iv) SENATE COMMITTEE ON ACADEMIC PLANNING

a) Paper S.84-32 - Annual Report

The Annual Report of the Senate Committee on Academic Planning was presented to Senate for information.

In reply to a general inquiry as to the status of annual reports from several committees which have not yet been presented to Senate, the Secretary indicated that requests for submission have been forwarded to most committees.

b) Paper S.84-33 - Visa Student Admission to Limited Enrolment Programs

Moved by T. Calvert, seconded by C. Hoyt,

"That Senate approve and recommend approval to the Board of Governors, as set forth in S.84-33, the proposal to limit visa student admission to limited enrolment programs in Computing Science and Business Administration, including: policy
regulations
implementation plan"

The Chairman wished to report, in the absence of J. Munro, that the Vice-President Academic had reservations about the paper as presented to Senate but would agree that the issue had come to Senate through the proper channels after long and careful debate at the appropriate committee levels.

T. Calvert introduced the paper by providing some background information leading to the proposal and briefly explained how the administration of the regulation would take place. The regulations would be in effect for three years with review during the third year and could be relaxed before that time if it became possible. He felt the proposal was defensible not only within the university and local constituency but also internationally as he believed other countries would recognize that attention had to be paid to local needs and obligations as well as to international obligations.

Speaking in opposition to the motion, J. Tham felt that further enrolment limitations for visa students should not be enforced in light of the differential fees and the general enrolment limitation already in effect on visa students. He believed foreign students should be treated equally and have the opportunity to select programs of their choice provided that they satisfy academic requirements.

R. Bruskiwich pointed out that some countries have scholarships available to encourage foreign students to come and study and wondered if development in this area had been considered as it would cultivate the international spirit yet be financially accountable to the local community. D. McDonald advised that the Senate Committee on Scholarships, Awards and Bursaries was in the process of developing a program for the administration of funds to foreign students which would come from part of the differential fee levied on visa students.

Further concerns were expressed that the proposal was discriminatory on grounds of nationality and some opposed the regulation in principle. Brief discussion followed.

Question was called, and a vote taken.

MOTION CARRIED
21 in favour
10 opposed

v) SENATE COMMITTEE ON ACADEMIC PLANNING/SENATE GRADUATE STUDIES COMMITTEE

a) Paper S.84-34 - M.Sc. Program in Statistics

Moved by J. Webster, seconded by N. Grant,

"That Senate approve and recommend approval to the Board of Governors, as set forth in S.84-34, the proposed M.Sc. Program in Statistics"

C. Graham was in attendance in support of the proposal but was not called upon to provide additional information.

J. Webster introduced the paper by explaining that the Department already offers a substantial number of statistics courses at the graduate level and the development of this program has been a natural evolution servicing a need and demand in this area.

Speaking in opposition to the motion, R. Stewart felt consideration of new programs should be postponed until the statement on academic planning priorities and goals has been developed for the University so that Senate could better evaluate whether or not these proposed programs are in the best interest of the university.

Question was called, and a vote taken.

MOTION CARRIED.

vi) SENATE GRADUATE STUDIES COMMITTEE

a) Paper S.84-35 - Annual Report 1983

The Annual Report of the Senate Graduate Studies Committee was presented to Senate for information.
