not in the lab/tutorial components, so you just need to make more tutorials/labs available.</td>
</tr>
<tr>
<td>No econ classes for a ECON 2nd year student</td>
</tr>
<tr>
<td>I am on a waitlist in position 17. It is a distance course and I am anxious to know if there is a possibility another section will be added?</td>
</tr>
<tr>
<td>Courses that I needed had conflicting schedules and was not able to take them at the same time</td>
</tr>
</tbody>
</table>
This course's availability conflicts with PHY 130 lab.

Quite a few of the course times overlap, making it impossible difficult to schedule more than one class per day. And the courses that were found to fit right after each other is offered at two different campuses. (Impossible to get from one campus to another in 10 mins.)

My actual problem is not able to fit in the Lab portion in my schedule. The lecture and tutorial is fine. Also, I noticed that some of the class time for tutorial or lab are during the lecture time yet there are students still registered for those time. Does that mean that they are not going to attend the lecture? But then the system would not allow them to register anyway as they are conflicting each other.

It would be important to increase class sizes to benefit students.

CHEM 460 is a required course for the Chemistry Honors degree that is only offered once a year. Last year it was offered mid-day and that would work excellent for me, but this year it is offered in the late afternoon/early evening. This time is extremely inconvenient for me as I live in Mission and transportation between Mission and SFU is very sparse. Westbound transportation in the afternoon from Mission is unavailable, so I would have to spend all day at SFU with nothing to do since I am not taking other classes on those days. There were numerous breadth and elective courses that I was considering taking, but they were all offered either in the evening (5-8) and transportation is difficult for reasons stated above or on separate campuses and insufficient time would be available for me to travel between campuses.

It's not possible to get into any REQUIRED courses, let alone elective courses, when there's no availability left BECAUSE the university chooses to give out an late enrollment appointment to an international full fee paying student with a better than average class record in his second semester. I shudder to think what's going to happen in the later semesters. Leaves a horrible aftertaste of SFU as a whole who are quick to remind me that I have $5,400 outstanding (a multiple of the amount local students pay) without even waiting to see if the student has completed his enrollment. Fantastic work!

Offer more than one lecture for the upper level HSCI courses. All HSCI students need to take them and they fill up very quickly.

MBB 222 is adding extra sections for tutorials once the previous ones are full, but they are at the same time as CHEM 282 lecture, which is a co-req, so people can not enroll in those tutorials and get into MBB 222. This is a big problem because I need it, and others, so we can take MBB 231 in the summer, and enroll in 3rd year courses in the fall! There is not enough sections offered so that people can enroll in classes. (BISC is also a problem as ALL the sections at this time are wait-listed)

Also, STAT 201 is a requirement for many people, and offering very few seats at the main campus is frustrating. I can’t take it in surrey at 8:30 because I have other required classes for my degree in Burnaby at 9:30. These are major courses which should always be available!

There is never spots left when I register and I have absolutely nothing to take for next semester, unless i fail the courses im taking this semester and have to retake it.

I am unable to finish my lower division requirements this semester because i was unable to get three courses that i needed. I also don’t understand how there can be spots empty in some tutorials when lectures are full and vice versa. I’m frustrated with the enrollment system considering most of these classes were full by the time my enrollment date arrived.

This system should show if the classes are available or not. It does an inadequate job of doing so. This is a reoccurring problem and irritant.

Please send more emails about enrollment appointment as I missed mine for this upcoming semester.

SA 356W

I was advised to get into this course by Lynn Kool to finish my undergrad in Political Science. Thank you

I feel its slightly ridiculous that this class is required for my major and its NOT being offered. I am sure there are plenty of students which need this class and due to some unknown reason its not available for anyone to take.

Many 300/400 level CMPT courses in the same concentration have conflicting schedules.

I really need to get enroll this course. Because I am on the waitlist, i couldn't access webct. It also means i cannot hand in my assignment on time. The lecture already started twice, I have so many things left behind.

I require this course for my PBD in Special Education.
COMMENTS

because my enrollment date was later most of the students, I was not able to select this course.

i want to switch my econ105 's tutorial but there is no space, which cause that i cannot take ling110.

Why aren't there waitlists for any of the econ classes?

In most of the science courses I need to register, I am being told I don't have the prerequisites and its frustrating as I am almost completing my degree program and need a science credit.

Please, please, please provide more spaces in Business 316. There are lots of students on the wait list and this has been the case for many semesters now. Please take this into consideration. Thank you.

For this semester I will not be able to take any of my required pre-requisites for my intended major. This greatly frustrates me and makes me very unhappy with S.F.U. The reason I came to S.F.U is because I wanted to major in music. For my first semester I was kept busy meeting the requirements so I could take these courses this semester. However, now none of them are offered to me. Every music course that I could possible take requires these courses. I have other friends in the program who are displeased with this as well.

I do not understand why this is?

Also, of the courses offered, I have been wait-listed and/or blocked because the classes are full. I had no control over when my enrolment appointment was set and once I was able to enrol in my courses the classes were full.

Is there any way I could get priority for these courses?:
FPA 147 Intro To Electro-acoustic (this is a distance education course yet it is blocked to me. it is a pre-requisite for my degree. Is there any way possible you could get me into this course. I would love to take it. I have been excited to take this course for a while, as I am already practicing my electronic music production on my own now.)
CMNS 258 - This is one of the only alternative music courses I can take this semester. However, I am on the wait list for this course. Could you help me get into this course please?
FPA - 243- Gamelan

Also, FPA 249 is the only course I am enrolled in right now, yet, I need prior approval to get into this course. Can I have that approval. I may not have the pre-requisites from SFU right now but, I play classical guitar at the grade 9 level. I have read lots on music production - my friend lent me his notes from his music production school. I am very competent in the field of music. Its what I love.

Thanks for your time and understanding,

I feel the Business Students already accepted into the facility of business should also have priority in the lower division courses for the program. On several occasions I have been unable to enroll in such Business courses because all sections are full before my enrollment date.

The popular classes need to be in rooms with more spaces to allow students to enroll--this is ridiculously obvious.
ENSC 105 is supposed to be ENSC 105W

I am kind of annoyed how easy my first semester was to enroll in classes but now in my second I only got one of the three classes I had planned on taking

I am very displeased that there were not more available business times for REQUIRED business courses. If I can't enroll in business courses that are required for me to graduate, how am I expected to be able to have a varied course load next year.

Please change this

People who are taking the second part of organic chemistry (chem 282) are unable to get into the two tutorials that are open because the chemistry lecture is on mondays and fridays from 10:30 to 11:20. The tutorials should be later in the day. Since chem 281 is a prerequisite most students will take chem 282, so it doesn't make sense that the tutorials will be at the same time as the 282 lecture.

Need to have more Pol 300 and 400 sections its ridiculous

Some courses are either overlapped or don't have enough space

IAT 100 - Not enough labs offered, 24 seats still vacant in lecture but 1 lab short.

I don't know why, but my enrollment date are so late....I'll try to choose any B-Hum that still available but it still full (Phil 150)...Even I want to take my last requirement subject (ECON 301) it full too....So stressed out

I have done FANx99, got out with a C+. I have done ALL my Q requirements. Why can't I register for Math100??

i cant take required courses for 2 terms...
I had a specific enrollment time and was unable to enroll b/c I was taking the prerequisite in the fall semester which did not allow me to register for it this semester. by the time i was able to work it out with the advisor, the class section was full.

this is very disappointing b/c i need this class asap!

I did not get many of my classes
I am a business student and most of the business classes were full
i don't understand how this all happens and even the courses i wanted to take for WQB were also full
i am taking some elective classes that im not really interested at all 3 different campuses. This is going to be very inconvenient. Even though I am a first year, i know that other students have priority over me, i feel that next time, it would be better if students did not get such a late registration date. Mine was on the 26th, the last day before open enrollment.
Just to take into consideration
Thank you

Actually, the French offerings are pretty darn good, and they look even better for this summer. Hope the summer session offerings are still in place when we get there.
Too bad about the conflict with FNST courses. We'll see what happens in the Fall.
PLEASE start to offer more sections of FPA courses, and in multiple semesters!

Why are kinesiology courses even offered if over 75% of the class space is reserved? It's ridiculous

Was enrolling for my courses on Nov 24, I was allowed to enroll at 5:30 but I was in class. Got home and started enrolling, lots of my courses had been taken from earlier enrollment times, but I sifted through available courses and found what I thought acceptable for next semester. SIS went down for some scheduled maintenance (said 5am-5pm, it was 7pm...?)
Checked back later, most of my secondary courses had been taken. Once again struggle to find open courses that I could enroll in. Currently only have 3/4 courses. I am very upset by this massive gap in enrollment times disallowing me from getting adequate courses.

This is upsetting and totally unfair. It's impossible to make anything work this late in the enrollment period, and if I can't get into the classes that are necessary, how am I ever going to advance in my degree. It's ridiculous and unfortunate that you've made your course selecting so challenging.

nothing at all

Every possible class i looked at for first choice and back up was closed. Very inconvenient.

Gender studies courses need to be offered more often. They are constantly full!

PHIL 100W Error: You are unable to enroll in this class at this time. Available seats are reserved and you do not meet the reserve capacity requirements.
I was unable to take this course so I have registered for ENGL instead. If possible, please enroll me in this course and take me off the currently enrolled 'Intro To Fiction'.
I prefer to be in tutorial #9647 for PHIL100W

out of around 25 classes i looked at, i could only get 3, and i’m on the waitlist for one of them. the times i got were not suited for my schedule. not enough classes were offered and not at good enough times, and should be offered at both campuses.

English 101W Was completely full (Lectures and tutorials), as well as the waiting lists being completely full before it was even my turn to register.

I am second degree student and I don’t have any other class to take next semester. I hope you can open some seats in BUEC 232 and BUS 254. Thank you very much!
I wish to get a faster chance to select the courses,

I want to minor in Kin, but there is NEVER any space left when I come to register... It's frustrating

why are there so less classes when there are so many students wanting to take these courses!!!!!!

Why are the Crim class size so small when it is a well known fact that Criminology is one of the most popular disciplines at SFU? I’m going into the 2nd semester of my 2nd year and I still haven’t been able to enroll in 2 crim classes and I plan on doing a joint major with Crim and Psych and it is proving to be rather difficult.

Lectures, Tutorials, and Wait List were all completely full before I was able to even register.

Horrible selection of classes this semester. The classes that were available either conflicted in time or campus. I am very upset as I feel I am being forced to take classes I have zero interest in just so I can fulfill requirements. I am not complaining about WQB requirements, I really enjoy classes outside of my major...I am complaining about the fact that I can't even register in classes within my major due to the fact that their are major conflicts in campus or time, and there is just not enough space...
**COMMENTS**

I am really frustrated as I am trying to get into Kin 142 since last term. I am a Kin declared major and meet the course requirement, and still it does not take me in due to some restrictions. It is delaying my study-period as I can not take any further courses. Why would you declare a student as a major in a given faculty if the student cannot take any of the core subjects?

There are too many HSCI students and too few seats for HSCI classes. This is a lot of hassle for HSCI majors as it delays graduation time by a whole semester every time you fail to register to a core course.

2nd semester that I have tried to enroll in Crim 131, and not been able to.

This is the second semester I have tried to enrol in either of these courses and each time there is no room left. It is making it difficult for me to move on to my 300 level courses because I need these at prerequisites.

The Intermediate Spanish class had only 25 spaces available and my registration date prevented me from signing up for the course in time.

Class sizes are too small, and with 2 courses not being offered at all this semester, everyone goes on the waiting list for the ones that ARE offered, making it impossible to get into anything. This is the second semester in a row that I was unable to get the classes I need to graduate.

not enough spots!!!!!!!!!!!!!!!!!!!!!!!!!!!!

the tutorials for 102 and 305 are conflicted. these two courses both only have one tutorial available at this moment.

Do not put similar classes EXAMS ON THE SAME DAY!!!!! That ruined my schedule!!!!!

It would be nice to have either more 400 level courses in Geography or more space open for students. If I can't get in to Geog 428 my graduation will be pushed back till next year and that is very frustrating.

I don't know why it's not letting me this is a cohort program for systems one in which I am in. What can I do?

I was extremely frustrated with the course selection this term. Many of the courses I'm required to take were not available, some of which I need to complete before I can take some more advanced courses. I have a fairly good GPA (3.5) and am in my third year now; I find it incredibly unjust that several courses I'm interested in taking to fill my requirements for my major and minor were full before I was even able to register. The cost of University is excessive and I shouldn't be having settle with courses that weren't my top choice simply because they're the only ones available.

LAST SEMESTER THE SIS SYSTEM MADE AN ERROR AND DROPPED ME FROM BUS 303, AND THE ADVISORS COULD DO NOTHING ABOUT IT. THIS SEMESTER I CANNOT AFFORD TO PAY ALL extra fees (u-pass, athletics/rec) so am just taking distance courses. Fees should be pro-rated on amount of course so that taking one course at a time doesn't break the bank (I had been taking one course at a time).

It was horrible this term.

I do have the prerequisite (Math 12) and I'm taking Math 152 this semester, but it says you don't have the prerequisite and doesn't let me register! The class was open when I tried to register first but now it's not.

ENGL 199 should have more sections and be opened to all students. It is very hard to register for this course and get the desired section. Most not available at preferred campus.

This is the second semester that I have tried to get into this class and it is always full.

All of these courses are required for my learning disabilities minor, there should be enough spaces in at least one of these courses for me to get into but I am unable to enroll in ANY education courses related to my minor at this time.

It's terrible.

I think the enrollment appointment dates between students should not be that big difference. Some students' enrollment date is 3 weeks before some students'. This puts the students with late enrollment date in the very disadvantageous position in arranging their courses for their desired schedule.

To many of the electives I have needed since I've been at SFU have conflicted with my courses.

It's also EXTREMELY difficult to schedule WQB Requirements around FPA studio courses, as math and sciences are scheduled the mornings that the only available studio courses are offered. Also transportation times between campuses make schedules more difficult as well.
COMMENTS

Geog 428 should have a way bigger class size, especially considering there are 3 pre-req's that allow you to take this class. Overall there was a very limited amount of classes offered this semester in the geography department, and even less at the fourth year level. I believe I will have to delay my graduation now because of not getting into the geog 428 class. also wanted to to geographies of agriculture but there was a time conflict. Overall I was very disappointed.

Should really open up more classes for these courses, they ran out of space a whole week before i could even register for any single one of these sections. BUS 254 was worse, cannot even waitlist, but 207 is not far behind.. waitlist position 34 even at the surrey night class section.. extremely disappointed as i cannot even complete any required courses this semester, have to spend another semester doing filler courses. please open more classes for these courses in future please! this is getting ridiculous...

i arranged my schedule few days ago, but when the enrollment dates came, some classes were not offered. So i had to change my plan, and it messed my goal.

I couldn't get into any of the courses I need for my intended major.

With such a late registration date, I was not able to get ANY classes that I needed. I am very frustrated with the availability, and the restrictions placed on some classes.

I'm going through distance education and although these classes are offered pretty much every single class is already full so its impossible to enroll into any because SFU does not offer a waitlist for classes through distance education. The only classes that still have spots are once I have already taken or ones that are only offered on campus.

Unfortunately, I had the second to last day for an enrollment date and I received none of the courses I wanted. In fact, I couldn't even enroll in any of my 6 back ups because there was no room for me! Honestly, I do not think it is fair because it is not like my GPA is low.

More public policy and local administration classes! I will not be able to specialize with the current selection (I've been waiting a year for more -5- poli classes and nothing is really being offered)

More spaces for distance education classes!

Please extend class sizes for 300 and especially 400 level courses. At 400 level, 20-25 students should be enough for a professor at these class levels to handle instead of class cap of 18 students.

I am severely disappointed with the course availability. I NEED these two courses to complete my degree.

the lecture is closed but the tutorial is available. because my enrollment date was later than others, i was not able to enroll in this class from the beginning

Please offer CRIM 135 @ Burnaby Campus.

I had a late registration date, so all the classes are now full. I need to take Buec class, but there is no space left in any section. Please increase the SPACE in Micheal Johnson's class Tues/Thurs: 12:30-2:30

This course was offered in the catalogue and fit perfectly into my schedule, however when I wanted to enroll for it, it was not available. This made it difficult for me to find a replacement, I have to work with a limited schedule.

Courses fill up way to fast! Also, I was left with tutorial times that I didn't like.

There should be more classes for business students, or a waitlist. SFU has very many students looking into business.

Avoid overlapping final exams with other courses in the same faculty that are often taken together

Hopefully i will be able to get the Kin 140 im wait listed for.

Not enough history courses, in particular 200 level courses. The courses that were offered were mostly full or wait listed by my registration date.

I have got 98% of Math 12, which meets a pre-requisity, but I dont know why I cannot get enrolled...

The course should be offered more than once every spring if it is a mandatory course

I was given more or less the last day for registration last semester which exponentially increased the difficulty for me to get into the courses I wanted to register for.

These classes are upper division courses - either the spaces need to be RESERVED for health science major/minors, or there need to be more spaces.

IMPOSSIBLE TO GET INTO CRIM CLASSES! Have been trying to get in these classes since Fall 2009. If I knew it was nearly impossible to get into these classes, I would not have chosen to study at SFU. Terrible course availability, completely regret wasting my time and money going to this school

ENGL 199 and ECON 105 are always closed

<tr>
<td>CRIM classes are impossible to get into. How am I supposed to transfer into CRIM Program if I can't take any of the classes!</td>
</tr>
<tr>
<td>When I was planning my courses ahead of my enrollment date, Geog 215 said that a tutorial was offered 4:30-6:20 on wednesdays, but when I went to enroll, it was no longer an option. It was very frustrating for me to plan a new schedule on the spot, and now I have three final exams on one day.</td>
</tr>
<tr>
<td>There need to be more Hsci classes added if they are this popular and not even Health Science Majors can't get into the classes.</td>
</tr>
<tr>
<td>I am third year health science major i really need these courses to continue with my degree, being unable to enroll in them is delaying my degree!</td>
</tr>
<tr>
<td>if courses are reserved only for students within one faculty, there should be others options for the rest of the students -outside of that faculty- who are looking to satisfy their graduation requirements.</td>
</tr>
<tr>
<td>I found it very surprising that this course was no longer listed with available sections after only the 2nd day of registration.</td>
</tr>
<tr>
<td>I also find it quite irritating that you can no longer click on full sections to see if there is waitlisting space, or at least to verify that the class is in fact full, and is not listed as no longer available for some other reason. Personal verification for a class being specifically full is important, because it means I can then decide for certain that I must choose another course, and not wait to see if the class is listed as &quot;no sections available&quot; due to some kind of error.</td>
</tr>
<tr>
<td>It is ridiculous for a class capacity to be only 50-80 when there are surely more than 300-500 students in the Health Science program and over half of them cannot get into the required classes that they need. This NEEDS to be fixed.</td>
</tr>
</tbody>
</table>

Please let me know what the chances are that additional lectures will be added.

**SIAT is ridiculous.**  
I can't believe that as a fourth year student with good academic standings, wanting to minor in SIAT, I was unable to get ANY of the three courses I want. It is stupid that they have so little openings for the course that serves as a pre-requisite to all other courses.  
It's a joke that I could not at least put myself on waitlist before 12/03. I can understand not putting people from the waitlist into the class until after 12/03, but not even allowing a waitlist basically tells me that SFU is not based on merit of grades and credits, but based on students all trying to apply like a bunch of ANIMALS.  
In all, I am completely disappointed and appalled at how unprofessional SFU's SIAT department has been handling their course selections.

I wish I can get FPA 262 and FPA 264 as well in my Spring 2011 semester, because I need 3 of the FPA 200 level studio course as electives for my major, this semester I have FPA 263, so I want to have FPA 262 and FPA 264 for next semester. The contents of them are something I'm interesting in.

I work Monday - Friday 9-5, I am able to take an hour off here or there or leave early but the courses just aren't available which I need to take. I have taken all my elective courses (transfer student from another university) so only have required courses left to take. Please help - I really want to finish my degree but am really conflicted with my job as well.

it is unfair to students who choose courses near end, because there are no spaces left unfair random selection by whoever decided to set up this system many people cannot take courses they require because it has already been selected

All available courses were full within 5 minutes of IAT opening up.

The unavaliable courses are giving me difficult time because I barely able to register at least three courses in order to be eligible to apply for student loan. It was a very unpleasure experience.

I'm really upset because on my registration date I tried to register for Eng 212 but the system said I did have the pre-req's when I knew I did. I was told to call the english department and now that I have done that and have been told what I already knew- that I do have the pre-req's there is no space in the course. I knew this would happen because when I tried to register there were only 3 spaces left.

The course selection should not have left the first years applying to the second term until the last available times

I am enrolled in the SFU NOW program, which is fantastic. However, I am also a third/ fourth year student in Pol Science but did not find any 400 level classes.

I am not sure how I would be able to graduate if these two classes are not offered. Thanks.
I wish I hadn't come to SFU- course availability is so incredibly frustrating. I will recommend to everybody I know that they NOT come to SFU to be Linguistics majors as classes fill up instantly and there is no availability and graduation will take them MUCH longer than planned. Nobody should have to go through this, it is ridiculous. I didn't even list all the classes I couldn't get into because there wasn't enough space. I have tried to be flexible, and take what is offered, but even then I cannot get classes. Also, WQB requirements are the most ridiculous thing ever.

summer 2010, fall 2010, and spring 2011 I was unable to enroll in this course

For HSCI, the lecture is open but no tutorials? how does that work? The lecture hasn't even hit maximum capacity.

If more and more students will like to take a course, there should be more seats available in order to satisfy the needs of each and every student.

I am a CMNS major and Publishing minor and for the past few semesters I have had difficulty getting in CMNS 473 and CMNS 375. This time, I managed to get into CMNS 473 with the assistance of an adviser because next semester will be last semester taking classes. However, I am still not able to get into CMNS or PUB 375 because both sections are full and I really wanted to take this course before graduating from SFU.

I had to wait a full 2 semesters to complete the final course required for my graduation because neither of the two courses (LIng 323 and 324) were being offered. These are core major requirements. This semester I had to take the course at UBC instead because otherwise my graduation would be delayed again.

I want to enter business department next semester, thus I have to complete Phil XX1 this semester. There is no other phil courses available to me due to the time conflict. Therefore I am wondering if the University can open a seat for me. Thank you very much!

there are many labs that i am able to attend however, the one available conflicts with my chemistry course

I never got into any of the classes I needed

I've been trying to enroll these two courses in the past 2 terms.
Also asked for advisors for help and e-mailed them as well.

Some of the courses I entered that are required have only 1 seat available due to a later enrolment date). 

Also asked for advisors for help and e-mailed them as well.

Some of the courses I entered that appeared open indicated that there was reserved seats and that I did not meet those requirements. ie KIN110 and HSCI130

I can only register Econ 301, Bus 316 and Buec 333 next semester.
However, I am able to enroll to any of these classes right now.

I had to wait a full 2 semesters to complete the final course required for my graduation because neither of the two courses (LIng 323 and 324) were being offered. These are core major requirements. This semester I had to take the course at UBC instead because otherwise my graduation would be delayed again.

I want to enter business department next semester, thus I have to complete Phil XX1 this semester. There is no other phil courses available to me due to the time conflict. Therefore I am wondering if the University can open a seat for me. Thank you very much!

to attend however, the one available conflicts with my chemistry course

The process of course selection is very unfair. If one has a late enrollment date (ie nov 23) everything is full and waitlists are the only option. I’d be far better off pursuing education at another institution. It is just ridiculous to permit such disorganization and inequality to happen where students just want to fulfill credits and be done. I can't enjoy school if none of the classes that I want, not to mention NEED for my degree are full or I'm being restricted from joining (ie Communications classes that do not allow certain students to register even if he or she is in fact a communications student)

Need more availability - I’m taking longer to finish beacuse of this problem for semesters now.

I found it very disruptive to my Music Major progress, as these courses (140 and 145, both of equal priority in my current position) are the prerequisites for many other courses also required for my major. Please ensure that both these courses are available in the Fall 2011 semester. I also found it a significant hindrance that FPA 147 was ONLY offered through distance education, and declared Music Major students were not given priority over students from other faculties for this course (as it is now full, and a fellow Music Major student was denied access due to a later enrolment date).

I need this course

From SFU website, I could not find the information regarding "courses to enroll for first semester - Spring 2011"
Thank for your help.

physics 121’s lecture is open but there are no tut at all that are available. physics 131 and math 232 are both waiting lists.

Need more tutorials offered and more 300-level Biology courses in the Ecology, Evolution and Conservation Stream.
I have completed all courses in first year and second year HSCI, last semester I was not able to get into any classes (HSCI) and so I took Physics 100, Chem 122, Chem 126 and Math 154, all subjects that I am not strong in, let alone taking them all together. This semester has been very stressful and hard so therefore, I was hoping to take 3 HSCI classes, chem 281 and stats 201 but because all sections were full by the time I registered I was unable to get into any classes. When I went to see an advisor, I was told there is nothing they can do and pretty much said it doesn't matter if I can't get into classes. I now have to take BISC 102, 202 and Chem 281 next semester, which are tougher. I am not happy with the courses here at SFU in the HSCI department. I will now have to take hard core courses and take HSCI courses towards the end of my degree. I was hoping for a better distribution, but I don't have that option anymore. This is just really frustrating and may result in lowering my GPA.

**THERE SHOULDN'T BE RESERVED SEATING FOR FIRST YEAR COURSES**

I can't get any classes I want

When I tried to enrol in the course, it has a green dot, as if it's "open", but it tells me that there is an error when I try to "finish enrolling". What am I doing wrong? Is it full or not? It's december 3rd so it should be open to everyone if i'm correct???? Please help if you can!!!! Much appreciated

Why don't we have more sections for Jap100?
There are so many people want to learn a new language they like.

I cant ever get any classes I need or want.

PLEASE PLEASE PLEASE OPEN UP MORE SPOTS! It would mean a lot if I could get into one of the courses that are full.

I was given an unfair enrollment date, which is why when I checked for the courses I wanted they were all full

If would be great if this course capacity would increase as many undergraduate science students would love to take this course!

Really dissapointed in the ways classes and priorities are set up. Being a criminology major student i believe it should be much easier to get into the classes that you need to graduate and that are of interest to you. Can not understand why you make it harder for students to take the courses they need.

please fix the system!
i dropped a waitlisted course, and i should be able to take this one because there are still spots left on waitlist but it says
Error: You are unable to add this class at this time. The maximum term wait list unit limit would be exceeded with this change.

Error: You are unable to add this class at this time. The maximum session wait list unit limit would be exceeded with this change.

please fix this!
i need this course and I should've gotten this spot now!

the priority is not fair.

All the popular courses such as lower division business courses are offered at really inconvenient times such as mid day (2:30-4:30) times which really conflicts with a lot of breadth electives.

Also, the more popular breadth classes such as Asian studies are only offered in selected semesters yet they only accept 100 people in a 100-level class. There should be more people allowed.

Online courses should not have limits of 55 people; that is even less than a lecture.

Popular courses should have more times with better professors/lectures and have better tutorial times (e.g. Bus 336).

I REALLY NEED THIS 2 COURSES, BECAUSE THEY ARE THE MOST IMPORTANT PREREQUISITES FOR ALL THE OTHER COURSES THAT I HAVE TO COMPLETE MY DEGREE.

There needs to be more room in all WS 300 level classes or multiple classes offered. I never seem to be able to register in the ones I desire due to my late registration date and the size of the classes offered.

They seriously need more classes and to have it offered at more times during the year!!!!!!!

I logged into SIS to enroll for classes at the first moment available during my online enrollment appointment, but none of my required classes showed as open (all sections show as closed). As a second degree / after degree student, I was told I need these classes before being taken into the bachelor of business administration program, so my current program classification is defined as BBA - non degree program. Are these classes showing as full because they are normally only offered to business program (degree) students?
I am actually frustrated on the schedules, and the waitlist of the classes. I do not see any con 200 level course, also Criminology courses, and Kinsiology courses are all FULL. this happened to me the last semester as well!

Every student’s course selection system should be ready to go at the right time, or else students won’t be able to get the classes they want.

Please let me in!

The limited number of upper division (300 level) courses that are available for KIN this semester is absolutely ridiculous... So many of the people I know have been unable to get into anything because they have yet to take Kin 305 or 306 and almost all of the upper division classes available this semester have those prerequisites. What happened to Kin 310-314? None of those require those classes and would enable people who haven’t taken 305/306 to actually enrol in classes they need instead of wasting time on classes they don’t simply for the sake of getting your credit hours up!

I also know that there was quite a few other people who needed it as a requirement and the class was full.

Yes, classes are all full.

The course still has seats available but since there are no tutorial times open, the class closed and no one can enrol anymore.

I wish I could get my CMNS 220 tutorial one hour earlier so I am not stuck on campus all day and night! From 7:30p to 6:30p

I’m in my last year and can’t believe I cannot get the classes I need.

Both Buc232 and PhilXX1 are popular courses, so I think they should have a larger number of waiting list. Thank you for your consideration.

I was waitlisted for English and it was dropped off my schedule?

IS 450 (required) offered at conflicting time with most other electives. very frustrating.

I am curious as to why this course was listed as offered until the week before my registration and then was cancelled last minute. I was very excited to take this class, it is my last semester at SFU and found myself searching for a substitute and not quite satisfied with the options available.

There isn’t enough space for the labs but there’s still space in the lecture.

I’m sick and tired of not being able to take my required courses. I have been trying to take Crim 103 and Crim 104 since Fall 2009. Why is it that certain courses are reserved for certain majors while Criminology is not? I think this is really unfair. Also, why are most of the courses offered in Surrey? NO ONE LIKES SURREY. Also on another note, please get rid of useless professors like Rick Parent and Birute Galdikas.

It seems ridiculous that there is no space available in majority of the 200-level CMNS classes. If you accept the enrollment of a certain number of CMNS program applicants, shouldn’t SFU be able to ensure that there are enough classes available for those student accepted into the program?

Why set requirements that does not require additional knowledge from other classes to take on mandatory courses? (i.e., 12 units to take BUS 237 and BUS 251?)

I believe that students should be prioritized in their own faculty department because most students are taking health courses outside of their requirements.

I was only able to enrol in 3 classes (unless I wanted to be taking a bunch of courses that have absolutely nothing to do with my program). EXTREMELY frustrating!

I was waitlisted for English and it was dropped off my schedule?

This semester there are so many time conflict between all my classes, and this should my last year. I couldn’t get the course I needed, I may need to graduate half a year later or so.

I am a 4th year student. I should have uninhibited access to 4th year courses.

This is the 3rd semester I have wait for this course. Other courses I need to complete my cert in health and fitness are never available (by distance) either.

Courses have available spaces in tutorials but no space in the course itself.

I understand that it is necessary to place restrictions for students in that major or minor. However, by not having enough seats or sections opened, you are turning people down when they really want to take that course (especially if they are considering to add an IAT major or minor to their academic plan). My friends have told me that you literally need to camp in front of the computer at midnight before the day of open enrollment and if you’re lucky, you MIGHT get a spot. How come there are such limited space in this class and some other courses?

I sent in my highschool grades and they have not been entered into my account therefore I was not able to register
COMMENTS

it sucks

I'm a little bit frightened at the moment. I have one year left to complete my degree, and due to my schedule (mature working student), I cannot take classes during the day. I will have to beg my employer to allow me to work a split shift and do an afternoon class to obtain fourth-year classes. It's doubtful I'll gain such permission, and not sure what recourse is available apart for waiting and waiting for courses to be open. The night classes fill up so quickly. It's unfortunate SFU NOW students can't get a few spaces held back for them, or an extra space added? Perhaps we can create a wait-list for these classes?

I am very worried this is going to delay my degree completion.

I understand that it must be very hard to coordinate all the upper division CMNS courses, but it seems like the amount of conflicts in scheduling and/or lack of availability is more than it should be. As the enrolment and talking with many students reveal, there are more popular courses than others. Somehow if these could be made more readily available, that would be great as those are the real courses we're paying money for. We could do without the just-a--credit, unpopular courses.

NEED MORE TUTORIALS

There should be more classes or seats available for CMNS lower division requirements. It is unfair to only be able to successfully register in 1 out of 4 desired CMNS lower division courses.

This is my second semester trying to get into this course that si required by both Ba and Bsc students. I do not understand why SFU doesn't open a second section for this course.

Offer more publishing courses. It is inconvenient for students who are close to graduating.

All the available sections are full, the rest sections will stuck with other classes(ENSC 102, 150). But this course is corequisite with ENSC102...

absolutely ridiculous that only one lecture is held and if you cannot get in, you simply cannot take the class which you either need or are thoroughly interested in.

unsatisfactory.

Econ 302 is a pre-required courses for most 400 level economic courses. As I want to graduate in Summer, I should take Econ 302 next semester in order to choose 400 level courses in Summer.

Rather terrible selection of introductory science courses, don't you think?

Please add enrollment past capacity for the distance ed offering of this course

I completed a BS in Comp Sci over 8 years ago, and am now picking up some courses to apply for an MA in Counselling Psych and have been finding it challenging to pick-up the courses I need, including EDUC 328. It doesn't help that I have a poor registration date and that I don't have the required prereq's, but class size is also a factor.

Thanks for your time.
Regards,

XXXXX XXXXXX

I am completing the Behavioural Neuroscience degree and find it very inconvenient that some of the Kinesiology and Psychology courses I need are offered at the same times as each other because I need to take both to complete my major.

This is my major, and for THREE consecutive semesters I have not been able to enroll in ANY of these 100 level Crim courses. This is extremely stressful and something needs to be done in order to make sure students are able to enroll in the courses that they want, since we are paying a significant amount of money each semester. This is very unfair.

The class was reserved for majors

Please make the class sizes larger.

The business faculty should keep seats on reserve for business students that need to complete lower level degree requirements.

I was deeply disappointed that I was unable to partake in any class I was hoping for. I truly hope that their will be more availability in the future; also that I am given a earlier registration date.

You need to make more surrey classes available!

The lack of availability of courses that I need to complete my program on time seriously makes me consider changing schools.

The Lecture has space however the ALL tutorials are on waiting list. so when we register we are placed on waiting list for lecture and tutorial components.

Might as well just say all of them. Because there are none left that I need and can register for.
And those that I am reaching out on a limb to take, just to get credits and breadth, wont let me.
Most IS 300 level classes are not being offered, and the ones offered conflict with other courses and campus offered.

Hello, I am taking my prerequisites for the Pharmacy program at UBC and NEED to take these courses next semester. Please open some more classes!

there seemed to be no space in any courses i wanted this semester!!

I need this class so I would really like to be in it.

This program is a joke, get your XXXX together. At this rate I wont graduate until im 60

My main concern is since this is not offered in the summer that I be able to take it in the Fall Term would I be able to get an early appointment time to book classes for fall term?

Thank-you

I am finding it difficult to find CRIM classes at the Burnaby Campus

The enrollment date which I was given was absolutely pathetic; therefore I was not able to take any criminology courses as they are extremely popular and fill up quickly.

The computer program believes I do not have the pre-req, PSYC 201, and so I may not enter. This is not true. I am taking the equivalent and directly transferable course at douglas college, however since I am not a SFU student, the computer appears to be unaware that come next term I WILL have the required course.

Im trying to get a KIN minor and it is near impossible at this school. says seats are reserved for certificate which im doing and still didnt let me get in classes.

I didn't get into 215 cause i need kin 142

I'm a transfer student and do not need lower division credits. I'm currently finishing my first term at SFU and couldn't declare a major yet, hence my late enrollment appointment. At this time almost all the upper division courses are full and I had to register for lower division courses, that I do not really need. This will unnecessarily delay my course of studies and I'm pretty discouraged, and time is at a premium for me (I am 25 and financing my own education on limited means).

The HSCI website should have a list of courses that count towards the additional 9 upper division courses a HSCI major can take.

