

SIMON FRASER UNIVERSITY

MEMORANDUM

S.71-18

To..... Mr. H. Evans,
Secretary of Senate

From..... S. T. Stratton,
Acting Dean of Education

Subject..... Request for Senate Action

Date..... November 27th, 1970

Would you please place before Senate the following motion from the Faculty of Education:

That Senate approve that for those students who fulfilled requirements for Education 403-0, that the requirements for the B.Ed. degree be Education 403-0 and 135 semester hours of appropriate course work. Such work must include Education 401, 402 and 404 and must fulfill all current requirements for the B.Ed. including requirements for a minor.

Justification:

Students previously enrolled at this university who have not completed degree requirements should be given the option of fulfilling degree requirements either under the calendar at their time of entry to the university, or under current regulations. As the structure of the B.Ed. degree was modified to permit students to complete degree requirements in 10 semesters (Senate December 9, 1968, and March 3, 1969) by renaming Education 403-0 to Education 405-15 and by permitting Education 405-15 towards the requirement of 150 semester hours, students who completed Education 403-0 who now wish to complete their B.Ed. degree requirements are placed in an inequitous position with those students completing their degree under the new regulations. By modifying the degree requirements as identified in the motion, these students would be able to complete their degree in the 10 semesters expected under the present degree requirements.

The above motion has been approved by all appropriate Centre and Faculty Committees and by the Faculty at its Meeting of November 23rd, 1970.
