SIMON FRASER UNIVERSITY

Senate Graduate Studies Committee

1992 REPORT TO SENATE

The Dean of Graduate Studies is responsible for the general supervision of graduate work at the University and chairs the Senate Graduate Studies Committee. This report outlines the position of graduate studies at Simon Fraser University, describes some changes made in 1992 and makes recommendations for future directions.

The enclosed copy of the 1993 S.F.U. Graduate Studies Fact Book describes, in quantitative terms, the graduate student body in Fall 1992 and provides some retrospective data on completion rates. It is the third edition. It is designed to complement information in the Simon Fraser University Fact Book, produced by the Office of Analytical Studies.

I. Enrolments and Degrees

Table I shows the recent history of graduate enrolments and degrees granted. The FTE enrolment figures should be treated with caution on two grounds. Prior to the Fall 1989, they were determined through a reporting process which was subject to considerable variation between departments. Starting in the Fall 1989, a new, rigorous definition of Part-time status was adopted; this was primarily responsible for the large change in the (Head Count)/FTE ratio between 1988/89 and 1989/90. The official recognition of Part-time status and the introduction of a reduced semester tuition fee for Part-time students were major advances in improving the accessibility of our graduate programs. Programs approved for part-time study are listed in Appendix A.

As requested by Senate in January, 1989, I can report that the introduction of a formal requirement of competence in the English language has proceeded very smoothly. A very small fraction of applicants recommended for admission whose first language is not English did not produce TOEFL scores of at least 570. Of these, a large majority submitted satisfactory other evidence of their English language competence. Most TOEFL scores are over 600.

II. Degree Completion/Withdrawal

Degree completion times are presented, starting on page 26, in the Graduate Studies Fact Book. It should be noted that these data do not take into account the possibility that a student may have been enrolled part-time for all or part of the program and thus overstate completion times, especially for programs with large numbers of part-time students.

I remain concerned by what appear in many cases to be excessive times for degree completion. When resources are limited, it is especially important that they be used effectively and

efficiently. The Ministry of Postsecondary Education has recently become interested in degree completion time and may be considering measures that would effectively penalize universities with lengthy completion times.

I am actively encouraging departments to ensure both that their degree requirements are realistic and that their students make satisfactory progress, as required by Senate regulations, toward meeting those requirements. The Graduate Studies Handbook, first published in 1991, contains guidelines for supervisors and students that (if followed) should improve prospects for expeditious degree completion. I am also considering more rigorous enforcement of the regulations requiring annual progress reports.

I am also pressing for timely appointment of supervisory committees. In establishing the Graduate Studies Database, I encountered many students who had been here for several years, yet apparently had no supervisory committees. This situation has largely been remedied; each semester, reminders about 'delinquent' students are sent to departments by my office; a minor flood of committee recommendations follows.

Withdrawal rates are presented, starting on page 39, in the Graduate Studies Fact Book. There are tremendous variations in rates between programs. The overall rates for the University as a whole are in line with the results of similar studies performed in the U.S. I know of no directly comparable studies yet completed in Canada, although both the Canadian Association for Graduate Studies (of which I am President) and the Western Canadian Deans of Graduate Studies are proceeding with projects to compile these data, as well as degree completion time data.

I am very concerned about the low completion rates in some of our graduate programs. Withdrawal may be due to any one of or a combination of factors including: lack of ability, lack of motivation, lack of financial resources, health problems, and deficiencies in the graduate programs and/or their implementation. For the last several years, I assisted a Master's student in Education, Ms. Marianne Yeatman, who, as her thesis research, performed a study of students who withdrew from their graduate programs. The study had both statistical and anecdotal components and made some interesting generalizations about the importance of the factors outlined above. The thesis was successfully defended early last year and is available in the S.F.U. Library. As of January 1, 1993, I have instituted an exit questionnaire to gather information about many aspects of our graduate programs from students who successfully complete their degrees and from those who withdraw. Because of the need for confidentiality, the results will be analyzed only statistically, once enough students respond; it will thus be at least a year until results will be available for most programs.

Meanwhile, I am continuing to press for improved funding for graduate financial aid. There had been very substantial increases to the graduate scholarships budget in the previous two years. Unfortunately, this year there was a significant reduction. I have argued strenuously to reverse this action and provide increased support for graduate students. I am very pleased that the current agreement with Teaching Support Staff Union increases the Teaching Assistant stipend and reduces the workload. The latter factor will both allow students more time for their studies and

will create additional teaching assistant positions, allowing more graduate students to receive appointments.