If possible, I prefer taking 'EDUC220' by distance education.
## APPENDIX B

**SIMON FRASER UNIVERSITY**

**FALL 2009 COURSE AVAILABILITY SURVEY**

### GENERAL COMMENTS

Data as of September 14, 2009, end of week 1 of classes

<table>
<thead>
<tr>
<th>COMMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>The course registration process is seriously flawed. I can barely take courses in my own major. Something is wrong.</td>
</tr>
<tr>
<td>the lecture was still open. there were still labs with available seats. the only problem was that there were no more tutorials.</td>
</tr>
<tr>
<td>I am taking my LPI in august which will hopefully allow me to enroll in English and i did get an A in grade 12 math however it has probably not been sent from my online school yet or it has not been viewed yet thus i should hopefully be able to take these courses and hopefully in first seme with the help of taking 2 of the courses from the 4 that i already have. thank you</td>
</tr>
<tr>
<td>i think i just need to be permitted to enroll earlier</td>
</tr>
<tr>
<td>The fall 2009 semester doesn't have many classes offered, in Bus426, there is like 60 people on waiting list to wait for 38 seats which is already full. Only 1 class offered. I have to join waiting list for all the accounting courses i want to take and being forced to take electives instead. I feel sad.</td>
</tr>
<tr>
<td>god bless you guys are able to give me the courses</td>
</tr>
<tr>
<td>All the BISC courses i want to take in my final year are either not available, or are all offered at the same time!</td>
</tr>
<tr>
<td>More seats are needed! I need earlier enrollment dates! The enrollment system needs to have more options (for classes and spots offered and for students who don't get in) and equal opportunities for all students!</td>
</tr>
<tr>
<td>I am entering SFU in the fall with the intention of completing the PBD in Criminology. The three courses that i need to take right away (before i can even begin to meet any other PBD requirements) are Crim 101, 131 and 135. All three of these classes are full, so i'm not sure what i'm supposed to do! i need these classes in order to start my PBD program so i'm left with an acceptance to SFU but with no courses to take! i am very unimpressed.</td>
</tr>
<tr>
<td>There should be more tutorial dates available since the only one offered is at the same time as CRIM 101 which is a required class.</td>
</tr>
<tr>
<td>Health Science courses are not offered very often and it makes it difficult for students to plan time tables in advanced.</td>
</tr>
<tr>
<td>for whom it may concern , i really need this course , would you please try to put me in 1 of this course classes ? thank you</td>
</tr>
<tr>
<td>Crim courses are <em>always</em> full..</td>
</tr>
<tr>
<td>Please could i be contacted through my SFU e mail when this problem id resolved</td>
</tr>
<tr>
<td>Intro to french: is it considered an elective that will b credit towards my criminology degree? i am completing my criminology degree so any classes available i could enroll in? this is my first full time semester in SFU and I do really need the courses I have selected for. I hope I will be able to take them in fall term.</td>
</tr>
<tr>
<td>Many courses were already full at the time of enrollment.</td>
</tr>
<tr>
<td>can you provide one more lab at different time schedule to make it more convenient? thank you</td>
</tr>
<tr>
<td>I need FPA 111 in order to meet WQB requirement</td>
</tr>
<tr>
<td>Actually, I have finished the most of credits of Lower Division. The leftover courses are: BUS 207/237/254/272, four courses in total. Unfortunately, I cannot select any of them. Could you help me? thank you very much!</td>
</tr>
<tr>
<td>when i enroll in this class, the capacity of the class ios not full but the tutorials are full of people. it is very ridiculous, and now, by some unknown reason, i am posted in the waiting list in both the lecture and the tutorial.......</td>
</tr>
<tr>
<td>It's generally terrible. BUS 473 was moved an hour ahead and now conflicts with BUS 419. BUS 410 is already full by July 8, 2009 at 12:45pm and the wait list is 11 people long. That is because the time slot is the most desirable for finance students so this is the class they're taking. If other finance courses didn't conflict, it would be evenly distributed. BUS 418 wasn't even offered. There aren't a lot of choices between courses.</td>
</tr>
<tr>
<td>many of the psychology courses are offered on Thursday mornings. So they're in conflict with each other.</td>
</tr>
</tbody>
</table>
I was so looking forward to taking another religion course but none were offered. Everything is usually closed by the time my appointment rolls around. It’s very frustrating. English, Anthropology, education courses... all closed. Sucks!!

note to self: 11 backup elective courses is not enough. You need 3 backup schedules

course conflicts with CHEM 215-4 Introduction to Analytical Chemistry course with the only tutorial open at the moment

The course schedule is quite disorganized and is not very user friendly to access. Also, many courses do not have a corresponding tutorial time or any time reasonable.

Why can I not take econ 105?

I want to take this course desperately since i will be switching my major to biomedical engineering. this is the only course i am eligible for. if in any way i can enroll in that course, that would be of great help, please

For Chem 121, lab times were only available on Wed, Thurs, and Fri. As a result, my Thursday is extremely busy due to a Math 154 lecture at 9:30 AM, a Chem 121 lab at 1:30 - 5:30 PM and a Bio and Chem tutorial in between the two, with a lunch break from 12:30 - 1:30. Because there is no Chem 121 lab on Tuesday, I only show up on Tuesday for a single Biology lecture that is 50 minutes long. It takes me longer to get to school on Tuesday than it does to partake in the lecture.

There seems to be many courses available, but rarely I am allowed to sign up for them because they are either supposedly filled or have reserved places that are going to be filled. I basically want just 4 courses in Burnaby so that i can juggle my employment and school. This course selection program is really frustrating and seems tailored to the privileged few.

course conflict with ESCN 101 W, but they are both required.

Please help me take these classes above.

The Lecture session said it is open but I am still put on the waitlist. Other available Lab or Tutorials are conflicted with my other courses

Hello, I have two problems: 1- What should I choose for an elective course? and why? 2- How can I choose "ENGL 101" to be in my "waiting list"? There is no option that allows me to do so. Please advise!

Sincerely, xxxx

It is impossible to get into a first year English class. I have tried the last 3 semesters. I need only four courses for a completion of a Certificate in Criminology and to apply to enter the upper division of Criminology studies. When one of the choices comes available I plan to complete my requirements.

must be more efficient! people need courses and pay good money to try and take them, please! make it more convenient to book courses!

The course exam conflicts with my CMNS 130W course exam. There are no other sections available for CMNS 130W and this is the only FREN that work with my schedule. I need to take French for my intended major in International Studies.

I am working full time. I would be greatly appreciated if more CRIM courses could be offered through SFU NOW or in the evening. Thanks.

I need to take this class in order to complete my major in Kinesiology. Without it I cannot take any other required classes, is there any way I can be bumped up the wait list in order to take the class this semester?

In order to get the courses I’d want I'd have to show up at 8:30 AM every single day of the week for exactly 50 minutes of lecture and then go home. Since I live in Vancouver, this is an hour and a half to commute because of the rush hour traffic. It seems like such a waste to have these classes spread out across the entire week at awkward, early morning times. Showing up for a half hour lecture, once a day, is a big annoyance! Please offer classes in the afternoon, or outside of rush hour times, and make it easier to stack the courses into fewer days.

I was very disappointed with the course availability! There were classes that i needed to take and also some that i was very interested in that i was unable to take because they were full. In particular it was very important for me to take Spanish 201 but it was full and there was only one class being offered. Not only does this inconvenience mess up the plan i had made for this semester but it also messed up my long term plan when it comes to finishing my program and makes me think that every semester is going to be just like this and then i think what if i never get to take one of the required classes that i need because its full every semester. Over all i am disappointed.

I need to take BUS 320 this semester otherwise it will set me back. To take any other accounting courses (my concentration) I need to complete BUS 320. It also impacts me gaining summer employment. Completing BUS 320 and 321 will impact an employers decision. If there's anything you can do, please let me know.
EASC 101 was an elective but chosen as a lab upper level requirements while taking courses I am actually interested in and are relevant in my career path. To top it all this course will not be offered again for another year, which makes it hard for me to fill my conflicting with my work schedule, the need to go and return my books for this course and overall stress. And I am quite unhappy about this change. For because SFU waited until the very last week of summer to inform the courses are all over the I NEED to have FPA 104 for as a prerequisite for ALL further courses in my MUSIC major. This is my first term at SFU. I am a returning student after 3 years of term. As I decided to declare my study into criminology I could not get any courses I wanted. I am quite unhappy about this change. For 1 because SFU waited until the very last week of summer to inform us, leaving me no time to search for other course, minimal availability of open classes that fit into my schedule, conflicting with my work schedule, the need to go and return my books for this course and over all stress. And (to top it all) 2, this course will not be offered again for another year, which makes it hard for me to fill my upper level requirements while taking courses I am actually interested in and are relevant in my career path. EASC 101 was an elective but chosen as a lab requirement for the PDP program working towards to become an Elementary School teacher. This class was open until just a few days before my enrollment date (July 17th) and then it was closed by the time I could enroll. The courses are all over the place! The summer semester was much better laid out when it came to labs being directly after the class periods. There were no courses left for me to take. I am continually losing faith in SFU. Every semester I am let down and I never get any of the courses I need. Now it will be a whole other year before I can take my 200 lvl HSCI courses. Thanks. I was unable to pick BISC since the timings available coincided with the existing Chemistry lab timings. I tried to sign up for eng1101 in July when the classes were all open still and when I pressed enroll, it said I wasn't in priority for this class. Which I think is strange because the year before I was going to UBC but I decided to go to SFU and by then all the classes were closed. AS A DISTANCE LEARNING STUDENT resided OUTside CANADA, IT IS CHALLENGING TO WAIT FOR CONFIRMATION AT LATER TIME (often last minute) BECAUSE I NEED TO INFORM CODE EARLIER TO GET THE MATERIAL SHIP TO ME ON TIME. Even I am successful in enrolling for the course, I often encountered a delay in reading due to late shipment of the materials, it has resulted in 'catching up' which is not my preferred style of learning. I WOULD APPRECIATE IF YOU CAN LOOK INTO THE MATTER AND PROVIDE SOME SUPPORT FOR INTERNATIONAL STUDENT LIKE MYSELF. THANK YOU.

the class capacity is too small. I am a communication major, publishing minor and I have never been able to enroll in cmns 375 (this is the 3rd time I have tried) because it is always waitlisted way before my enrollment. None of the other cmns classes are like this so it seems that way too many non-cmns students are enrolling! It should be 100% reserved for us. This will be my last semester so I will never get to take this course. I am actually really upset concerning my two psych courses. One of these is a required course for one that I was planning on taking next semester that has a requirement for my degree that it must be completed in my first four terms of courses. I am planning on majoring in psychology and criminology, and the fact that these courses have a "must be finished by" requirement should make it that those who are majoring in the specific courses are allowed to take them first.

This is one of the 2 courses I absolutely NEED to graduate on time. It was unavailable in the Summer, so I waited until the Fall to try to take it. Full again. This is XXXXXXX ridiculous.
I have already waited a year to take this course, in addition to that I have failed to get into this class three times!!! (including this semester) This isn’t something that a student should have to go through.

Limited course availability in History this term

Next Fall semester will be my last semester, but I would not be able to learn what I want to learn.. instead I need to take whatever is available to finish the school...

There is an insufficient offering of night/evening classes to accommodate working students.

Because my enrollment date is so late, I am unable to select any courses I must complete.

It will be so great if I could take this course this term,because I need to take an elective course, it is of the credits that I had to take during my frist year at sfu, now I am in 2nd year and still can’t take it. and also how early do the students have to register and be 100 %sure that they can get in , in general?? like how long before the starting date of the classes?

Class is reserved

Have not been able to fulfill any of my W requirements in 2 years, going on 3 because of late enrollment date, or because I do not meet the reservation requirements, even with sufficient availability in classes. Similar situation every semester and as a result have not been able to meet the 60 credit hours.

I was surprised at the lack of different class times that were available.. I ended up with two full days with 4 different courses. . .nothing on Thursdays

I believe that distance education courses are an excellent idea, however, I also believe that more seats should be available than 45.

I’m really frustrated, this is not the first time I have not been able to enroll in a course.

It was also confusing that about 3 classes still appear as open when I search for classes, but that there aren’t any tutorials available for those classes.

Each semester I have been here, I have consistently had a very late enrollment date. This has made it extremely difficult to find courses that my program requires. As a film major, I require several practical courses in fine arts outside of film. I should have at least one by this point, but each semester every course offered has filled up before my enrollment date. I would GREATLY appreciate it if I could have an earlier enrollment date in later semesters as I have been forced to take several courses that do not even mildly interest me and the courses that I require, all fill up. Thank you!

My course selection time is very poor and much later than of the majority of the students therefore it results in no space availability or poor tutorial schedules that conflicts with other course schedules

I have yet to see any of the courses offered in the Fall or the Spring. Many of these courses sound extremely interesting and I would be glad to take them.

Seats are available in the course at Surrey campus, but they are all reserved. Even though I live in Surrey and the Surrey campus is very close for me, still I can’t enroll in the course. In all other courses I am able to enroll even though they are business courses as well. Would really want to be able to enroll in the Econ 103 course at Surrey Campus.

Engl 214 and Engl 327 seem like popular classes. They should have a waitlist. When enrolling, I found that a lot of the third year English courses had exams scheduled for the exact same time, which makes it difficult for me to be flexible in my choices. Someone may want to look into that. :-S

I am fed up with SFU’s registration system. I am a fourth year Accounting major Business student, and I have been unable to get into a single accounting class for 3 semesters in a row. This is unbelievable.

I am unaware of “breadth” requirements as an International student.

Was very interested in taking Intro to Biological Psyc as I recently completed Human Anatomy and Physiology Biology course. Do not want to take by distance education which was all that I could see offered this term.

Please open more labs

Please offer English 470

Another tutorial/lab or more spaces should be open

There is limited seat for students who take courses as elective courses. Seat reservation for electives should also be implemented for popular courses from certain time period.

As a new transfer student it is unfortunate timing that I will not have enough units for particular second year courses until after the summer semester. I hope more courses will be available at the Surrey campus as I commute from Aldergrove.

2nd year is a HORRIBLE TIME to register because we get absolutely nothing.
I was definitely not satisfied with the selection and times i was left with on my LATE registration date.

I don't see why the Math 151, Acct 100, Acct 201, and Fnce 130 don't transfer from my previous school (VIU). I feel I have strong knowledge in all of these areas, and I don't think I should have to take similar courses again.

I am wanted to take the course because I am interested in pursuing Health science. All the tutorials for the class were unavailable.

System says that I do not have permission to have this distance tutorial. P.S. My native language is not Japanese.

I need a science with a lab as a prerequisite for PTEM (PDP). I work as an SEA Mon-Fri 8-3. All of your sciences are only offered in the mornings. Can you try to offer at least one night class for those of us with jobs?

There are not very many communications courses available this fall and the ones that are cause scheduling conflicts.

When I enrolled for this course I was automatically put on the wait list in the first position even though only a couple people had enrolled. I understand that the reason for this was because 50% of CMNS courses are held for CMNS students until the end of the first month (July 31st). However, between July 31st and August 4th, I was still listed on a wait list in position one even though the class I wanted was less than half full. Now the class is completely full and I am still on the wait list in position 1. How can I do or even consider doing a minor in communications if it's that difficult to get into the most introductory of CMNS courses?

There are 46 people and maybe more in waitlist that should be enough to open a new class. Or indicate that another class should be open for BUS 329.

There are many steps involved in adding a course, it could have been much simpler and faster. Most lectures have only one section and are set at conflicting times, labs/tutorials also.

I am an ENSC students, why ENSC 220's lecture is FULL!???

SFU should increase class sizes, 81 people per class is ridiculous. Thank you for your time.

I have 6 courses this semester. Since I have MATH 152 course on Friday morning from 08:30 to 09:30, so I want to choose the ECON 105 course whose course number is 1089. Although I know there is a ECON 105 in Surrey Campus, but it is really far away from my house. So I really want to enroll in the ECON 105(1089).

Some course schedule are changed or deleted without notice. Couple required higher level courses are not offered, which affect my course planning and graduation time.

I'm a first year student, this would have been my first semester, but right now, none of the courses that i need are available. I don't know what to do because i don't want to take just random courses that will be of no use to me in the long run. I don't understand why the courses aren't available, if they are required.

I only have 7 courses left to take, but I can only register in 2 of them, both of which are electives and not required for my degree. I don't know how I can be 39 on a wait list but there is only 1 section for the class. Why is there not 2 classes, clearly there is demand.

3rd and 4th year math courses should not be offered on a 2 year rotation, and should only be offered at one campus either surrey or burnaby. That way it doesn't create conflicts for students. The poor availability of math courses is a serious problem, to both math majors as well as joint majors, seriously reducing the number of joint major students in Math. I understand that there are economic issues, but it doesn't provide much consolation. Maybe if certain courses were made more accessible, or cross listed courses like Philosophy of Mathematics-Q etc were offered, the university would be able to pull in more students from other faculties to fulfill their WQB requirements and allow us to "subsidize" upper level math courses.

Both of these unavailable courses are currently PRIORITY for my undergraduate schedule it limits my course selection for all post semesters following fall 2009 in order to declare my Criminology major.

HSci 100 has an open lecture, but all closed tutorials. Wasn't able to enroll.

Every term I can't get the courses I need. More seats need to be opened up. It's very stressful to wait list for your classes and not know what's going to happen for 2 months still.

Having such limited spaces in classes causes a lot of students to reconsider whether or not to continue their studies for the upcoming semester.

Every single semester I have the same problem of all of the communications courses being offered at the exact same time. And every semester I fill out one of this surveys to say as such and still NOTHING HAS CHANGED. I am extremely frustrated and disappointed with the quality of my experience at SFU. This is a humuuuge problem that MUST be fixed.
If a class is popular enough why not run two courses? Why does every English tutorial happen on Wednesday morning at the same time? Why is the organization at this institution so pitiful?

For MBB 308, the lecture offers more seats than the labs combined.

I found that the classes I needed to take and wanted to take were all full by the time my registration date came, as well as the times for some of the courses and the location was inconvenient.

There are an enormous amount of accounting students at SFU. Many of whom will be wanting BUS 426 and BUS 420 in pursuit of fulfilling the Chartered Accountant program. I had registration on the second day and could not get in to these courses. I find it very disappointing that only one section of each was offered. More needs to be done.

Psych department must help me, as I am not yet a psych major.

I was able to recieve all my courses except the one mentioned.

I have only enrolled in two courses but I have to enroll in 4. None of the electives have available seats or they have requirements I do not live up to before commencing my studies. First year international student at international studies, stream 1

These three courses all had space left when I was trying to apply for them, but the system would not let me enroll in these classes stating that the available spaces were reserved for some certain students, but I did not meet the requirements. I have already declared myself an intended Crim major, but it still would not let me enroll in those Crim classes and I was wondering which students have the priority in those available seats.

Perhaps it would be better to offer larger/more sections for these classes? These are required accounting classes; frustrating when your enrollment time comes around and there isn't even a chance to consider registering.

My original enrollment date was set as July 17th and then was changed to July 14th which caused me to miss being able to enroll in one course as I was out in the field and unable to check my account.

I have checked the the course outline and met re-requisites of both courses, but the system didn't allow me to enroll. In fact, I used to enroll successfully to the course CMPT300 two semesters ago. I could due to the reason that I'm a transfer student.

2nd semester in a row that I can't get in

Enrollment was an incredibly frustrating experience.

night time courses are invalid. Most of the courses are available in daytime which is not suitable for full time workers.

100 level courses - introductory courses - should not be restricted to people who have already declared a major. An introductory course should be a pre-requisite to declare a major!! As well, distance education classes should not be restricted at all!!!

The day of the hour of my registration every class was full, in fact they were all full from the night before.

there needs to be more spots for people who are not in the program and also more online classes available.

Scholl should reconsider the system of WQB requirement because there is remited number of course availability and choices.

There is not enough space for the class

Blocking it until August 1 was not good.

Very limited amount of space in courses required for major programs

Why wasn't I informed that I can't take these courses?? After all, I am in the engineering program.

Does my COMP 1001 course from Carleton provide me with the credit I need to fulfill the CMPT 120 requirements? If so, why am I not able to register into either CMPT 120 or IAT 265?

I really need to take this course. I have been trying since July but was unable to register. First day and it is now full and I need it for my degree. Is there any possibility I can register? Please assist. Ryan Berg

PLEASE PREPARE MORE SPACE FOR STUDENTS!!

This year's course availability was horrible...
### COMMENTS

The selection of philosophy and psychology courses are very disappointing. There is a severe lack of 200 and 300 level Philosophy and Psychology courses. Cognitive Psychology and Social Psychology are at conflicting times, even though I was planning on taking these two to satisfy my major requirements. I’m majoring in Psychology and minor in Philosophy, and it’s apparent that at this rate, it will take me a long time to graduate, even though I do not have the time or money.

I did the LPI and got a 4 on the essay. I am not sure about the other parts of the LPI. I am now doing FAL. Everytime I try enrolling in an english course I get the following: Error: Unable to add this class - requisites have not been met. Check the class description for a list of enrollment requirements.

If a course has just 24 seats then there should be more than one section....and the history of science class is an extremely popular class because it counts as B-sci. You can only get in to it if you enroll in the first few days....

Why are these only offered in Surrey??

Is it possible to increase the class capacity for these classes, because there’s only a maximum of 24 people allowed in the class. Even just expanding it to 30 or 32 people would make a huge difference for all the people on the waitlist.

This course has filled up before my sign up time 4 semesters in a row, this includes the waitlist, yet there is only one section being offered this semester.

both of 315 and 320 are popular courses and mandatory for both accounting and finance major. school should offer more sessions so students don't have to delay their graduation time

I do not like the waitlist process, nor do I like the fact that you get charged $50 for dropping a course. It limits making choices, and SFU should adopt UBC's style of course choosing.

This system for picking classes is horrible

I e-mailed Prof. Faber who said I could take the course should a space become available. She said I should ask to be put on the wait list.

This is uhnfair. Now I am out of the loop for other course sections, and I cannot do anything about it.

Should think about improving registration system, or offering more classes.

For Education 100 Wednesday and Friday are the busiest days at the campus. I am a new student at SFU and decided that Wednesdays were not good for my first semester. So I choose my other classes on Tuesday and Thursday and both Education 100 classes are full on those days. It makes it a little difficult.

All of the available classes were in an undesirable campus, at a really inconvenient time. First year students should have privileges enrolling classes. I feel like picking leftovers...

I am really interested to take this class but it has a conflict of exam with my Math 157. I have made all the compromises I could make but I cant make it work..

BUS 320 is NEVER available by the time I register. Very frustrating due to the fact that this is my third term failing to get into the course.

**NEED MORE CLASSES IN BURNABY!!!!!!!!!!!!!!!**

This system has made it almost im possible to get the courses i want. My schedule is completely ridiculous. I have to drive out to the Surrey campus in the morning for some classes and then drive to the burnaby campus in an hour to make the classes i need. Honestly this is my first year here at SFU and i am already having doubts about attending this school i don't want to have to fight to get the classes i need, considering i am paying more than i can afford to go to SFU i would hope the the courses i wanted i would be able to get.

**BISC 304 (not W) Conflicts with BISC 316 for term Fall 2009.** Also, **BISC 304 W is not offered until Summer 2010.** The **W is required for BISC 304 for my major.** Also, **I want to finish school in the next year and a half and a lot of the courses I want and need to take are not even offered as far as Summer 2010, and the system will not let me see what will be offered for Fall 2010.** I am majoring in Biology - Evolution and Ecology. These courses are not offered as far as I can see: **BISC 411 - Behavioral Ecology Lab (BISC 410 Behavioral Ecology is offered in Spring 2010)** BISC 406 - Marine Biology and Ocenography  BISC 419 - Wildlife Biology

**The Labs and Tutorials left for BISC 100 conflict with eachother.**

**Priority should be given to those with a declared major .....**

**I need these courses for this semister**

The fact that 100% of the seats were taken by CMNS students, when the course description clearly stated that only 50%~75% would be reserved, was terribly inconvenient. Despite there being open seats in the E100 section, I was added on the waiting list and had to wait a month only to find out that it was full. Unfortunately, this fall term will be my last at SFU, which means I’ll never have had my chance at this exciting course. I sincerely hope this never happens to any other students in the future. Thank you.
Not enough finance/business courses are offered at the Surrey Campus, so it is very inconvenience.

This is postponing my degree by at least a whole semester! Unacceptable. We are paying money for this.

Please help me to enroll in CMPT300 and CMPT412.

It conflicts with math 251. And both courses are required for first year mechatronics in surrey.

The choices for the tutorials were way to restrictive, having them on mondays, wednesdays and fridays at 8:30 in the morning predominantly results in terrible conflicts with other classes, namely math, is always at that time. I think having greater variety of times/days would be of great help.

There needs to be more courses available to students!

GEOG 111 is a critical first course for many students as it is a prerequisite for many courses in the program. I am surprised it did not have more available seats.

I'm required to take ENSC 100w which is offered at one time only. The CMPT 128 class is open, but because the lab is full, I could not register. It is very frustrating!

It is very hard to get my required classes when they are not offered...

No spaces in any of the courses that I need. Not sure what to do.

couldn't get anthropology 101 because I work during the day and needed it to be held after 1pm.

The tutorial's have to be increased in either the number of student's or the number of tutorial's itself.

It would help if you could increase class capacity especially in September. I only took 2 courses this fall semester due to no space in classes.

The 100 level courses fill up before I can get to any of them. I need some courses that require me to go back and do a 100 course as a pre-req, however I'm unable to get into most of them. The linguistics course is Monday Wednesday AND Fridays... very inconvenient for anyone who isn't going to school every day... I work, so I have to take courses only 2 days a week, 3 tops.

Please have more classes open... !!!!!

How is anyone supposed to graduate? I'm in 3rd year, I have a 3.3 GPA but by the time my enrollment comes around there are NO available classes. It is really disheartening and it happens every semester.

This is the second time that there are more spots in the lecture than in the lab. I cannot register in the lecture because the lab is closed and the waitlist is full but the lecture still has space in it. Why do they do that? Why are all the lab courses offered on only Tuesday and Thursday? Very few courses were offered in the summer so all us students are trying to play catch up. Every course seems to conflict either with times or exam schedules. At the moment I do have Bisc 303, but if I can get into Limnology then I will have to drop it due to conflict.

I am a film student and this course is required. I discovered it was full as soon as I was allowed to register.

Please increase class capacity

It should have more openings. I attempted to take this course a year ago, but it filled up then too. Since I need this course to graduate in the following semester, not being able to take it now will delay my graduation by a whole year, which, in my case, will be catastrophic.

Not enough spaces in distance ed classes.

Will these courses be available? I have no other courses to take other than ARCH 101 if there is nothing else. I don't want to take a course that I'm not interested in!

As I would like to complete my PBD as soon as possible without taking classes that require further prerequisites I am dissappointed that my limited choices are not offered. I am also discouraged to hear that 427-4 will not be offered for awhile due to funding cuts and as it is a requirement and I have already taken 424-4 as an undergrad I have little choice. I was also looking forward to taking that particular course and have selected my courses based on my job as a resource teacher at the elementary level. I chose those particular courses listed above as they will help me in my current job as well as in the classroom level. I truly hope that you offer these classes in the next four semesters either through distance or evening courses as I work full time and am trying to complete the PBD as soon as possible. Thank you very much for taking the time to read my comments. xxxx

Yes, I am kind of disappointed that I couldn't get into that class. I need to take that course in order to meet IAT 265 prerequisite.

When I checked earlier to see what courses to take, there was no wait list available for the distance education course. Then when I tried to enroll for it, a wait list comes out with a full list.

I want to add courses but it said there was a time conflict with other courses but I don't have any conflicts. I am also not able to take ECON but I have all the qualifications.
is an error on the screen. And the reason is I did not meet the 100 level. The system used to determine priority for enrollment needs to be changed somehow. It tried to enroll in my desired classes they were all already full. I have been waiting since my FIRST YEAR at SFU. All of the available classes were in an undesirable campus, at a really inconvenient time. I could not get into Math calc for social sciences or math calc regular because of requirement issues but I believe it is because of my transferring from XXXXXXXXXX I need math 157 or any calc math for my program and even willing to take the distance education one.

For SA150, I've been trying to get in for the past two semesters. Every time I try to enroll its all full, [the distance ed and wait lists are full]. This is very unfair that some people actually need this course for their degree and only 200 spots are available. As you can see this course is really popular but I cannot wait another semester so I am forced to take some random electives. Please consider this comment. Thank you!

The time table of mine just can't make it up... there is no way of going between Surrey Campus and Burnaby campus within 10 mins of break.[the only FAL course I can get is at Surrey Campus...while my next ECON class is in Burnaby campus. Although I saw Surrey Campus offered CRIM 101...but it indicated that the available seat is reserved and I do not meet that requirement]...and I am only to take a few of courses allowed (due to BOT program)... plz help me...

I'm on the wait list for 2 courses and all the other business courses I want to get into are full. I want to graduate on time, 5 years but it seems that is not possible at SFU as courses are not offered according to the need of the STUDENTS. there is never enough sections at sfu for any courses, sfu is a joke compared to UBC course availability.

The times are awful. And can't get into any class that I really want. Most are also full.

Lecture times were no problem. The issue resided in tutorial times. There was a shortage of tutorials and when a new class was made, it conflicted with HSCI 212 Lecture times.

All deparments should have available courses posted for two semesters in advance so students can see if courses are offered the following semester we know if we can take a required course at a later date.

ALWAYS NO SPACE....

Last fall it had a 100 spots, now it only has 75? What's going on at sfu?

Only a limited number of positions were available for a 1st year introductory course. Consequently, it is a gateway course into the department. This pre-requisite should be examined more closely as to whether or not it is absolutely necessary for students to take for the next set of courses. Specifically FPA 104, is an intro to music, and should be a course that one has the option of taking, not one that a student has to take in order to take a higher level FPA course. Students should, and do, know if they have a musical background and is deemed unfit for the advanced FPA classes, ergo this is a personal discretion, not mandated, so students are free to take more FPA courses at an advance level as they see fit.

The course Educ 427 that is required for the Post Bacc in learning disabilities is not offered in the Fall OR in the upcoming Spring Semester.

My registration date was on July 17, 2009, and I finished last year with a CGPA of approximately 3.5. When I tried to enroll in my desired classes they were all already full. I have been waiting since my FIRST YEAR at SFU to enroll in my required crim classes and as of yet have only finished one out of the 5 that need to be taken at the 100 level. The system used to determine priority for enrollment needs to be changed somehow. It completely unfair for second year students to be unable to enroll in classes that are required in the 100 level.

<tbody>
<tr>
<td>I was really frustrated at how the classes that I wanted were full before my enrollment date. I think we should be notified why we got the date that we got. I had a high GPA from my last term, but did not get to register until the 17th, when there are other first years that registered on the 16th.</td>
</tr>
<tr>
<td>Many teachers are doing their Post Bacc’s (Like me) and cannot take these courses during the day, which is when they have been offered. Can they be evening classes soon? I am attempting to finish my PB soon and need them to complete my diploma.</td>
</tr>
<tr>
<td>For one of the courses, the only available tutorials were both at 10:30am on Thursday. Not only does this conflict with another required course who’s lecture is at 10:30 on Thursdays, but what is the point of having two tutorials on the same day and time? That cuts opportunity and ability in half when compared to 2 tutorials on different days or different times. Rather than having 2 choices or options, there is essentially only one.</td>
</tr>
<tr>
<td>Would it be possible to increase class capacity for Bus 485?</td>
</tr>
<tr>
<td>At the SFU NOW information session I was told I could take any of the course offered at SFU except for those within a set program. I will attempt contact Instructor as I work in the development/construction industry and these courses are of great interest to me.</td>
</tr>
<tr>
<td>Yes. The course availability of some courses are way too limited. The course has 25 enrolment seats. The course is also not offered for another 2 years! This is a required course as well. I cannot even put myself on the waitlist, and have already emailed the teacher. Nothing can be done. My friend was complaining how do the people or computer count these enrolments? I agree. Why are lectures sometimes open, tutorials closed, or vice versa? There is no way we can enrol into these courses, even though it says open. I was quite furious when I was waiting for one of my courses during my super late registration date, and the Lecture was open, yet the Tutorial was closed. Not only could I not put myself into the course, I could not enrol myself into waitlist. Open more seats for course offerings and course availability. If there are like 120 plus people out of 200 people on the waitlist, and the closed enrolment is so limited to like 100 or even 50, this kind of tells you: one either, many people need this course as a requirement, which is the most possible situations, or two alot of people want it as an elective, most likely towards their WQB, or they have a desirable interest, as it may be something related to their interest or program/minor.</td>
</tr>
<tr>
<td>To whom it may concern: There are still 22 available seats in Lecture. (IAT 102 Fall Term 2009) However, no available space in any studio labs. Thanks for the attention to this message, appreciate it!</td>
</tr>
<tr>
<td>I really don't think that someone who've received their offer of admission earlier should be able to enroll in courses earlier. Than those who have been admitted (but later) have only some left-over courses to choose from. It's not fair because we all pay the same money.</td>
</tr>
<tr>
<td>I guess that the seats are reserved for first year students. I enjoyed such privilege last year and I think it is totally welcoming and reasonable. However, whatever the reason is, it should be stated cause I, as a second year student now, have the right to know why I can't enroll a class that I need to take in order to graduate. I am denied to enroll 4 out of 4 WQB courses that are of my interest and within my ability to enroll. If they are full by August 1 (the open enrollment period), which is quite late, then 4 months of time and fees will be wasted because so far I am only allowed to enroll 1 course (out of 6 courses that I applied). If I cannot enroll them this semester I suspect it will only get harder to do so in the future so I am quite worried. Moreover, one of my required course (Geog 111) for my major is not even opened this semester. It is a prerequisite for the rest of the lower division required courses. I feel very frustrated that I cannot enroll almost all of the courses that I need to move on.</td>
</tr>
<tr>
<td>Would have been amazing to take CRIM 357</td>
</tr>
<tr>
<td>Given enrollment times should not depict the availability of classes. There should be an equal amount of reserved places within the class for each enrollment appointment.</td>
</tr>
<tr>
<td>I know very many students who are tried to take buec but couldn't this semester lecture still had about 100 seats available, however no tutorials left. and when i tried to get on the waitlist. it stated that no wait-list was available.</td>
</tr>
<tr>
<td>I am getting really sick and tired of courses not being offered of filling up before having a chance to enroll. Classes are listed as open on my registration date and due to reserved seating I am unable to take the course. It is very frustrating trying to take 5 classes a semester and only being able to take 3. At this rate I'm never gonna be able to get my degree. Very very! dissapointed and angry with the registration process!</td>
</tr>
<tr>
<td>i don't see any valid reason why i can't take this course. any further information will be helpful</td>
</tr>
<tr>
<td>A lot of the courses that I am interested in are either already closed or the times and locations where the courses are offered are very inconvenient!</td>
</tr>
<tr>
<td>I have been trying to get into bus 320 for 3 semesters now, it always fills up before my enrollment date.</td>

### COMMENTS

Although this is the only course that was required for me to take but was unable to get into, many of my other choices for electives were all full as well.

The registration date I have is really late and I do not get into the course I want. Also, some courses needed are not

It was very difficult to plan on waitlists that could potentially conflict with other courses. Also my courses were limited to what was available leaving almost no room to swap and the only alternative to possibly drop thereby incurring a fee.

I could not believe how quickly they filled up. I also was under the impression that the criminology courses would be at the Burnaby campus, however most appear to be at the surrey campus. As well on the distance ed site it states that a degree can be completed in crim online, but a lot of the courses were not offered online.

It is a very tiring problem that majority courses are held at the same time. Also, surrey and burnaby courses only have a half hour break in between, making it impossible to get from one place to another. I would very much appreciate it if I could be enrolled in AT LEAST 3 desired courses every semester. Sometimes, even this is a problem.

Would it be possible to please open up another section for either Bus 485 or Bus 486? There is no space left in either class, both have a class capacity of about 23 people and the waitlist is already at 15. Please open up another section, these are required courses and I really need to take them.

