

SIMON FRASER UNIVERSITY

MEMORANDUM

S.450

To.....	Mr. H. Evans	From.....	B. L. Funt
	Secretary to Senate		Dean of Science
Subject.....	Changes in Degree Requirements, Biological Sciences	Date.....	November 19, 1970

The following recommendation was approved by the Faculty of Science at its meeting on November 19, 1970, and is now forwarded to Senate for approval:

RECOMMENDATION: That the courses Chem.101-3 and 106-2 be deleted from the degree requirements of the Biological Sciences program and that the course Chem.105-3 be added to the degree requirements for students majoring in Biological Sciences.

B. L. Funt
B. L. Funt.

BIOLOGICAL SCIENCES - CHANGES IN DEGREE REQUIREMENTS

From: Chemistry 101-3 (General Chemistry) and Chemistry 106-2 (Introductory Laboratory).

To: Chemistry 105-3 (General Chemistry II).

Reason: The Biology Department requires its students to achieve a standing in Chemistry to the level of Chemistry 251-3 and 256-2. This includes all Chemistry courses prerequisite or leading to these two courses. Although this would imply the inclusion of Chemistry 101-3 and 106-2, the department has found that most of its entering students have had B. C. High School Chemistry 12 or the equivalent and are eligible to begin their Chemistry requirements with Chemistry 104-3 and Chemistry 115-2 (General Chemistry I and General Chemistry Laboratory). Therefore, it is recommended that the listing of the two introductory courses be deleted.

Chemistry 105-3 (General Chemistry II) is a new course which takes the place of former Chemistry 102-3.

B. L. Funt

Passed by the Faculty of Science, November 19, 1970
