S. 446

MEMORANDUM

To..... SENATE

From..... H. M. EVANS, REGISTRAR AND SECRETARY
EXECUTIVE COMMITTEE OF THE SENATE
..... COMMITTEE ON GRADUATE STUDIES

Subject..... GRADUATE COURSE OFFERINGS IN
KINESIOLOGY

Date..... NOVEMBER 23, 1970

This is to advise that the Executive Committee of the Senate Committee on Graduate Studies approved the Graduate Course offerings in Kinesiology at their meeting on November 23, 1970.

These are now being forwarded to Senate for approval.

cc J. M. Webster
I. B. Kelsey

SIMON FRASER UNIVERSITY

MEMORANDUM

To..... DR. WEBSTER,
..... DEAN OF GRADUATE STUDIES.
Subject..... GRADUATE COURSE OFFERINGS IN
..... KINESIOLOGY

From..... B.L. FUNT,
..... DEAN OF SCIENCE.
Date..... NOVEMBER 23, 1970.

I have noted an important omission in my memorandum of November 20th regarding the Kinesiology courses.

In his letter of October 27th which was circulated to the Kinesiology Committee, Dr. Ross included the following statement:

"We propose that graduates be permitted to count only one 3 hour Research course toward the 18 hour basic requirement."

This restriction is also reflected in the calendar copy which has been submitted pending approval of the changes by Senate.

This restriction, however, was not included in the specifications included on the individual new course proposal forms.

I would appreciate your bringing this additional point to the attention of the Executive Committee of the Senate Committee on Graduate Studies.

SIMON FRASER UNIVERSITY

MEMORANDUM

To Mr. H. Evans

From B.L. Funt

Secretary to Senate

Dean of Science

Subject Kinesiology Changes in Graduate Offerings

Date November 20, 1970

The Interdisciplinary Committee on Kinesiology at its meeting of November 9th approved the following changes in the Kinesiology graduate program. These are now recommended to the Senate Graduate Studies Committee for approval.

- 1) The Committee recommends a reduction of the total course credit hours from 20 to 18 for the M.Sc. (Kinesiology) Program. (The program requires completion of a thesis in addition)

Reason

This brings the course credit requirement into closer position with the requirements in the departments in the Faculty of Science. Furthermore, it eliminates an awkward situation which resulted from the fact that the courses available for credit often added up to 19 instead of 20, because of the unit credit assigned.

- 2) The Committee recommends the reduction of credit hours in Kines. 801 and in Kines. 802 from 5 hours to 3 hours in each of these courses. These courses are renumbered 806-3 and 807-3 respectively.

Reason

This represents a redistribution of the course content.

- 3) The Committee recommends the approval of 8 courses which embody topics previously given under Kinesiology 805, "Special Topics". (New Course Proposal Forms are attached)

Reason

The specification in this manner indicates more clearly the proficiencies and areas of competence in the Department and indicates the range of topics which might have been given under the special topics format. It will also permit 2 special topics to be taken without a repetition of a course number.

LBF/ma

cc: M. McGinn

Note: The above memorandum has been modified to incorporate changes approved by the Executive Committee of the Senate Committee on Graduate Studies, November 23, 1970. Similarly the descriptions have been changed from "Research" to "Special Topics."

SIMON FRASER UNIVERSITY

MEMORANDUM

To.....Dean L. Funt.....
Chairman
.....Senate Interdisciplinary Studies.....

From.....Dr. William D. Ross.....
Chairman, Graduate Studies Committee
.....Kinesiology.....

Subject.....PROJECTED CHANGES M.Sc. GRADUATE.....

Date.....November 5, 1970.....

The projected changes in our M.Sc. Graduate Program:

- 1) reduction of total hours required for M.Sc.(Kinesiology)
from 20 to 18
- 2) reduction of credit in two required seminars from 5 to 3
- 3) identification of individual research areas we feel would
accomplish the following:
 - (a) make program planning easier since graduate courses are
usually ascribed three hours credit
 - (b) Kines. 801 and 802 Seminars which were designed to give
an overview and introduction to graduate study in Kinesiology
could well have the work load reduced and thus encourage
students to focus attention in specific areas rather than
devote time to generic study of the field.
 - (c) the individual research courses we wish to offer in addition to
Kines. 805 Special Topics, represent no additional cost or
deployment of faculty. The change merely helps identify our
areas of interest and permits us to ascribe responsibility
for graduate leadership. "Special Topics" is an innocuous
label, we can continue to use it to give opportunity for
individual research guidance but identification of the area
in the catalogue and on transcripts would be appropriate
since the title would give information.

SIMON FRASER UNIVERSITY

NEW COURSE PROPOSAL

I CALENDAR INFORMATION

Department: Physical Development Studies Course Number: 811-3 Title: Anatomy

Sub-title or Description:

Special Topics

Credit Hours: 3

Vector Description: N/A

Pre-requisite(s):

Consent of instructor.

II ENROLMENT AND SCHEDULING

Estimated Enrolment: One per semester.

Semester Offered (e.g. Yearly, every Spring; twice yearly, Fall and Spring): Every semester.

When course will first be offered: Immediately upon approval.

III JUSTIFICATION

- A. What is the detailed description of the course including differentiation from lower level courses, from similar courses in the same department and from courses in other departments in the University?

This course and the adjoining proposed research courses are meant to identify the areas, within the department, of particular competence and of specific relevance. It is, essentially, a breakdown of Kines. 805-3, Special Topics, into designated subjects already being taught under the special topics heading.

As outlined in the attached calendar copy revisions, Kines. 805 (Seminar) and Kines. 805 (Special Topics) will in the future only be offered occasionally when opportune. Whereas this would normally require a student to take 9 hours of graduate level courses from departments other than Kinesiology, these proposed courses will provide sufficient cognate area enrichment within the Kinesiology program itself.

- B. What is the range of topics that may be dealt with in the course?

Ongoing research in anatomy.

C. How does this course fit the goals of the department?

Identifies an area of interest and competence within the Department and ascribes responsibility for graduate leadership.

D. How does this course affect degree requirements?

May be taken as part of the 18 course hour requirement for the M.Sc. degree.

E. What are the calendar changes necessary to reflect the addition of this course?

Addition (of this course and other research topics courses) in the Calendar -- see attached calendar copy revisions.

F. What course, if any, is being dropped from the calendar if this course is approved?

None.

G. What is the nature of student demand for this course?

Each student in the program elects to take at least one of these courses in his graduate research.

H. Other reasons for introducing the course.

This course provides a more specific identification in the catalogue than furnished by the title "special topics". A specific title on transcripts would be more appropriate since the title would be informative of the course content.

IV

BUDGETARY AND SPACE FACTORS

A. Which faculty will be available to teach this course?

Dr. Allan J. Davison

B. What are the special space and/or equipment requirements for this course?

None.

C. Any other budgetary implications of mounting this course:

This course represents no additional cost or deployment of faculty.