Can you make waiting lists?

Not enough tutorial spaces, too many wait lists

So far, I will not be able to return to SFU because of this.

I have already submitted my IELTS score report but still it says I do not meet the requirements. Could you please look into the matter as the classes are getting full really quickly and I have to take this course.

Thank you

There are no waitlists for these courses either. It would be nice to be able to be placed on a waiting list in case someone decides to drop the course.

Trying to start a PBD in Special Education. I am on the wait list for EDUC 422 and had to enroll in a course that is not a part of the programme - EDUC 467. Disappointing to say the least as I am a teacher recently returning to Canada; an ex-alumni of SFU and unable to do required courses.

I have 6 more classes left until I graduate from the business admin program with a concentration in accounting and I need to finish on time by April 2010. Therefore I really need to take BUS 329 in the fall. Please open another section.

EASC 107 is only being offered in summer 2010. There are no courses being offered for the Fall and Spring semesters.

At the end of the Summer 09 schedule, I WILL have the required number of credits to enroll into Stats 201. But at the moment, in the middle of this semester, I do not, as I have not yet completed the course. I find this is unfair, as my enrollment is now but will not be able to sign up for Stats 201 until my transcript is updated in mid August. And by then, the course may be full.

Not much available. Needs more seats to a class and better times.

The system doesn’t know that I took Bio 12 (the prerequisite for BISC102) in the summer of 08, even though I went through the steps (including sending in my transcript) to rectify this in fall 08.

I started at SFU in January 2008 and so far I have had the same difficulties getting classes every term. Where one term I was only able to take one class due to scheduling or availability of class space.

Every semester I never get any of the courses that I want. I’m not sure of what to do as I am failing behind my schedule in order to apply for the programs I am interested in. Most of the english classes are never open, or are never available and on my enrollment date nothing is available. If I knew who to speak too, or what I could do to make the chance of me getting the courses I want is available. Help would be much appreciated. Thank you

If a class is popular enough why not run two courses? Why does every English tutorial happen on Wednesday morning at the same time? Why is the organization at this institution so pitiful?

Yes, when a course has so many conditions on eligibility it may be an idea to flag this feature in different colors or asterisk it to make it clear that all 3-4 conditions need to be met before a student can register in the course. Also providing a link or information on how one goes about getting dept. permission or a contact person would also be helpful.

No space when it is my time to register!

I question whether PSYC 270 should continue to be shown as a course SFU offers when in reality it has not been taught in 3 years. I have been waiting patiently for this course to be available during any semester at all, and have been disappointed by its lack of offering.

</table>
**COMMENTS**

Should make CRIM 101 more available to new students and increase the number of students allowed per class when there is an error message, there should be more explanation as to why it occurred. During enrollment peak, there should be someone to contact when the office closes. There is no way to fix our problems during the weekend on days off when offices are closed. When adding classes, there should be more attention to the link saying proceed to step 2. Because it was unclear, I was not able to get any of the required courses I need to finish my degree.

Most of crim courses become full too quickly. When my enrollment date starts, crim courses, which I desired to take, have been already full so I didn't have a chance to enroll any of crim courses so far. (Even though I am thinking about majoring criminology) I hope in the beginning week of september, there will be some space left so that I could enroll intro crim.

I am unable to enroll in PHYS 140 because it says that available seats are reserved and I do not meet the reserve capacity requirements.

I feel that open scholarship students should get priority enrollment dates.

Please offer more classes....

I was unable to enroll because my date was so late. Now I only have one class to take and will most likely not have enough credits to take Hellenic Studies Summer 2010.

I was not able to add myself to the wait list for the IS 406 - Complex Emergencies course even though the departmental adviser had granted me a waiver from prerequisites. Requesting assistance in this matter.

There are lots of rooms for the class for there isn't much rooms for the tutorials. Even though, there are about 46 rooms left in the class to goin, I was not able to choose the desired tutorial time due to the lack of tutorial capacity/number of rooms for tutorials. I did not know why I could not take this course, because I met the requirements actually, but SFU said I was not. Maybe it's the fault of my BC transcript? I don't know...

There's no waitlist either.. especially for CRIM101, I don't even get a slight chance of getting in since my registration date is so late.

Some of the required courses' labs conflict with other limited required lectures which lead to further changes for the rest of the schedule. Making an preview online worklist would help the complication and confusion. Thank you.

Online help would be appreciated in the evening, especially for students with late enrollment times.

Open more Lab times.

A large number of courses are reserved so there are not many to choose from.

There are too many students taking available seats for their friends so that tons of other students cannot get the right courses they wanted. That is not fair for them. It seems that the enrollment appointment time policy becomes absolutely meaningless and pointless.

Not enough classes offered at Surrey Campus and it is difficult to commute to Burnaby Campus.

I'm having a horrible time trying to make my schedule work. The lectures are at decent times but when there's only a couple of options (sometimes only one) for tutorials and labs, it becomes nearly impossible to make anything work. I want to take 5 courses but can only get in 3 (of which one I'm on the wait list). I'm struggling to make anything fit. I can only imagine what it would be like to actually choose a schedule that I wanted. I'm basically taking whatever I can get. The fact that some courses are only offered one semester a year is ridiculous. I don't live in BC and can't afford to pay an extra year to live in residence and finish my degree. There's no way I'm the only one with these complaints.

It was ridiculously hard, unclear and confusing to use. Nothing was available and academic advisors were misleading and told me I could take courses that I was then unable to get into.

A lot of courses are also, reserved.

very frustrated with the available crim classes offered at surrey

I really need to take FPA 171, but the time is conflict with another course.

A lot of courses are also, reserved.

Of the required upper level Linguistics courses, only 3 out of seven were offered this term. I have already completed one of them, and had other conflicts with one of the others, so could only take one of the courses REQUIRED BY MY MAJOR. I am about to go into my fourth year. I would like to be able to take courses that are in my major, and graduate as soon as possible. It is difficult to impossible to do this if the courses that I am REQUIRED to take are not available to be taken.

Absolutely not enough accounting class available.
Having to register on the second day completely rearranged what I planned for my course schedule. There should be some way to set up your courses on the website so you can view your future schedule before your registration date.

I tried to sign up right at my given enrollment time, but course was closed with no waitlist. Is it possible to have another class, as they are both very popular.

This will be my fourth semester getting the last of the available options.

EASC 210 has one section this semester - and it virtually destroys the entire day Friday. Since most science classes are MWF, this section is a bit challenging to plan around.

Yes. I have comments but they would not be polite to put in writing. I am a teacher who has been employed and teaching for 8 years. This is the second time I have tried to enroll in distance ed Children's Literature and have not got in. I was on this computer before my appointment and was ready to go so late entry was not an issue. I also can't imagine why I do not meet the requirements for the courses as I already have a Bed Degree from another university. This system does not work! I will be calling to hopefully speak to a person who can help me.

**YOU SHOULD OFFER COURSES THAT ARE REQUIRED TO COMPLETE CONCENTRATIONS FOR BUS MAJORS. WHY WASTE OUR TIME?**

I was accepted to the faculty of communications, art and tech. I am confused why I cannot enroll for these classes which (I thought) are supposed to be reserved for communications students. Please inform me if I have misunderstood what is happening here. thank you.

There should be waiting lists for all courses. I NEEDED to get into the two French courses.

I was only able to enroll in ONE English class this semester. As an English major this is a HUGE problem for me. I will be unable to meet the requirements to complete the program if I can't enroll in the courses!!

We need more sections for courses.

SFU needs more courses for students because a majority of my friends are complaining about the lack of courses as well.

No.

I found that most of my required classes were closed at the time that I tried to enroll. I began my enrollment at the exact time of my appointment.

booo

I have one semester to complete the courses required at prerequisites for PDP and by the time I was given my enrollment appointment, every class was full. I now have to take an extra semester and have to delay my application to PDP.

CMNS department needs larger lecture halls! Or, spring session courses for a program path that are not all simultaneously scheduled for the same timeslot (Tues, 10:30-12:20, etc.) Is the program really only designed for part-time students? All the courses I need to get into my upper level requirements are waitlisted about 30 to 40 deep.

I hope that more of the CORE prerequisite courses for programs can be offered via Distance Education. While Computer Studies are generally limited, typically English or language based fields, tend to be easily suited to Distance based learning. If students can access their prerequisite courses more easily, this will open up a lot more possibilities for them taking advanced courses if doing continuing studies or when they finally are able to study full time on campus.

I was admitted to SFU pretty late and as a result, by the time I got around to registering for classes, most of them were full unfortunately.

there are a very limited number of upper division BISC courses available, and they ALL fall on the same days, with multiple courses overlapping each other... It would be much better if they were spread out on all 5 weekdays, and add an additional lab for those courses with only one lab (many!!) so that people like myself are actually able to enroll. This is ridiculous. As well, I tried to enroll in a humanities course (eg. 101, 130) in order to fulfill the completely useless WQB requirements (which would not be necessary if SFU allowed transfer of the humanities courses I have ALREADY taken at college) ...but yet again, ALL sections, even distant ed, were completely full. So much for “higher” education.

too many lectures at exactly the same peak times. Makes it very difficult to do WQB and Major requirements.

It was depressing to be unable to register in any of the courses I wanted.
COMMENTS

There are not enough sections available to students. If you are going to offer a business program you better have the facilities and funding to provide students. It is unacceptable my registration date is today at 9:30am and I can only get into one business course, and I am in the faculty of business. Also, the business I did get into it not one that is of choice, it was either bus 374 or bus 381, and bus 381 was completely full so I had to choose the other one. Bus 381 was my the option I most wanted. SFU shouldn’t even call itself a university it doesn’t have the facilities or funding to provide enough class sections and seats to students. Also, it is rather a waste to have night classes for students because everyone’s first choice is to go to school in the day. Night classes shouldn’t be the only other option as a second section. There need to be way more day time sections for classes. The availability of classes at SFU is a joke, when I can’t even register for a class on my registration date.

Very disappointed as to availability and times of desired courses. Most found that are of interest conflict with each other. Out of 15 courses I wanted to take in Psychology, only a dismal 5 were available...

at least 2 sections of these classes should be available since there are SOO many business students

I am a second year student and every first AND second year course I had any interest in at all were full. I don’t understand how so many first and second year students were able to get enrollment dates before me...

Currently I am enrolled in one class because I cannot get any other classes. I am very unhappy

I’m an international transfer student. My major is business administration and my concentration is finance and marketing. I have taken other core courses already, now, I must take the courses for my concentration because I’m an international student, I don’t have time to wait for 1 semester and I don’t have a job to do if I don’t take classes. So, I’m wondering whether there will be more seats in BUS 315 and BUS321. Thanks very much.

The space is very limited.

u guys are XXXXXXX im a crim major and can’t enroll in crim classes cuz its reserved for sfu students? seriously someone give me an explanations as to why this is?? u XXXXXX XXXX porch monkeys dont noe anything

I feel upset when I know IAT100 is full...I really want to take this course that be my one of WQB. I hope IAT100 course can open one or two more class.

I am doing a PBD in Special Education and am a non-degree seeking student. Because of this, my enrollment date is after everyone else and I can appreciate the reason behind this. The problem is, I cannot register in any of the courses I need to take in the fall and I can only take the courses that are 4pm onwards or distance because of work. It’s a bit frustrating and if I don’t take anything this fall I have to reapply to SFU.

I have already had 70credits but my enrollment day is obvious so late that I am not able to register the core courses

There needs to be more sections offered in the upper division Criminology courses, especially Crim 402, Crim 355, and 357.

Yes. The course availability of some courses are way too limited. The course has 25 enrolment seats. The course is also not offered for another 2 years! This is a required course as well. I cannot even put myself on the waitlist, and have already emailed the teacher. Nothing can be done. My friend was complaining how do the people or computer count these enrolments? I agree. Why are lectures sometimes open, tutorials closed, or vice versa? There is no way we can enrol into these courses, even though it says open. I was quite furious when I was waiting for one of my courses during my super late registration date, and the Lecture was open, yet the Tutorial was closed. Not only could I not put myself into the course, I could not enrol myself into waitlist. Open more seats for course offerings and course availability. If there are like 120 plus people out of 200 people on the waitlist, and the closed enrolment is so limited to like 100 or even 50, this kind of tells you: one either, many people need this course as a requirement, which is the most possible situations, or two alot of people want it as an elective, most likely towards their WQB, or they have a desirable interest, as it may be something related to their interest or program/minor.

lecture was offered, but no tutorial..

the exam is the only thing that conflicts. Would it be possible to take the exam at the Burnaby campus where this course is also offered?

This was the worst enrollment period that I’ve had- all of the courses that I need in my major (human resources) were unavailable three days after the start of enrollment. It is ridiculous.
How can you enroll Business Faculty students then not have enough business class slots available to them. Theses are required classes and I cannot take them. Nor can I afford either academically of financailly to take excess electives. This semester Summer 09, I had to take all distance electives because the classes I wanted were not available as well. Now this is substanially slowing down my schooling and I don't have time for this delay. I am a good student who is getting all A's this semseter and this is my reward? This is rediculousand makes me want to change schools. Seriously this problem needs to be fixed now! Otherwise what am I to do?

Any of those is ok

tired of having my courses full when my enrollment time starts......

So far I am only able to register in one class for my 2nd year program. I thought that I had declared myself in the IAT Program - BSc. with Media Arts concentration, and that this would give me at least some access to courses. I am hopeful that you will be opening up more classes for the second year courses. Thank you

Most of the courses I ended up having to take this semester are not necissarily courses I need or want to take.

All Business classes are full and these are the only classes I am interested in and have pre-req's for.

Bus 320 is a VERY popular course. Many students at SFU are concentrating in accounting. However, since bus 320 is a prerequisite for all other upper level accounting courses, it is difficult to take any other courses that are required to graduate.

Because I am not in Kin yet don't have a reserved seating for 142. Can't get into Kin without it???? This is the third semester I've tried, and if I don't get in this semester, I'm done trying I will go somewhere else. Cant get into Phys 101. took 100, in math 154 and Took first year biology at Lethbridge Alberta, obviously didnt transfer third semester I've tried, and if I don't get in this semester, I'm done trying I will go somewhere else. Cant get into Kin without it???? This is the second semester in a row that i have not been able to get into these courses, and it is becoming very inconvenient. Its holding my graduation every semester i can not get into these courses.

This is the second semester in a row that i have not been able to get into these courses, and it is becoming very inconvenient. Its holding my graduation every semester i can not get into these courses. I find it very frustrating, and incredibly disturbing that a decision made two semesters ago to opt for three courses instead of four can permanently throw my academic career off kilter. I wanted to take three English courses in Fall 2008; two of them conflicted with other courses, and one of those was distance education (which I decided to drop due to computing difficulties). Since then, SFU has given me very late enrollment dates, and in spite of my GPA of 3.33, and my desire to enroll in more classes, I have been shunned from doing so. Can I ask how the hell I'm supposed to dig myself out of this rut? If it is a requirement that I enroll in many classes in order to move my enrollment appointments to an earlier date, then I am truly screwed in every sense of the word, seeing as by the time I'm allowed to apply, there's nothing left to enroll in! How can an institution like this, which claims to value its bright minded students, go ahead and make someone feel so unwanted and so unvalued as a member of the community. You could argue that I was complacent in my first year, but had there been any way of me knowing that starting off slowly would permanently cripple me, I would have hit the ground running.

BUS 320 courses only have 55 seats available for each section(only two sections). It should've increased more than that if it is gonna be held in Burnaby campus.

Honestly, I was not impressed by my registration date. It was at the worst possible time. Thanks SFU, And you have technical difficulties it appears, I was number 1 on the wait list for that course, but as soon as space was available, I was not registered.

This is postponeing my degree my a semester every time this happens, and is costing a lot of extra money and is unacceptable considering how much we are already paying.

This is the second semester in a row that i have not been able to get into these courses, and it is becoming very inconvenient. Its holding my graduation every semester i can not get into these courses.

should allow more students to enroll.

i was not accepted into my program until after registration had been opened to students for a month and a half, and now i am struggling to find even three courses that will fit in my schedule, program, and interests.
Busy required accounting courses should have more that 1 section or have larger student capacity. Accounting courses that are 3-4 hours long lectures can be split into 2-1hr and 2-2 hr lectures in different rooms if all bigger rooms are taken. Do everything possible so that not to make students waste an entire additional semester taking the last 1 or 2 courses that are left to graduate, please !!!

Sth Year student, figure it out guys and send me an email or give me a call. xxxx@sfu.ca  xxx-xxx-xxxx

I need to register in one more course to have a full course load. Can anyone help me get into a 1st year English course?

There is not enough sections for all the courses to satisfy the amount of students enrolled at SFU. Also, as a business student I believe we should have enrollement restrictions for some of our business courses.

High demand subjects like ENGL 101 should have more classes such as 2 lectures and more tutorials.

Many of the CHEM and BISC introductory courses had course times that directly conflicted with one another or there was insufficient availability on non-conflicting days and these tutorials filled up fast. There were also instances with CHEM 111 where the lecture was full and closed as it was combined with CHEM 110 but there were tutorial and lab openings that worked with my schedule.

I personally think that course registration has gone a long way as business courses are reserved for business students rather than having random majors fill up all the spots. however, i do believe that since our business faculty is so huge, we need more availability.

Can I please get into these courses? I need them to apply to PDP this upcoming January!!!!

I had a list of 7 classes that I wanted to enrol in this semester and of those 7 I was only able to get into one. Seminar classes should have more than 25 seats and popular classes should accomodate more people. I only have 2 semesters left at SFU and yet I never seem to get into any of the classes I'm actually interested in. This is extremely frustrating as a student who is almost finished their degree but would like more knowledge in particular areas.

what does it mean when it says that the course has reserved seats and that I do not meet the requirements to fill one of said seats? I have tried to get into CRIM 101 3 times now and would really like to take it. Any suggestions would be greatly appriciated.

I should have chosen all my classes on July 15th 15:30. During that time, all classes I wanted to choose were available. Because of the strange technical problem, I couldn't login to SIS page and complete my enrollment successfully, so that I misses all the chances to choose courses I wanted. It's unfair.

This is crazy! I would like to finish my very simple 30 credit diploma in special education sometime before the next century. During summer I was unable to get into any classes I needed, and had to go through Thompson Rivers and pay more money for the same course!!! Now , from what I have heard I will have to wait until summer to take EDUC 424 - and I'm sure I will have a 50/50 chance getting in before it fills up too!!! I regret taking my diploma at SFU. I will take further graduate studies at UBC or another institute.

am a communications major - have met course requirements -
for year 2 students there is almost no BUS, BUEC, or ECON classes available.

There are so many courses I want to take that don't get offered at all.

There needs to be a waitlist for crim courses

Due to the fact that second year students get last priority, there were no spaces left in any classes. I had to readjust my entire schedule because all the courses I wanted were full.

reserved seats in distance ed. class would not allow me to enrol and the lack of a waitlist on the 210 left me with no options.

I am attempting to gain the courses to apply for a Minor in Kinesiology, but I can't get into any of the classes because they are all full or have reserved places for Kin Major students. My registration date is always too late. As well, I am trying to complete a History Minor but the upper levels always fill before my registration date.

I live near UBC which is hard for me to go to Surrey Campus

There should be more sections open in the Fall semester due to the inrcease of number of students enrolled during this semester. I need to take BUS420 and BUS426 in order to graduate by the end of year 2009.

I need this course for upper level pre-reqs!

Unfortunately the only lab/tutorial sections that were available conflict with each other and all waitlists are full. I'm going to attempt to take this at a college as this happened to me last time I tried to attend school at SFU.

There are 200 people waiting to be admitted to KIN 110; why not make another section?!
There was room in the lecture but no room in any of the labs. Just a big ? there
SA 286 has not been offered for the past six semesters and it is required for my minor.

We need more courses.

Since I am an international student, I want to have an English course. However, this course should not be very
difficult. I want to make this second language better for other courses.

The entire enrollement process has been very frustrating for me this semester as the amount of courses
available is extremely limited. I just transferred from Kwantlen into arts and now I just got early acceptance into
business for this fall semester and am starting to seriously regret my decision to attend SFU. Had I realized how
limited my course selection would be I would have gone to UBC but because I made sure all my courses were
part of the SFU business program it is now too late for me to switch. My biggest complaint is that because I am
going into accounting and the accounting program has just changed to Honors this semester I have to take Bus
320 before I can take any other accounting courses. By the time my enrollement time had come there was no
seats left at all. How am I supposed to get into the accounting honors program if the necessary course to apply
is not even available to me? I also the system had not updated my account to show that I was now accepted
into business and because of this delay I missed out on 300 level business courses that were available to me at
the time of my registration but were subsequently full by the time my account had been properly updated. I
would appreciate it if someone could contact me regarding the issues I have had at jordanf@sfu.ca

I was wondering why there is no waitlist for this class?
The unavailability of these courses is delaying my graduation so it would be much appreciated if more sections
could be opened for these courses and for required courses to be actually offered each semester. Thank you.

cmns 375 is always full before I can register

no

Unfortunately the only lab/tutorial sections that were available conflict with each other and all waitlists are full.
I'm going to attempt to take this at a college as this happened to me last time I tried to attend school at SFU.

I am really not happy with how the enrollment system works and I do not think it is fair. Having already a later
registration date (July 16th), I had 8 classes altogether including backups. I have so far only successfully
enrolled in one and am wait listed in two. I could be enrolled in at least a few more, but though the classes are
open, they say that the few remaining seats are reserved. I need to know my classes ahead of time in order
to balance my two jobs' availability and I am now unable to do that because of my enrollment problem. I am a
very studious student, and I have taken 5 classes each semester in my first year (a total of ten) while balancing
a job with over 20 hours a week. This year, I will have a second job to pay for my tuition. I just don't think it's
fair that I can't get into any classes at all right now, except for one.

Courses in the Faculty of Business & Administration should be BLOCKED for the students in this faculty as like
the Surrey Campus.

I am very disappointed about the late enrollment day. I didn't get any classes I planned to take. Why am I
paying so much tuition to SFU if you guys cannot give me the courses I want? This is very frustrating and I hope
SFU can improve on this ASAP.

I still don't understand what the prerequisite for English is.

All but one of the classes I initially chose to take are full by the time I can register, and my back up classes have
filled up as well. I am left with classes I like, but don't necessarily further my education in the direction I had in
mind, and am passionate about. I am sure I will perform worse due to lack of interest in my back up's back up
class, and it won't go towards any major I'm interested in pursuing.

sessions and lectures are limited, unable to register for the desire courses, should open more sessions for major
course like economics or bucc courses

so far, I can only register two courses that I want, the other courses I could only register up two classes that
were available.

No space and conflict with REQUIRED courses. Two other electives conflicted, too. Slightly improved from 2009
spring term, but only because my enrollment date was about 4-5 days earlier. After I did enrollment for fall
2009, a later in the same day, all required were full and only 2 elective courses were available.

<tr>
<td>PLEASE make more available seats for Business courses! My enrollment date was on the late side, and I did not get ANY of the courses I wanted at my desired times and desired campus. It is very upsetting and completely unfair. PLEASE make more seats available!!!!</td>
</tr>
<tr>
<td>Just wondering why there are not more CMNS courses available to take each semester.</td>
</tr>
<tr>
<td>I am only able to do my ECE diploma through distance educ. because of work and family commitments. The application process took so long that my enrollment date was so late and therfore I was only able to get one course this semester.</td>
</tr>
<tr>
<td>All courses are taken within the first few week, students with late registrations have no way of getting the desired courses they need. It's either there's no room left, or the room that are available will conflict with other courses.</td>
</tr>
<tr>
<td>If I'm doing a psyc minor but haven't declared it. Is that the reason I am not getting into the courses?</td>
</tr>
<tr>
<td>I was not able to apply for my courses on line because of an issue with residence fees. My fees were paid in full, but were deducted a $50 charge for cleaning my room which I was not aware of. As far as I know the room was left in original form. I then had to wait to sign up for courses after a 24 hour wait time once I paid the extra $50 charge, therefore all the courses that I wanted were then full up. I felt it very unfair that there was an issue with my room that nobody told me about and the accounting dept. just took the money out of my account without informing me. Also, many of the courses that I would have liked overlapped with the same times and dates preventing selection even if they were available.</td>
</tr>
<tr>
<td>I need to take four SFU courses in order to qualify for an entrance award I've received (Ken Caple College Transfer), but can't get on the wait list for this course (which was sitting at 2 of 8 waiting positions taken), probably because I have also got EDUC 220 on a waiting list. Can I not be on two waiting lists at a time? Another course that was available was MATH 190, but I don't have a placement test completed for that one In fact, I am currently enrolled at Northern Lights in Fort St. John for the Fall, w/o a placement test and I would rather take that one in person, as it's been a quarter century since I took a math course! : ) Biology I thought would fit in with my teaching goals, but....no luck. I don't want to lose my scholarship, so hopefully there's a way to have two courses on a wait list. Thanks for any help you can provide me with! XXXXX</td>
</tr>
<tr>
<td>I started enrolling one day after my enrollment date but there are no required 300 level business courses that are open. I believe there are 3 that are currently on wait list for this course (which was sitting at 2 of 8 waiting positions taken), however the day and evening courses are all booked on the other classes.</td>
</tr>
<tr>
<td>I need a Canadian History for PDP requirements. This is the only course that works with my schedule</td>

</tbody>
</table>
I applied to SFU specifically for CRIM (which I was encouraged to do so by Professor Kinney and TA, J. Yasayko (for Bill Glackman) after I achieved an A+ in both of their classes, 101 and 103. I have had to "move mountains" to make it possible to even attend SFU. And while I appreciate that there are budget cuts, and while I appreciate that this is a common problem it doesn't change the fact that I applied specifically to CRIM (even if I can't declare yet) and most of the other departments won't let me register because they reserve for their students and yet I can't get into the classes in "my department". I wanted to take BISC and Health Sci as a minor - but I am grid locked there too. Granted, I have not declared, but how am I supposed to declare if I can't get the requisite courses under my belt?!?! I was foolish to believe that at least one course per term I should be remotely interested in - now I feel just grateful to work my ass off to pay too much money to not even be able to fill my schedule?! This shouldn't be as hard as getting an MRI. This is beyond absurd. If this cannot be remedied I will be transferring out and you will lose a very talented student - who was once boasting and very enthusiastic about attending SFU.

Please make more spaces in Bus 315 and Bus 316 for the spring semester. I have not been able to get these classes for the last 2 semesters and I need them to finish up my last 2 courses. Thank you.

All the night courses booked up really quickly this time around. Not sure if SFU is seeing an increase of mature working students seeking re-education given the current economic climate, but that should be addressed.

I really wish there could be another section for CMPT 150. Important prerequisite courses like these, when are at their maximum capacity, affect students' degree plan as a whole. It is important to me (or to any other student in my situation) that I do this course in Fall '09 since it enables to take other course(s) next semester which in turn enables me to do COOP by Spring '10.

I was able to recieve all my other courses, except for the one previously mentioned.

There should be more classes offered especially for those which are required for EVERY student not just those planning on majoring in the area. That and giving those who plan to major in the class a by into the courses they need on the 100 level so they can get a 200 level course before they become third years.

I am currently on the waiting list for two political science courses that i need to take and am really interested in taking as I am considering political science as my intended major, but am currently still on the waiting list for them. I cannot believe that the university can have so few spots available for second years who still need first year courses and that most courses are full by my registration date. If this continues I will be lucky to graduate in 10 years let alone four or five.

There should be more classes avail as Distance Ed and more seats avail. People work full time (adults) and get go to classes during work.

Very confused. Logged in to enroll FIVE MINUTES after enrollment was available, and only found TWO open classes and am currently on ONE waitlist.

there needs to be more courses made available at the vancouver campus for normal undergraduate students (ie,not communications, gerontology, or crim). Also, I don't know how to become an sfu now student. I only take classes at the downtown campus at night because I work full time, but I am not labelled as an sfu now student and so couldn't register for this class until today, and now it is full. please make this information more readily available and understood for students that are already attending sfu as working people. right now, the program seems to be focussed on working adults. I am 25 years old, already registered at sfu, but I am also a working adult, and I feel that I should be included and benefitting from this program. Now I have to wait another semester to finish my breadth science requirements. Very frustrated.

Third semester in a row that I can't get into these classes even though I'm going into fourth year and supposed to be concentrating in accounting.

I hate course registrations I never get the courses I need

There seems to be a very limited selection of courses combined with either very little room in each course, or not enough sessions offered. For someone like myself who is having to take a part-time leave from work to upgrade, I feel extremely limited. I now feel that I will have to wait a whole year before my upgrading is complete as the courses I want to take are only offered in the summer.

My only comment is that the priority enrollment for SFU NOW students could be labeled differently. If it were to say enrollment "only" for SFU NOW students until Aug. 1st, rather than "priority enrollment" it would perhaps be less ambiguous.

Open more sections

Need more teachers and more tutorials on different days.
The reason I was unable to choose these classes was due to an astonishingly late enrollment date (July 21st)! Speaking to Academic Advisors, past students as well as to staff at the GoSFU desk, I was informed that this is not an uncommon occurrence due to the poor system by which students are provided enrollment dates. I believe the best methods to correct this fatal flaw in your enrollment system are as follows: 1. Create more classes for the first year classes. You have a large number of new students, provide more classes for them. As sad as it is to say, student numbers decrease as the years go on. You just have to accommodate the large number of first years. 2. Reserve spots in the class for students unfortunate enough to have late enrollment dates. Unlock a set number of spots every week in July. (1st week 100, 2nd week 50, 3rd week 50, last week the rest). By doing this it gives a fair opportunity to all students. A similar system is already in place. Classes at Harbour Center and Surrey campuses have a set number reserved for students at those campuses until July 31st.

So far I have only been able to take 2 courses that I need and I'm doing a internal transfer therefore I need to take ENGL 104. Please help.

We really need more space/classes for these courses. These classes are really hard to get in every semester.

I'm a second year to be student and I'm appalled at the availability of 1-level and 2-level courses for second year students. I think it's shameful that a second year student like me only has one course selected so far because of lack of any availability.

It is very frustrating to have to wait for department consent when I was given a date to enroll.

Why can't I enroll for my required courses? I have met all of the prerequisites.

Many of the criminology courses this semester fell at similar times. Fridays between 9-12. Conflicting if you wanted to take two. Mondays 1030-12:30. Many tutorials also clashed with times of popular (required upper level) crim classes. Please add a couple more electives - required crims were very open with lots of tutorials and is much appreciated.

It is really important for me to enroll in more than one course this semester. I am really interested in these courses in which I did not get into.

Is it possible to open more classes as these courses are filled too quickly for students who are trying to get into SIAT?

You guys really XXXXXX me this time. This is how you treat a student who came here on your scholarship? I'm too angry to even write about it.

Some of the required labs conflict with other limited required lectures, which lead to further changes to the schedule. Making a preview online worklist will help the complication and confusion. Thank you.

I was away and could not register until August 10. By then, almost all the SFU night classes were closed. I am not a NOW student as my application was not accepted even though I had a 3.1 GPA from McGill when I completed my first BA and a 4.1 from Concordia in a Communications programme. The two classes I took at SFU I received an A and A-.

I wasn't able to get any of the original class times I wanted. I had to change my whole course schedule to evenings since they all filled up way before my registration date.

Spots reserved for those with a Kin Major... will they be released or offered up if they are not filled?

Because my central focus of undergraduate study has remained on the 18th century, I plan to apply to the English honours program in 2010 when I complete the remaining 6 credits for my undergraduate degree. Dr. Solomon's 18th Century English 420 course will be an important step in the development of my future study of 18th-century writers. As I am now 56 years old, I want to complete my undergraduate studies in a timely fashion and enter a Master's Program in the near future. Since I am a part time student, my work schedule restricts my participation in other available courses this upcoming semester. I request that I be considered for admission to Dr. Solomon's upcoming English 420 course due to these extenuating circumstances.

I have been waitlisted for these courses even though I have all necessary prerequisites and corequisites. I require to take these course for my degree. Why haven't I been enrolled in them?

this is very sad that the japanese 101 only offers two sections this semester... after all, each sections only contain 25 seats... wish that there will be more sections available for japanese in the next semester.

The courses that are available are reserved for SFU NOW students. The other classes will not let me register at this time for some undisclosed reason. I want to go to school, I can make the proposed time of the classes that say they are "open," it is after my registration time, so what is the point in restricting me to register. I am very dissatisfied, especially when I am dumping this much money into my education...or attempt at education...

Please increase class capacity for Bus485 or open a second section.
This is the third semester that I have not been able to register successfully for this course. Please consider adding more seats to this course in the spring or providing some way for PBD in ECE students to have priority to register. If it is a required course to complete the diploma it should be made available to us.

It's extremely annoying and painful how spots are reserved, or have priority seating when the are a required part of my major and I cant get into them. At this rate ill still be trying to graduate eight years from now. Sweet.

We're paying you to take classes, but in return we don't get anything that we want or need to take?

-If I don't get into this course next semester, how will I graduate? -It's pretty sad when SFU has to recommend me taking the course at another university -It's really nerve-racking to wait and see if you'll get in a class or not

This was the most stressful and difficult enrollment in my time her at Simon Fraser University. I could not believe the negligent scheduling of this school's staple program - Criminology. It seems like every other program (including Psychology, Business, Kin) has enough space and flexible times for its students. Criminology has an absurd amount of overlapping classes and times that make scheduling a nightmare. I am a student who has fairly good marks, and has taken courses on time. Crim 330 for example was completely full before my enrollment date even began. Crim 335 was the only other upper division course I could take (that was available) towards my legal studies minor, but that was also unavailable. At this point, I don't know how I will graduate in my projected 4 year time, simply because it seems like there are no classes available. I am very disappointed with the way this university is functioning at the moment.

Ive been waiting for IAT 244 for 5 semesters now. I waited till August 3rd 12:01am to enroll since seats were reserved but right when i click it, it seems to be full right away which doesn't make sense. And its been like that for 5 consecutive semesters.

As a second year undergraduate student, I have to say that I am appalled at the lack of availability of courses this semester. I had looked forward to returning to SFU this semester, but after the disappointment of this enrollment appointment, I am not sure what to expect. By limiting the availability of courses (even to students whom require the course towards their major), I believe that the university is doing itself, and it's clientele a disservice.

2 business classes at different times shouldn't have the same exam time!

No, everything would have been fine if admissions did their job.

This is my second year, and first off my registration date was very late so alot of my classes were taken up already, even though i believe i was a good student, with a good GPA. I have a huge issue with not being able to register for classes at the surrey campus because courses there are reserved for surrey students... we are all sfu students. Overall, not a good experience with registering for the fall, its very frustrating, along with some staff that i called for help that were not helpful at all.

For popular classes try and put them into the larger lecture halls to accompany all the interested students.

I have been trying for two semesters now and still I have not been able to get in this course.

the lack of available courses really frustrates me i wasn't able to get into any of the courses i want or need

I hate this process. I would like to be able to search only criminology courses, and be able to see only courses that are open with available seats. It is also ridiculous trying to get into upper level crim courses, they are all full and there is no waitlist so I have to open up each individual course every day to see if there are seats available.

There are often many Lab and Tut sections available, but with only one Lecture section for most classes, it is very hard to fit in all required courses and final exams without a schedule conflict. This is especially troublesome for Lower Division Science courses which are prerequisites for subsequent required courses.

I was not able to enroll in these classes last semester either due to the limited seats available. I am concerning about this because if I cannot take them this semester again, I need to pay additional living expenses for expended semesters on top of the tuitions for international students. I hope SFU increases the number of classes for accounting majors. Thank you.

This is my third term and I have been unable to sign up for an English course on the Burnaby campus. Since I can not get a second 100 level english course I am unable to move up to the 200 level courses. Please notify me how I can sign up this term for an english course. I have also attempted to take an english course through DE and none were available. Thanks XXXX XXXX XXXXx@sfu.ca

There are over 200 people on the waiting lists for this course -- why don't you add a section?!

Need more spaces.

