Subject Undergrad. Calendar changes

Date October 3/79

The attached, proposed changes are meant to accomplish two things.

1. Under General Requirements we want to inform students of a list of complementary courses which is being developed within the department. We also want them to be informed of a general meeting to take place at least once a year. This meeting will serve the purpose of orienting students to the offerings and the faculty of the department.

2. As a result of several semesters of experience we want to make some adjustments to our "philosophy of science" requirement. Essentially we want to broaden the requirement plus build in a safeguard for students who, for one reason or another cannot take a background course in the general area of philosophy of science or history of ideas. As well as adding two courses to the choice a student can make from outside the department we are proposing that students may take two courses within the department to fulfill the requirement. This latter, inside alternative will require the permission of the Undergraduate Adviser.

General Requirements

Add - before I

In planning a program in Communication students are advised to visit the department and speak with either the Departmental Assistant or the Undergraduate Advisor. S/he will be able to provide advice on selection of courses. Among other things, a list of courses in other departments which seem complementary to a Major or Honours in Communication will be available. In addition, advice on appropriate methodology courses for students' individual interests may be gained from consulting either of these two persons.

Students are also advised that at least each fall and perhaps each semester, in the first or second week of classes the Undergraduate Advisor will convene a general meeting to orient students to the department. The date and time of this meeting will be announced by professors in the first week of classes.
