MEMORANDUM

ATTENTION Senate
FROM Wade Parkhouse, Chair of Senate
Graduate Studies Committee (SGSC)
RE: Faculty of Science

DATE July 11, 2016
No. GS2016.20

For information:

Acting under delegated authority at its meeting of July 4, 2016, SGSC approved the following new courses **effective Spring 2017**:

Department of Physics

- a) New course: PHYS 890 General Relativity and Gravitation *(effective Fall 2017) sn*
- b) New course: PHYS 891: Cosmology

Department of Statistics and Actuarial Science

- a) New course: STAT 641 Introduction to Statistical Computing and Exploratory Data Analysis – R
- b) New course: STAT 642 Introduction to Statistical Computing and Exploratory Data Analysis - SAS

MEMO

Faculty of Science

ATTENTION Wade Parkhouse, Dean, Graduate Studies

FROM Peter Ruben, Associate Dean, Research and Graduate
Studies, Faculty of Science

RE Faculty of Science, New Courses and Major Program Changes

DATE May 12, 2016

TIME 2:07 PM

The following curriculum changes have been approved by the Faculty of Science and are forwarded to the Senate Graduate Studies Committee for approval. These curriculum items should be effective for Spring 2017. Please include them on the next SGSC agenda.

Department of Biological Sciences

Course change (title, description, prerequisite): BISC 827

Department of Earth Science

New course: EASC 628 Advanced mineral deposits

Department of Statistics and Actuarial ScienceNew course: STAT 641 Introduction to Statistical Computing and Exploratory
Data Analysis – RNew course: STAT 642 Introduction to Statistical Computing and Exploratory
Data Analysis – SAS**Department of Physics**

New course: PHYS 890: General Relativity and Gravitation

New course: PHYS 891: Cosmology

Department of Mathematics

Program change: MSc Mathematics, PhD in Mathematics

New course: MATH 801 Computer Algebra

New course: MATH 846 Cryptography

New course: MATH 875 PhD Preliminary Examination

New course: MATH 876 PhD Comprehensive Examination

~~COURSE CHANGE, MATH 701 Computer Algebra~~

New Graduate Course Proposal

Attach a separate document if more space is required.

Course Subject (eg. PSYC) PHYS	Number (eg. 810) 890	Units (eg. 4) 3
Course title (max 100 characters including spaces and punctuation) General Relativity and Gravitation		
Short title (for enrollment/transcript - max 30 characters) Relativity and Gravitation		
Course description for SFU Calendar * Gravity and space-time, Einstein's equations and their solution, tests of relativity, black holes, stellar equilibrium and collapse, and cosmological models.		
Rationale for introduction of this course This course is the graduate level offering of undergraduate course PHYS 490.		
Term of initial offering Fall 2017 (1177)	Course delivery (eg 3 hrs/week for 13 weeks) 3 hrs/week	
Frequency of offerings/year 1x per 2 years	Estimated enrollment/offering 5	
Equivalent courses (These are previously approved courses that replicate the content of this course to such an extent that students should not receive credit for both courses.) PHYS 490		
Prerequisite and/or Corequisite ** N/A		
Educational Goals (optional)		
Criminal record check required? ☐ Yes ☒ No If yes, then add this requirement as a prerequisite.		
Campus where course will be taught ☒ Burnaby ☐ Surrey ☐ Vancouver ☐ Great Northern Way ☐ Off campus		
Course Components ☒ Lecture ☐ Seminar ☐ Lab ☐ Research ☐ Practicum ☐ Online ☐		
Grading Basis ☒ Letter grades ☐ Satisfactory/Unsatisfactory ☐ In Progress/Complete	Capstone course? ☐ Yes ☒ No	
Repeat for credit? *** ☐ Yes ☒ No	Total repeats allowed? <u>0</u>	Repeat within a term? ☐ Yes ☒ No
Required course? ☐ Yes ☒ No	Final exam required? ☒ Yes ☐ No	Additional course fees? ☐ Yes ☒ No
Combined with an undergrad course? ☒ Yes ☐ No If yes, identify which undergraduate course and what the additional course requirements are for graduate students: PHYS 490; graduate students will be required to complete additional problem sets.		