</table>
I'm a transfer student from a college. buec 232 is the last course I need to take in order to complete my lower division courses and transfer to SFU business faculty. I really need this course.

Overall no classes available for a first year student to be allowed to enroll in even though it's gonna be my 3rd term, it's like a job interview where they require experience..well, hello, i need to start somewhere, give me a chance..

This is crazy! I have a 3.78 GPA and I wasn't given an earlier registration date?! I am very upset! I work so hard at this school to try and obtain a decent GPA, only to find that I am waitlisted for the classes I need to get my Communications degree. How is it fair that students on academic probation have a sooner date than me? I honestly deserve better and find this process ridiculous.

This is my third semester on the wait list for this class and not being able to take the course.

The space in accounting classes, or there lack of is likely to be a well known issue for SFU Business. Perhaps the home page for SFU Business should amend its comment which refers to SFU's Business degree program a four year program to a five year program since people cannot register in accounting classes.

I received what seems to be a verification program to a five year program since people cannot register in accounting classes. How is it fair that students on academic probation have a sooner date than me? I really wanted to go to Surrey but guess that didn't work out.

I have not seen these two courses offered for several semesters now and I require these courses to complete my program and graduate.

There should be a waitlist for Criminology Classes. Also, the application for the Legal Studies requires Crim 135, however, if there are no sections available, you cannot apply for the program.

I am a second year kinesiology student and I have only been able to get into two kinesiology classes so at the rate I am going it will take me way too much time to get my degree. I think that it would be very helpful if these classes were made much larger as they seem to be very popular.

Systems need to be faster, if possible. Also lecture times and especially tutorial times could be better organized. More availability please!!!

The classes are reserved. In case of CRIM 103 at the Harbor Center, there are ONLY 8 people enrolled!! If people, for whom the places are reserved don’t bother to enroll, then what's the point of doing so?

I have just transferred a course which can accepted as MATH 1xx (3) from Vancouver Island University. And, I think it may be seemed as the prerequisite for STAT 270.

It can be quite frustrating for students who need to take these course for their undergraduate degree, and have to wait until next semesters to do so. Especially when tuition is already a huge burden on my shoulders.

Second year students have the worst luck :( 

By the time my enrollment date came along almost everything was full making it difficult for me to find courses to take that would benefit me.

Yes, SCD 401 should be delivered via in class format twice instead of only once a year as the SCD final project (404) requires completion of both 403 and 401 before a student can enroll.

Yes, I was quite choked actually when the system first crashed and I was unable to get into PHYS because of a transcript error. I really wanted to go to Surrey but guess that didn't work out.

Social studies requirements for the PDP program need a variety of specific courses and I have a lot of problems finding those courses available to take. Especially considering that Fall is the busiest semester, it seems odd that I am unable to find a lower division history course that covers both the 500-1600 and 1500-1815 time periods. I think that taking into account that people need these courses to apply to PDP is important so that they are offered year round.

It is very inconvenient that IAT 334 is offered only once a year; this makes it difficult for students to take higher level courses later on that have this course as a pre-requisite. There needs to be more sections per semester for any courses that are only offered once a year.

I checked my Transcript and I believe that I do have all the pre-req's. I have ENG 101W and ENGL 1WRIT3.

REALLY NEED TO TAKE THIS COURSE CMPT150 TO CATCH UP WITH MY SCHEDULE...

SFU did not receive my updated transcript yet which states that I have met the FAN X99 requirement (Principles of Math 12 - final mark of 75%).

<td>Please make for a more fair course registration system. People with later registration dates can't get into courses they want.</td>
</tr>
<tr>
<td>I was supposed to be on the wait list but the tutorial for the class was closed. Appropriate number of tutorial blocks</td>
</tr>
<tr>
<td>Bus 320 and Bus 322 have limited spaces, which makes it impossible for me to register for these courses</td>
</tr>
<tr>
<td>ON RECOMMENDATION FROM MY ACADEMIC ADVISOR I CHECKED THE WEB PAGE THAT RECOMMENDED B-SCI AND Q COURSES FOR ARTS STUDENTS. I NEED TO TAKE A Q AND A B-SCI THIS YEAR AND I CAN BARELY GET INTO ANY OF THESE CLASSES (THE ONES THAT ARE FOR ARTS STUDENTS) BECAUSE THE 100 LEVEL COURSES (THAT I DON'T NEED PREREQUISITES FOR) ARE ALL BOOKED UP! I WAS ALSO THINKING ABOUT MAJORING IN HISTORY BUT THERE ARE VERY LIMITED COURSES TO CHOOSE FROM BECAUSE OF MY LATE REGISTRATION DATE. I DON'T KNOW WHAT I COULD HAVE DONE DIFFERENTLY BECAUSE MY GPA IS MUCH HIGHER THAN OTHER STUDENTS I KNOW WHO REGISTERED BEFORE ME. I AM NOT PLEASED THAT I HAVE TO TAKE (AND PAY FOR) OTHER COURSES THAT I DON'T EVEN WANT TO TAKE JUST SO THAT I CAN GET 4 CLASSES FOR THIS SEMESTER AND NOT FALL BEHIND IN CREDITS TOWARDS MY DEGREE.</td>
</tr>
<tr>
<td>I would like it if courses could be offered on a two day basis (instead of MWF), which makes scheduling MUCH easier and cuts down on transit times. Also I don't know why two of the required courses that I have to take are offered on a completely different campus. I have no way to attend these courses because there is just not enough time (10 min) for me to move between campuses. This delays my graduation by at LEAST a semester.</td>
</tr>
<tr>
<td>I think since SOCIOLOGY 150 is a requirement for Criminalogy major and so other majors its a good idea to add another lecture too ! Its been 2 semesters that I have not been able to enroll in this lecture class! Its very frustrating....</td>
</tr>
<tr>
<td>there are not alot of open spots and time slot to fit into the schedual. And alot of the courses are reserved.</td>
</tr>
<tr>
<td>I have not gotten into my desired courses for the last couple of terms. While the reasons have usually been because of the lack of seats, this term has blocked my enrollment with a new reason: &quot;available section(s) not at desired campus.&quot; I don't understand why there should be reserved seats for students based around destination purposes. I feel that enrollment for either campus should be available to all students as there is ways of traveling back and forth. Furthermore, I would like to suggest that more seats be available to the Burnaby campus as there seems to be more attending there.</td>
</tr>
<tr>
<td>I find it extremely unfair and very difficult to enroll at this university when courses are not made available to students who need them the most, and are not being offered at all times. Two semesters in a row now I have not been able to enroll in IS240 as it fills up quickly, and for some reason unknown to me, my registration time is always late. It has come to my attention that First-year students who are registering for the fall are also given earlier registration times then Second-years: this I find extremely unjust and very difficult to deal with, as courses that I need as prerequisites are getting filled up by First-years. Unimpressed.</td>
</tr>
<tr>
<td>Business courses should have some seats saved for business students. Other departments such as health science, kinesiology, criminology, and communications reserve seats for their faculty's students.</td>
</tr>
<tr>
<td>Intro to Religious Studies should be offered in the burnaby campus</td>
</tr>
</tbody>
</table>
I am really disappointed with the way the course selection process has been handled. Very disappointing. I was also thinking about majoring in History but there are very limited courses to choose from because of my late registration date. I don’t know what I could have done differently because my GPA is much higher than other students I know who registered before me. I am not pleased that I have to take (and pay for) other courses that I don’t even want to take just so that I can get 4 classes for this semester and not fall behind in credits towards my degree.

I find that there are not a lot of choices offered this semester for HSCI classes in the lower levels. Many of the classes I wanted to take are not being held this semester. Thanks for reading.

Seems as though many Political Science courses are being offered on the same days at the same times. Also, the Political Science Research Methods course (and its alternative requirements STAT 203 and IS 240) was offered at the same time as another 200-level Political Science requirement (210) and its alternatives were offered only at the same time.

I need both of these courses in order to graduate with the MOS concentration in my BBA.

Why is it that, the lecture has more room while all the labs and tutorials are taken?? What happens to the students who sign up for the lectures, but are left without tutorials or labs??

I am very concerned about the fact that for two semester consecutive I got a very late enrollment date. Thanks for reading.

This is my last semester and I need to take BUS 424 in order to graduate. Is there any way I can get in this class??

There should be more seats available at least for the students who have declared those courses as their major.

Yes. The course availability of some courses are way too limited. The course has 25 enrollment seats. The course is also not offered for another 2 years! This is a required course as well. I cannot even put myself on the waitlist, and have already emailed the teacher. Nothing can be done. My friend was complaining how do the people or computer count these enrollments I agree. Why are lectures sometimes open, tutorials closed, or vice versa? There is no way we can enroll into these courses, even though it says open. I was quite furious when I was waiting for one of my courses during my super late registration date, and the Lecture was open, yet the Tutorial was closed. Not only could I not put myself into the course, I could not enroll myself into waitlist.

Open more seats for course offerings and course availability. If there are like 120 plus people out of 200 people on the waitlist, and the closed enrollment is so limited to like 100 or even 50, this kind of tells you: one either, many people need this course as a requirement, which is the most possible situations, or two alot of people want it as an elective, most likely towards their WQB, or they have a desirable interest, as it may be something related to their interest or program/minor.

I’ve just spent over two hours trying to find ONE other course that I could take in the Fall 2009. Every single class I wanted to take was at the same exact time as the two classes I NEED to take for CMNS or had conflicting exam times. Without those CMNS classes I cannot take any other classes in CMNS. I didn’t want to take only two classes this semester, so I’ve tried to find another one with little to no luck that would count towards my WQB requirements. I’m now stuck taking a history class that is probably my 17th choice in a long list of classes I would have been otherwise really excited about it. I began my enrollment the minute I was able to and still had this problem. Very disappointing.

I am registered in the Kines. Certificate Program Fitness and Health, and also work at the university. It is not possible for me to take this course on campus at the time listed. Distance was my only option. Hopefully I can get in next semester.

I was told after a meeting with Professor Takei that I would be able to get into this class after taking a Placement test. Since I couldn’t select it myself, does she do it instead?

As a new student to SFU I found the selection available to me was very limited this term, many of the other course options were full on my registration date.

There should be more sections available for the above two courses since seats are limited but too many students want to get in. The registration date started two days before mine, so when it comes to me, there aren’t any seats left and it will definitely affect my graduation plan.

It says it requires Math 151 and Phys 101, I then decided to take these courses as they are needed as the co-requisites for this course. But to take Math 151, I need Math 100 (says I haven’t met requisites but I have Math 12 with a grade of C+, meaning I have met the requisite.). And for Phys 101, I need Phys 100 which I have just enrolled in.
I could and they were already full. If there is anything that can be done to squeeze me in it would be most
ridiculous and highly annoying.

SIAT needs to realize the number of students in need of taking required courses, and prepare better. Many of
the students taking 200-level are in 3rd years who could not take it in their 2nd year for similar reasons.

For the Math 151, me meeting the prerequisites is based in outdated school marks, not on my final grades which
will change once my provincial exam score becomes available in late July. In my opinion, it would be better if I
was allowed to enroll. If I did not meet the prerequisites once the marks become available I would have dropped
the course prior to the start of classes. In that way, I would not have to rethink my schedule in a rush, because
now, I will wait for my marks and will change my schedule accordingly risking not finding space in Math 151 and
in the classes that I have to move to fit that class again.

Please OFFER MORE CLASSES FOR THE REQUIREMENT CLASSES !!!!! PLEASE PLEASE PLEASE PLEASE PLEASE PLEASE

conflict with ENSC 100 W.

Late enrollment dates make it extremely difficult and not to mention frustrating when searching for classes

I was not able to get ANY of the courses i wanted.

There was no wait list. It was just closed at 250 students.

I think I may not have a good grade in Math 150, but I am not sure yet. If I can choose this course and Math
150, when I know my final grade, I can decide which of them need to be choose.

I really want to have Math 151 but i just cant get in please help me

Why is it that i always get a very late enrollment appointment and am never able to get the desired courses???

It is very difficult to declare a minor when one cannot get into prerequisite classes due to 75% reserved for
already declared students. I've been waiting to get into this course for a year now, but I never seem to be lucky
enough to get into the lucky 25% range. Very disappointed yet again.

Still says there are 12 spots left in the Lecture, but all of the tutorial sections are full
courses are full easily, and it's unfair for transfer students like me with a late registration date.

My gosh! The courses need more sections.

I just find it really upsetting to SEE that the class is available but in the end it's not (the remaining available
seats are reserved?). I couldn't even get onto the waitlist! I know a lot of people who have interest in taking this
course but can never find a spot for it (Distance Education or In-person sections). It's just very frustrating and I
think SFU should just offer more distance education sections.

It took SFU over 3 months to process my application and when I was finally available to pick my classes some of
them were already full. I need to take one of those psychology classes and tried to add them on the first day that
I could and they were already full. If there is anything that can be done to squeeze me in it would be most
appreciated.

I transferred to SFU so I could continue my degree in becoming a French Major with a Bachelor’s of Arts. This
class is practically the only one I need to be taking and I can't.
I couldn't select this classes because i didn't meet the reserved requirements in surrey campus! I just followed the MSE term one course list, but i couldn't select any single one that matched my schedule.

I was denied and received a reserved for others message.

Way to many classes were full by time my enrollment time came around. There should be more business classes offered.

The lecture and all the tutorials were closed before my registration date so I never had the option to add them.

This survey does not have enough spaces for the classes I was unable to take. It's a real shame that every semester I have the same problem! I even had to change my program due to courses availability.

I was curious about how one had a chance to gain access into a class when it is full before you are eligible to register? Seems a little strange to me.

I have 2 courses to complete - this one is essential to my area of interest in graduate studies.

ENSC courses should be offered in multiple terms.

This semester's enrollment was particularly painful as all the classes I wanted to enroll in were full.

Please start another section.

THE REQUIRED COURSE OF MATH 151  CALCULUS I WHICH I HAVE FINISHED IN MY FIRST DEGREE HAS NOT BEEN RECOGNIZED, SO I CAN NOT CHOOSE DISCRETE MATHEMATICS I. How could I get all my previously work finished in my first degree accepted by the system? I am a second degree student, thank you.

Classes filled up very fast. Having more classes available may help students pursue what they want to study.

P.S. i have not put any course number because i must take numerous BUS courses and none were available.

I only need two 400 level courses to graduate in English Literature, but the course selection is so poor. You need to consider your working students and have more evening and distance education courses. It's mean.

I had applied to SFU to specifically take KIN 105 as part of a prerequisite to enter Nursing School. It is very unfortunate that both distance education courses for KIN 105 are full at this time. I am currently 28th and 11th on the waiting list. Is there any other way to get into these courses aside for waiting for other people to drop out?

Course registration and availability was nothing short of a disaster this semester. Not just for me, but for almost everyone I’ve talked to that doesn't have the Shrum Scholarship (99% of people). I’m finding hard to complete not only my major but fulfilling basic requirements or my intended minor because of the terrible registration date for 2nd years, and the fact that faculties schedule all of their courses on the SAME two days of the week (CMNS - Tuesday & Thursday), it really doesn't make sense. Taking IS courses or language courses seems to be out the window due to them all being on the same days, same with IAT. Not only that but I’m only registered in 3 courses, and I need to take 5.

I would appreciate if SFU could open more sections for these demanded courses.

all students have this problem . It think its time to transfer to UBC

The courses that I currently need to complete my Post Bacc in Special Ed are not at convenient times or are full.

BUS320 should increase capacity per course I have waited for 3 terms but my enrollment time was not early enough for me to be registered in

340 is required for all Kinesiology majors.

WHY WON'T IT LET ME REGISTER? I DON'T UNDERSTAND. IT'S MAKING IT VERY HARD FOR ME TO GET WHAT I NEED.

The courses that I wanted to take had lectures on the same days and time.

I just wish one semester I could be able to get all the classes that I desire

i have courses that end up at 9:30 at night i was wondering if there was anyway you could help me change around my schedule i’m willing to take summer courses

Wish there were more seats available; especially for English 199-this course fills up really quickly!

There should be more class space available for bus 400 level courses. I just can't get into any of them because they are all full!!! This is not fair. How am I supposed to graduate on time if I can't get into the courses I need!!!!!!!!!!
**COMMENTS**

More popular courses sections such as 200 level's Business course are necessary because there are a lot of people who need to take those courses as required lower division course or need to take these courses to meet their requirements to transfer from other programs to Business program. As a business student, I sometimes feel that it is a little bit unfair for us because sometimes we cannot register the business courses we need. In my opinion, some seats of Business courses should be reserved for Faculty of Business.

It is weird how the site opened before 10:30am. I had to change almost all my classes because somehow 250 people managed to get the classes they wanted before the designated time please make sure this does not happen again because it is just not fair if you are abroad and have to wait until 5am to find out that the classes you wanted were already taken.

English 101 was full AND closed before I even began to choose my classes. I have been trying to enroll into this class since the Spring 2009 semester and it is ALWAYS full or closed.

I really really need the first year of English course since I only have 2 courses, and I am now aware that English is also one of the most required courses.

I make a mistake and drop the BISC , but I want to enroll it again , can I ? I want to major in Economics, but the required course BUEC is close, I can't enrol, is there any chance I can enrol in this semester ? thanks.

It doesn't seem fair that people who are taking the course as an elective can get in over people who need the course as a requirement.

conflict with ENSC 100 W

Awful availability!!!

Increase class capacity in Bus 485 please :)

As a fourth-year student who will be graduating in June 2010, this course is necessary for me to complete my requirements in order to graduate. It is critical that more space is open for this course for Humanities students who should have first priority in Humanities courses especially for fourth year Humanities students who wants to graduate on time. I have found that in the past, many of the students in Humanities courses are not Humanities students and it is a shame that Humanities Department do not reserve a number of seats for just Humanities students as other departments do for their students. Otherwise, how are Humanities students supposed to get the required Humanities courses to graduate?

I would have choses this required course over my other required course. I got an A last term in the music composition 1 so why am I not approved to choose it either?

This is the second semester in a row where I have tried to get this course. I need it to move forward with my internal transfer into the Faculty of Science and so this is extremely frustrating.

there was room in the lecture but no room in any of the labs. just a big ? there

Some of the lectures are open, yet ALL tutorials are closed, how is this possible?

Why bother charging me all this money to enroll in SFU if you're not going to let me register until the course is full?

Many courses in the Geography and Biology department often seem to be offers at the same time. While I listed the biology courses as electives, I am required to take upper level science electives and the Biology courses are the most readily available and best suited to my abilities. (There are not a lot of courses that don't require more prerequisites that are not part of my degree program).

There were not enough class. Most of the class that were available got taken away too fast

STOP RESERVING SEATS! Or, only reserve some seats. I have an early enrollment date due to scholarship, and it does me no good if I can't get into a class because all the seats have been reserved

My enrollment date is the 5th day and the waitlist is almost full at this point of time. Is it because my enrollment date is late or the space is so limited?

I've been trying to take 2-3 business courses for over 3 semesters now and haven't been able to get in any of them. Also haven't had any luck getting into any desired English courses that are required.

Very frustrating .. navigation is horrible .. if the course is already full, why bother allowing students to add to the cart?

I think it's ridiculous that 3 of the very few science geography courses overlapped somehow. There are so few upper level science geography courses offered as it is, and usually just once a year; why would they be made to overlap? That's ridiculous. Secondly, if a person has been permitted to take BISC 102 without Biology 12, and has a good GPA (3.6), why would they not then be permitted to take BISC 101, so they can be assured they will graduate on time? I was told I have to wait until registration is over to see if I can get in without the prerequisites, and its likely there wont be any spaces. I need this course to graduate, I plan on graduating next spring, and I don't know if it's going to fit into my schedule for next spring of upper level geography courses that are, again, only offered once a year. But all will be needed to graduate.

</tr>
<tr>
<td>It is an online course with an option to take the exam off campus, but because the time of the exam conflicts with another exam, I cannot take it.</td>
</tr>
<tr>
<td>More classes offered or more spaces in the class, because it's hard to find classes that fits your entire schedule. As well for 1st year students I think for whatever specific program they are in, SFU should put them in a class already so that it wouldn't be so difficult on them and if they wanted to switch into a different class then they can always do that.</td>
</tr>
<tr>
<td>It is unrealistic to not be able to swap an existing course to a waitlisted course, because then the system automatically enrolls you into a waitlisted course thereby increasing your course load. This then forces the student to then have to drop the original course and pay a fee, when really they are keeping the same course load but just wanted to swap. Very frustrating.</td>
</tr>
<tr>
<td>No good courses for the legal studies minor are available.</td>
</tr>
<tr>
<td>I am on the SFU swim team and my registration was accepted late. I tried to book PSYC X99W, CRIM 101 (surrey), and CRIM 103 (downtown), and PSCY 100 (Surrey) but they give a message &quot;Reserved, you do not meet the reserve capacity requirements&quot;... I do not know what this means. I could only get ONE course for the fall 2009 term and no 1xx electives are available for CRIM or PHIL. I managed to get the one POL course I needed for the entire year in the first term, but that's it. please help!!! are there any openings? Can I get on a wait list? I prefer to stay on Bby campus because of the aggressive swim schedule. Any help appreciated, please. If I can't get any courses, I can't swim for Coach Liam and represent SFU swim team and I really want to start SFU this year!</td>
</tr>
</tbody>
</table>
**COMMENTS**

Perhaps more sections for high-demand should be considered for the Fall semester.

Course availability was awful by the time I was able to register for classes. I am a third year student with a good GPA and I do not understand why I had such a bad registration date. It makes me very frustrated that now I have to take classes that I don't want to take because that is all that was left. I am very disappointed.

The requirements for the BUS 251 and ECON 105 courses were unclear, I didn't understand that you had to have taking the q-placement test for these courses before it was too late (on the enrollment date). If you could make this more clear in the class description that would be great.

Can you add another section or more spaces to the Bus315 and Bus316 2010 semester please? There is not enough spaces in the summer 2009 nor in the fall 2009 semester and there has always been so many students on the wait list.

ON RECOMMENDATION FROM MY ACADEMIC ADVISOR I CHECKED THE WEB PAGE THAT RECOMMENDED B-SCI AND Q COURSES FOR ARTS STUDENTS. I NEED TO TAKE A Q AND A B-SCI THIS YEAR AND I CAN BARELY GET INTO ANY OF THESE CLASSES (THE ONES THAT ARE FOR ARTS STUDENTS) BECAUSE THE 100 LEVEL COURSES (THAT I DON'T NEED PREREQUISITES FOR) ARE ALL BOOKED UP!  I WAS ALSO THINKING ABOUT MAJORING IN HISTORY BUT THERE ARE VERY LIMITED COURSES TO CHOOSE FROM BECAUSE OF MY LATE REGISTRATION DATE. I DON'T KNOW WHAT I COULD HAVE DONE DIFFERENTLY BECAUSE MY GPA IS MUCH HIGHER THAN OTHER STUDENTS I KNOW WHO REGISTERED BEFORE ME.  I AM NOT PLEASED THAT I HAVE TO TAKE (AND PAY FOR) OTHER COURSES THAT I DON'T EVEN WANT TO TAKE JUST SO THAT I CAN GET 4 CLASSES FOR THIS SEMESTER AND NOT FALL BEHIND IN CREDITS TOWARDS MY DEGREE.

I think the lab size and space should match the size of the class as well. By that, I meant if the lecture could have 300 students, there should be 300-people lab space for us. Therefore, there will not be a problem for not having enough space for the lab!

It should have more seats and a waiting list!!!

I find it incredible that on average only one or two first-year classes are actually taught by a professor in-classroom. It would help tremendously to have more available 100-level classes that are not distance education.

I find that a lot of criminology classes did not have a wait list for the fall 2009 semester.  Also, I was wondering if one is placed at first, second, or even third position on a waitlist is there any chance to still get into the course? (online course) I noticed the class sizes were very small too for most crim courses

I successfully enrolled in this years ago but had to withdraw and find it confusing that now I don't have the prerequisite.

I don't understand why my enrollment date was so late that all the classes I needed were full. It makes going to school here very frustrating and unenjoyable.

sorry to disturb you again. For the reason that i chose ECON 103 and 105 at the same time, i need to take part in two exams in one afternoon form 12:00 to 18:30 on 09/12/10, it is absolutely hard for me. but I don't want to change my classes, so what can i do now?

if there's still available spaces in the LEC class, TUT should also have space too.

Not satisfied.

I think there should be more spaces available for Distance Education for students that are unable to attend at SFU.  I live in Victoria and am unable to relocate for school.
## GENERAL COMMENTS

Data as of September 13, 2010, end of week 1 of classes

<td>Very poor availability almost always.</td>
</tr>
<tr>
<td>BIGGER CLASSES!!!!! So frustrating when you cannot get into your required classes!</td>
</tr>
<tr>
<td>I always had a late registration date, which’s really annoying when the courses I want is all full when its time for me to add. I hope econ300s can have more slots, or one-two classes. And courses in downtown can have an earlier time, most of the courses in downtown all start at 5.30 and ends late which is not very convenient.</td>
</tr>
<tr>
<td>How do I reserve for class?? My courses are extremely messed up this semester, I tried to find 8 and planned to take 4 of them but I only got into 2 of them...</td>
</tr>
<tr>
<td>It sucks.</td>
</tr>
<tr>
<td>Can you please make more spaces available in Bus 316? I have been trying to get into this course for many semesters now without any success. There seems to always be a high demand for Bus 316. Given the high demand and large number of people on the waitlist each semester, could you please either add another section to the fall 2010 or spring 2011 semester? Thank you.</td>
</tr>
<tr>
<td>I dont understand how for the fall semester only one class of bus 207 is open. I need this elective to be done with my second, because i set some personal targets. But am on waiting list, that is not fair. more business classes should be made available, esp for the fall semester. Because I am an international students and paying lot of money to be in SFU and not to be getting this kind of service of enrollment</td>
</tr>
<tr>
<td>Please arrange a seat for me, I have no other courses left to take. And Econ 302 is also a prerequisite course for my next semester! Thank you!</td>
</tr>
<tr>
<td>my course selection time was july 28 4:30 pm by that time nothing was open out of my 10 choices of course i was going to choose so i ended up picking randoms for now.</td>
</tr>
<tr>
<td>software bug</td>
</tr>
<tr>
<td>I need an explanation as to what prerequisites are necessary. These courses are required and I would like to complete them on schedule. Otherwise, I am happy to have enrolled in the courses that I did enroll in.</td>
</tr>
<tr>
<td>This blows.</td>
</tr>
<tr>
<td>You guys should just add a class since for business 207, there are 2 waitlist of 50 and even more 2nd year who didn't even get in, that is plenty of people will for another class</td>
</tr>
<tr>
<td>I am a second year student in the Health Science department, I need to take these courses in order to take the 200 level health science courses in the following semesters.</td>
</tr>
<tr>
<td>I DECIDED TO ADD KIN 110 BY DISTANCE TO THE LIST IN CASE I DID NOT GET INTO THE LECTURE BECAUSE I WAS ON THE WAIT LIST IN POSITION 50, AND IT DID NOT ALLOW ME TO BE IN BOTH. I THEN RE-ADDED KIN 110 BY LECTURE AND GOT PUT ON THE WAIT LIST IN POSITION 114</td>
</tr>
<tr>
<td>There have to be more sections for classes.</td>
</tr>
<tr>
<td>When is the challenge test for French 212-3? I graduated as a French Immersion Student. Math 157 class is full in Burnaby Campus and in Surrey it clashes with my English. Please help.</td>

<tr>
<td>This is my last semester at SFU and I would have loved to take this course. It would have been beneficial as I am going into criminal law.</td>
</tr>
<tr>
<td>Due to the fact my major is not yet in the Biomedical physiology i was unable to get a single Kin course that worked with my schedual</td>
</tr>
<tr>
<td>The course was 426W NOT 426, but a box came up every time I clicked 426W saying that it was an invalid course number (maybe because of the W?).</td>
</tr>
</tbody>
</table>
I tried to enroll the minute enrollment appointment began, July 23rd, Friday at 6:30. But SA316 was already full and cannot enroll. I'm a second degree student and SA201 was required to enroll other courses I'm interested in taking but it is not offered. Because of these courses I cannot take, I had to take elective classes I'm not interested in studying. I noticed that others had already enrolled in some classes before the enrollment appointment began. Why some people are given priority and some are not? I am an international student and paying large fees and have immigration requirements to maintain status to continue study. I find this very inconsiderate.

There should be spaces left open for first and second year students, for we do not have the variety as the third and fourth year students do. I have had a problem about space opening for four semesters now, and am forced to take two classes distance ed to actually get a course to help with graduating. It is not fair that as a first year I already have to declare my major and minor so early in order to be prioritized. If it wasn't so much work, I would have transferred to UBC.

There was a lot of conflicting courses and not enough available, spread out times. They were all together at the same time usually.

I am position one on the lab wait list, and I am very worried I wont get in. I need to take this course as a pre-req to other courses, and I was on the wait list for the same course last year in the spring semester and never got in. Is there any way I can please still take the course this semester?

I am uncertain why I am listed as not meeting the requisites for this course.

Too many business students with too little class capacity, especially for finance and accounting. Even a finance concentration student with 80 to 90 credit and 3.33+ GPA cannot get the finance courses

I was surprised that some introductory courses like Philosophy and Humanities were closed already.

There needs to be a greater diversity of courses offered. I was only able to enroll in two classes and they filled up before my enrollment date. As well, the system you are using for enrolling is awful. I navigate away from a page and get the following message "this page is no longer available." It is because of this that I am not enrolled in EDUC 220 and now am forced to be #13 on the waitlist.

All of the 400-level finance core courses are in wait list already. These will postpone students' graduation. Please offer new sections if it is possible.

this class is a required class for crim majors/minors to be able to take 200 level classes. Its silly that there are only 120 spots. either add another class or add more spots and TA's.

I have taken hsci130 and bisc101 last year why can I not enroll-I would swap this from course HSCI 140-please advise

on the CODE website it is mentionned that it should be offered every tem by distance education; however, it was not available in summer 2010 and is still not available in fall 2010. This class is a pre-requist for the Post-bac in criminology which is given through distance education. It would be important to update the information of CODE to reflect the real availability of this class, and it would also be important to offer this class periodically as it is an important pre-requist for the post-bac. The knowledge acquired from this class is needed to complete the further classes. Even if in my case, the pre-requist pas waved until it becomes available, I am penalized since I lack the knowledge from that class. Thank you for considering my comment

08 :30 classes are too early. Thanks

The lecture was at an appropriate time but the only tutorial which I can attend was full.

I think it is unfair that despite getting straight A's I had to wait until near the end to select courses. For students that transfer to SFU it is sometimes difficult when core classes don't transfer (for me, first year Biology) and it is impossible to take it later on because first years have priority.

Dear Teacher, I really need this course to be done before finishing my 70 credits! I am very appreciate for your helps and please help me!

Could you offer classes for IS majors more often? I know it's one of the faster-growing schools at SFU, and I just don't understand why I have such a hard time finding classes that will work towards my degree (distance ed doesn't count).

If I could change my tutorial class for CRIM 135 then I wouldn't have a difference of 10 inutes to go from surrey to burnaby

When I found out my registration date, I went to student services and was told that there would still likely be room in the Bby course of 323 by this wk. But there is not. Last wk lots of room. Also, Kin 140 is one of the few Sci-Bre courses offered for my grad requirem. Will try to find another Sci-Bre offered.
On my application I said that I would like to take courses in CMNS only and it was never explained that they may not be available to me and that they were reserved. It was also never communicated that I would have to ask the dept. for enrollment permission for a first year level class.

I plan to be a comm major, and couldnt get in for some reason. It was reserved. But i'm a second year and need this class to continue towards my degree. REALLY IMPORTANT.

I am trying to enroll in BISC 202: Genetics but have been placed on a very extensive waiting list.

Please at least increase numbers of student in each Econ course. Bussiness faculty’s classes have much larger student number capacity than Econ classes.

Terrible course availability for upper-level marketing classes. 35 spots? Really?

the PSYC 385 course that was full when I tried to register was Evolutionary Psychology not Animal Behaviour. That being said I would LOVE to take an Animal Behaviour class but it wasn't offered this term either.

Needs more classes and spaces for business courses.

I have been trying to get this course ever since I came to SFU, until now it's always full even when I'm on time for my class enrollment dates! I really need to take it as it is a requirement for my future, please.

I have to say it is a terrible enrollment exprience for me this semester. I am a sophomore major in econ, but I fail to get any 200 level econ courses!!!!! Why not make econ courses reserved like IAT or POL.

All the classes I have chosen are not my first, second, or third choices, all the classes I had wanted are full or have the same error message saying that seats are reserved. Without these classes there is not much else I can do since these are prerequisites for my next classes. Maybe an earlier enrollment date would have helped. =)

I need to take this course online because I am a full-time working mother who cannot attend classes.

I am taking it at the harbour center campus but it is incredibly inconvient. The course was long full and waitlist full a week before my registration date. It feels very unfair as I am a math major and I need the course.

HAVE MORE SECTIONS IN COURSES THAT OFFER DISTANCE EDUCATION AS AN OPTION

Seems odd that a third year Health Sciences major with good grades is unable to register for any of his 300 level HSci courses he needs.

Not enough space in Labs, the Labs only offer half the space as the Lecture. 50 Spots for a required course just doesn't make any sense. FIX IT.

I believe no language final exam should clash with IS 101 final exam, as languages and international studies are subjects which complement one another.

It has been very difficult for me to take classes the past two semesters that I actually need. I am trying to figure out a major and get started with some classes in particular areas and am not able to get in. I have had a very late enrollment date the last two semesters and it has been extremely frustrating having to take classes that will do nothing for me and my degree.

I am a new student to SFU and I am changing my program from Biological Sciences into Criminology but all of the criminology classes were full or at an undesired campus. I also found that there was a lot of time conflicts with other classes I wanted to take and there was no time available that would fit into my schedule.

Why the reserved seats? Are those students more favoured than others?

How can BUEC 232 be so available but not BUEC 333!? It's just as important.

THERE SHOULD BE MORE SECTION FOR THIS COURSE SINCE THERE IS A HIGH DEMAND FOR IT

Most of the IAT courses are closed by the time their reserves lifted on July 31, so people like me who are trying to enter the program have little to no chance of even getting into the program, and even if we eventually get in to siat, we will be far behind the other students. I think this system could be improved (maybe lifting the reserves earlier for students who are trying to enter the program?)

2nd semester I've tried to get these courses to no avail, waitlisted on both registrations.

I have been going to SFU for 20 years, have well over 200 credits, and a current CGPA of 3.67; yet, somehow I have difficulty getting into the courses that I want/need. This is incredibly frustrating.

Allow more students into the tutorials, or add more tutorials. This is an upper level writing course required that is very difficult to get into with a late registration date.

I am an alumni student wanting to pursue my PDP. This class is required in order to do so.
COMMENTS

I received the information that I had achieved the AP credits for PSYC 100 and 101 too late, but immediately sent this credit transcript to SFU. I am now waiting for SFU to receive this info, so I can declare I have earned the prerequisites for PSYC 221. Until then, I am still enrolled in PSYC 100.

Indicating the number of seats left would be a big help.

Was planning on taking 9 credits and working part time at my fulltime job with the Burnaby school district but could not coordinate labs and tutorials and classes. Too bad. I love going to school at SFU. But if I am going to cut my pay in half for me and my two kids, I need to maximize the credits. More evening courses would be fantastic for single parents like me. I could qualify for the PDP within the year if I had access to these courses in the evenings. I am already shifting my schedule for the one course I have enrolled in. Also, surrey is not a real option as it is to far for me to get my kids in time from daycare. Having them in vancouver would work too close to skytrain access a must too.

registration at sfu is a joke, from the website format to class availability. I would love to type out what classes I did not get into but i am too busy trying to find other classes to take. should have more space. im in arts and social science faculty but i cant even take econ courses. it's all full. thanks.

For the Math course, I do meet the requirements: I just completed Math 12 with an A. Without the math course, I cannot take my Physics course. As for Biology, I cannot see any time interferences, although I get an error message.

