RE Change to ECON MA calendar language

DATE 8/31/2022

The following change is proposed to clarify calendar language and allow students to take coursework outside ECON towards their program requirements. Thank you for your attention to this matter.

Signed,

Simon D. Woodcock
Graduate Program Chair

Calendar Entry Change for MA in Economics

Summary of change: Clarifying unit totals and calendar language.
Rationale for change: GPS changed the minimum number of credits for the MA from 30 to 40, effective in the Fall 2022 calendar. The 40 unit minimum prevents our students from taking courses outside ECON, which are sometimes less than 4 units. The proposed change reverts the minimum number of credits to 30.
Effective term and year: Summer 2023
Will this change impact current students? If yes, what is the plan for current students? Yes. It will allow current students to take elective courses outside ECON without increasing completion time.

Attention: Sean Zwagerman, Chair, FASSGSC

May 20, 2022

Dear Sean,

At its meeting of December 9, 2021, the Department of Psychology approved a calendar entry change to move the Clinical Psychology Program's PSYC 819 Ethics and Professional Issues course requirement from the PhD to the MA level, with an area-course requirement from the Clinical MA program to be moved in compensation to the PhD level. The proposed change was tabled by SGSC at its March meeting due to concerns about reducing the integrity of the clinical area streams. After further discussion and approval by our Clinical Committee on May 6, 2022, we have amended the calendar entry change such that PSYC 790 Proseminar in Personality would be the course moved from the MA to PhD level in compensation.

Department of Psychology

- The Clinical Psychology Program's PSYC 819 Ethics and Professional Issues course requirement was moved from the PhD to the MA level.
- To compensate for this, PSYC 770 Proseminar in Psychology from the Clinical MA program was moved to the PhD level.

Please include these curriculum items on the next FASS GSC agenda.

If you require additional information, I can be contacted by email (tracine@sfu.ca) or mobile (778-997-3942).

With sincere thanks,

A handwritten signature in black ink, appearing to read "Tim Racine", written over a horizontal line.

Tim Racine

Calendar Entry Change for Psychology MA

Summary of change: Move PSYC 819: Ethics and Professional Issues from the Clinical Psychology PhD program to Clinical Psychology MA program. In compensation, move PSYC 770: Proseminar in Personality from the Clinical Psychology MA program to the Clinical Psychology PhD.
Rationale for change: Clinical psychology students are seeing clients during their MA program. In preparation, they should complete PSYC 819 at the MA level rather than at the PhD level. This was a recommendation from the Canadian Psychological Association accreditation office.
Effective term and year: Summer 2023
Will this change impact current students? If yes, what is the plan for current students? No.

FROM	TO
Clinical Psychology Program Requirements Students in the clinical program are all members of the clinical research area. The PhD program, accredited by the Canadian Psychological Association (CPA), is based on the scientist-practitioner training model. The program provides generalist training and optional tracks in clinical child psychology, clinical forensic psychology, and clinical neuropsychology. Standing in the program is contingent upon maintenance of satisfactory performance in course work, thesis work, practicum skills development, comprehensive exams and adherence to professional ethical standards (CPA Code of Ethics, and CPBC Code of Conduct). Unsatisfactory academic progress and/or CPA ethical code of conduct violations (e.g. dishonesty, boundary violations, etc.) may lead to withdrawal from the clinical program.
