MEMORANDUM

To..... SENATE

From..... SENATE COMMITTEE ON UNDERGRADUATE
STUDIES

Subject..... FACULTY OF SCIENCE - CURRICULUM
CHANGES

Date..... DECEMBER 19, 1980

FOR INFORMATION

Acting under its delegated authority, at its meeting of December 9, 1980, SCUS approved a title change for BISC 410-3, and a change in the prerequisite statement for PHYS 150-3 - Elementary Physics of Electronic Devices.

R. A. Webster

SIMON FRASER UNIVERSITY

SCUS 80-100

MEMORANDUM

81-15

H. M. Evans	From B. P. Clayman
Secretary, S.C.U.S.	Acting, Dean of Science
Subject Minor Curriculum Revisions - BISC, PHYS.	Date 1980.11.19

On behalf of the Faculty of Science, I approve the changes in the BISC and PHYS curricula as shown below and request that they be submitted to and approved by SCUS as soon as possible, in order that the changes be effective for the 1981-82 edition of the Undergraduate Calendar.

Title Change BISC 410-3 Comparative Ethology

The regular instructor of this course, Dr. L. Dill, has requested that the title be changed from "Comparative Ethology" to "Ethology". No change in course description is necessary.

Prerequisite statement change,
PHYS 150-3 Elementary Physics of Electronic Devices

The Department of Physics wishes to correct an inaccuracy in the statement restricting the availability of PHYS 150-3 for credit to students who have previously taken other PHYS courses.

The present statement reads,
"Students with credit for PHYS 101-3 or 120-3 normally may not receive credit for PHYS 150-3."

The statement should be amended to read,
"Students with credit for PHYS 102-3 or 121-3 normally may not receive credit for PHYS 150-3."

This is less restrictive than the existing statement. It is necessary because students who have PHYS 102-3 or 121-3 have received instruction in electricity and magnetism which could overlap with the topics taught in PHYS 150-3. There is no such overlap between PHYS 150-3 and the courses PHYS 101-3 and 120-3.

B. P. Clayman