It appear as though students registered in the Post-Bac Dip program requires authorization from various faculties to register in each and every single upper-level course despite meeting (or exceeding) the minimum academic requirement and seats are 'open' - this creates a significant disadvantage to those trying to finish the program within the specified time frame.

Don't have the two biggest courses for first years at the same time, and force the student to take distance education as an alternative. Please have a secondary lecture, or schedule them differently.

I have logged in at exactly when my enrollment time opened and ECON 210 was already full. I find this ridiculous as i am planning to major in economic and i am losing a semester already because i cannot take the classes i need. I fail to see why i don't qualify to take BUEC 232 because i have already taken MATH 157 in Fraser International College(FIC) and passed it, maybe the SFU computer system does not have my older records from FIC. Please kindly consider.

It said didn't meat prerequisites yet I the description says no requirements. Its a TechOne Core Class and I am in the TechOne program.
Pleas add more room for the BUEC 232 course!

courses are taken too fast, very hard to get in

If possible, I would like to study the two above in place for COURSE NUMBER 103 (Intro to microeconomics).

my enrollment date seems to be so late that when i want to enroll for courses im either not able to get the class because they are full or im on a waiting list.

For the FPA courses, i would suggest that if they have certain courses that students need to take for their program, that these courses are not scattered throughout the week at one campus because not all students have the advantage of being able to drive from one campus to the other in an hour.

I was frusterated that KIN 143 showed that there were open classes however when I went to register I was unable to do so. I was aware that seats were held for KIN major students however it would have been nice to know exactly how many seats were held for the major students. That way I would have known how many seats were actually open to everyone instead of not knowing at all.

My enrollment date is always placed at nearly the end of the enrollment. Could you guys at least tell me why????

Did not get the tutorial I wanted. I need one directly after lecture.

Need more classes for Biology courses as I was not able to get into ANY BISC class due to a late enrollment date.

COURSES NEED MORE AVAILABILITY AND IMPORTANT ELECTIVES SHOULD NOT BE SCHEDULED AT THE SAME TIME SLOTS AS VITAL SCIENCE COURSES!

Being one of the students that do not get to register for courses until well on into the registration period, I often am left scrambling several times to try and rework my schedule to suit the available courses. This sometimes results in erratic schedules or (in my opinion) overly dense course loads. However, I understand that course availability is based on professor availability and past demand for the course, however I think that the priority system could be more effective by offering priority to students that require the course over students that wish to take it as an elective, based also on intended major, not just declared major.

COMMENTS

After being enrolled in the subject, I had dropped the class. and now when I try to enrol myself again it says I don't have the pre requisites.

By the time my registration date and time came, the courses I was most interested in and needed were already full.

more sections please.

There needs to be less conflicting times between core courses that the school KNOWS a big group of people need to take (e.g. Bus 207 and Bus 232). Also, there needs to be better tutorial times. Popular elective classes need more classes.

IS 101 at the burnaby campus on tuesday at 2:30-4:20 pm was available athe night prior to my appointment and the following day, said it was closed. I revied the class closed, but the availability still had 88 seats so this confused me. I was wondering why this course would be closed if there are seats left, which forces me to rearrange my entire schedule so I can go take this class at Surrey. It is imperative that I take this class as I cannot get into any other classes within this area until I have completed IS 101.

could you add a waitlist for business courses?

The fact that COGS 310 was placed at a terrible time slot in the morning when all of the other science courses run, destroyed my chance to do these courses.

I have been waiting to enroll in JAPN 100 for three semesters, now the fourth. I really hope that I can get it next term.

If I registered at TRU-OL I could take all the above courses without delay except that I am not able to transfer any further credits to SFU. If distance courses are going to be offered and an enrollment date is the criteria, why are the courses full. I am unable to register for any courses this term.

still want to be put in this class

I have the pre-requisites for Phys332 but it won't let me in. Also you should change ENSC 201 or Phys 332 so they do not conflict. Thankyou.

Discouraging that the courses I really need and wanted were all full by the time my enrollment date came up.

The system will not let me enroll because of an exam conflict

I think if there is a waiting list of 30+ in each class that might be a sign that you need to offer more class spots, especially seeing it is a distance ed course. Maybe another class? Can't be that hard to hire more TA's to do the marking and get another classroom for the exam. If the demand is there, which it obviously is, you should supply!

Yes, always hard to get into above courses because of very limited spaces and time available.

I am a second degree student who wish to take accounting in SFU. Could you add more seats on BUS class because I can not register any of them. Thank you so much!

I only need one more English 4th year class and I think it is ridiculous that there are NO classes available at the time of my registration even though it is my declared major. Also, I have no idea why the system is not letting me register for HIST 339... it is a distance class!

There were quite a few of the courses that I would have liked to enroll in for my breadth requirements that were not offered for some reason. Also, many of the crim classes that I need to take are always full before my enrollment date, making it impossible to get into the classes that I need. Because of this, I had to take courses over the summer otherwise I could not continue to take courses that were relevant to my anticipated crim degree. I have commented on this several times, however the situation never improves. Speaking with other crim students, I have found that they all have similar complaints. Not enough crim classes are being offered to accommodate the large number of crim students. I should not have to put my degree on hold just because I can't get into one or two courses that are prerequisites for just about every other crim course that I need to take. This is extremely frustrating and stressful and really gives the impression that SFU isn't aware of the problems that students are facing, despite the multiple complaints.

class # 10604 (ensc 182 D400) is missing), can only sign in D401 and D300.

I could not get in to the wait list. is it because the class is closed? also, I have taken Physics 12.

I would love for more courses, especially Criminology, to be available at Surrey Campus.

I asked an online advisor why I wasn't able to enroll and they said there were restrictions placed on those courses and that I would have to talk to the professors to enroll. The information on the course, such as the outline, said nothing of restrictions being placed on the course.

In general, there are a lot of courses that I was interested in, but no seats were available for that course. The three courses that I'm enrolled in, two I got in after waitlist, and for ENGL 102W, I only got a spot out of luck. It's very hard to pick courses that I want, because a lot of want and want and need would be full.
COMMENTS

Is there any program in place that allows students who aren’t able to get in their required classes one semester, to have priority the next semester? If not, then I think that would be very helpful in helping students get the credits required.

Extremely difficult to find any classes of interest that actually had availability.

English classes should have waiting lists!

I have been unable to get into these two courses since my first semester at SFU, and as a result I have had to "settle" for a lot of other courses simply to take up credits. These classes are the first to fill up and they fill up extremely fast, especially since their class sizes are relatively small in comparison to biology courses etc. It is very frustrating for students trying to fulfill degree requirements in a timely manner!

There’s not enough space in these classes and now I am taking courses that are useless to my degree

Due to lack of computer access, I was late in registering for my courses. I am willing to take a regular Bachelors in oppose to Explorations - if it means I can be accepted into my required classes.

I have been accepted into the PLP program with a start date of January and had hoped to take some courses to help me work towards Educ as a second degree. I see that not being a stated education student has negatively effected my ability to move forward successfully with courses at this time.

Should have more lecture times. Just one makes it difficult for students to have all courses needed,

Yes, If one is #5 on the wait list, what are the chances of getting into that class??
all econ classes are full too soon each sem which means there is alot of students and not enough seats for each of us to commit or requirement for grad

Math 100 is only offered once a semester at a very early time for many students. I have to pay for my school and my job is in the morning, therefore i can't progress with my math because i dont have time for the courses.

I'm a Health Science major and would like these classes.

I am in position 115 and position 110 for these courses. If there are this many students who would like to take these courses, more than one of each should be offered.

I was very upset with the course availability. Last year, my first year at SFU, I was able to enroll in every first choice course. With one exception of not being aware of the 30 unit requirement for the HUM 204 course, I was unable to enroll in all of my first choice courses this year due to all sections being full. I understand that second year is difficult to accommodate especially when one doesn't have a scholarship priority enrollment date, but myself and many other second year SFU undergraduate students had a great deal of trouble and frustration with enrollment this time around.

I really need an Econ upper division course....any one of them or others

ADD MORE DISTANCE CLASSES!!

The wait-list was only for five extra people, which didn't seem like enough. Furthermore, I think there should be priority for students who are just finishing the SPAN 102 to get into SPAN 201, and so on and so forth.

Constant conflicts, doesn't make it easy to take WQB requirements. Why yes, WQB was a stupid idea, seeing as it takes away from potential classes I could be attending that actually have to do with my major of the 120 credits required to graduate.

I completely understand having seats reserved for students majoring/minoring in a particular faculty. However, it is difficult for students in the arts programs to meet their science requirements when so many seats are reserved.

The restrictions placed on courses are fine, but the HSCI faculty's inability to meet the needs of students with commitments (work etc) in declaring to allow the student to meet the criteria has made getting this course impossible.

There seems to be very few B-Sci courses for Art students that are available. Not only for this term but in the burnaby campus.

It felt demoralizing to be a declared Health Science student and have all upper division HSCI courses full. I am grateful to my counselors for attempting to add more seats to the 319w. Hopefully I will be able to get in tomorrow.

I took Math 12 in the Summer of 2009 to improve my school mark and I fulfill the requirements to take Math 157 but I'm pretty sure the university only has my first mark that shows I don't fulfill this requirement, I need this changed ASAP!

I think there are not enough seats for students who want to attend in 157 course. I add my classes just one day after the enrollment appointment begins, but there's no seat for me in 157 already.

I dropped this course and was unable to sign up for it again since the system things it was a duplicate.

ENGL105 indicated that it was open, but I was not able to register in course, it said it was full after attempt.

Waitlist is too small.

I am a BBA student; My enrollment date is July.23. When I registered the course, there was no seats available in any section. I do not know why...Many students might just hold for their friends...Could you give me a favor?! Thanks a lot!

It was open during my course registration and I signed up for it along with CHEM 122, and I came back to the SIS website to check for other classes and realized I was not enrolled in CHEM 126 anymore for some reason, so I went back to take the class and there was a waitlist.

The majority of the electives I wanted to take had a conflict with the time of my required courses

The course is already full on July 20th! And there's no wait list!

Yes, I want to obtain a bachelors degree in Fine Arts Music composition. I was told Issues in fine and performance arts is necessary. There is only one scheduled lecture time for Issues in Fine Performances (FPA 111) and it conflicts with Fan X99 thus creating a 5 hour gap between the courses and a commute from Vancouver to Burnaby and back. For my life it would be greatly beneficial to take the Fan X99 at woodwards because then I could avoid such a mixed up schedule. Also, the Fundamentals of music course corresponds poorly as a third course on this same day as Fan X99 and FPA 111 because it would cause myself 2 commutes from Vancouver to Burnaby, so I had to swap it and take the distance education version of the course, which is less desired than the actual course. I really want to be able to take every music course possible to make me accepted into the contemporary arts for music.
COMMENTS

Upper division courses are extremely limited. Many require lower division pre-requisites that are not offered by distance ed. Much more variety is required. Distance education course development should be a priority. More offerings as well as more subjects should be provided.

Most of the courses that I need this semester are offered from 12.30 to 1.30 MWF at Burnaby campus.

There aren't enough available biology courses in general. I understand it is a popular subject, so more classes and more times would be an improvement. And, if CHEM 230 is offered, the optional lab component CHEM 236 (necessary for some chemistry streams) should always be offered the same semester as well!

There needs to be more spots available for 2nd year students, or some leeway for students also working jobs while studying. With the late enrollment dates and a full time work schedule it is incredibly hard to get the classes you need/want

I don't know why I cannot be enrolled in BUS274.

Every single one of the courses I'm required to take this Fall are full. I can't believe that SFU wouldn't have other options for students. It's not like I can't get into 1 course I need, it's ALL of them. Guess I'm not going to school this year, better luck next year? Or maybe better luck at a different school?

The reason I can't take these classes is that they conflict with Kwantlen's first ever offering of Archaeological Theory, which will run Wednesdays from 10am-1pm.

Only 1 wait space in desired lab for CMPT 225. IAT space reserved for now. will try to go on wait list.

the SIS updates soooooo slow~!! I dropped one courses. And I want to re-add it. It take sooooo long time to waite. Always says the courses is duplicated. But i already dropped it first

Because of my enrollment date I end up having to be on multiple wait lists. It gets really frustrating when I try and get on another wait list and the system won't let me because there is a maximum number of classes that I can be wait listed for. I don't want to go browsing for random open classes to take just because I can't be on another wait list. I am paying a lot of money to come to this school and I am frustrated with the extreme lack of choice I get when enrolling in classes. This is a huge disappointment for me, and it would be nice to see a change in class availability.

I want to be in

There needs to be more course sections offered within each course. One is not enough due to the amount of students. It is very frustrating not being able to register for ANY course desired due to limited capacity and the lack of sections available. Are there not enough teachers to teach? or maybe the admission of students should be reconsidered and not admit so many new students. The problem right now is that there are too many students, too little course sections available.

The Econ department needs more sections for manditory classes.

A waitlist that big is rediculous

I cannot believe that this course is completely full only an hour after my enrollment appointment has began, a little unfair at the least. Another lecture NEEDS to be opened.

I was trying to sign up for the Distance Ed option, but it kept telling me there was a time conflict. Bizarre!

Available lectures are still reserved during open enrollment.

More space is needed for HR and Finance courses! Everytime I try to register for them, they are always full!!!!!!

Something must be done!!!!!!!!! very disappointed with my late enrollment date for the past 4 semesters

My enrollment date was very late and I was not able to take the courses I need.

we need more classes for required Business courses and courses to be offered in the evening for students who work part-time or full-time

I believe the courses must be available to the students who would like to major in that area. 4th or 3rd year students who has early registration date enroll the classes as electives, so there are no spots available who really needs the course to major.

why did i get my enrollment date so late the physics 120 class is already full and i am number 33 on the waiting list and its a must have for me.

english 199 has way too many distance ed selections not enough in class selections and it fills up fast because class sizes are small

Just the tutorial time of the English course I wanted is in conflict with another course

not enough upper division ws courses offered!!
### COMMENTS

**Do u recommend me remain on the waiting list for my chem 121-4 class scheduled M W F 10:30-11:20 and Tutorial Tuesday 9:30-10:20 and Lab Wednesday 13:30-17:20?** I really need this class and cant make any other times. is it a risk that I should take to remain on the waiting list?

It took a lot of effort to get cleared at work for Phil 210. They are both required, but I could only take one. I chose Phil 210 because it is a pre-requisite for more courses than what 201 is. Now I will have to wait a full year to take 201. I have noticed that the courses that cater to working students seem to be for a limited number of subjects.

It hard to register with tutorials being in afternoon more moring ones

**YOU NEED TO UPDATE YOUR SYSTEM WHEN IT COMES TO PRE-REQS BECAUSE THEY ARE NOT ACCURATE.**

I really need to take BUS 316 in order to graduate after Spring2011. Since this course is a prerequisite for all the 400+ level courses for my finance concentration, if I cannot take this course in Fall, I won't be able to take any 400+ level course in Spring. Therefore, all my 400+ level courses will be delayed for one semester. BUS 316 is a required course, so I have no other options...I think the number of seats should increase so that finance students won't be unable to graduate or the lack of seat available in a required course. thanks.

Kind of impossible when your selection time is on the very last day... 28th of July...

I am going into my second half of 2nd year and have prerequisites for 3rd year classes which I need to take to obtain my degree and I couldn't get into ANY of them.

Needs ALOT more.

I am a physically disabled student, I was admitted a little bit later but all of the classes that I have to take are full and there is no waiting list for them, everything is already much harder for me because of my condition I had to pass so many obstacles to get here and now that I had all my hopes up for coming to SFU and enrolling in a great program and courses, i see that there is no room for me and nobody makes it easier for me and all my hopes are crashed and of course things are even harder for me than other students, a little bit more attention to disabled students would be much appreciate it, and I Konw I should registrare for classes early but what can I do there were just too many problems in my way.

I find it very unfair that I am having trouble completing my major because I can't get into classes that I need. Because I was given such a late sign up date, there was no way for me to get into an important CMNS class that I need for my approaching Co-op term. The class only has room for 30-40 people, so there is no way that a student with a July 28th enrollment date such as I had could possibly gain admittance.

Upper division Political Science courses ought to be scheduled so that it is possible to take two or even three on the same two or three days at one campus, in a number of groups. This way, there would be cohorts of students taking the same classes on the same days at the same campuses, but would avoid the ridiculous arrangement of tackling tutorials onto days that have no other relevant lectures available. Attempting to take even as few as two courses in political science and have a viable work week is nearly impossible without resorting to distance education classes, which are considerably worse in engendering a positive learning environment, and an all around horrible experience despite the best efforts of the fine staff at this university.

The error messages I have recieved about courses being full seem to be incorrect, as everywhere else on the website indicates there is plenty of room left.

Please incream the size of the class.

I read on the Faculty of Arts & Social Sciences that this particular course was available provided that the student had 60 units to date. I meet this requirement and still was not able to add the course. Is there a problem?

in required courses, the lecture was available, but tutorial was not...FIX THIS!!!! Not acceptable when trying to meet faculty requirements especially if you are not going to allow me to enrol in courses outside my faculty.

Chokepoint courses such as cmpt 225 and math 240 needs to be offered more consistently. I can't bloodyadvance until I take these courses, and can't do co-op until I do the courses that require these as pre-requisites. Please don't leave me hanging next term.

HSCI courses for the 300 levels are too small. It is impossible to register for them if you do not have priority registration. They are all required courses for HSCI majors and the availability makes me believe graduating on time will be impossible. Also, not providing enough tutorial numbers for the number of seats available in lectures creates waitlists for students unnecessarily who need the course and also need the few chances they have at waitlists for classes that are actually full.

Physics 125/126 is an important pathway for theoretical physics and mathematics students to take higher-level courses.

I am a student major in Economics, however, I cannot enroll in any economics classes I need for my degree as they are all full.
**COMMENTS**

Somebody took too many seats.

I wanted to add a course at the Surrey campus which had 67 seats available (LING 110), but I could not register for it because it kept telling me it was full and there were no seats available and the wait-list was full.

I have a phone call in to the Business advisor to discuss classes.

Honestly, it's not fair that non Crim major students (ex. Business and Science kids) get priority in choosing Crim classes when Crim majors can't. Why can't SFU reserve certain spots for Crim students only? Kin classes are reserved for Kin students, why not Crimology?

This course is very important to me. I can not select any required courses for Fall term. And all I need is one more ECON 200 level class to complete my lower division. I do not want to wait for another term to go to the upper division. Thank you so much.

I have passed the requirements for this course, but unfortunately it doesn't allow me to take this course.

My enrollment date was at 6:30 pm, July, 27th. When I was able to select my courses for Fall term, most of courses were full, and I am not able to choose them. Right now, I only have two courses, and there are no other options for me choose(all I want are full). The most important thing is that I have done most of lower division course of business faculty's requirement. But there are only three courses left, but I am not able to choose them. I do not want waste my time on taking those courses which are not useful or meaningful for me, it takes time and money. Hope you could understand my problems!! I really wanna take two more courses for Fall 2010.

BISC101 - for 2 semesters in a row I have tried to get into this course and each time there is no space left. I am increasingly frustrated in that it seems all 1st year students have an earlier registration time than I do, and I am currently working on a second degree - I have already a previous degree in Business Administration from SFU, with over 200 credits already, and yet my registration time is currently lagging first year students?? Why is this. Does the fact that I have previously earned a degree at SFU not give me any priority for registration than first year students, not to mention the fact that I have spent over $35,000 dollars with SFU over my academic career - sorry - but increasingly frustrated - maybe I should switch institutions where there is a better chance of not only getting the courses I need, but they might actually recognize seniority privileges, and respect some level of expenditures made. ECON 355 W - again due to my registration date which is very late with respect to my seniority, I have been blocked out of registering because the course was full by the time my registration date rolled around - who do I have to appeal to at SFU, or which department to rectify this inequality that I perceive.?? I am currently looking at switching institutions - I expect to probably spend another $20,000 at least in pursuing my education goals, perhaps their are other institutions that wont block this goal as SFU is currently doing to me through incompetent registration timetable allocations.

WE NEED TO OPEN MORE SPACES!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

I think it is unreasonable for a course like HIST 101 that is only offered in the fall term to only have one section. Due to my enrollment date being so late, HIST 101 was full by the time I could enroll and it is not offered next term.

Course availability this semester is rediculous. I'm forced to take electives that are not wanted or needed. More sections must be offered. All of these classes that I did not get into are REQUIRED and all were full before my registration date. I tried to get into 4 other required classes as well but they were also completely full. I am forced to take unwanted classes, which sets me behind in my major.

Generally satisified with course selections, though I hope I will still be able to take the courses I want in second term. And English 101 should have a wait list.

Please advise which course should be taken in place of introduction to computing science and programming for engineers for the mechatronics systems engineering program.

All the class that I wanted are all in wait list, what should I do?

It's rather inconvenient that this course is offered in class only once a year, given that it is a required course for two programs.

Tutorials are all full with people waiting but there are no other tutorials available for students to enter making it difficult to get into the class.

I wanted to take the night courses offered at harbour center but I am not an SFU NOW student so I couldn't sign up yet. I am a night person and cannot wake up early in the morning for health reasons and I was upset when I understood I have to wait until Aug. 7 to see if I can get into these courses. I feel strongly full time students should also have a chance at night classes as well.

</table>

**COULD YOU PLEASE ADD MORE SECTIONS OF BUS 315&316 FOR FALL!!!**
COMMENTS

I hate how there isn't any courses available by the time I choose courses.

I think more tutorial times should be available, in order to be matched with the seats open in lecture halls. We need a fair number so everyone gets a chance to take courses they have interest in.

I am a BOT student. There are a few courses I could pick but all full at the very beginning of my enrollment date. I’ve been checking around these days but still get nothing. I am worry about my FALL semester.

Is there any possibility that another Open Lab for Math 157 would be created?

Need courses on or after 4:30 PM

SFU should offer more sessions for each courses, especially for BUS courses. For example, the supply of available seats in finance courses are way less than the demand. And also, most Business courses have time conflict with non-business courses.

I have graduated with french Immersion but the warning says that I have not met the prerequisites For a 4th year to not be able to enroll in a 100 level course because it’s mostly reserved is unfair. As is not being able to be waitlisted while waiting for department approval for a preq to be waived.

MY PRIORITY IS ENGL 101 AT BURNABY CAMPUS, BUT APPARENTLY AT THE TIME OF MY APPOINTMENT IT IS OFFERED AT SURRY ONLY. THE PROBLEM IS, ALTHOUGH IT’S MARKED WITH GREEN CIRCLE, I'M NOT ALLOWED TO ENROLL AND IT SENDS AN ERROR MESSAGE SAYING "AVAILABLE SPACES FOR RESERVED STUDENTS, YOU ARE NOT ELIGIBLE". WOULD YOU PLEASE LET ME KNOW WHAT TO DO?

THERE IS NEVER ANY SPACE IN THESE CLASSES!!!! MAKE MORE CLASSES

I'm just confused as to why SFU offers a degree program online but then doesn't offer some of the same classes or not enough seats for those of us who are enrolled through distance Education. Its frustrating because I'd like to finish my degree in a proper time line but was only able to enroll into one class this semester. I’m not sure how this can be remedied but it needs to be looked at.

Not enough options for scheduling. I simply cannot take a number of classes due to the fact that a tutorial is in the way!

I want to know how to fix this issue.

With my placement test I skipped the 100 and 200 level course. I'm now in my last year doing a french major and could not register for a certain 300 level course (yet I could for 400 level). By the time I got it all sorted and got the permission (I did not have 200 level prerequisites), the course was full and I was stuck taking a course I did not want with a professor I had already had 3 different times. This was frustrating because I couldn't get into a course and it wasn't my fault. If my account had been cleared prior (at the time of a placement test for instance), I would have been enrolled and happy about it.

I am taking the prerequisites during this term Summer 2010.

could have more sections and spots

When a course is reserved for people it should say so we don't completely base our schedules around courses only to find that they are unavailable. I am a history program student and these courses were vital this semester for completing my first year.

The severely limited class openings for popular courses is what makes course selection a disappointing experience. This is also the 3rd consecutive time I pick near to last for courses.

Could only get into the distance education course for CRIM135. Could also not take 5 classes because the of upper division history courses that I wanted were full, only offered by distance or were not offered this semester.

Please Help

It's pretty limiting. The latter half of my degree has mostly been spent compromising my interests for "required" courses that are neither interesting nor informative, nor even well designed or delivered. If one hasn't learned to write an academic paper by 3rd or 4th year, then maybe the course offered should actually be compelling enough to make students want to take it. Yes, I'm talking about Linguistics 301W, the worst, most boring course I've ever taken. And it seems the only alternative to that is Linguistics 309W, which was not much better. Please design a writing course that actually makes students excited about writing, rather than fearful for their GPA. I'm tired of wasting my life producing drivel so that the system can check off another box. I came to university to learn and explore and grow as a person, not spend hours writing papers on topics I don't care about. I want courses that encourage me to think and challenge my viewpoints and beliefs. I want courses that inspire me to learn, not force me to spend hours reading textbooks and papers just to vomit it back up on the exam, having gained nothing. In short, I'll be glad to graduate, if I can ever get the courses I need to finish.
I was accepted late into SFU, making me unable to get all the classes i would like to have. I am not able to get into an English class. Assistance would be appreciated.

Can I have my enrollment date earlier ??? Mine is always at the end and late. Therefore, I was not able to take courses what i should and want to take. Why are there so many restrictions or priorities in the so many courses?? Because of that some people like me has to wait to take courses until the restriction or priority time is over.

In the summer semester Bio 101 had not enough tutorials and labs for the amount of people in the lecture so I was forced to try to enroll in fall semester and the course is full. This course along with crim 101 and psyc 100 seem to be a requirement for the majority of the student body and therefore there should be more lectures and tutorials available.

Not enough course availability for suggested WQB electives and major requirements. Need more lectures at different times and campuses so students do not have to get behind in their studies due to inability to enroll in important required courses.

Argh. Course selection for second year students in intensive multi-component academic plans is very difficult.

MBB 231 is currently required as part of the Environmental Sciences major program, but the prerequisite for it, MBB 222, is not. Completing the non-required prerequisites for the required courses would add a significant amount of time to the length of the degree.

I had lots of difficulty obtaining the necessary courses for my program. Even though my CGPA was 3.57 last semester, my enrolment date was so late that almost all of my required courses were full. The classes that I am now taking do not adequately fulfill the needs of my program and as a result it may take a longer period of time for me to graduate.

I'm a second-degree student. I understand that my enrollment appointment date is later than normal freshmen, but I can not understand why I am facing the dilemma where almost no course that I need to enroll is available. I planned to take four courses in my first term, but only succeeded enrolling ONE. I hope you could help me with this situation.

There should be more classes available seeing as how it is such a popular course. Also, the class should not be shown as "open" when the "available" seats are already reserved.

Most anthropology and archaeology course times overlap. This is very inconvenient for archaeology and anthropology students as most majors and minors are looking to take more than one ARCH or SA course at a time.

Most courses are too full even weeks before end of registration.

available tutorials not easily synchronized with my work schedule (ie often held on days opposite of lecture, and impedes my work schedule to have to come up for a one hour tutorial).

CMPT120: Prerequisite is MATH12 *recommended*. MACM101: Prerequisite is MATH12. If I'm able to enroll in CMPT120, why I couldn't with MACM101? is it because CMPT120 is "recommended"?

there is no space left for me to enroll any courses of i listed. these courses are the basic courses for me to start the 300lvi of econ, so i really need to get one or two of these courses.

All classes are full

I think it is really inconvenient you find out that remaining seats are reserved at the very last step of the course selection process.

This course is very important for me so that I can enter other certain courses. I hope I can get a place next term! please do try to consider it.
I think it is annoying that I am a 4th year undergraduate student and I STILL got a lousy enrollment date. When I first came to SFU they told me that 1st years get the best date, in 2nd and 3rd year it decreases, and then in 4th year it gets better again. By the time my enrollment date came, 99% of the 400 level English courses were closed with no wait list. Because these courses have a high demand, small class sizes, and often several pre-requisites, I think they should all have wait lists in order to make enrollment easier for students who are trying to graduate on time (ie. in 4 years, like me). I was lucky to get into 427W, but even that class was filling up fast and only had a few spots left by the time my enrollment date came around. If I hadn't gotten into that class, I would have had to request a pre-requisite waiver for Engl 465W and even with the prof's permission, I wouldn't have been allowed to enroll into the course until the second week of classes (if there was space). I am doing a minor in Publishing and I have found that Communications courses are just as competitive and hard to get into. However, they HAVE wait lists so it makes the whole situation a lot less stressful. I have complained about this before and nothing was done, but I definitely think that the English department needs to get on board with this and start providing wait lists for their courses. If anything, it will help decrease the amount of students who end up coming to ask the English advisor for help with enrollment during the first week of school. In the end, it would be a win-win situation for everyone.

Why are the courses I need NEVER available, and why do mandatory tutorials have to exist? I had to change my lab time in one class just so the system wouldn't refuse to let me enroll in a different one due to the lab and tutorial conflicting. Why does it matter when my tutorial is enrollment system? I'M NOT GOING TO ATTEND IT ANYWAY, SO THE TIME IT TAKES PLACE IS IRRELEVANT.

Many courses only available in one semester made enrolling in courses more difficult.

These courses are all distance studies courses and the one or two extra students should not make that much of a difference to the quality of delivery.

I am a student working to achieve a Bachelor of Arts in Criminology. This is my first semester and, so far, I am unable to enroll in any CRIM classes. I have funding and I don't know how that funding will be effected if I am unsuccessful in enrolling in a CRIM class. There are available seats in the Surrey campus but I have residence at Burnaby. I don't mind commuting but the seats aren't open to Burnaby students and I'm hoping that the classes don't fill up before I have a chance to reserve a seat. The closed courses at the Burnaby classes don't even have wait lists so I am unable to reserve the first available seat. This is very frustrating because my funding maybe effected.

I need this class but I also need the class which conflicts with it. They are both requirements for my credential and I don't wanna wait for another 1 or 2 semesters before it is being offered again. I don't need any more delay in my graduation!

I am a student working to achieve a Bachelor of Arts in Criminology. This is my first semester and, so far, I am unable to enroll in any CRIM classes. The closed courses at the Burnaby classes don't even have wait lists so I am unable to reserve the first available seat. This is very frustrating because my funding maybe effected.

I have a huge problem with this class being offered because it has officially become a hinderance to my graduation time frame.

BUS 421 is my required course however I can not choose it as it is full.

There seems to be this problem every semester. For my minor course, the HSCI 130 course lecture says open, and so does its' waitlist, there is open space and tutorials are not open. Course selections are so frustrating because there are so many conflicts. All of the required ECON courses are closed, this happened to me in the summer semester too, I did not get any ECON 200 leveled course, and I only wanted to take one of the two that I need to take, and they have 4 of the Econ 200 level course, all packed full.

NONE OF CLASS IS AVAILABLE FOR ME IN THIS SEMESTER! I HAVE TO WAIT ONE MORE TERM TO TAKE ANY VALUABLE CLASSES AND I AM NOT SURE IF THE NEXT SEMESTER WILL BE THE SAME AS THIS!

I need to take, and they have 4 of the Econ 200 level course, all packed full.

These courses are all distance studies courses and the one or two extra students should not make that much of a difference to the quality of delivery.

Please indicate to student which double major or minor is very difficult to complete due to time conflicts.

For the popular selections, I think there should be more that one class.

reserved spots? really?

Course availiability isn't very good. A lot of the science courses conflict with each other. Also, there isn't much room in classes when you have a later enrollement date.

CRIM 330 is offered at a time that is late in the evening, and since I live faraway from the campus, it's not very convenient to arrive home until 11 or so.

For the popular selections, I think there should be more that one class.

I don't wanna wait for another 1 or 2 semesters before it is being offered again. I don't need any more delay in my graduation!

Not available at the Surrey Campus at convenient times; labs must be taken in Burnaby, and conflict with other courses.

Course availiability isn't very good. A lot of the science courses conflict with each other. Also, there isn't much room in classes when you have a later enrollement date.

There seems to be this problem every semester. For my minor course, the HSCI 130 course lecture says open, and so does its' waitlist, there is open space and tutorials are not open. Course selections are so frustrating because there are so many conflicts. All of the required ECON courses are closed, this happened to me in the summer semester too, I did not get any ECON 200 leveled course, and I only wanted to take one of the two that I need to take, and they have 4 of the Econ 200 level course, all packed full.

NONE OF CLASS IS AVAILABLE FOR ME IN THIS SEMESTER! I HAVE TO WAIT ONE MORE TERM TO TAKE ANY VALUABLE CLASSES AND I AM NOT SURE IF THE NEXT SEMESTER WILL BE THE SAME AS THIS!

I have a huge problem with this class being offered because it has officially become a hinderance to my graduation time frame.

BUS 421 is my required course however I can not choose it as it is full.
I just really would like to take these courses this term. and I need help with getting these courses to enroll. thank you.

I am wondering how I am going to enroll in BISC 101 if my # in the waiting list is 63 and I have registered for the course in the time that the registration open for me and when I select this course it was full. I am so shocked how some students can registered before other students it is unfair. I really need to take this course or I will be delay in many courses.

I HAVE ADDED THESE COURSES. BUT IT IS NOT LETTING ME REGISTER.

I am a visiting student, and understand that I do not have priority. However, I find it ridiculous that I had so many courses approved and yet still unable to fill my schedule with enough courses to graduate. I really wanted to come here, but I just don't think it is possible anymore. Class sizes should be bigger, especially when classes fill up so fast.

Many of the courses I wanted filled up, along with their wait lists. There was no wait list for BUS 251 which was frustrating. I’m not 100% sure if the other sections at other campus filled up for these classes but they were full in Burnaby.

Classes filled instantly, couldn't find any open classes that I wanted. I do not have a full course load like I wanted because all the classes are full.

Need more distance ed courses and availability of courses at surrey campus!

Almost all of the courses required for my degree were between 12 and 3, three days a week, making it impossible for my boss to work my schedule around them. CMPT courses were offered in the morning at Surrey, which is convenient, but Calculus II was not offered there. I’d really like to see more options for longer two day per-week CMPT courses, rather than three 1 hour courses per week. Otherwise, it’s extremely difficult for part-time students to get the courses they require to proceed with their degree.

I think sfu need open more class section for some required courses. I had a really tough time on course chosen.

Some classes have no wait list capacity, though it would be better if they did, in case someone really needs that class.

This happens semester I need to fulfill electives or wqb but I do not meet the requirements. I took off the summer semester because I had the same problem this is totally ridiculous.

I am a first year student coming from aboard, and not able to be offered a place in the university residence. I have enrolled into a class at 8.30 in the morning as many classes later than that are full. It will make an inconvenience about attending classes on time for me and people who is in the same situation as me. Thank you very much!

There are too many courses at inconvenient times as well as conflict with other courses.

I did not get the one with Cathy Mcfarland and am putting this course off till I get the prof that I can work with to be a success.

I am currently working full-time and looking to complete my Post Bac Diploma in Special Education part-time. This means that I need to take evenings courses or courses via distance education. As it is, all of the courses within my program are not offered every semester. I expect that as a previous graduate coming back to SFU to complete an additional program, I should have an earlier registration date so that I am able to at least register for the courses when they are offered. To be competing for courses with a late registration date, it is almost as if I am a first year student again, however I am not and therefore I do not have that same kind of flexibility. Furthermore, I have found that when there are courses that are available and they have open seats, I am not able to register for them because they are reserved for students who have declared minors/majors in the specified faculties. Even though I am taking a Post Bac Diploma under the Education faculty, there are still courses I need to take within other departments. Other diploma programs should be considered when restrictions are put on course registration. All of these factors are adding up to make this process extremely frustrating!

This is the second time that I couldn't select this class which I planned for taking it - First Time Spring 2010 ( Not enough space ) - Second time ( I was not in reserved list for this course )

I have completed FAN X99 with a final grade of B, so I do not know why I am unable to register for this course.

