

SIMON FRASER UNIVERSITY  
ENGAGING THE WORLD

## SENATE SUMMARY MEETING OF JUNE 10, 2024

### 1. **Report of the Chair**

The Chair reported that during the Open session of the May 23rd Board of Governors meeting, the Board unanimously approved the establishment of the School of Medicine as a faculty at SFU and the full program proposal for the Medical Doctor program. Thanks was extended to the School of Medicine team, to Senators who participated in the joint Board-Senate committee and to all Senators for their engagement on this topic. Now that internal approvals have been concluded, the school is shifting its focus towards the accreditation process, concluding the hiring of the founding dean and preparing to welcome medical students in 2026.

The Chair reported that on May 31st, the Honourable Terry Beech, the Honourable Josie Osborne, and partners visited the Burnaby campus to launch the SFU Clean Hydrogen Hub. The Clean Hydrogen Hub will provide on-site hydrogen production and serve as a testbed for emerging hydrogen-energy technologies. SFU received funding support for the hub from the federal government, provincial government, industry, the City of Burnaby and more. It will be led by SFU chemistry professor Steven Holdcroft.

The Chair reported that last week, it was announced that SFU received \$80 million in funding from the Province of B.C., the Digital Research Alliance of Canada and additional partners to upgrade Supercomputer Cedar, SFU's supercomputing facility. This investment will enable SFU to create a new system that replaces and upgrades the existing Cedar supercomputer, which is nearing the end of its life.

The Chair reported that a new research group based at SFU has received \$14.6M in federal funding to help support public confidence in and access to vaccines, in preparation for future pandemics. The Social Sciences and Humanities (SSH) Consortium is co-led by Kelley Lee, professor in SFU's Faculty of Health Sciences. The Consortium will bring together expertise in epidemiology, anthropology, communications, political science, history, law, philosophy, sociology and other fields. The team will work together to understand perspectives, attitudes and needs towards immune-based innovations.

Noting the approval of the establishment of the School of Medicine as a faculty by the Board of Governors, a question was asked regarding if there is an effective date attached to the establishment. Senate was informed that the establishment is effective immediately.