* Course descriptions should be brief and should never begin with phrases such as "This course will..." or "The purpose of this course is..." If the grading basis is satisfactory/unsatisfactory include this in the description.

** If a course is only available to students in a particular program, that should be stated in the prerequisite.

*** This applies to a Special Topics or Directed Readings course.

RESOURCES

If additional resources are required to offer this course, the department proposing the course should be prepared to provide information on the source(s) of those additional resources.

Faculty member(s) who will normally teach this course Andrei Frolov, Levon Pogosian, Andrew Debenedictis
Additional faculty members, space, and/or specialized equipment required in order to offer this course N/A

Academic Progress Units: _____
Financial Aid Progress Units: _____

PHYS 890: Relativity and Gravitation

Professor Andrei Frolov

frolov@sfu.ca

P8456 / 778-782-3787

Course Description:

Gravity and space-time, Einstein's equations and their solution, tests of relativity, black holes, stellar equilibrium and collapse, and cosmological models.

Recommended Textbooks:

Spacetime and Geometry: An Introduction to General Relativity, S. Carroll

Gravity: An Introduction to Einstein's General Relativity, J. B. Hartle

Topics:

Review of special relativity and flat spacetime

Manifolds, tensors, covariant derivatives, and curvature

Gravity as geometry, geodesic motion

Einstein's equations, Newtonian limit, gravitational waves

Black holes: Schwarzschild solution, horizons, gravitational collapse

Cosmology: Homogeneous expanding Universe model, large scale structure

Early Universe: inflation, reheating, nucleosynthesis, microwave background

Quantum effects: evaporation of black holes, primordial fluctuations

Cool but esoteric stuff: Extra dimensions, wormholes, warp drives, time machines

Grading:

Your progress will be marked on absolute scale. At the end of the course, assignment and exam marks will be combined in a weighted average, from which the final grade will be derived (with thresholds to be determined by me). The relative weights are:

Assignments 45%

Mid-term(take-home) 15%

Final exam (open-book) 40%

Assignments are to be handed in on a due day by beginning of the class. Late assignments are accepted, but will be penalized at 5% of the mark per day late. *Late exams will not be accepted.* Failure to submit an assignment or attend an exam will result in zero marks. Attendance of lectures is at your discretion, but no notes will be provided.

New Graduate Course Proposal

Attach a separate document if more space is required.

Course Subject (eg. PSYC) PHYS	Number (eg. 810) 891	Units (eg. 4) 3
Course title (max 100 characters including spaces and punctuation) Cosmology		
Short title (for enrollment/transcript - max 30 characters) Cosmology		
Course description for SFU Calendar * Topics in Cosmology actively investigated today. The course includes a review of the current cosmological model and observations that support it. Theoretical issues associated with the remaining unsolved problems in Cosmology are discussed, as well as the type of observations that can test the existing ideas. The course assumes a basic knowledge of General Relativity.		
Rationale for introduction of this course Course fills a gap in Physics graduate course curriculum.		
Term of initial offering Spring 2017 (1171)	Course delivery (eg 3 hrs/week for 13 weeks) 3 hrs/week	
Frequency of offerings/year 1x per 2 years	Estimated enrollment/offering 5

PHYS 891: Cosmology

Professor Levon Pogosian

levon@sfu.ca

Course Description:

Topics in Cosmology actively investigated today. The course includes a review of the current cosmological model and observations that support it. Theoretical issues associated with the remaining unsolved problems in Cosmology are discussed, as well as the type of observations that can test the existing ideas. The course assumes a basic knowledge of General Relativity.