For awhile there was a waitlist available for linguistics but all these error messages kept coming up. I checked daily and now the class is full and I can't even waitlist.

I'm a second year student trying to finish all my first year classes that are pre-requisites, how am I ever going to graduate when the class was full almost 2 weeks before my enrollment date!

I have to do distance education and unfortunately submitted a late application. All positions were therefore already taken by the time I received my computing ID. It is the only subject I can take at the moment. I am a teacher and will be teaching science (primarily biology) this year and needed the course to familiarize myself more with biology to be able to teach it better. In future I might continue studying but for the time being I really need this one course only.
I would really like to take these courses, but I cannot select them because the prerequisite courses are not available. I have taken these courses in my previous university and want to take them again. Please help me with this issue.

Need to offer more variety in upper division CMPT courses. There also needs to be better schedules for these courses.

Space in ENGL 101 runs out too quickly on 2nd day of enrollment. I am currently enrolled in Physics 12 in summer school and was told that I would be able to sign up for the Physics 120 class in the fall semester. For some reason the system will not allow me to select the course contrary to what my advisor instructed me.

I really need to get into EASC 104! I need this class as science credit for my WQB science credit. This is a 1st year class, how can I not meet capacity requirements? I am in my 4th year in Criminology.

This is my major! Please! Thank you a million!

This course Bisc 303 is a required course for health science majors and biology majors, why is there so little space? I don't even know why it cannot be offered in spring term!
When I first enrolled, only one section of French 215 appeared on the system. I called both the French department and the Student enrollment info and they told me that the second section of that course listed in the timetable had in fact been cancelled. I had wanted the section that had been "cancelled" but with that news I rearranged my schedule and settled for class times that were less than ideal. Then, all of a sudden, that second section began appearing in the system and thanks to this lapse in the system, I am on a waitlist for the Spanish class that I want - and my registration time was on the very first day of enrollment.

I couldn't get Explorations- Organizing society.

It should be advertised to students that ENSC courses and Upper Level CRIM courses at the Surrey Campus are for students enrolled in specific programs only, that there is a permanent restriction on the class. Otherwise you'll have students like myself, becoming very frustrated and annoyed when they cannot register for a class that they have the pre and co requisites for and there are no time conflicts.

The course availability for this class was incredibly inconvenient. The Laboratory and tutorial times could not be chosen seperately and therefore created an incredibly hard challenge to schedule amongst other courses. Most of the lab times were incredibly bizarre and could have easily been remedied if not for the combined time slots between Tutorials and Laboratories.

I am a first year student, and this is my first year at SFU.

The structure of this enrollment system is unfair.

I am currently have 86 credits but I could not even enroll into any finance entry courses for this and last semester, since spaces of BUS 315 and BUS 316 are quickly filled. As a result, I have to spend the precious credits on other non-business courses.

I am completing or have completed the pre-requisites for both of these courses but it will not let me enroll! I am completing the equivalent of math 12/math 100 outside of SFU. Please help!

Very discouraging that courses are not available. Makes it very difficult to move ahead with program. The above are just 5 courses I couldn't get into but there were at least 10 other courses I tried to select that were unavailable. What are students expected to do?

The completion of my degree and that of my friends has been put off for a year because of lack of availability. As a consequence, I recommend to my friends to do as much course work in college as possible.

This class is really vital for CS students but there is only one class open this semester and the even the wait list is full. All other computer science classes have this one class as a prerequisite, so it's very difficult to take other courses.

Why each student has different enrollment date? Because it's unfair. sooner gets everything.

There needs to be more anthropology courses offered through CODE or NOW.

The structure of this enrollment system is unfair.

What determines your date of enrollment?

More online availability is needed.

Courses were open, but when I enrolled I was placed on the waiting list

since I've already met the pre&co-requisties (I've finish Phy12 from my secondary school), I don't undestand why I couldn't enroll in this course.

Q courses in the arts without major math prerequisites are hard enough to come by, but it seems that the ones that do "exist" are never actually offered.

I hope another section will be opened.

I don't know why I didn't get into the Kin 481 Class, I meet the kinisiology requirements and I am in the ergonomics stream.

I hope that next semester I can get my courses. My appointment date was so late so there was not many options of class sections. I hope to see more classes available in the mornings and afternoons before 3PM. I have kids that get out of school around then so hopefully for moms studying you guys could give us earlier appointment dates to enroll! Thanks!!

I have completed math 12 in saudi arabia it is the equivalent of BC math 12, but when i try to enroll in the math 150 calculus I, it ways the i do not meet the prerequisites. can you please help m solve this issue and enroll in the class? thank you \" 

I planned on taking the Thursday lab at 8:30, but it has disappeared from the system. I made my schedule several weeks ago, and checked it a few days ago, and everything was there.

<tr>
<td>The courses that are requirements for Majors and Minors are not offered, or have class limits of 18 people that are full with no waiting list. There is no choice for course selection, courses chosen do not further my progress on my degree and this is an appalling inadequacy on SFU's behalf. It is frustrating to waste another semester in this way. Not impressed.</td>
</tr>
<tr>
<td>There should be more lecture classes and tutorial times for the core courses. (ex: SA150)</td>
</tr>
<tr>
<td>All the courses were about the same time (focused on 9.30-10.20 and 11.30-12.20), and too many course were on Monday W and Fr, Tu and Th doesn't have many courses to choose.</td>
</tr>
<tr>
<td>It is extremely difficult to get into any courses. Everything is full and if its not full it conflicts with other courses I have already been enrolled in. It is ridiculous how many courses have time conflicts or are full. They were full on my enrollment date! It is unfair and extremely frustrating when I need to be taking at least 12 credit hours per semester and that is hard to achieve!</td>
</tr>
<tr>
<td>I find it very unfair how students who have a late enrollment date and are a health science major, are not able to get any of the classes they want because of the small class capacity - even though there is a enrollment restriction! Is there any way you can increase the class capacity?</td>
</tr>
<tr>
<td>The course was originally offered at a better time, then being changed to another time after course selection has started and gave students no time to plan/make adjustments.</td>
</tr>
<tr>
<td>VERY limited selection of 200-level Economics classes in most semesters!</td>
</tr>
<tr>
<td>I am supposed to graduate in April... these courses are lower level requirements for my degree would like to finish them as soon as possible. I could not register as early as I liked because of a financial hold on my account. Both classes do not have a waitlist.</td>
</tr>
<tr>
<td>It seems that my ability to register in all other science courses depends on my registration in Biology 101. I would appreciate your help in getting into these courses -- which I have been trying to register in prior to the Enrolment Appointment Deadline.</td>
</tr>
<tr>
<td>please move my lab from Friday to the Wednesday from 10:30-12:20 (which has a wait list) because it is really inconvenient for me to wait for 5 hours on Friday and it also conflicts with my work.</td>
</tr>
<tr>
<td>You should not give open enrollment to Philosophy. I had a later enrollment appointment and even though I was admitted into the Philosophy program I was not able to get a seat in any of my required classes for my degree program.</td>
</tr>
<tr>
<td>Course availability should be more. And a better enrollment process should be introduced, rather than randomly appointing enrollment appointments to students. Concerns about enrollment appointments should be addressed. Students end up taking courses which do not interest them. As a result of which their grades suffer. Or, they are unable to complete their degree in time due to unavailability of classes. This causes immense inconvenience and hardship to students and should be addressed by SFU.</td>
</tr>
<tr>
<td>It's been three semesters and it ENGL x99 is always full by the time of my Enrollment.</td>

<table>
<thead>
<tr>
<th>The sections are not available at the desired times and there is no seats left in any of the sections either. Also, math classes should be offered later in the afternoon as well for students who come from surrey</th>
<th>Not enough courses for undergraduate Health Sciences students!</th>
</tr>
</thead>
<tbody>
<tr>
<td>I tried to be extra prepared by checking for class selections 2 days prior to my enrollment appointment. I listed out several different arrangements of courses as to not overlap and allow for reasonable available work time. I was quite shocked that within 2 days I was left with such minimal choices in class selection (at the Burnaby Campus, I cannot travel to Surrey), that my options were to either not work and have a scattered &quot;swiss cheese&quot; schedule of classes or sacrifice my extra-curricular activities and just take what's left over. This was not a very good first-time enrollment experience.</td>
<td>I would like a broader range of upper division courses offered. Last semester I took courses that I was not really interested in that did not really aid me in my post graduation goals. I took them because I wanted to take 5 courses and those were the only five courses that I could take that would work towards my degree. I feel that the upper division electives that a student ends up taking is more reflective of what year she or he was in than where the student's interests lie. You are very much constrained by what is offered each semester. If you wish to finish your degree in a timely fashion then you must sacrifice taking the courses that you are really interested in. This semester, before I got a co-op job, I was again looking at taking another semester full of courses that I did not really want to take, but was going to take because I do not want to take any longer than I already have to finish my degree. I know that logistically it is not possible for SFU to offer 30 different courses each semester. It is still frustrating. I was very disappointed in the fact that kin 444 was not offered this fall as I have been waiting for two years to take that course. (:</td>
</tr>
<tr>
<td>This is my second last semester!!!! I have to take at least one HR course in order finish my degree ON TIME!! I am currently taking 103 credits!! And it doesn't make sense that the available seats are just 25 seats and wait list capacity is 50 seats (which is double the normal available seats). It is impossible those 25 people would drop the class together.</td>
<td>All of the courses I needed to take were offered on the same days at the same time. Because of these scheduling conflicts, a course load that could have taken me one semester to complete might take me three. I was pretty disappointed. These courses are all offered for the same group of students completing the same requirements, and they are all offered at the same time. I don't have many elective credits to fill up, but my course requirements alone will keep me in school for semesters longer than I would otherwise need to be.</td>
</tr>
<tr>
<td>The system works quite well, but the actual status of a class should be indicated more accurately. CMNS 110-D200 (4427) was green circled and was not marked with an asterisk so I was led to believe it was fully available. Beyond that, if it is restricted, I am a CMNS Program participant, so why is it restricted against me?</td>
<td>Every semester Bus required courses are full so fast and leave no choose for those do not have early enrollment day pp!</td>
</tr>
<tr>
<td>Every Semester i.e. Spring 2010, Summer 2010, Fall 2010, CMPT 120 is full. I can't even add it to Wait List because it always conflicts with my other courses. For example, D200 lecture is on MoWeFr 2:30PM - 3:20PM. I am taking CHEM 215 lab on We 1:30PM - 5:20PM. The D500 lecture is on MoWeFr 9:30AM - 10:20AM. I am taking PHYS 121, and the Lecture for that is on MoWeFr 9:30AM - 10:20AM. My suggestion would be adding a new section for CMPT 120 Lecture on MoTuThu any time after 1:30 PM. And the Lab for CMPT 120 on preferably on Thursday (or second choice - Tuesday)</td>
<td>There were a lot of courses that I wanted to get into but a LOT of them were full. It seems that I always have a terrible enrollment date. My friends at UBC never have this problem. There should be a function on the system where you can search &quot;all available upper division courses&quot; or &quot;all available Q courses&quot; for example. I mentioned the Kin 143 in particular because I have been trying to get into it for over 2 years and it is ALWAYS full and I am always on the waitlist but too far away to get in. The only time I had a good experience with this system was in my first year. That is almost like false advertising because you start going to SFU thinking you'll never have problems getting into classes and then every semester it gets more ridiculous. This whole system needs to be re-done. I would tell my friends to not go to SFU because of this problem with getting the classes you want/need.</td>
</tr>
<tr>
<td>I do not feel it is fair that ALL criminology courses fill up before students who tend on doing a Criminology major can register. I do not know how I am going to be able to get all the required Crim courses done in time to declare my major.</td>
<td>I have no idea why I wouldn't have met the prerequisites for General Biology - I got 82 percent in Biology 12. What is the problem?</td>
</tr>

### COMMENTS

Course availability is terrible! I almost don’t want to attend the university this semester, due to the dull course load I was forced to assume as all of my main choices have been taken. I am particularly disappointed that Phil 100W was filled before I had a chance to enroll, as I have been waiting two terms to take the class and thought that finally being granted an earlier enrollment date as a second year student that I may have a seat in the class. I received a letter from the Philosophy department for my outstanding performance in some of the next level intro courses, so I am very annoyed that I am unable to take the course I really want. Seriously do something about this, I REALLY want that course!

All the tutorial times clashed, that was the only reason I could not take the courses I wanted. Also, the lecture days also clashed. For someone who needs to work in order to go to school this isn’t helpful as going to school more then 3 days a week is impossible.

I was really disappointed that I had to choose one out of three courses because all were scheduled at the same time on the same day and there were no other sections being offered. I am also very disappointed that the courses I can’t take due to the conflicting times are only offered once every year or two because now I will have to choose something I am not nearly as interested in to satisfy my graduation requirements.

This semester, I registered ENGL 207 and ENGL 201. I want to take the ENGL 203 class because tutorial classes on Monday are already full. And other tutorial classes are the same time with other English lectures. For students who take English 200 level, please give more choice to choose available tutorial classes. Thanks.

There was about 5 classes that I wanted to take and needed to take and they ALL conflicted with each other, so I was forced to choose 1 and pick other random classes I didn’t really want to take.

Course availability is very limited.

I am a teaching assistant for the Surrey School District. I can only take classes at night or online. I was originally wanting to major in math, but could not because they only offer day classes. I have now declared English as my major, but there are two classes that I need, 203 or 205, that are only offered during the day. I would love more online and night classes to be made available!!!

Lots of people need bus 254 and can’t get in, same with 232 (like at least 50 each)

I found that there are ridiculous gaps that cannot be filled due to the weird course times. As well, I cannot even take CMPT 120 right now because the only time that can fit my schedule is already filled.

I first came to SFU in 2003 and I am in the Joint major program (Compsci & Business). BUS 468 has BUS 237, 360 as pre-reqs, both of which are exempt for me. What can I do?

I’ve already taken Psyc 210 previously and am trying to retake it. Yet now it seems the pre-req’s required I no longer meet. This is confusing because now I am supposed to take another FAN XX9 so I can get into a class I’ve already taken. Seems backwards somehow...

Even though my registration date was not that late, I was only able to select 1 course that I wanted. I found that almost all 300 level CRIM courses were already closed (full) come my registration date. I want to remain a full-time student, and I am very disappointed that I am not able to take the courses that I am interested in.

It said that I did not meet the requirements but I have. I took math 12 and finished with a B.

Please do the course transfer from other Universities (particularly those from overseas) properly so we can enroll in our desired courses without delay to ensure we get a place.

I AM CURRENTLY TRYING ADD THIS CLASS (MATH 151) AT 9:30AM; HOWEVER THIS TIME IS ALREADY BOOKED BY CMPT 120 LAB. ALSO, BECAUSE OF THIS, I TRIED TO ADD CLASS (MATH 151) AT 8:30AM; HOWEVER, THE INTERNET PROGRAM PREVENTING ME FROM ADDING IT. IT SAID AN ERROR HAS OCCURRED. “Error: Unable to add this class - requisites have not been met. Check the class description for a list of enrollment requirements.” “Error: This course meets the Fall 2006 writing, quantitative or breadth requirements.” If possible, please relocate my CMPT 151 Lab to another time and add Math 151 (9:30am).

I intend to major in history and the history course 106 was showing up as reserved for history students, yet I was unable to enroll and by the time open enrollment came around, the course was full.

eco 290 SURREY campus ends at 12:20 thursday, eco 291 SAME DAY BURNABY campus STARTS at 12:30. A few of my friends include myself want to take both classes together to meet requirement to get into econ department, but is there any possibility for us to go FROM SURREY TO BURNABY campus in 10 minute????!! ALL econ’s classes are fill up very soon, in almost EVERY semester, PEOPLE WANT TO MAJOR IN ECON ALREADY BARELY HAVE AN OPTION AND SFU MAKES IT EVEN HARDER FOR US TO CHOOSE.
This is really outrageous, I have a REQUIREMENT to take a course, and I cannot even enroll in it because all 3 lectures are full. Is that not a hint to make a fourth lecture? A lot of students are dealing with these problems, and it really confuses me what you guys are doing to actually make schedules that work.

I picked 7 (SEVEN) courses that count as a B-Sci credit and all of them were full. Finding a potentially enjoyable science credit is hard enough for us kids that aren't into science-y stuff, but to be able to find seven that seem interesting and not get into one of them is incredibly frustrating.

I need this course to graduate with a labour studies certificate. I have found that courses in this area are limited and this compounds my frustration as I already had to change my major when they closed the Canadian studies department.

26 upper division criminology classes were completely full by the time my registration date came along. 2 upper division criminology classes were reserved for SFU NOW students or students with 90+ credits. 5 upper division criminology classes conflicted with the one MANDATORY class I needed for the fall. 2 distance classes were left, one of which is a Q where I need access to a TA. that leaves only 1 upper division crim class... it is only offered at surrey, i have no interest in the class, it is not a requirement and the tutorial and lecture are on different days. Seriously considering switching to another university that ensures its criminology students have access to criminology classes! What guarantee do I have from SFU that I will be able to get into the required criminology classes that I need to graduate?!

Getting the courses I needed this semester was really frustrating because I couldn't get into the ones that I needed the most. I need the English courses for an English major but it was a fight to get them, if I could get them at all. Furthermore, while Japanese is an elective, I am dissapointed that all the sections were closed before my enrolment time.

I found it was very hard to find courses that could fit into my schedule without overlapping. I also found that most of the course I wanted all had lectures on Tuesdays which made it impossible to have more then 3 classes that I was genuinely interested in and didn't have lectures beginning at the same time or starting half way threw each other. As well by the time I was able to register most classes were already closed or wait listed, which doesn't really give students a chance to get the courses they need or want.

SFU courses are always full. It is really hard for students to graduate on time.

It seems nearly impossible to graduate in a timely manner when registration dates make the biggest difference and there is no guarantee that you will get into ANY of the courses you need. The evening before my registration the courses I needed were still available but I lost any opportunity to graduate in April when I tried to add classes today. I had no opportunity to get into 4 upper division courses this semester, this is very discouraging. It's very difficult for those who have children and are trying to finish up their education but repeatedly lose the chance at registering in courses that are necessary.

As I have an GPA of 3.5 I am very confused as to why my classmates with GPA's much lower, like 2.2, were given an enrollment date earlier than mine. It's very frustrating. I am wait listed in two courses that I need to take, Physics 101 and Kin 110. I really need to get into Kin 110 as I have tried to find another course to take but nothing fits into my schedule. My Mondays, Wednesdays, and Fridays are full, and because of a four hour organic chem lab that I have on tuesdays, I am unable to take any tuesday thursday classes... which leaves me next to nothing. If there is anyone that can help me it would be really appreciated as this is, like I said, extremely frustrating. I most definitely need to get into Kin 110.

All three of these courses were supposed to be offered this fall and all three were canceled.

If my CGPA is in the top bracket then why are all the tutorials and labs i want to take filled up and closed when i register for courses? Shouldnt CGPA be the sole factor in determining course selection time?

I am one class from being able to declare kinesiology as my minor, but i cant seem to get into classes to be able to do this. also on my registration date i registered to many of these classes, and said i was enrolled, but i checked today, and it had me not registered for any of the classes. I NEED all of these classes to stay on track for graduation. all of them i need except for REM 100, which is not required, i can choose another if i have to, but the others i really need. PLEASE PLEASE PLEASE help me, i need to get into these classes

I could not get into ANYTHING I wanted. Same with last semester.

Home come these courses are full at beginning of my enroll time. It is weird

I would really like to take this class

bad enrollment date screws good student once again... gotta love sfu :(
| COMMENTS |
|---------------------------------
| I wish more courses were offered as evening selections at HCC for students wishing to complete their degrees while working f/time. |
| General chemistry II conflicts with math 232. There was room in PSYC and SA but the available seats were reserved. |
| There should be WAY more sections offered in 150! It is such a popular class. Why is there only one person teaching it? And no less-- why is there no waitlist? |
| Conflicted with IAT309W |
| On the schedule of classes it says that this course is available at the Burnaby campus but when I try to enroll it is only at the Surrey. |
| There is still room in two of the courses that I want yet I cannot enroll in them, and they are both filling quickly. Have only taken 3 instead of 4 courses because nothing else fits my schedule. |
| Courses should be available to all the students who need them. IS students in stream 2 take a lot of other courses in other disciplines. These are required for us yet they aren't reserved for us and it means that we suffer and can potentially take a lot longer to graduate while you suck us dry with fees. It's not well organised and something should be done. |

<th>1. Your system is useless. I am trying to talk about ENGL 453W: Aboriginal Literature, but this tells me it does not exist, so I have to pretend to be writing about ENGL 453: Shakespeare, which I am not. You offered the course, and now it's no longer offered. I have been trying to get into this class for three years now. Either it fills up and I can't get in, make other arrangements, and then a week later five people drop it and then I get E-mails later from advisors and profs saying &quot;oh, well there were available seats. It wasn't at maximum enrollment capacity! Why didn't you enroll then??&quot; The answer to that question, which drips with privilege and dismissal, is I can't afford to sit around all day every day for the first week of classes because I'm usually at work trying to make extra money to pay for the class(es) I managed to get into. I have to give my availability ASAP (as in later on the day of enrollment) and then my schedule is set, meaning I can't wait around for people to decide they don't like their prof, or writing two essays is just too hard for them and subsequently drop the course. Telling me it's my fault is infuriating, as most people I know worked throughout their university career, and went to schools where they had an organized enrollment system where you planned ahead and problems like this did not occur. I guess we just aren't &quot;world class&quot; enough to have that kind of system.</th>

| Some courses that I really wanted to take (like JAPN 101 and CHIN 100) were already completely full before I even had my enrollment appointment. Even the waitlists were full. I’ve also really been wanting to take a KIN course, but both last term and this one I haven’t been able to :(.
psychology 201. class number 9165 (lecture) on tuesdays from 4:30 to 6:20 and the tutorial is thursdays from 6:30 to 8:20 class number (1187). it says it is conflicting with another class but the other classes are distance education.
the upper division courses get filled up extremely quickly due to limited availability and a lot of students are waitlisted for courses they need that particular semester and end up not being able to take them. |
|---|

| No
I think there should be a larger class size for this course since it is mandatory. |
|---|

| The availability really sucks. It is hard to find any classes that you WANT to take let alone the classes that are required for your major! And when you do fins one there is usually a prerequisite that you have to have.
more lectures and tutorials need to be made available, especially in the ECOon and BUS faculties
I have been waiting for 2 semester for a ECON UPPER DIVISION class. I am not able to enroll any of these classes so far. In that case, i suggest SFU should open more ECON class, especially ECON 301 ! Otherwise, student like me cannot finish our degree on time !!! |

| For the Physics 120, I believe I do meet the requirements as I took IB Physics 12 SL in high school (scoring a 7/7).
For the Math 151, it said I couldn't take the course because "you are unable to enroll in this class at this time. Available seats are reserved and you do not meet the reserve capacity requirements." I do not understand how I do not meet these requirements as I have been offered the Gordon Shrum Major Entrance Scholarship and I scored a 7 in IB Mathematics 12 SL and received 100% in Calculus 12 in high school.
Could not get into any 300 level health sciences for the second semester in a row. (Probably due to my registration time and the fact that I am not at 60 credits) Being a health science arts student, there is not much I can take.
I am very frustrated, as I am not able to register in any criminology course because of no availability. I am majoring in this field and I do not know what courses to take now.
I just want to say I got a C+ with my Math 150 and I really do not want to re-take it or take another course since I think Math 150 is much harder than Math 157. Why don't give the students one more change? I do hope to have a change to enroll into the course. I don't have a very good grade with my Math 150 but I am doing pretty okay with Math 152. I just want to know if there is a change students like me can have a second change to get into the course. If a student with a B of Math 157 can take this course, I really think I deserve a change. Thank you!
I was only able to register for one class since all the other ones are full.
I am shocked that the course options offered at the Burnaby Mountain Campus are very limited in comparison to the Spring 2011 semester. My schedule is very inharmonious. I much prefer the course availability during the Spring semester... please fix this!
XX
I am a LING-major student, but I have got no LING courses to take for next semester.
3 times tuition fees than local students equal to no courses to enroll?
some students sell the space, every space for $500.
If there is anyway for me to get into either Philosophy and/or English please let me know
If it is possible, can you solve the problem about I do not have BC math 12 REQ?
I don't want to e-mail to every adviser every time for the same issue.
If the system can recognize I have the REQ that equal to BC math 12, than I can register for these courses directly without any problem every time.
Thanks for understanding and helping.
There is always no space for econ 301 and econ 305.
It is ridiculous how I pay so much to attend this school so much money on books, transportation, etc and I can't even get into a class I need in order to fulfill requirements to get my degree and I have to take something that not only do I not want, I don't need
What I don't understand is why can't I register if I am an SFU Now student. I recently was asked to confirm my status, which I did in June 21st and again today, July 22.
I had this philosophy course in my queue and apparently I hadn't added it to my full time schedule yet so I didn't get in. I need this for my philosophy W and would greatly appreciate getting in.
the courses have been full ever since the first minute of my registration date, and I have no been able to get in
The system of how students get selected to choose their courses is ineffective and often force students to take courses they other wise wouldn't because the ones they do want are always full. Students enrolled in a desired major program i.e criminology, should get priority seating in select criminology courses before those who are only taking these classes as electives.
Psychology classes with labs/tutorials should offer wait lists.
Being a second year student (that has 57 credits), I was very surprised to see that I could not get ANY of the courses that I wanted. To make things easier for myself, I was going to live on Campus again but seeing as only ONE class that I wanted is available there, I do not see the point in doing so. I think for courses such as ECON 103 and BUS 254, there should be more classes available as these are requirements for a business major and lower level classes as well.
Hi, allegedly I have some sort of preference while choosing classes, but I can't even get into any waiting list. Thankyou
I really want this course, but it was completely full when it was my time to pick courses.
I am put on the wait list for this course and am unsure of the outcome of getting the course in the end. What is the likelihood of getting that important course? |
**COMMENTS**

Eventhough my enrollment date was July 19. Student service center told me that my enrollment date was July, 28. As a result, when I chose my courses, I didn't have enough choices and I couldn't get in one of communication courses. I can prove this fact by providing e-mail capture. It was really unfair and unreasonable. As I heard, freshman have a priority to enroll their classes but I couldn't get it.

The worse part was before July 28, I really wanted to change my enrollment date so I went to Student service center and they said that you would send e-mail to you. but they didn't!

<table>

<tbody>
<tr>
<td>I wish there was either another course offered through distance ed ie 2 courses, or 2 courses offered at the SFU campus, because with a child I can't take night classes at the surrey campus</td>
</tr>
<tr>
<td>I would like to enroll in section ENSC 182 - D400</td>
</tr>
<tr>
<td>I was suggested to choose CHEM 121, but I never took Chemistry 12 in High School. If I learn Chemistry 12 ahead of the time that the course starts, could I meet the requirements? (or do I need to get the proof from the Ministry of Education) I can't take summer school because it is already starting so could I use another source to prove that I know the information taught in Chemistry 12.</td>
</tr>
<tr>
<td>I am going to graduate this summer and I really need this course for upper division elective course.</td>
</tr>
</tbody>
</table>

SFU is a world renouned University, students pay a lot of money that goes toward paying TAs who sometimes can't even teach or toward tutorial sections for courses that have absolutely no use of them. SFU should allocate its funds in a more appropriate and smart manner where students don't only have a wider selection of courses but at times that are much more convenient as well. How does UBC manage to do that so well?

SFU is also fixing pointless things that probably cost more money than anything, the logo on the concrete SFU sign going up the Burnaby mountain campus has been changed from a formal university symbol to a very lame looking red box...bet that cost enough money to open a new tutorial section for at least one course if not more, but no, instead wow students are gonna love what we did there for the 2 seconds the bus passes the sign!

| I think that second-year students going into third year (I am entering my third year this fall) should get earlier enrollment dates. I was not able to enroll in any of the third year courses I wanted, therefore it will take me longer to graduate and school is going to cost my family more money. I end up taking courses I don't necessarily need for graduation, and it's just a waste of time. My GPA was even higher this semester than last semester, but I had a later enrollment date. I thought if you strive for good academic standing, it should act as motivator; allowing students to enroll in their classes at earlier dates. Very disappointed with the enrollment process at SFU. |
| I think that having a cap on how many courses you can be on the wait list for is ridiculous and unfair. By the time I was able to register everything I wanted had already gone to wait list. However, I was only able to be put on the wait list for two. |
| All the upper level 300 criminology classes are full and closed! There are no wait lists and I can't even register for elective courses. Its really frustrating because there isn't enough space and no wait lists either. |
| There are simply no available seats in the courses I need (LING 221, LING322). There are not enough classes. Only one of each of the courses I need are provided. All of the classes, which are required, fill up quickly. It is too hard to fulfill credits in my major in a timely manner when one can't take the courses needed. Very frustrating. |
| I believe that as a NOW student we should also be granted priority registration for distances classes. I have professional commitments that severely limit my schedule and I am not always able to take the evening classes offered. I was very disappointed in my inability to meet my course requirements for this semester. |
| I think another class should be opened because this class is essential for those who want to get into economics and the later they get in, the more difficult it is to catch on. It is actually a little unfair for those who do not get the chance to take the class. If they do not take Econ 105, then they cannot take the higher requirements for Economics. It will take years to graduate at this pace. Please consider opening a few more classes for those in need. Thank you for your concern. |

| It seems that basically no one except scholarship students get the class times they want. This bothers me especially since I am supposed to be a scholarship student this semester but no one has contacted me. I have a gpa of 3.9 and I am not not getting any classes I want? This is very ridiculous. |

<tr>
<td>Am VERY displeased with the handling of EDUC 426 this semester. Being a seminar course with only 35 seats (40 at most), with seats from the waitlist rarely being added, makes the situation difficult as it is. Changing the date of the reserved seats (originally to be released July 31, changed just prior to my registration to July 22) only caused further frustration. I declared my minors so that I could take advantage of reserved seating; changing the release date at the last minute so that the seat I SHOULD have gotten was released to the general public is decidedly unfair, and such circumstances make it impossible for me to fulfill my course requirements. Once again, I am profoundly disappointed with the Education faculty course planners and their inability to make courses available to undergraduates - why bother creating the BGS(Ed) and the ability to take education minors if you will then not allow students to get their courses?</td>

<td></td>
</tr>
</tbody>
</table>
I find that for people who wish to explore other faculties have a very hard to matching up a reasonable schedule or finding space in the class. This semester, I wanted to take a small break from my degree courses and wanted to experiment with a few other subjects that I found interesting, only to have them all become full before my application date or at unreasonable times at another campus. This seriously limits a students options of being able to explore a subject they're interested in.

The one time I actually have the prerequisites for courses, none of then ones I need to take are offered... :( so now I'm a Mechatronics student stuck with only 3 courses for the 3rd semester in a row.

First year new undergraduates should be advised to take french courses second semester in case the placement test narrows the classes they may take.

Really bad. I have not been able to take a crim course since first semester, 1 year ago

It would benefit all students if the website for enrollment was kept up-to-date, so as to avoid frustration when trying to register for required classes that have long-since filled up.

Seeing as I work four full days a week evening courses offerings would be nice to have. I am attempting to do my degree in archaeology and it seems that most classes, especially those with labs, are never held in the evenings.

I was really disappointed with how late my registration date was. I was unable to get into many classes because they were full by the time I could enroll. Also, I wanted to sign up for ENGL 311 - Early Shakespeare at Harbour Centre, but was unable to because I am not an SFU NOW student. I find this extremely irritating since I am a declared English Major at SFU and I should have priority to the 300 level English courses.

This is the second term in a row that all the Economics course have filled up before I’ve been able to register. I find it very ridiculous that there are only 4-200 level economics classes being offered per semester.

I am trying to grad after spring 2012... so hoping to see those courses being availble in spring 2012.

I have been waiting this class for 2 semesters!!!!

I am displeased that a required course only has one section offered - both 311/313 I know are very popular and I would love to see another section opened up.

I would really like to see more spaces available for upper division HSCI courses that are required for graduation.

As BUS315&316 are required for finance-major students within the area of concentration and are pre-required for 400+ finance-aimed courses, shouldn't there be more sections available? How come there's only one BUS315 class for Fall term?

Giving transfer students from Douglas college enrollment priority is absurd and unfair. I have attended this school for three years yet I am given an enrollment appointment which is a week later than a classmate transferring from Douglas College? This has resulted in me being unable to enroll in two of the courses I require in order to get my Linguistics degree. Apparently I should have gone to Douglas instead of straight to SFU because at this rate I will be 30 before I graduate. Please increase the class capacity for 200 level Ling courses in order to accommodate the demand. I sincerely hope that some improvements can be made before spring semester enrollment.

I wish there are more spaces for English since it is required and needed as WQB requirement. I've been waiting for taking it for more than 2 terms already and I still unable to get in.

Please add more sections for the classes that fill up so quickly! Some people need them to graduate.

My registration date was July 18, and went on SIS this course was already full and i had to put my name in the wait list. there should be more sessions or more professors.

Time conflict between MACM 201 and MACM 316. Only a handful MACM courses are offered each semester, they should be scheduled so there is no time conflict between them.

There are not enough available space for tutorials in BISC 202.

I was only able to find a single relevant course.

Hi there,
My name is XXX XXX and my student number is XXXXXXXX
I believe I have the prerequisites of the courses I listed above.
I was a science student in high school and graduated with a score of A in science over all which including physics, chemistry and biology. We don't have any A+ or better marks.
I have a graduation certificate with a translated copy which is translated by a translator who is member in both Society of Translators and Interpreters of British Columbia( STIBC) and Canadian Translators, Terminologists, Interpreters Council ( CTTIC).
Hoping these marks will be treated as equivalents of physics 12 and chemistry 12.
Thanks in advance of your help.

xxxx xxx
Dear SFU registrar's office,

It is very unfortunate that the SFU registrar's office emailed me the wrong date for registration! SFU emailed me and told me that my registration would open on July 28th, 2011 at 10:30 AM while the actual registration date was July 20th, 2011. Since I was not familiar with the go.sfu.ca website and it's my first year at sfu, I planned to build my schedule a day before the registration date I was told. So, yesterday (on July 27th, 2011) I logged in and realized that my registration date was on July 20th, 2011! I registered for all my courses except the BISC 101 where I had to select the wait list. Today, I went to the registrar’s office at the burnaby campus and let them know about the wrong date they sent me. All they told me was "we are sorry, just contact the Biological Sciences department and see what they can do for you". So, I went and found the departments office and they simply said "Sorry, we cannot do anything for you! It's the registrar's office fault and go back to them and see what they do!"

I don’t know why the registrar's office does not take responsibility and takes such important matters very lightly. I wonder if a student forgot about an exam date or assignment due date, would the University still forgive and forget? I don't think so!

Not being able to take this course would cause a lot of difficulties for me since this is a basic required course and I must take it.

I don’t know who reads this comment and if somebody would help me or not but please treat students like a human being not just a simple number in your computer.

Thanks, XXXXX XXXXX

Just that one question above.

Please make more tutorials to accomodate more students that need this course as a prerequisite for other 200 level health science courses.

I really need these courses to contiune my education and these are times are the only times that work! Thank you in advance!

I only have time for one course this semester to do after work, and this is my preferred course.

Thanks in advance,

XXXXXXXX XXXXXX

There are not enough courses available. Especially when people are trying to graduate on time. I am a second year student and can't even complete my first year Crim courses because they are always full.

I'm a second year student and my registration date was after first year students. I could not get the Biology 102 lab time that I wanted because almost all of them are already full. I think as a second year student I should have priority over first year students for course selection.

So many students in economic major could not get in any economic courses, especially 3rd and 4th year of students.

I think that SFU really needs to open more sections for upper economic courses.

More courses should have waitlists

ECON 290  Error: You are unable to enroll in this class at this time. Available seats are reserved and you do not meet the reserve capacity requirements. What does this mean??

