

**SIMON FRASER UNIVERSITY
OFFICE OF THE VICE-PRESIDENT, ACADEMIC
MEMORANDUM**

To: Senate

From: J. M. Munro, Chair, Senate Committee on Academic Planning

Subject: International Student Intake Target for 1994/95

Date: February 17, 1994

Senate considered the report of the Senate Committee on International Students in November 1993 and adopted principles relating to international student enrollment at SFU. The principles considered by Senate included one to reduce the maximum percentage of new international students admitted to the University from the present 7%. Senate approved a motion to remove this section from the principles and it was therefore not supported.

At its meeting on November 10, 1993, SCAP requested the Senate Committee on Enrollment Management and Planning to make a recommendation each year on the percentage of international undergraduate students to be admitted as part of the following year's undergraduate admissions target.

As indicated in the attached report, the intake of new international students at present is approximately 5% of total new undergraduate admissions. In order to provide more spaces for domestic students, the limit on international students would have to be reduced below the current level of admissions, but the number of domestic applicants who would become admissible by a reduction in the size of the international student population is a very small proportion of the number of applicants who are presently admissible but not admitted. Any adjustment therefore would not have a major impact on the accessibility problem faced by many domestic applicants.

In light of these considerations and consistent with the principles adopted by Senate supporting the value of international students to the University, the Senate Committee on Enrollment Management Planning and the Senate Committee on Academic Planning have recommended the following action for consideration by Senate:

"That Senate approve and recommend approval to the Board of Governors that the maximum percentage of international students to be admitted into undergraduate programs at SFU in 1994/95 be set at 7%."

This is the same limit which was set by Senate and the Board of Governors in 1982.

J. M. Munro

MEMORANDUM

TO: Senate Committee on
Enrollment Management
and Planning

FROM: W. Wattamaniuk, Director
Analytical Studies

RE: Enrollment Targets and
International Students, 1994/95

DATE: January 11, 1994

At its meeting on November 10, SCAP indicated that it would like SCEMP to make a recommendation each year on the percentage of international students to be admitted into undergraduate programs as part of the following year's admissions target.

The maximum percentage of new international students that may be admitted into undergraduate programs at SFU is 7% at present. The current level of admissions (FY1993/94) is about 4.8 % and the total number of international students is about 5.1%. The ten year average (1984/85 to 1993/94) for new admissions is 5.8%

I am attaching as background a copy of S.93-53, which includes the report of the Senate Committee on International Students (SCIS) as well as the principles recommended by SCAP that were approved/amended by Senate.

I am also attaching three very short tables that contain the latest information on the number and % of international students at SFU, their basis of admission, and country of origin. These are meant to supplement the data contained in the SCIS report.