Recommended Textbook:

Modern Cosmology, S. Dodelson

Course Details:

The aim of the course is to cover topics in cosmology that are actively investigated today, both from the theoretical and observational perspectives. The course will be largely self-contained, however, basic knowledge of General Relativity will be assumed.

The plan is to start with a brief review of the basic building blocks of the current cosmological model and various types of observations that support it. Then the focus will be on the unsolved problems in cosmology, such as dark matter and dark energy, the cosmological constant problem, inflationary model building, search for gravity waves, cosmic magnetic fields and others. In each case, we will examine the current state of the theoretical understanding of the problem as well as the kind of observations that are, or will be, available to test the theory.

Re: Course Proposals - STAT 641-2: Introduction to Statistical Computing and Exploratory Data Analysis - R and STAT 642-2: Introduction to Statistical Computing and Exploratory Data Analysis - SAS

We propose the introduction of two courses, STAT 641-2 and STAT 642-2 which are statistical programming courses in R and SAS, respectively. The courses are intended for graduate students outside of the Department of Statistics and Actuarial Science and will be cross listed with STAT 341-2 and STAT 342-2, respectively. STAT 341-2 and STAT 342-2 are courses intended for Statistics undergraduate majors.

This proposal is to be presented to the Faculty of Science Graduate Curriculum Committee for consideration of having the course added to the Calendar.

The courses were approved by the Department of Statistics and Actuarial Science at the January 15/16 Departmental meeting.

A handwritten signature in black ink, appearing to read "Tim Swartz", is written over a light blue horizontal line.

Tim Swartz
Graduate Chair, Stats/ActSci

New Graduate Course Proposal

Please save the form before filling it out to ensure that the information will be saved properly.

Course Subject (eg. PSYC)	STAT	Number (eg. 810)	641	Units (eg. 4)	2
Course title (max 100 characters including spaces and punctuation) Introduction to Statistical Computing and Exploratory Data Analysis - R					
Short title (for enrollment/transcript - max 30 characters) Intro to Stat Comp. Data An.-R					
Course description for SFU Calendar * Introduces the R statistical package in the context of statistical problems. Data management; reading, editing and storing statistical data; data exploration and representation; summarizing data with tables, graphs and other statistical tools; and data simulation. Students with credit for STAT 340 or STAT 341 may not take STAT 641 for further credit.					
Rationale for introduction of this course Graduate students across the university are becoming more involved with the analysis of data. This course provides them with an introduction to the statistical programming language R to assist in their research endeavours.					
Effective term and year Spring 2017		Course delivery (eg 3 hrs/week for 13 weeks) 2hrs/week for 13 weeks			
Frequency of offerings/year once per year		Estimated enrollment/offering 10			
Equivalent courses (These are previously approved courses that replicate the content of this course to such an extent that students should not receive credit for both courses.) STAT 341					
Prerequisite and/or Corequisite ** STAT 285 or STAT 302 or STAT 305 or equivalent. Open only to students in departments other than Statistics and Actuarial Science.					
Criminal record check required? ☐ Yes ☒ No If yes, then add this requirement as a prerequisite.					
Campus where course will be taught ☒ Burnaby ☐ Surrey ☐ Vancouver ☐ Great Northern Way ☐ Off campus

STAT 641-2

Introduction to Statistical Computing and Exploratory Data Analysis - R

Day Course

Instructor: Dr. Carl Schwarz

Prerequisite:

STAT 285 or STAT 302 or STAT 305 or equivalent.

Textbook Recommended:

SAS and R, Data Management, Statistical Analysis, and Graphics, 2nd ed, by Ken Kleinman and Nicholas J. Horton, Publisher: CRC Press

Calendar Description:

Introduces the R statistical package. Data management; reading, editing and storing statistical data; data exploration and representation; summarizing data with tables, graphs and other statistical tools; and data simulation. Students with credit for STAT 340 or STAT 341 may not take STAT 641 for further credit.