I was unable to register for BUS 312 D100 because the exam is scheduled for the same date and time (December 12, 2011 from 7:00pm to 10:00 pm) as the BUS 336 D100 exam. Given that these are both core business courses which many students are likely to have to take in the same semester, these exam times have been poorly scheduled. As it stands, I may have further issues in the Spring 2012 semester, as BUS 312 is a prerequisite for the BUS 478 course I had been planning to take.

Overall, there are very few Burnaby campus sections available for BUS 312, BUS 336, and BUS 374 in the Fall 2011 semester, and since these are all core business courses which I planned to take this semester (as I have completed my other core requirements), it has been particularly difficult to create a reasonable schedule. I am confident that I am not the only BBA candidate that has struggled in scheduling these courses for Fall 2011.

I have so much difficulties with enrolling the classes I want and which I must take to graduate.

I tried to take these courses this semester and checked go.sfu.ca everyday to look for the spot, but I couldn't get in. Therefore, I only took two elective courses this semester.

And it happens again with enrolling those courses for next semesters.

I want to ask you if there is any other way that I can try to get in to those courses.

And I cannot take 2 courses per every semester.Please consider my situation.

It is very important that I am able to take this class (Intro into Communications) because it is a required course for my major and it is a prerequisite for many CMNS 200 courses. Thanks!
**COMMENTS**

I am trying to complete a Diploma in counselling and it is difficult to get into the courses, despite already having the prerequisites from another institution. I think it should be easier to get into these classes if you are in the diploma program since these courses are electives for it. I’ve had to wait to get into these courses and this has resulted in me being on waitlist. It is highly unlikely that I will be able to get into these courses since I am number 18, 20 or more on waitlist. This makes it difficult to complete my diploma program in a timely fashion.

It is very challenging to find course availability to complete my French major. Unfortunately, due to family commitments, I am only available to take courses at the SFU Burnaby campus from 9 to 1:30.

SFU should offer more class sections, because often most students find that the classes they plan on taking during the semester are full by the time their enrollment date comes.

Urgent attention needs to be paid to ensuring enough seats especially for those subjects that are core to majors. There is nothing more frustrating than not being able to take any HSCI classes for an entire year and still be a placeholder in the program-- it makes no sense at all, and just plain spoils plans for progression. Never before have I seen such! What’s worse is it’s the same story term after term, year after year. Now SFU has a stinkingly bad reputation in this regard. Either you fix it or you don’t probe for comments like these giving false hope for change to such ones like myself. #disgusted

I am a SIAT student but usually I could not take my desired courses which are required, because first of all, my enrolment date is too late by the time all the IAT courses are full and I could not take any. Second, SIAT courses capacities are not enough even for all SIAT students and this is not fair. I am in second year and I am not able to take 300 courses because of these reasons! And it’s not only me I have few friends in same situation as me! I Hope SIAT will sort these problems out.

I was told to wait until July 30th for open enrollment, because it wouldn't let me enroll in the classes I wanted even though they were open. Now, it's past July 30th and all of the classes are full. I was supposed to take 5 classes this term, and now I only have 3. I only have 10 credits this term, and no one will help me fix it, even though you were the ones who told me that I had to wait, and that I would be able to get in on the 30th.

It may be a glitch, but when I registered for FPA 171 (instead of 150), it let me sign up for the seminar, but the lab doesn’t show up on my schedule. I wanted to register for the Tuesday lab at 12:30-2:20. Also, when I go onto the weekly schedule, my Monday courses don't show up (which is the FPA 171 seminar and FPA 111).

I'm on the waitlist

PSYCX99 or 109W also wasn't available anywhere but Surrey. This should be available at Harbour Centre or by distance as well.

If the course is overenrolled, it must be very popular. You think the university would have more than one class at the main campus, or even have one at Harbour Center.

I didn't get the right anthro tutorial

There is only 2 sections available in this course, and NO SPACE At All for all the business students. There is high demand in Finance courses, more sections should be offered including BUS316 and 400 level. The capacity of each sections in BUS316 is only 60 students and the waiting list are full in both sections. It's clear that this course needs more sections to be open for approved business students!

Need this course to move forward in my music curriculum, but have, for the second term in a row, been unable to join because of a late registration date.

I had to sacrifice an elective that I wanted/needed (crim 416) for my minor because it conflicted with another mandatory class (crim 332). The mandatory class was open still, but the only tutorial left conflicted with my elective lecture.

The reason was mainly because there were no space left in the lectures but yes for labs/tutorials or opposite. I do not know how come it is possible to have seats for labs but not for lectures, or spaces left in lecture but not for the labs/tutorial.

This system is very annoying to use. Does it really have to be this slow - and confusing?

How am I ever supposed to get a crim course? I've been trying for 3 semesters straight now, I want to be a crim major and I can't even get an intro to crim course. Classes need to be more available or larger sizes.
I was allowed to register July 19 at 3:30pm. The above classes were full or had conflicts. In fact, I was hugely disappointed that most of them only had one section offered; no wonder it is full! In addition, I was interested in CRIM 335 and 338. I am trying to earn my upper division credits to graduate within one calendar year. Having only ONE section offered for these courses is going to make earning my degree an even longer and more frustrating process than it already has been. Also, the courses I need for my upper division electives are specific because I wish to earn my Legal Studies Certificate with my degree. Therefore, I can’t just take whichever CRIM classes I want; I am following the certificate requirements. Surely with the amount of money we pay for tuition we can afford to add some more sections to these courses??? Please help and add more course sections! I would love a call back to explain what I’m supposed to do should this situation happen in the future, and my graduation is delayed.

I would very disappointed with the course selection. I would like to graduate soon and I am unable to do this because all the required courses I am interested in and need are not available, are at the Burnaby Campus and conflict with other courses. Why do you have to put all the desired courses/required on the same day? And why because all the required courses I am interested in and need are not available, are at the Burnaby Campus and Green circle shown |

---

Next semester is my last term and i only need 1 more 400 level economic course. i am already late for my graduation for 2 semesters because i onl need one more semester because of the only one 400 level course? | Some courses only offered at Surrey campus - location is not convenient for those who use public transit and live near downtown. Also, many basic entry-level courses have pre-requisites that a post-baccalaureate student should already meet. When attempting to register for said courses, I was not able to because of a lack of pre-reqs, even though I already hold another degree from a different institution. This prevents me from registering for the specific courses that I would like to take. |

---

I am a first year econ major student who is trying to register courses. it will be more helpful if the system gives you suggestions about what you should take as a first year student. | My registration date is late and therefore these courses are full. |

---

There needs to be more linguistic courses offered at different times! As a linguistics major I am fighting for seats to a class that is not even convenient to my schedule and no options are offered. | There needs to be more linguistic courses offered at different times! <tr>
<td>why are these seats saved?</td>
</tr>
</tbody>
</table>

80 maximum spaces in a course is a bit shocking because there's more than 80 people trying to get into upper division classes and those 80 people probably filled up the other courses that only have 80 spaces. I honestly think this department need to find a way to at least make the minimum 120. I am trying to graduate but the spaces are limiting me to be able to grad. every time i try to add some econ class i can't....... econ is my major

System was extremely slow and eventually crashed. Annoying, frustrating, and inconvenient. Spaced filled up before enrollment time. Classes are too small for essential courses like English and Breadths

The enrollment system is not working well...some courses are still open but there are no spaces for lab...and some courses don't have any space, but their labs are open...I don't really understand why is this happening? no wonder so many students cannot get classes they want and graduate in time...please make sure there are enough space for student enroll...

Some of these classes must be taken for graduation. It was unclear I had to declare my major at the time of my application to SFU as well as before enrollment.

I am two credits away from technically being in third year and because of my late registration date I am unable to get into my required third year health science classes (health science is my major).

I was unable to enroll in any upper division CRIM courses as they were all full or had "reserved seating"

I do have 12 credits tho. I don't understand why I need 12 credits to take an intro course.

The seats available for IS 220 are not enough

There are too little seats opened for all the students in the faulty.

I found that the course lecture conflicted with another course's tutorial. It should be made that first year lectures shouldn't be conflicted by the tutorials (though with limited space hour, I can see where the conflict arises from).

I did not do physics in my IB. I assume that is the reason why SIS said I did not meet prerequisites. However, my academic adviser suggested me to take phys-101 and she knows my IB grades and MBB-bachelor degree requirements.

I really need to take this course in order to declare my major. I wish there was more space available. Or priority was taken off earlier to enroll.

I don't understand why the Spring semester does not offer any Computing Science courses. I'm am actually very disappointed since I really did want to take it. I was going to take a Computing Science course in the 2011 Fall Semester but I could not due to my schedule.

To be honest, I really hope I can enroll in MACM 101, I just transferred from Uvic but almost all the courses are closed by the time I accepted the offer.

I have been waiting to get into these 300 level courses for many semester but they are always full. All of my lower division credits have already excess the required credits. I have been taking more electives than I need. Is there any ways that you can make the classes bigger so I can graduate on time? Thank you.

More CODE classes and more offerings at Surrey would be wonderful.

2nd year students get junk the left behind

Confusing that it is only available in spring, every single year. The demand for the course might be lower in the fall, but it would be nice if there was a smaller classes in the fall.

I was unable to get into PSYC 300W which is a required course for my major. I just hope that courses that are required could have more seating in them, or have another course option. Thanks!

I was originally enrolled in the cert program but could never get the classes I wanted because they were held for people in the minor program. So I declared my minor and now I can't get the one class I need to complete my cert because they are being held for people in that program, which I no longer fall under.

I have been kicked out of the system twice and it's incredibly slow. It's very frustrating. My registration started at 3:30. It's now 6:48 and I am 47th on the wait list for one course.

I have been trying to get into some of these courses (crim 220) since spring last year, but it is impossible because the Burnaby classes only have about 100 seats, and the Surrey classes usually fill up before early enrollment.

I was unable to enroll in english 101 since it is reserved for students in another program. I was wondering when was thew earliest i could sign up for this course.

There were a lot of classes that were on the same day, at the same time. Mainly, Tuesdays at 10:30 and I found that pretty frustrating.

<tr>
<td><strong>If I am waitlisted for a class, what are my chances of getting into it?</strong></td>
<td></td>
</tr>
<tr>
<td>I will check back in Spring.</td>
<td></td>
</tr>
<tr>
<td>By the time I was able to enroll, there was nothing that I really desired taking, and I had to scrape through whatever was left in order to randomly enroll into something that could possible fulfill some purpose (elective, WQB requirement). Mostly I was forced to pick at random. As someone already struggling to get out of AP status, having such little choice in classes seems to be punishing me further.</td>
<td></td>
</tr>
<tr>
<td>This is the 4th semester in a row in which I could not get the courses I need. This is unacceptable when I pay money to be at SFU.</td>
<td></td>
</tr>
<tr>
<td>I find it very frustrating that I pay a lot of money to go to SFU but I never seem to get the classes that I want.</td>
<td></td>
</tr>
<tr>
<td>I am an IB student and I received a 3 in Math HL which translates into a b- not a b which this course requires. I am currently taking math principles 12 to update this mark and will definitely make the pre-requisite requirement. I was just wondering whether I could be let in to insure my spot earlier, since the mark will take some time to be received on your end. Since this course is a requirement for the program that I want to pursue it is necessary that i complete it within my first or so semesters at SFU. Thank you.</td>
<td></td>
</tr>
<tr>
<td>I hope to get into this class! Today is the last day for enrollment and I would greatly appreciate being accepted into the class. Being a mature student, I work full-time while obtaining my degree; would like to obtain my degree sooner than later, as it will affect my earning power significantly. Thank you!</td>
<td></td>
</tr>
<tr>
<td>The Communications courses I have selected are required for me if I want to move onto 300 level classes in the Spring semester and therefore graduate on time. I am majoring in CMNS and need both 260, and 253W to fit into my schedule. I am currently enrolled in the 253W course at harbour center, but the tutorial I’m in does not work with my schedule - I need it an an earlier time as I live at the burnaby campus and the rest of my classes are there. I also need the Kin 110 course, as I am applying for PDP after my degree and this course is needed. Is it possible for me to take Geog 111 and Geog 213 at the same time, instead of taking Geog 111 before?</td>
<td></td>
</tr>
<tr>
<td>I am a third year Ling major and I was unable to register for any upper division classes. The ones that were open I have either taken or do not have the prerequisites for because those classes are full every semester. There needs to be way more seats offered for these courses. As a major in Linguistics I should be able to register in any upper division ling class without difficulty. This is the third year in a row that I have had difficulty. I thought once my major was declared I would not have a problem, that was not the case. I would like to know that there is going to be a definite change for next semester.</td>
<td></td>
</tr>
<tr>
<td>By the time I can register my classes, none of the 300 level Econ classes offered is available. This is my first term here and I have no idea what I can do next. The lecture for HSCI 216 fit nicely, but the only open (and even the one waitlisted) tutorial conflicted with the HSCI 215 lecture. Increase the number of sections for upper division core ECON courses (301, 302, 305, BUEC 333).</td>
<td></td>
</tr>
<tr>
<td>I can assure you that a lot of business students are frustrated with the shortage of upper level business classes (especially the finance courses). I want to know whether or not SFU is doing something to improve this unpleasant situation. Being a business student is already stressful enough, we do not want extra stress resulted by this enrollment issue especially when we are paying expensive tuition. I do not want to waste a few more semester just because SFU does not offer enough courses. I do not believe it is fair for the students. Time is money and we certainly don’t want to waster our money and time. Please take our complaints into account when you decide to offer more classes. Thanks,</td>
<td></td>
</tr>
<tr>
<td>As a communications major I found great difficulty getting into the classes I required. A lot of the other 200 level classes I was interested in taking were full such as 226. CRIM 241 Tutorial conflicted with required PHIL 150 course.</td>
<td></td>
</tr>
<tr>
<td>Yes.It is my first semester at SFU.I already have masters in Industrial Engineering from Concordia University, Montreal, but the system tells me that I do not have the prerequisites for Chem 120, Phys 140 and I do not meet the requirement for the reserved seats for Math 151 and ENSC 182 that I don’t know what those requirements are. Please help me in this matter. Please make this a priority for Sociology majors. I have tried THREE Semesters and I have not been able to get a seat in the course. It is at a disadvantage for me because I will be unable to move on to upper level courses if I don’t complete SA150.</td>

<tr>
<td>Open up more classes and tutorials. for some reason permission was needed to get into course, was unaware of this this course conflicted with CRIM 330. More selections for CRIM 330 need to be put in place, as it is such a popular course every semester. The major subject in sciences (i.e. maths, chem, bio, and phys) have overlapping times. The CRIM courses have far too few spots.</td>
</tr>
<tr>
<td>There should be more courses available on the Surrey Campus and more seats and classes in general. For those of us who are entering their first year, we are given the lowest priority in selecting courses. This not only ruins our momentum but also dulls our passion.</td>
</tr>
<tr>
<td>Please list out the pre/co-requisites items. My student ID number is XXXXXX. I dont think that the courses listed above are not offered enough in this term~!!!!!!!!!!! As a student at SFU, it is very difficult to take courses during the enrollment dates because many courses are not offered enough!!!!!!!!!!! This make many sudent cannot graduate~!!!!!!</td>
</tr>
<tr>
<td>Very difficult process. Thought that the courses were open and then at the end, error messages pop up and nothing is available to register in. courses need to have more seats available.</td>
</tr>
<tr>
<td>Please have more classes!</td>
</tr>
<tr>
<td>I have gone three semesters and still have not been able to get in. class capacity is too small, and not many classes offer!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! so many final exams are held at the same time!!!!!!!!!!!!!!!!!!!!!!</td>
</tr>
<tr>
<td>No</td>
</tr>
<tr>
<td>HSCI 120 should open up more seats as it is a rather popular course. I really need these courses I did choose BUEC333 this semester, but I have to drop it since family issue. And I have to graduate as soon as possible. Thank you so much!!!</td>
</tr>
<tr>
<td>The course availability is fine, I am enrolled in my third year of studies yet it would not let me enroll in many third year courses. I am unable to take any level 300 econ courses and I am left with only 1 elective course for the Fall semester. I have already taken 3 level 200 courses and am in need of taking upper division courses!</td>
</tr>
<tr>
<td>Most classes fill up quickly. It’s impossible to get the courses that I need. Or the tutorials that will be open are the 8:30 am ones, which are really hard for me because I live all the way out in Richmond. The commute from there to SFU is about an hour and half or more in traffic.</td>
</tr>
</tbody>
</table>
I don't understand why these required courses are being offered yet the amount of students they allow into them is about ex. 60. However, about 100 students or more need to take these. Also since these courses are required they fill up very fast and people with later registration dates are stuck because they can never get into any of these classes. I really think there is a problem with HSCI course offerings and maybe they don't have enough staff to teach these courses. However, registration has risen greatly over the past years and that is the reason why getting into required classes is so hard, so what is HSCI doing with all of this money? Why can't they afford to hire more professors to teach these required courses? I am so frustrated because I have been waiting for 3 semesters now to get into the required courses and yet I never do. The advisors keep saying that I should take electives and fill my WQB requirements until space opens. I finished my WQB requirements now and all I have left is my required courses. Unfortunately, I cannot even get into these!

A concerned and frustrated student

<tr>
<td>I am an open school put the waiting lists for all ECON upper division's courses. Major/minor has a horrible registration time and is very likely to not get into the classes they need. Surrey campus student. This makes it very hard to declare a major/minor considering one without a reason. I double-checked all the requirements and it indicated that I should be able to be a confirmed student. However, only after I tried for the fifth time, placing my name on the wait-list, did the course allow me to enrol, but only on the wait-list.</td>
</tr>
<tr>
<td>ARCH 344, has only 60 seats! This is a very small class. Should offer more seats!</td>
</tr>
<tr>
<td>My enrollment appointment is always late that I hardly ever find upper level econ courses, and end up taking courses I don't want just for the credits. I hope this problem gets resolved soon because this is very costly for me as an international student.</td>
</tr>
<tr>
<td>It seems like most of the classes that I wanted, if not all, have been filled by the time I was allowed to enroll. I had to enroll in a whole bunch of electives just to keep my full-time status, and even they do not come at convenient times. It is the third semester that I have trouble enrolling.</td>
</tr>
<tr>
<td>Need to make sections of courses that are required for a major!</td>
</tr>
<tr>
<td>A major problem for course availability has been trying to sign up for Surrey Campus courses while not already a Surrey campus student. This makes it very hard to declare a major/minor considering one without a major/minor has a horrible registration time and is very likely to not get into the classes they need.</td>
</tr>
<tr>
<td>CAN school put the waiting lists for all ECON upper division's courses.</td>
</tr>
<tr>
<td>I am an open studies student and as my enrollment date was a week after others who have declared a major I was unable to get a spot in the course. I am an open studies student as I already hold a degree in Psychology from a different institution. This is very discouraging as I am taking the course as I plan to apply for graduate school but seeing the number of spots available, I will have a tough time getting in the course no matter when I try to enroll in it.</td>
</tr>
<tr>
<td>Although one of my desired classes was marked as available, I was not able to enrol in the class for an unknown reason. I double-checked all the requirements and it indicated that I should be able to be a confirmed student. However, only after I tried for the fifth time, placing my name on the wait-list, did the course allow me to enrol, but only on the wait-list.</td>
</tr>
<tr>
<td>I looked for IS220 for the Spring 2012 semester and it isn't offered then either. Perhaps it's not a big deal, but for a class that is a pre-requisite for all three IS streams I would've assumed it would be available in either the Fall or Spring.</td>
</tr>
<tr>
<td>Being an Econ major and not being able to get any Economics classes is quite frustrating. I have to settle for electives, half of which are already full or clash with other classes. Also, being a Burnaby student, I can't enroll in classes in Surrey or Vancouver.</td>
</tr>
<tr>
<td>I feel of time and semester is wasted just trying to get into your required classes.</td>
</tr>
<tr>
<td>All of the Criminology courses for upper level 300 are full and classes are closed. There are no wait-lists, even the elective courses are full, I didn't get any classes I needed for my degree, I have only a handful to graduate however it will take me an extra few semesters at this rate. I don't understand why there aren't more sections available or wait lists if people drop it or get dropped for not paying. Its not a fair system at all. Some people register in classes and drop it later if they change their mind, however I will not know because it just says class closed.</td>
</tr>
<tr>
<td>I took chem 121 in the spring 2011 term, which is the prerequisite for chem 122. I am still unable to enroll in the course.</td>
</tr>
<tr>
<td>The class has space, I want to get into the class. I have 60 credits, but SFU cant show it because I did not update my latest transcript. How do I contact the professor, who do I talk to so I can get in and enroll before I get shuffled to the wait list!! Thank you!!</td>
</tr>
<tr>
<td>On the wait list for GSWS 101 and needs to get in for my minor requirements, no other open GSWS fit into my schedule or are open. Thank you.</td>
</tr>
<tr>
<td>No</td>
</tr>
<tr>
<td>I don't completely understand why there are still spots that are coming up as available but I am on the waiting list.</td>
</tr>
<tr>

<tr>
<td>-----------------------------------------------</td>
</tr>
<tr>
<td>It's quite ridiculous how the state of this University has dipped since I began my first year. Year after year there are less seats available for courses that are REQUIRED for my program. What is it? A cost saving measure? Inadequate planning? Whatever it is, I feel this is simply unacceptable. I really do not enjoy wasting my time and money taking on more useless semesters that do not contribute towards my diploma. How is it that I cannot get into a SINGLE course that I require for my finance and management science concentrations. Yes you heard right.... not a SINGLE course. You can be rest assured if this situation does not improve I will be taking my studies AND my tuition elsewhere... UBC perhaps. So please... fix this XXXX you call &quot;enrollment.&quot;</td>
</tr>
<tr>
<td>Please make more space for English, it is required, as well as needed as WQB requirement. I have been waiting to take it for more than 2 terms, and I still unable to get in.</td>
</tr>
<tr>
<td>I had conflicts with chem 121 and math 150 at the surrey campus both in one semester</td>
</tr>
<tr>
<td>This course is distance ed but the waitlist had already begun before my registration date. I am a transfer student with more than 60 credits, but because this is only my 2nd semester at SFU I had a later registration date and was unable to enroll before the waitlist began.</td>
</tr>
<tr>
<td>I really DO hope to get into the Econ courses, I need to take them. Please help me, if you can overload me into classes, that would be greatly appreciated. Thank you.</td>
</tr>
<tr>
<td>I'm currently trying to take courses at Surrey campus, that's why I don't have much choices. This course is necessary to all engineering majors and is mandatory, so in regards other sections should open up or capacity should increase.</td>
</tr>
<tr>
<td>I reapplied at SFU to finish my last semester before graduation. I received the latest possible enrollment date even though I have 120 credits, AFTER students who have less credits.</td>
</tr>
<tr>
<td>I would like to enroll please, I do have 60 completed credits, but my latest transcript has not be updated to the SFU system. I am eligible! How do I enroll before going on the waitlist! I really want to be in this class so I can get a science credit. Do I contact my prof and how do I find them? Would you be able to resolve this for me? Thank you!!</td>
</tr>
<tr>
<td>no</td>
</tr>
<tr>
<td>This class should be offered!! A lot of people would want to enroll in it. I hope that you can consider!</td>
</tr>
<tr>
<td>I signed up for BusOne on the Surrey campus. I am surprised that there is no room in this course!</td>
</tr>
<tr>
<td>none</td>
</tr>
<tr>
<td>I need to retake ECON210, I would like to know when does ECON210 will open?</td>

<tr>
<td>This course has a time conflict with another required course, come on guys, at least design the schedule so that the required courses don't have a conflict. Very disappointed.</td>
</tr>
<tr>
<td>I find that because we must do breadth courses we take spots away from people who actually need the class for their major. Please list the things I need to do before I can meet the requirement and book this class.</td>
</tr>
<tr>
<td>Yes, lower division courses at the 200 level should be reserved only for students majoring in their respective fields.</td>
</tr>
<tr>
<td>For CMPT225, I'm taking the pre-requisite course(CMPT125/128) right now and I want to take CMPT 225 right after I finish the pre-requisite. Is there any way to get into the course? For LING110, it says im not &quot;available to enroll at this time.&quot; and I wonder why. Is there any way to get in?</td>
</tr>
<tr>
<td>I have been trying to get Crim 131 since Fall of 2008. I require it to move on in my Criminology Degree. This is preventing me from moving forward.</td>
</tr>
<tr>
<td>MKost desired and key courses unavailable due to late registration date. As a fifth year student enrolled in the Duel Degree Program with over 100 credits - and a decent GPA standing of 3.0 I don't understand how or why I received such a late date for registration.</td>
</tr>
<tr>
<td>I'VE WAITED FOR THE BUS 315 AND BUS 316 FOR 2 SEMESTERS.....!!!! SO I CHOOSE BUS 478 BUT IT NEEDS 90 CREDITS. BUT I MEET ITS OTHER PREREQUISITES. ALSO, I'AM TAKING AN ECON MINOR BUT THERE'S NO CLASS LEFT.. I HAVE NO IDEA WHAT SHOULD I TAKE THIS SEMESTER IF I KEEP MY MINOR,!!</td>
</tr>
<tr>
<td>I think it's silly that I'm in third year and can't take any third year courses in my own major. If I can't get in now with my current GPA, I wonder if I'll ever be able to get these courses and finish my major.</td>
</tr>
<tr>
<td>I've been having problems in getting courses that I want. In addition to the late enrollment date, I'm in co-op. This course is only offered in the Fall and I'm supposed to go on co-op term in spring and fall 2012 (alternating terms as I'm already in my third year). Contacted academic advisor and they said that there will be no expension on class capacity due to the trip. Very hard to get subjects wanted!</td>
</tr>
</tbody>
</table>
I wanted to enlist in several IAT courses, but I found that SFU has created a Catch 22 situation for students who wish to enter SIAT. You can't enlist in an IAT course because almost all the seats are reserved for SIAT students and you can't become an SIAT student until you've enrolled in IAT courses. It's a completely ridiculous system.

The main problem is the tutorial times for MBB 321. All of the sections but one conflict with the other required MBB third year courses. This tutorial then conflicts with Physics lecture. I am still deciding which course to take as I can only take one or the other.

Should have more time slots and sections based on the number student accepted.

For KIN 142, the online courses does not hold enough space for students who would like to take it online. I have been eagerly waiting to be enrolled in this course now.

As for MBB 321, I am hoping more TUT would be open on possible on Fridays as on the other days, it would conflict greatly with other MBB tutorials.

Thank you.

My enrolment date was too late for me to get into any courses I wanted.

It is extremely hard for me to take classes I need to DECLARE my Major (Psychology), when they fill up so quickly. This prevents me from enrolling in other available classes, especially Upper Division, that ARE available.. because they are only open to students who have declared their Major. How can I ever move forward when the limitations are so strict? Waiting until open enrollment leaves me with no other choices at the end. Someone needs to address this & if students declared in a Psychology plan don't choose specific classes right away, we shouldn't have to wait until they decide to do so.

Also ENSC 182, couldn't enroll to those classes at Surrey Campus.

For entry level courses that are required, and most popular (such as CRIM 101), if more lectures were offered (in my case, either at the Burnaby or Harbour Centre location) it would greatly increase my chances of gaining a spot in the class. This will be the third semester I have tried to get into Crim 101 in order to finish it as I work my way towards a Crim Major, however the course is always full within a day or two of registration.

There has been a really big family issue and housing problem that I don't really have any telephone and computer access, so it leaves me so late to enroll into courses, Please kindly help my situation here/

Cannot enroll in the classes even with open waiting lists. The system instead prompts that the waiting list will become full for the semester.

Need more labs for some courses

I applied within 12 hours of my opening, and I'm in my final year and all economics courses were full. I hope I'm able to get in next semester

This course is always full by the end of the first week of enrollment, is there anyway to add additional sections either on campus or via Distance Ed?

CMNS 260 particularly is ALWAYS full, or it is offered at only one campus every semester, making it harder to get into the class.

Won't let me register in any sections.

I need IAT 336 to graduate. I've tried to get into that course, however could not at the spot.

I find course selection as a very frustrating process. I wasn't able to get into the courses I planned to enrol and the above mentioned courses are not available until the summer 2012. All those courses above are reserved for SIAT students and yet they filled up before most of 3rd year SIAT students even have a chance to enrol.

This course is a requirement of mine, and going into first year studies there aren't many options as you need pre reqs for almost everything else. I now have to take a course related to my studies but not actually required. I wish I didn't have to spend the time or money on that.

I would like there to be more French classes, because that's what I'm trying to major in, and I couldn't get into any 200 level FREN classes. Also, all the KIN classes are saved for KIN majors, and I'm not a KIN major but I do want to minor in it, but I can't get into any! This is the second semester in which this has happened.

I attempt to enroll in one of these three History courses every term and never succeed due to space full. I have never taken a history class during University but would like to explore all subject areas during my undergrad.

My only general comment is that every year I constantly have to shift around all the courses I'm planning on taking because the classes that I want to take always fill up long before my registration date. This is quite frustrating.

Hope IAT312 to be offered next semester (2012 Spring).

I really need Crim 131-3 to complete my degree and with it being in Surrey the schedules conflict with my other classes. Can you please add a session at Burnaby or other days as well?

<tr>
<td>I need this course. It fits my timetable, the conflict is the exam date. I would like to take this course and ask for an adjustment to my exam date.</td>
</tr>
<tr>
<td>Very upset that I could not get the courses I needed.</td>
</tr>
<tr>
<td>I have tried to register for a number of courses in Criminology, Psychology, Sociology &amp; Anthropology, and Archaeology all to no avail. I allowed myself a number of options in all these areas, and was surprised to not be able to get to any of the courses I desired at this time.</td>
</tr>
<tr>
<td>I was deeply shocked and disappointed to discover that none of my required courses were available when it came time for my registration date. I've been attending university for quite a few years now and never have I encountered a situation in which every single section of every single class was full. I was even further shocked when, upon contacting my department to receive help with this obvious problem, I was told to wait and keep checking and that hopefully by the middle of September a course might open up. I for one do not see how waiting until the middle of September to find out whether or not I am actually attending university this semester is a viable solution. This entire registration process has been quite disconcerting as I am an international student and am relocating specifically for the purpose of attending this university. Any assistance that anyone at your university could offer me would be greatly appreciated.</td>
</tr>
<tr>
<td>I am wondering why there aren't reserved spots for Business students in the Business courses? I will be doing my fourth semester in the summer and I am concerned that I won't get into BUS 254 which I need for my lower division requirements.</td>
</tr>
<tr>
<td>should explain the order of the enrollment to ALL students. Most friends including me have a pretty late day to enroll.almost all courses are full which is really annoying. I cannot take the courses I like cause there is no choice left for me. Also, hsci214 was open for registration but it was closed recently. I sent a email asking why and they replied me that they were advertising for a teacher - which is too ridiculous! The time of hsci214 fits my scedule but now they cancelled it! Can I at least know the reason why my enrollment date is so late like this?and how can I do to make it earlier?boost my gpa?Contact me by email please. Thanks.</td>
</tr>
<tr>
<td>CMNS 220 is a requirement course, and it is not available for fall 2011, spring 2012, and also summer 2012. CMNS 260 is also a requirement course, and it only comes with 72 seats on fall 2011. There is no CMNS260 on spring 2012 and also summer 2012. In this case, I do not think I can graduate on time.</td>
</tr>
<tr>
<td>I am not able to take Math 157 because I had not met the pre/co-requisites. However I retook Math and pass the requirements already.I have talk to my school and they told me to send to transcript PSI to the Univeristy. I have send it PSI serveral of time now. Please update my marks as soon as possible because I am scared I will loose the seats.</td>

<tr>
<td>Open more sections....</td>
</tr>
<tr>
<td>other psych courses i want, conflict with my schedule</td>
</tr>
<tr>
<td>COMMENTS</td>
</tr>
<tr>
<td>-----------------------------------------------</td>
</tr>
<tr>
<td>Why were unrelated 4th year chemistry courses that are offered once a year scheduled into the same time slot? It should be possible to enrol in both CHEM 464 and CHEM 465 because they are not pre-requisites for each other, yet they are scheduled into the same time slot. If I wanted to take both of them I would now have to wait until next Fall because I can only take one of them this year. On an unrelated note, I find it interesting that I have to take an upper division B-Hum course because if I do a lower division one I will end up exactly one upper division credit short of the requirement for graduating (60 UD units) when I meet the total credit requirement (132 units).</td>
</tr>
<tr>
<td>As soon as EDU 100 is available would I be able to get into it? (burnaby campus only since i live in langley..)</td>
</tr>
<tr>
<td>The class sizes are really small and the wait lists are also too small. Some cap at 6 so it's hard to show the people that increase the sizes that there needs to be more spaces. I wasn't able to get any of the classes I needed this semester and I already have taken all of my breadth requirements.</td>
</tr>
</tbody>
</table>
| According to my class schedule, this course should fit in fine. However, the system says that it is in conflict with my CHEM 110 course. 
Everytime they give us a date to pick our classes, the system goes down. We never know when the system is going to be up and running so by the time we find out, all of the classes are taken. All of the classes i needed are full. SIS is not a very good system to pick classes. The website needs to be revised ASAP |
| I have the prereq!! |
| Criminology courses in surrey should not be so restricted that any other students can't get in. Or at least explain how someone can get on a priority list. |
| I don't know why i can not select this course |
| The reason I could not get the course I wanted is because I graduated from a school in Washington state, which requires biology to be taken in 10th grade. This course requires a 12th grade biology, which goes with the Canadian system which is not fair to students like me who wish to achieve a degree that requires this course. I took biology in 10th grade and advanced biology in 11th grade so i do not see why this course should require me to have a prerequisite of 12th grade biology. |
| I really want this two course for next term, is there any possibility can help me? thanks. |
| BUS/BUEC courses should have reserved seating. This would give business admin students a chance to enrol in required courses regardless of their enrolment date. 
The prerequisites which are written in the siat website are just to have minimum of 18 credits and as in my advising transcript I have 32 credits. |
| I THINK THERE SHOULD BE MORE WAITLIST OR CAPACITY ADDED |
| Need a better system, this is absurd. We are paying thousands of dollars for courses that aren't our first option. |
| I have had problems registering in the past because I was not a student who the spaces were reserved for. I only try to enroll in classes that I need for my degree and I am declared in all my programs. So, if a student in a program needs a course for their program, why cant they get in just because they are not specifically in that department? Why can't there be spaces reserved for students completing that certificate or minor as well as all the other reserves? For example, I am completing a Cognitive Science Minor for which I need an upper division psychology class. When I went to register for a class (from the list of classes approved for a cogs minor), I was waitlisted even though the class had more than 50 spaces open at the time. I also emailed the advisor to ask about this. My question was sent to the Head of the Department and I still haven't heard back. This was LAST Semester! |
| It is very inconvenient to have the CRIM 300 class completely conflict with the CRIM 314 (Mental Disorders) class. It's very frustrating that CRIM 330 is already full, when it is a required course. |
| This course selection was actually better compared to my first 2 semesters. I'm hoping that means there is some improvement in the system but if not then please continue working on better course registration. |
| Hi, 
There was no availability in any of the courses required for my Econ major. Please make available a 300 level econ course. I am falling behind and i wish to take 300 level course to pursue my Econ Major . Thank You |
| I was enrolled in the IB Diploma and I wasn't able to undertake the Chemistry course, however to make up for this I'm currently undergoing self-study for Chemistry by studying the IB Grade 11 & 12 Chemistry via the course outline provided. Hence, by the start of the term I should've met the pre-requisite. I believe I should be ready for the course - CHEM 120 come Fall. |
**COMMENTS**

yes the tutorial schedule is not fair only one available on tuesday when the course is offered they should added more tutorials on tuesday because the tuesday tutorial is all full add another one from 5:30-6:30 on the day of lecture better than making 2 other tutorials not even on the day of lecture and so late in the afternoon.

My registration date was annoyingly late, leading to a lack of choice overall AND class conflicts (usually due to tutorial times). This is particularly frustrating as it is very difficult to fill out one's lower division requirements if one cannot find the courses needed to finish the requirements for the Upper Division courses.