III. Grades

Page 9 of the Graduate Studies Fact Book gives information on the S.F.U. graduate grades of the end of the Summer 1992 semester; it excludes students who had not yet taken an S.F.U. graduate course. Data were taken from the Registrar's data files and incorporated into and processed within the Graduate Studies Database system.

The tremendous range in the grade distributions among departments may stem from two causes: (1) differences in grading practices and (2) differences in the abilities of students. I believe that, most likely, it is a mixture of these with the former a larger contributor than the latter. This range is one of the reasons that I have moved away from interdepartmental comparisons of CGPA in the ranking of applicants for S.F.U. graduate scholarships.

IV. Special Arrangements

The Senate Graduate Studies Committee serves as the Graduate Program Committee of students enrolled under Special Arrangements. I have given special attention to these students. With the goal of ensuring their satisfactory progress, I have brought all their supervisory committees into compliance with Senate's regulations and require up-to-date progress reports as a condition of registration. The response of students and supervisors has been excellent.

I am pleased to report that the defences of theses completed under Special Arrangements, which I chair, have all been quite successful. Table II provides data on degree completion.

Historically, Special Arrangements have been a high risk area; students either succeed or fail spectacularly. The number of students enrolled have remained roughly constant around 25. Degree completion has been highly variable: 4 in 1992, 6 in 1991, 2 in 1990, 3 in 1989, 4 in 1988, 7 in 1987, 6 in 1986, 2 in 1985, 6 in 1984, 1 in 1983, 2 in 1982, and 4 in 1981. Some other students have dropped out and others encountered health problems. By the steps outlined above and by continued rigorous adherence to the criteria for entrance into Special Arrangements, I hope to improve the success rate.

V. S.G.S.C. Motions

A summary, prepared by the Office of the Registrar, of the motions passed by the S.G.S.C. is presented in Appendix B.

VI. The Future

I remain optimistic about the future of graduate studies at SFU. We have introduced a number of new programs which are in the process of implementation. Several other exciting new

program initiatives are presently in the planning process; some of these have received approval from the Senate Committee on Academic Planning approval to proceed with detailed planning. Substantial growth in graduate programs is a component of the University's strategic plan. It will be essential to ensure that sufficient resources are allocated to support this growth while maintaining high quality.

The quality of our existing programs remains high and the quality of most of the thesis defences which I have attended has been high. With rare exception, applicants recommended by departments for entry into Ph.D. programs have been very strong. Through aggressive recruiting of excellent applicants with the aid of entrance scholarships, rigorous enforcement of the present requirements for satisfactory progress, improved financial aid and careful monitoring of student supervision, it should be possible to improve further the quality of our graduate programs, and to decrease degree completion times and withdrawal rates, thus making more effective use of our resources.

A handwritten signature in black ink, appearing to read 'B.P. Clayman', with a long horizontal flourish extending to the right.

B.P. Clayman
Dean of Graduate Studies

SIMON FRASER UNIVERSITY

MEMORANDUM

Report to Senate of the Activities of the Senate Graduate Studies Committee from January 1992 to December 1992.

Number of Meetings - 3

1. A sub-committee of the Senate Graduate Studies Committee was established to consider a graduate student appeal. The appeal was denied.
2. A proposed Master of Arts Program in Latin American Studies was approved.
3. A Task Force on Guidelines for the Supervision of Graduate Students was established. The membership was made up of faculty and two graduate students; one graduate student from the TSSU. The Task Force will also look at the faculty/graduate student relations more generally.
4. Graduate Curriculum Changes in the Departments of Psychology, Contemporary Arts, English, Linguistics, Economics, History, Political Science, Business, Education, Aquaculture, Chemistry, Mathematics and Statistics and the School of Resource and Environmental Management.
5. New Graduate Courses in Education, Kinesiology and Business.
6. A Co-op Education Program in Mathematics and Statistics was approved.

Simon Fraser University

Graduate Studies Fact Book

The Graduate Studies Fact Book provides a snap-shot of the Fall Semester student population, as well as retrospective data on program completion. The information is derived from enrolment data provided by the Office of the Registrar, supplemented by information gathered and processed in this office. It is largely complementary to the S.F.U. Fact Book prepared by the Office of Analytical Studies. Minor differences in enrolment figures exist between the two publications due to differences in the data collection interval.

Each section is headed by a graphical summary. In some cases, the summaries omit programs where the numbers reported are too small to be significant; the tabular data are complete.

It is hoped that this Fact Book will be a useful source of information for the campus community. This office can provide additional more specialized reports, if these are required.

Active Now = headcount enrolment in the most recent semester.

Degree = number of degrees completed.

Trf = number of students who transferred to a different degree program without completing the first.

W/D = number of students who withdrew without completing a degree

W/D Rate = ratio of W/D to Total Completed.