Outline:

R component

1. What is the R programming environment
 - Downloading and installing
 - Basics of writing R functions
 - Basics of loops/if/while and other control-flow constructs
2. Data management in R
 - Reading and writing data: plain text files and spreadsheets, other file formats
 - Using R to query databases with SQL
 - Merging and re-shaping data
3. Data exploration and representation in R
 - Graphical displays. Customizing and extending these displays for your own research purposes.
 - Cross-tabulations and tests of association.
4. Data simulation and resampling in R
 - a. Generating data from parametric distributions: uses in evaluating statistical procedures and in understanding classical large-sample results.
 - b. Generating data by resampling: introduction to permutation, bootstrapping, cross-validation and their uses.

Grading Scheme:

Term Test – 50%
Final Exam – 50%

SPRING 2016 - STAT 341 D100

DEPARTMENT UNDERGRADUATE NOTES:**Students with Disabilities:**

Students requiring accommodations as a result of disability must contact the Centre for Students with Disabilities 778-782-3112 or csdo@sfu.ca

Tutor Requests:

Students looking for a Tutor should visit <http://www.stat.sfu.ca/teaching/need-a-tutor-.html>. We accept no responsibility for the consequences of any actions taken related to tutors.

REGISTRAR NOTES:

SFU's Academic Integrity web site <http://students.sfu.ca/academicintegrity.html> is filled with information on what is meant by academic dishonesty, where you can find resources to help with your studies and the consequences of cheating. Check out the site for more information and videos that help explain the issues in plain English.

Each student is responsible for his or her conduct as it affects the University community. Academic dishonesty, in whatever form, is ultimately destructive of the values of the University. Furthermore, it is unfair and discouraging to the majority of students who pursue their studies honestly. Scholarly integrity is required of all members of the University. <http://www.sfu.ca/policies/gazette/student/s10-01.html>

ACADEMIC INTEGRITY: YOUR WORK, YOUR SUCCESS

- Downloading and installing
- Overview of the system

2. Data management in SAS

a. Data input and structures

- DATA step
- Reading specially formatted files
- Date/time/character formats and manipulations
- Derived variables
- Exporting

b. Data access: from database systems using query languages

c. Merging and reshaping data

- sorting/subsetting (set/if/where statements)/ merging/transposing
- processing using DO LOOPS and SAS arrays
- modify variable attributes

3. Data exploration and representation in SAS

- basic procs (print, plot, tabulate, means, univariate, freq)
- by statement and uses in analysis and simulation
- output delivery system to extract information from analyses

4. Data simulation in SAS

Grading

Term Test	50%
Final Exam	50%

NOTES:

All grading is subject to change.

Materials

RECOMMENDED READING:

Recommended Text:

***SAS and R, Data Management, Statistical Analysis, and Graphics, 2nd ed*, by Ken Kleinman and Nicholas J. Horton,
Publisher: CRC Press**

DEPARTMENT UNDERGRADUATE NOTES:

Students with Disabilities:

Students requiring accommodations as a result of disability must contact the Centre for Students with Disabilities 778-782-3112 or csdo@sfu.ca

Tutor Requests:

Students looking for a Tutor should visit <http://www.stat.sfu.ca/teaching/need-a-tutor-.html>. We accept no responsibility for the consequences of any actions taken related to tutors.

REGISTRAR NOTES:

SFU's Academic Integrity web site <http://students.sfu.ca/academicintegrity.html> is filled with information on what is meant by academic dishonesty, where you can find resources to help with your studies and the consequences of cheating. Check out the site for more information and videos that help explain the issues in plain English.

Each student is responsible for his or her conduct as it affects the University community. Academic dishonesty, in whatever form, is ultimately destructive of the values of the University. Furthermore, it is unfair and discouraging to the majority of students who pursue their studies honestly. Scholarly integrity is required of all members of the University. <http://www.sfu.ca/policies/gazette/student/s10-01.html>

ACADEMIC INTEGRITY: YOUR WORK, YOUR SUCCESS