The course that I wanted to take was Introduction to Fiction at the Surrey Campus because the curriculum seemed more fitting for me. However, I could not take that course because I was not eligible for a seat, meaning priority was for Surrey Campus students, while I am attending the Burnaby Campus

My registration date was so late that I could only enroll into 1 class when I wanted to enroll into 4. Thanks SFU!

I was accepted to the Honour's program in May, 2011.

Course availability is outrageous! Its been 3 years at SFU and I can understand having difficulties getting classes in the lower divisions, but as a declared major, there is no reason that I should be last in line for course registration, leading to a complete inability to take the classes that I need for graduation.

The SIS system should not 100% prevent you from enrolling in a course due to course conflicts. The system ought to only WARN the student about conflicts if an oversight occurs at which point the student may select the priority class. Because of the order I had selected my classes, I am now prevented from declaring my major since, while I was making adjustments, it filled up and am now behind in my schedule. I must say it is quite frustrating to say the least.

Most of my friends including me cannot take any of those courses stated above!!!

A lot of the English courses were at awkward times, as in the evenings which is not very safe for a female student travelling across campus during the fall semester in the dark.

I am in my second term and I have yet to be able to receive any classes I register or. I am currently on the waiting list and I guess my question would be how are the registration dates given. Will my date ever be reasonable enough for me to get in to a class I desire, and not have to be place on a waiting list or unable to register for the class.

I am disappointed at this early date I was unable to get on the waiting list.

The required courses full up quickly didn't even have the chance to choose the courses when it's the enrollment date for me. Then have to spend a lot of time refreshing the page constantly to see if anyone drop the courses that we need.

Stop reserving courses, and just make a separate class for those you are reserving for.

Course selection times were very unfair. Second year students have the latest times which makes it virtually impossible to meet the requirements to declare your major by the end of second year.

I wish I was supposed to declare my major when I have tried for the past 3 terms to take courses and am unable to get a spot?

The problem above happens only to these two particular courses among 400-level CMPT courses, which is weird.

I don't understand why the BGS Ed get reserved seats, whereas I am a BEd student and need this course to fulfill my requirements.

I was able to get the required courses but not at the campus I wished. For this program sections are assigned rather than selected by the students through the registration process. It would seem that if there is higher demand for particular sections (in this case the Surrey campus), students who register earlier should get the priority. I'm also unclear on the purpose of our not knowing the particulars of our schedule until the first day of class.

this is really upsetting that SFU is only offering one section of each one of these classes and only once a year and there are so many students who want to get into these classes. We pay a lot of Tuition but it seems like we are getting less and less services every term.

For a 200 level course offered in Burnaby, there should be a much larger capacity for this course as 2nd year students already have a very difficult time getting a spot in this course. I will be entering my 3rd year this fall and I am not able to even register for a course that that is a 2nd year requirement. The evening class conflicts with many other 300 level courses as well. I find that, overall, there is not enough availability for a course being offered on different days of the week. For example, having 207 taught on only Wednesday in Burnaby is huge inconvenience especially when many, many business courses are on Wednesdays.

If it were to be offered on two different day then that would be of huge help in scheduling one's courses.

Lecture is shown as available with twenty-two seats open, however all tutorials are closed.
### COMMENTS

I am capable of taking 3 year and 4 year business but the system does not allow me to register because I am in economy which I am planning to go to business fall 2011.

More Distance ed. would be preferred for this class, as it is a VERY popular upper division elective.

Also, too many courses in the communication faculty conflict because their times overlap, or they are only offered one after another at different campuses.

All courses that I would like to take are full (even electives) that I am afraid I will not be able to graduate on time (within 4 years), which is worrying. I plan to take 4 courses every semester including summer however course availability made it hard and so far I can only register in 2 course that aren't exactly the course I would like to take. Only being able to enroll in 2 course this semester will slow down my graduation by a lot.

I am completing a minor in Kinesiology (enrolled in last required course this fall) and aspiring to obtaining a major in BA Health Sciences. As a competitive international figure skater representing Canada, I wish there was more flexibility for me to enroll in courses due to my intense training schedules, while striving to obtain an education at the same time. My schedules only allow me to take 2-3 courses each semester. I got a late enrollment date this time and could not enroll in HSCI 130 Foundations of Health Sciences which is a prerequisite to other HSCI courses I wish to take next year. The only classes that work for me are HSCI 130-D100 (Cls#13795), and any one of Tutorials D112 (Cls#13827) or D111 (Cls#13825) or D109 (Cls#13813). These sections are now closed and even wait listing is not possible. Not being able to complete HSCI 130 this fall will set me back in my pursuing this degree. Thank you for your attention.

I have been trying unsuccessfully for two semesters to register for courses that are a required part of my program. I do not understand why they are no open spaces.

More available seats for upper level courses!!! No excuse!!!

I have been in SFU for almost two years and I never had a chance to study my majors.

For people with course selection on the last days you can’t get into any of the classes you need and end up taking classes you don’t want or need. A waste of money and time.

SFU needs to open up more classes or reserve more seats for students in the business faculty.

Every semester I sit at my computer at registration and am annoyed with your system. How am I to graduate on time if I cannot get into any of the classes I need to graduate? I am going into my fourth year and am still struggling to get the classes I need. Very frustrating!

no

I hope I can get any one of the 3 courses in this semester in order to save my time.

Thank you so much;

needs more sections or increase the class max.

A glitch in the online registration put my registration back two days until I could get the necessary override from a Academic Adviser. During those two days, three classes I needed filled up and I had to make arrangements to take other classes. The Academic Advisers have too large a pool of people to serve, and due to their limited hours, students suffer. They need to take drop-in advising every day, because their appointments book up so fast that the only option other than going to a drop-in session, is to wait an entire week or more to see them, in which time all of the classes you need will be full and you’ll be out of luck.

For 3 semesters now I have been unable to register for my upper division credits because there are NO spaces left in any of the sections for my required courses. As a result I am finishing my last 39 credits yet have 30 credits of Econ upper levels to complete before graduation. This semester I am still unable to register due to lack of course availability, that leaves me with 30 credits of course work left for my undergraduate with all 30 credits dedicated to Econ upper requirements. This is outrageous, this lack of availability is prolonging my academic career and forcing me to take over the required 120 credits in order to spread out my workload while still being a full time student. I hope the school and the department and fix this ONGOING issue.

I believe for English 199 that they should offer more seats for the class because that course is a popular course and having only 17 seats is not enough.

I am a college transfer student. By the time I am allowed to enroll in classes (which is today August 25th) there’s no space left already.

Conflicts w/ PHYS 140 lab! Due to this I cannot take all 3 sciences and 1 math course as required for my area of study. Unsatisfactory class sections offered at SURREY campus.

Please open more classes/sections for HR 400-level business courses, if not, please enlarge the class volume. There are only 25 seats in 485, it means that only 25 people can get in. But there are tonnes of people who are concentrating in HR or joint major with Psych... don’t you want them to graduate earlier???
### COMMENTS

Health Sciences does a consistently poor job every semester in ensuring that there are adequate classes available particularly for the upper division students. As a third year student, I truly felt that I was left to fend for myself and basically find any courses that had absolutely NOTHING to do with my degree just to fill up my semester. I find it unfair that at this rate, I will probably not graduate on time because of insufficient class spaces every semester along with my always late enrollment date. SFU as a school overall needs to be able to ensure that there are adequate classes every semester. Very disappointed and frustrated with both the faculty of Health Sciences and SFU collectively as I feel that I am being thrown around for a loop around the system because I am not able to get any classes that I NEED.

Was also not at the desired campus.

I really need Bus 201 on Thurs in Burnaby Campus.

The day that opens for us to select courses differs so I get the later date. I think this does effect me.

More labs should be opened since there are many seats available in the lectures still

I was planning to choose MACA101 PHYS131 and ENSC 100W ! last two terms(2011spring 2011summer), but these are all closed that time.... Unfortunately, the same thing happens this term(2011FALL), which is so bad to me, because high level courses all based on those courses.

I’m very worried because this is the second time I’ve this has happened to me. I wanted to take IAT 338 in Spring 2011 but when my enrollment date came along, the class AND waiting list were already full. The same thing happened again now while applying for IAT 338 in Fall 2011, and I’m extremely nervous about waiting another semester and have the same thing happen again.

the course sizes are too small

Course selection is unfair because there is never enough space in class sections

I am approaching my second to last semester at SFU and I really really need a b-sci class and I Want to have it done this coming semester. I prefer online because i have a full work load and I am able to balance 5 classes better if one is online. I also require it to be in kin because I struggle with science classes but kin is the type I do best in.

Courses that I wished to take were filling up before my enrollment appointment, and do not offer a wait list. Obviously, if there is enough interest, a second course time would be welcomed by the students that could not get in.

As a student who is taking Communications as a minor, these classes are essential for me to take as prerequisites for my future Communication classes. Also, I need these classes because I need to get a good head start on my minor.

Wanted to apply for distance education because Burnaby offering conflicted with another course. Also tried to apply for surrey course but filled up, when open to all student.

Please seriously consider my enrollment into the HSCI-130 Foundations of Health Science Course offered on Tuesday's 2:30-4:20 pm (D100 - lecture) (137950) and Friday 2:30-3:20 pm. Tutorial Tuesday 4:30-5:20 p.m.

I am a mature student who requires to work full-time and Tuesday's is the only day of the week which I am able to commit to a full-day off for my two courses (as well as the Friday 2:30-3:30 pm). My goal is to take two courses per semester; I am in my third year of the General Studies Degree; however, transferring to the Health Sciences Program and therefore require this course in order for me to continue toward upper level courses for the winter semester. Thank you for considering my request. Sincerely, XXXX XXXXX

not many crim courses available at different times

Is there any way to be contacted if and when a space in these Distance Education Courses becomes available? I do try and check everyday to see if students have dropped these courses, but I had no luck. Your efforts and suggestions are greatly appreciated.XXXXX XXXXX

frustration

I find it very frustrating that I am a business student and I cannot even get into my required courses because they are all full before my enrollment date. I have a fairly high CGPA and yet I am still unable, practically every semester, to get the courses that I need.

I wish more flexibility between Surrey and Burnaby campuses. I could have taken Fren 211 in Burnaby but Explorations just offers Fren 210 in Surrey Campus. there are too many people take these courses every semester, please open at least one more lecture for student who choose courses late.
**COMMENTS**

I really think you should specify more on WHO the reserves are for, because reserve for Biomedical physiology and Kinesiology students is a wide group and when the reserves are meant for a specific concentration. It makes enrolling harder for students to know whether they are in that "reserve" slot or not.

I don't understand how this course became full so fast, it is a distance ed course, which would most likely mean more students are accepted.

Very poor. Most of the classes said they were full but when it came to enlisted/ the final step, it said they weren't. Very frustrating.

I need IAT 336 as a required course to graduate. I've tried to get into the class couple of times already, but couldn't get a spot.

I was disappointed to not get into any of my desired courses due to my late registration date which caused the courses to become full before I was even eligible to enroll. I felt that this treatment was unfair to not only myself, but other students as well who experienced similar difficulty with enrolling in classes this semester. This was the first semester I had experienced difficulty for enrolling into classes.

This is my 2nd year of consecutive semesters trying to get into this course. I am now in fourth year. This is ridiculous

Economic courses are impossible to get into for me. They filled up about 3 days before my enrollment date and there were only 3 courses for me to choose from as I have done Econ 282 previously. It is very frustrating when I cannot get into required courses.

When selecting "Show open classes only" WHY does the system show classes which are closed, allowing you to select the course only to have it show at the very END that the course is closed due to capacity? EXTREMELY frustrating

how come the cmpt 120 class is full when there are still space left?

I will be part of the XXX XXXXX team at SFU. We have practice everyday from 2:30P.M. - 5P.M. All rhe classes I want to attend have lectures in the morning or afternoon, none at night. Most of the lectures offered like ECON 103-4 Principles of Microeconomics and Canada to Confederation are ate the same time from 8:30 A.M.-10.20A.M.

Please offer more SA (A) designated classes! I was not able to take this semester's A designated class because of conflicting schedules, and if I don't get into one next semester I will have to delay graduating.

I can't take the core business courses that I need to take because they are all full. This problem should be addressed in order for students to be able to graduate in the required amount of time.

I just find that there are always no enough seats for me in any semester !

My enrollment date is always too late!

I am disappointed that a distance course would be full on July 19 of the registration.

Does not make sense; there is space in the lecture for ENSC 100 but not in any tutorial & ENSC 101 is a corequisite to it, but there is less space in the ENSC 101 than the ENSC 100 even though you must take them together.

I have been trying to get into HSCI-305 for 4 semesters now. Due to the fact that this is a mandatory class for health science majors, I hope the class size / wait list capacity opens up.

I am technically a 3rd year student entering my 4th fall at SFU and was unable to register in any 300 or 400 level classes. I am very dissatisfied that I was only able to get into 2 classes delaying my graduation further

Every year there are fewer and fewer FPA courses available, especially art and culture required courses. This is getting completely ridiculous and unacceptable - I need to graduate soon and the courses I need are not available for me to take.

The course filled up and it was also scheduled at the same time as another course.

The BU/ECON courses required for graduation have been full for the past couple of semesters

I am currently waitlisted for every course I wish to take this semester. This should not happen, I want to go to school and take these classes which are required for my desired degree, not be told that there is no space for me.

many course available but I had a lot of conflicting exam dates and times

BUS 393 could've fit perfectly into my schedule. However, the system wouldn't let me enroll in it as the final exam clashed with another class' final exam.

I needed this class as my last pre-requisite for me to declare my major and the class filled up before my registration date.

I don't understand how this course became full so fast, it is a distance ed course, which would most likely mean more students are accepted.

Very poor. Most of the classes said they were full but when it came to enlisted/ the final step, it said they weren't. Very frustrating.

many course available but I had a lot of conflicting exam dates and times

BUS 393 could've fit perfectly into my schedule. However, the system wouldn't let me enroll in it as the final exam clashed with another class' final exam.

I needed this class as my last pre-requisite for me to declare my major and the class filled up before my registration date.
I went through the course selection two days ago and found a list of four courses which at the time were open and did not conflict with each other/my work schedule. Other courses that I would have liked to take were not offered this semester or else had conflicting times, either with each other, the four courses that I chose to take (Monday afternoons and evenings appears to be a very popular time for 3rd/4th year history and English classes) or else with my work schedule. When I attempted to register today three out of the four classes were closed, without even the option for being wait-listed.

Since this course is only available in the fall semester (which I heard from friends), not having it this fall will really interrupt my schedules. While I do have FALX99 in fall to finish, I really hope I could take these two at the same time due the special available time that ENSC 100W &101W have. Please contact me if there is any chance!

I was unable to enroll in any courses located on the Surrey campus.

I was unable to enroll in any courses located on the Surrey campus.

Please contact me at 604-440-9977 as soon as possible

Will they open more tutorials up closer to the start date? If so, can I receive notification?

My enrollment date is very late. There is no space left for these hot classes. I wish enrollment date of next term will be earlier. Thank you.

This is my second time trying to get in this class and it is always full by my enrollment time.

we need to have these CORE courses for graduation available more and with more spaces. It’s kind of ridiculous for a 5th year student to not be able to get into these courses. I need 2 more semesters to graduate if I could finish these, but now I’ll most likely have to wait another year, which is ridiculous. My opportunities to my career is severely jeopardized.

Do I need to finish X99 at first before MATH 100&MATH 157&ENGL 199?

I am extremely frustrated by the lack of senior level classes available for BA students. This is my last year and I cannot get into any senior level options as they are ALL FULL. This happened to me last semester as well. I have taken my concerns to the advisers, whom were all extremely helpful and professional. However they are powerless to address the root, systemic problem - that being that there are simply not enough classes. I am not sure if graduate students have access to the seminar and senior level classes if so I think that this policy should be reconsidered, or at least undergrads should be given first choice. I really enjoy the classes that I have taken, and as such have been very excited to take senior level classes - however all the classes I get excited about taken fill up even before I have a chance to register. This issue needs to be addressed. Thank you.

The reason I am taking another semester at SFU is because I need to fulfill PDP requirements for Canadian History which I did not do during my undergrad. By the time I was able to register as an unclassified student all the spaces are filled. I feel that students with circumstances similar to mine should be given more options or otherwise, there should be more seats open.

I think it is ridiculous that as a second year Criminology student, I was unable to get into ANY in person Criminology classes because they were all filled up.

They have been full for three terms now at SFU.

I take most of my courses in surrey and I am no registered as a surey student, I am confused.

It's not fair to late enrollment student like me(FIC student)

Please let me in, I need it as my transfer credit

Competition for enrollment in ECON courses remains ABSURDLY COMPETITIVE. The number of sections for the environmental economics course is insufficient to meet the demand.

I was assured my transfer credit would be ample to get into these courses.

To find out who is going to drop the class which could help me to sign up for it

Kinda dumb and a bit of a let down since there were 3 spots left and I thought I had it, apparently not.

Lack of multiple sections for seminars problematic given small size - highly unfair for high-scoring students who are not enrolled in athletics programs (and thus do not benefit from extremely early registration).

It is my third year at SFU and I still cannot get in an IAT class because of the 'locks'. The class is full even before the lock dropped. The problem - must be IAT student to be able to register. I cannot even apply for an IAT minor because I'm required to have one IAT class. Please fix the system or offer more classes, since everybody knows how in demand this class is. I am still hoping to take this course because I find it VERY relevant to the jobs that I apply to. PLEASE HELP!

This course should really have more sessions. It always gets filled up too fast.
**COMMENTS**

Ling dept needs more availability in all classes.

A very popular class but more sections should be made available. As a second degree student, I have tried to register last year but the -one- class always fills up before my registration date.

My late registration time meant I did not get courses I am counting on for both my major and breadth credits.

EASC 103/196 also not offered; ENSC 106 Time conflicts; Kin courses also said I didn't meet the criteria for reserved spaces.

I need it to be accepted into the Kin minor program, however there is no longer any space.

Always no ECON course left. I saw people post online for selling ECON 300-level course. I think it is illegal!!!

I don't understand why there wasn't space left in a distance education course!

I would like to register for the class code number 5388 in burnaby on Wednesday: 2:30 - 5:30 pm.

Thank you for your time.
Regards,

XXX XXXX

The reason I am enrolled this semester is to take these courses in order to qualify & enroll for the PDP. If I can't take all these courses this semester, it puts me back an entire year, and almost defeats my choice in career.

I am currently on the waiting list for all my courses, this has left me feeling helpless. This lack of control over my future makes me feel very stressed, yet I do not wish to enroll in any open courses left because it would be a huge financial burden to enroll in something I feel I am not interested in or something that is useless towards my degree.

Even with a scholarship-granted early enrollment, courses were already full. It's obviously really inconvenient.

Please fix it, I have been trying to take these courses since my class enrollment date (7/26/2011). I am aware that both of them are surrey class, so I need to wait for the date when burnaby student can take surrey courses, I believe it is the 30/7/2010. But even today, 7/31/2011, I am still not able to take any of them. These courses really affect my future class schedule, it would be please to see the problem solved. thank you.

None of the upper division courses that I needed to work for my Economics degree Major are available. During registration almost all classes (more then 10) that I needed credit for my upper requirement was all full and not available. I thought by declaring my major as Economics I would at least get one course to help me for graduation.
I feel like I am simply wasting time and money taking lower division courses to get more credits. Will definitely not recommend the Economics Major to any of my younger peers.

What does it mean when a course is "reserved" and that I do not meet the requirements for the "reserved" capacity? And how can I avoid encountering this problem? Thanks.

Bottle neck effect.
The department accept the number of admission is greater than the number of total seats.
This creates everyone who cannot enroll in core courses very frustrate and feel negative toward the school and the department.
Student may accept pressure from midterm and final exam. And it is un-necessary that enrollment in courses is an pressure.
I was able to register to BUS 251 with professor Elizabeth, tutorials are too late. I was wondering if I can change to BUS with the other professor available.

When will i know if there are seats available?
many of the health science courses this semester were offered at the same time thus not allowing us to enrol in many classes.
all the 48(x) classes
Being a third year student, it is very frustrating that I am not able to get the core courses I need for my degree.
waitlists are inconvenient!

for CMPT225, I have completed all the pre requisites but it does not let me get in
during my registration time the SFU SIS system went down. Calling the school help line was frustrating with no answers, by the time it came back up (3hours) I was not able to get my first choices and had to scramble to get the classes I do have. Very disappointing experience.
I feel that if a course is required that more sections should be offered so that students can take the course without having to waste time with other courses. I am unable to take the intermediate level research methods now due to this pre-requisite not being available.

<tr>
<td>there are actually more than just one course i wasn't able to get into but this one is the course i've been wanting to take ever since stepping foot in sfu. econ 282 economics of sport, i've been waiting every sem to hope to see this topic come up again since its pretty rare and it has finally came, yet i still can't take it becauase of my late enrolment date. it just disappoints me dealing with this every semester.</td>
</tr>
<tr>
<td>This survey cannot possibly begin to express my utter disappointment with sfu this semester. I had similar issues with the course selection in spring 2010, but this year it was, quite frankly, a joke. I'm a linguistics minor who could not take any necessary upper division courses because every relevant class was already full before my enrolment. WQB's force me to enrol and pay for science courses that I have no desire to take, but then i'm unable to get into these classes because too many of the seats are already reserved. ENGL 210 hasn't been offered for three semesters now, forcing me to take my upper division English courses before I'm finished my second year ones. I have a high GPA and pay a generous amount for tuition every semester and yet still, somehow, I can't seem to take any of the courses I want to. I'm at the end of my rope and, rest assured, this is the last semester I will be given the run around by this University.</td>
</tr>
<tr>
<td>Courses have continually been unavailable to Economic students. Please place a reserve on seats like so many other disciplines at sfu have. Many economic students in third year will have defer their graduation because of course un-availability. It was open at first, i had to ask for permission even though it can be taken co-currently with another course (STAT 302), but now its full! There are never enough sessions open, especially in HSCI courses. I am only taking 2 classes i need at the moment!!</td>
</tr>
<tr>
<td>This has been a very frustrating process. I'm very close to completing my BGS Degree and entering into PDP, but I cant do either because the courses that are required I can't get into. BGS Education students ought to be on the priority list for obtaining required courses so that nothing hinders us from completing our requirements for our degree and receiving our teaching certification. Question: What does &quot;WQB&quot; stand for?</td>
</tr>
<tr>
<td>There should be another section for MACM 101 at burnaby, and 215 requires extra lab sections to accommodate us.</td>
</tr>
<tr>
<td>I am a student that has had in the past a bad academic standing. However, my studying habits have changed and have been scoring a competitive gpa each semester for 3 or 4 semester now. However due to the gpa of my first year of my studies, I seemed to get a later registration date in compared to most of my peers. I believe that many students, if not most, have a tough time adjusting to university lifestyle. Due to this fact, their studies can be affected within the first few semesters. It is unfortunate that a new student in transition from life stages who experiences difficulty is penalized through this delayed registration date when picking classes. I believe our school can be benefit via a more understanding, lenient approach to such matters. When speaking to peers who attend other big university, they comment on how impersonal and 'cold' the operational of their school is. If our university can reexamine the way enrollment priority is determined , it would make the institute a more competitive option in the market of post secondary education.</td>
</tr>
<tr>
<td>This is the second semester I have totally been shafted with a course selection time. I keep having to take electives I don't always need because everything else is full.</td>
</tr>
<tr>
<td>There were 2 classes last spring for japn 101, one in surrey and one at burnaby, but there is only 1 class in the fall for 200? I realize not all the student who took 101 last spring are wanting to continue on with 200 but many of them are and i am sure a large portion of both classes were unable to this fall because of the availability. It was entirely full, including the waiting list, days before my registration time. I was rather disappointed and hope that I will get in during the spring semester. Otherwise, I will have to study Japanese on my own and forget about learning it through the university.</td>
</tr>
<tr>
<td>When someone drops a course, it takes FOREVER for the system to recognize that and place someone from the waitlist into the course, and open up a spot on the waitlist. This makes it impossible to get on the waitlist when I know there is a spot open on the waitlist, but the course still shows as closed. Ridiculous!</td>
</tr>
<tr>
<td>courses need to be offered at more than one campus and at more times so to allow for students to be able to take the courses the need and not opt for irrelevant courses</td>
</tr>
<tr>
<td>The offering for Physics courses during summer terms is very limited and unfortunately, I feel slows down the progress of getting my degree.</td>
</tr>
<tr>
<td>Disappointed that I was not able to register, this is my last year for my BA. Planned on applying for PDP next year. It always seems to be scarce, I like how there are many different courses available but they always seem to be full by the time I register.</td>
</tr>
<tr>
<td>I wish there was a waitlist option in the course</td>
</tr>

<tr>
<td>The course says its open but when i register it says its full. When I browse the catalogue again it says its open still. I do not understand why this is happening, I've been trying to get in for an half an hour now and the same thing is happening.</td>
</tr>
<tr>
<td>please give the course to me. since i am business major, should not i get the reservation of the space? thank you</td>
</tr>
<tr>
<td>Not enough distance education available for criminology this semeseter.</td>
</tr>
<tr>
<td>There should be some way to ensure that upper division business courses do not have the same exam times, considering the high probability of Beedie students attempting to take courses in the same semester. As well, I believe that there needs to be a higher diversity of days of the week these courses are offered on and larger class sizes should be utilized to meet the needs of the vast student population.</td>
</tr>
<tr>
<td>I am still looking to get in. I am not sure why I don't meet the requirements as I have not taken any CMPT higher than 125,126 or 200 and I have Grade 12 Math upto and including Calc 3... I'm assuming that is because I'm not in the Eng Sci Department yet and am not able to find the date that they allow registration for students outside of the department.</td>
</tr>
<tr>
<td>There was no room in psych 210, psych 308, or psych 300. All are required . I couldnt get into HSCI classes either I tried 214 and 216. It looks like I wont be attending school in the fall.</td>
</tr>
<tr>
<td>It is not fair to the students who have late enroll dates since there are no space for them to enroll to the courses they wish to . Students whose major or planning to econ major can not enroll to econ courses because of late enroll dates. Econ course should have waitlist !! I heard some of the students who can enroll early , they enroll into the classes that they dont really have to take and then sell it to others who need the courses. The SIS system has problem , sometimes need more times to process when enroll to courses</td>
</tr>
<tr>
<td>I really want enrolled this course successfully... really need the credits...</td>
</tr>
<tr>
<td>I would like to take english101w, however, there is a conflict with the tutorials with my other courses at burnaby campus OR the surrey campus's english101w course is not open to others.</td>
</tr>
<tr>
<td>I need classes after 5:00 or on the same day.</td>
</tr>
<tr>
<td>Hsci courses are not always offered even many are required and even if it offered, it is always out of spaces. It is very frustrating for me and it delay my graduation</td>
</tr>
<tr>
<td>Some students occupy the space and sell it with high remuneration, especially in some upper division courses. My enrollment date was on July 26. However, there was no space available in any economics courses on that date. Is it possible to open more classes for students in Econ major. Otherwise, it is hard for us to proceed with our degree.</td>
</tr>
<tr>
<td>Almost every course I wanted to take overlapped with another. It really was such a disappointment and has limited me to the number of courses I can take.</td>
</tr>
<tr>
<td>no</td>
</tr>
<tr>
<td>Please do whatever you can to make more room in ECON 2XX courses and more ENGL101 courses. The courses were already full during Summer 2011 and thus, I couldn't take summer school. It would be very upsetting if I had to be behind by another semester.</td>
</tr>
<tr>
<td>I need to get into this course. PLEASE!!!!!!!!!!!!!</td>
</tr>
<tr>
<td>THE WEBSITE DOESN'T ACCEPT W'S. THIS IS ACTUALLY FOR 376W FIX THE WEBSITE SO I CAN ACTUALLY SELECT THE COURSE I AM HAVING DIFFICULTY ACCESSING.</td>
</tr>
<tr>
<td>I really want more seminar open because these courses are not offered every semester. I want them to be offered more in a year and I wish if there were more spaces available.</td>
</tr>
<tr>
<td>As far as I know, some students are holding places and sell them for money, they don't really need them. Is it legal? Whether it is legal or not, I do think SFU should take some actions to stop this kind of behavior, since every student is equal and has the same right to choose what they want.</td>
</tr>
<tr>
<td>Midterms should be scheduled in class. Due to the fact that Math157 now has midterms outside of class, it conflicted with another class and I could not take it at the Burnaby Campus! I have to go to Surrey now.</td>
</tr>
<tr>
<td>I am a communications major and UNABLE to enroll in any UPPER division courses!! this is frustrating as it happens every semester!</td>
</tr>
<tr>
<td>We need more classes.</td>
</tr>
<tr>
<td>This is such an annoying, slow, poorly designed process. Have an idea of what courses I can take and present those first rather than waiting to the last moment and putting a big red x up.</td>
</tr>
</tbody>
</table>
I just don't know how I'm supposed to graduate when there are no classes available to take. I have taken many elective courses to figure out the direction I want to proceed in and now that I have, I haven't been able to take the necessary classes to graduate. I am a student based in the Burnaby campus and I could only get one class in the Burnaby campus. Because the Surrey classes aren't available to Burnaby students until the 30th, by the time I was able to enroll in classes, all of them were closed (especially since at 12am on the 30th, the SIS system was not working!!! And to top it all off, since it was on a Friday, staff couldn't help the students as 1. it was too late, and 2. they weren't available until monday.) I just want to be able to finish school in a timely and less-stressful manner.

The one class that is especially annoying me is CRIM 101. I have been trying to get in since term one of my first year...I'm now going into my third year and I'm wait-list #7 for a distance education class!!!

SFU needs more classes!

I would love more distance course, trying to fit school into my life is a lot easier with these classes.

There are no course availability for distance education, besides 300-400 courses. I am only in my third year and those are the only ones available for electives. All my core required courses are full.

I've been having a hard time enrolling into ANY course for 2 terms now and it's beginning to be extremely frustrating. The fact that I'm not able to get into courses is doing nothing but setting my degree back and affecting my future enrollment dates. At the moment, I am enrolled into ONE COURSE! SFU needs to figure out a different method of deciding who's enrollment appointment is determined first. This is the second time that I have been at the very end of the list and I don't appreciate the fact that this simple little thing is taking a toll on my future career and that it is offsetting my degree.

I had a spot for Bio 101 however i was changing my tutorial schedule through the edit page after i changed the tutorial time the system dropped my lecture and tutorial and lab. So now i am on the wait list for lecture tutorial and lab. please help!! is there any way to undo it?

I think too many courses are offered MWF 11:30 - 2:30, not enough on Tuesday, Thursday. Also, some courses I am now in are Monday & Tuesday, etc. which end up conflicting with many courses.

Hi

I am a student got a C+ with my Math 150. I did not have a grade for my first math course, but i am doing okay with Math 152. And i also heard about that MACM 101 and Math 157 and 154 are much easier than 150 and 151. If students with a B of MACM 101 and MATH 157 and MATH 154 can take this course, I wander if i deserve a change taking this course without to re-take my Math 150 or take MACM 101 just for meeting the prerequisite.

Thank you!

I have the requirements and prerequisite for psych 358 because crim 220 can count as psych 201. I am also planning to declare and major in criminology.

For both of these courses I went to advisors to try and help me get in, this is my last requirement for graduating. And they told me to wait for the holds to lift. Now I'm stuck on a wait list, re-emailing the same advisors to try and get into one of these courses, not too happy.

I have met the requirement for MATH 151 Calculus I by having a 91% in math 12 in school and a 96% from the VLN Online school.

Please offer more courses that meet the breadth science requirement.

As a student who has achieved Dean's Honor Role with a cgpa higher than 3.0 I was very unhappy to have a very late enrollment appointment. Many of the courses I need and want are now waitlisted to which the waitlist is almost halfway full or the course is closed. It is unfair that I was not able to take many courses and have been left to take the leftover courses that I do not fully want to take; rather, I have been forced to take them due to availability issues. If the courses are at full capacity SFU should really consider opening up more seats for students.

More so, I am concerned with the communications courses that have been offered this semester to which they are quite limited in terms of upper level division courses. Because of the limited number of courses, I feel forced to take courses I do not wish to take.

--> COURSES I WISHED TO TAKE, BUT NOT OFFERED THIS SEMESTER: CMNS 200, 220, 321, 310, and 324.

Thank you for your time.

How am I suppose to finish my degree when sfu cannot offer the resources to get me there?

These language classes fill up so fast.):

I would like to complete a communications minor within my final year of school. This class is required

Why can't second year student get into BUS 254. Nothing is available. Please help

not enough lab section for every students in the course
Most of the courses which i need in order to graduate are not available. Out of 4 courses which i was planning to take in fall, i was able to enroll only in 2. Others 2 are not even having an option of wait list. And especially for econ courses, i am not able to register already 2 semesters in a row. They get full even before my enrollment opens.

Dear Mr./Ms.:
I am a student in SFU. I plan to enroll in criminology major so I have to take pol151 this semester. However the tutorial class (4:30- 6:20 pm) conflict with SA275 tutorial. Would you help me to get a spot in other tutorial class of pol151?
Thank you very much!
Your sincerely,
XXXX

The system isn't letting me put IAT 309W Design, Media and Info Writing into this survey, but that class is required as well. Needed as WQB Requirement: Yes. Reason: Course offered - no space left in ANY sections.

Both courses need more tutorial sections at convenient times.

I found it extremely hard to get into any of the courses I wanted/needed. I'm trying to declare my major and I'm having difficulties getting the courses I need to do that. A lot of the courses offered at Burnaby were very difficult to work into my schedule considering many of them have split up a 3 hour lecture or 2 hour lecture and tutorial over 3 separate days, which often conflicts with at least one other class. The restriction on Surrey classes until the 30th for Crim and Psych also made me miss out on a couple classes. Very frustrating experience.

CHANGING ENROLLMENT DATES FOR THOSE THAT WANT TO TRANSFER TO BUSINESS FACULTY

There are not enough space open for the classes. Only 25 spots per class
there are no space for late enrollment dates. It is not possible to release some seats in the begining and some later in enrollment process!

HSCI 100 which is one of the two courses in the HSCI BA program which is required is only offered at one lecture time for all the Fall 2011 semester. This is a problem considering all students in this program need it yet some students like myself probably cannot fit it in their schedule since there are literally zero other options for lecture other than the ONE section offered. I wanted to take STAT 203 in Surrey which offered at the same time and these two lectures conflict.

Hi~My name is XXXXXXX XXXXX and you can call me XXXXXX if you like.I am really sorry for interrupting you but I am very worried about my courses.I wanted to add FREN120 and have waited for a long time,now I am the 1st nevertheless I am still can not add this and tomorrow is the beginning of the fall.I ask you for help:is it because i have a SA conflicting with it?But now i do not have the courage to drop the SA because i am afraid of losing both of them.Can you help me.Deeply grateful!

It is my last semester and I desperately need both of these classes. I need Hum 312W to complete my upper division writing requirement and I need Pol 319 as my final PoliSci course.
I am currently enrolled for 4 classes and would like to add these 2. Please contact me as soon as possible.

Need to at least open the waitlist! I NEED these courses so I can take my other business courses!

It is frustrating when you go to enroll in your classes with a late enrollment date as a first year student to begin with. Every single English class was full by the time I could in enroll. I was trying to keep an open mind, and trying to enroll in classes in other departments. The system would not let me enroll in Communications classes, or any other class I was interested in, due to them being reserved for students in that particular faculty. By the end of my enrollment, I ended up with one class I was semi- interested in, that interferes with a class I am hoping will open up. It is just very discouraging when trying to come back to school after six years, and having no certainty at this point. I can't see myself going to school and paying for classes that I am not really excited for.

This is the second semester in a row where the paces have filled up to quickly to take these courses, i am now going to have to do an additional semester just in order to take them, who knows maybe ill have to do two semesters. I am a mature student and do not have my entire life left to wait for classes to open up. I am pretty disappointed.
